#90129p2484 05/09/1990 ~PR Newswire

SCOTTSDALE, AZ (MAY 9) PR NEWSWIRE - It was announced today by James E. Acridge, chairman and CEO of Giant Industries Inc. (NYSE: GI) that effective April 30, 1990, the company finalized an agreement with the Navajo Nation for renewal of Giant's rights-of- way for that portion of its crude oil gathering pipeline system that crosses Navajo land. The agreement brings all of the rights- of-way current and extends the rights-of-way for an additional 20- year period.

Giant will pay the Navajo Nation more than $1.5 million for the rights-of-way. Giant paid more than $1.2 million of this sum on May 1, 1990, with the remainder to be paid by April 1, 2000.

The rights-of-way covered by the agreement are in northwest New Mexico. The agreement will ensure that Giant can continue to utilize low-cost pipeline transportation to deliver crude oil to its Ciniza Refinery across Navajo lands. The Ciniza Refinery is located near Gallup, N.M.

Acridge also announced at the company's annual meeting that a major maintenance turnaround was recently completed at its Ciniza Refinery.

The turnaround was utilized to incorporate certain refinery throughput improvements in accordance with Giant's phased debottlenecking program. These improvements are expected to increase refinery capacity by 45 percent over the next three to five years.

With completion of the turnaround and implementation of the debottlenecking enhancements, the Ciniza Refinery is now fully operational with a rated crude oil capacity of 19,300 barrels per day. The constitutes a crude oil capacity increase of more than 7 percent.

Acridge noted improved refinery margins should make the second quarter significantly better than the first quarter of 1990.

Giant Industries Inc. is primarily a refiner and marketer of petroleum products, supported by natural gas and crude oil exploration and production. Specifically, Giant operates a crude oil refinery with a

rated capacity of 19,300 barrels per day, a 360-mile crude oil gathering pipeline, 71 truck transports, a unique Travel Center and a chain of 27 modern service station/convenience stores in Arizona, New Mexico and Colorado.

#90129p2485 05/09/1990 ~PR Newswire

SARASOTA, FL (MAY 9) PR NEWSWIRE - Salvatori Ophthalmics (OTC) today reported results of operations for the 1990 first quarter ended March 31, 1990. On sales of $1,311,270, Salvatori incurred a net loss of $33,378 ($.01 per share) as compared to sales of $795,400 and a net loss of $72,468 ($.03 per share) for the 1989 first quarter.

Salvatori credits the 65 percent increase in 1990 first quarter sales to its acquisition of the contact lens manufacturing and sales division of BMC Industries, Inc. (NYSE: BMC) on March 31, 1989, increased marketing emphasis on its RGP (rigid gas permeable) contact lenses, and increased sales of its soft contact lens product for the correction of astigmatism, the Sof-form(R) 55 Toric.

Although sales increased substantially from the same quarter a year ago, 1990 first quarter sales were off approximately 8 percent from the 1989 fourth quarter. Management of Salvatori attributes the decline in sales from the previous quarter primarily to seasonal factors. Prior to the 1990 first quarter, Salvatori had three consecutive profitable quarters since the end of the first quarter of 1989.

In July 1990, Salvatori Ophthalmics plans to begin the sale of the Boston Envision(R) contact lens under license as an authorized manufacturer of Polymer Technology Corporation, a division of Bausch & Lomb. The Boston Envision(R) contact lens design, Polymer Technology Corporation believes, is a significant advance which will create new levels in patient comfort and fit.

The Boston Envision(R) contact lens will be available only through Authorized Boston(R) Lens Manufacturers. Salvatori became an Authorized Boston(R) Lens Manufacturer in September 1988. The company believes this new concept will have a positive impact on its RGP sales in the last half of 1990.

#90129p2488 05/09/1990 ~PR Newswire

SAN FRANCISCO (MAY 9) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) today announced final approval of permits for two northern California companies which have been operating hazardous waste incinerators under temporary federal requirements.

The Agency issued permits to the Chevron Chemical Co., 940 Hensley St., Richmond, and the Shell Oil Co., Marina Vista Ave., Martinez. These permits will allow both companies to continue to operate incinerators solely for the disposal of hazardous wastes generated at their facilities, but under more stringent conditions than currently apply.

Under federal standards contained in the permit, the incinerators must now destroy at least 99.99 percent of incoming organic components, remove at least 99 percent of hydrochloric acid gases from gas emissions and allow for extremely low particulate emissions. The permits also contain provisions limiting emissions of metals and products of incomplete combustion.

The contents of both permits were amended to address concerns raised by the public during the comment period. Waste minimization provisions were strengthened for both permits. In addition to the requirement that Chevron provide an annual report demonstrating waste minimization activities, EPA added provisions that allow the Agency to require further reductions in generated wastes. The Shell permit also calls for review and reporting every two years and a cap on waste incineration volume.

Other changes to the Chevron permit in response to public comments include: restrictions on the amount of waste burned annually to approximate no more than the average amount burned during the past five years; a reduction of metals feed rates to 40 percent of the draft permit rates; and the requirement that the facility's risk assessment be revised every five years to incorporate current risk standards and techniques.

In response to public comments, the Shell permit has also been changed to

include the requirement that a revised risk assessment be prepared every five years, prior to EPA's consideration of a permit renewal.

Chevron has manufactured dry and liquid-based pesticides, fungicides and gasoline additives at its facility since 1935. The incinerator, in operation since 1967, treats liquid waste solvents generated from Chevron's manufacturing process. This liquid waste is approximately 85 percent water and 15 percent hydrocarbon solvent. It is classified as hazardous waste by federal regulations because it is ignitable, and toxic due to the presence of metals and pesticides. No wastes from off- site are burned in this incinerator.

Although the Chevron incinerator has the capacity to treat approximately 130,000 tons of waste per year, the company's permit limits the operation to an average of 60,000 tons per year.

Shell Oil manufactures gasoline and gasoline additives, various other fuels, spray oils, lubricants and asphalts at the site. The Shell permit allows the company to operate four incinerators to treat hazardous wastes produced at the facility. These incinerator units, in operation since 1969, can treat approximately 50,000 tons per year of liquid wastes generated from Shell's manufacturing processes. Today's permit limits hazardous waste incineration to 15,380 tons per year.

#90129p2490 05/09/1990 ~PR Newswire

DALLAS, (MAY 9) PR NEWSWIRE - Rexene Corp. (NYSE: RXN) of Dallas and UBE Industries Ltd. of Tokyo today announced the signing of an agreement for the formation of a joint venture company in Japan. Initially, this venture will manufacture and market 30,000 tons per year of REXTAC(R) Amorphous Polyalphaolefin (APAO) in the Far East and Pacific Rim using Rexene's proprietary technology.

REXTAC APAO is a unique patented polymer which has been commercially developed by Rexene in the United States since 1986. It is principally sold as a component into the adhesive and sealants markets where it is used in hot melt applications for nonwovens, packaging, pressure sensitive and assembly applications. In addition, REXTAC APAO has also found applications in three other primary markets: wire and cable, roofing and laminating. REXTAC APAO is covered by a series of patents issued to Rexene since 1987.

The Rexene-UBE relationship began 25 years ago when UBE licensed Rexene's low-density polyethylene process in 1964 and the polypropylene process in

1968.

The Rexene-UBE joint venture is the "next logical step in a long, mutually beneficial relationship between the two companies," said Andrew Smith, president and CEO of Rexene. "We look forward to working closely with our friends at UBE to capitalize on emerging business opportunities in the Japanese and Pacific Rim markets."

Rexene Corp., through its principal operating subsidiary, Rexene Products Co., manufactures thermoplastic resins and petrochemical products including polyethylene and polypropylene resins, styrene and plastic film. Rexene is headquartered in Dallas with manufacturing facilities in Texas, California, Wisconsin and Delaware.

UBE Industries Ltd., is one of the largest diversified companies in Japan consisting of seven operating divisions, including plastics and rubbers, chemicals, cement, machinery, plant engineering and coal. Its plastics and rubbers division manufacures polyethylene, polypropylene and nylon resins, polybutadiene rubber, polyimide film and related processed products. UBE is headquartered in Tokyo and has numerous industrial facilities throughout Japan.

CINCINNATI, (MAY 9) PR NEWSWIRE - The Kroger Co. (NYSE: KR) said today it has reached tentative agreement on a new, three-year labor contract for 8,500 clerks and meat cutters in the company's King Soopers division in Denver. Employees are voting on the new contract today, with acceptance recommended by the negotiating committee of Local 7 of the United Food & Commercial Workers Union.

Separately, Kroger said that its 6,000 retail clerks and meat cutters in Dallas-Fort Worth completed ratification of a new three-year contract late last week.

Both contracts include provisions for incentive compensation. No other details of the contracts are being released.

LOS ANGELES (MAY 9) PR NEWSWIRE - Seattle-based Nendels Corp. has been chosen as the franchisor for four hotels in the Los Angeles area: the 170-unit Airport Century Inn at Los Angeles International Airport, the 101-unit Hotel Santa Monica, the 83-unit Plaza Inn and the 79-unit Siesta Inn, both in Buena Park.

Nendels president and chief executive officer, John Matlick said, "The increasing demand for Nendels properties will be accomodated by these four franchises. They are great additions to the Nendels system and represent the high value, convenient locations and friendly service that have made Nendels famous."

Joel Leebove, managing partner at the Nendels Airport Century Inn said, "Nendels offers a value oriented franchise with innovative marketing philosophies."

Nendels plans to have 20 additional properties in California by the end of 1990; 10 will be in Southern California.

Nendels offers inns, suites, hotels and resorts for the mid-priced traveler and Valu Inn by Nendels for the economy traveler. Nendels currently has 60 franchises with more than 4,400 rooms in seven western states and Canada.

MUSCATINE, IA (MAY 9) PR NEWSWIRE - The board of directors of Bandag, Incorporated (NYSE: BDG), Muscatine, today declared a regular quarterly dividend of 25 cents per share on the common stock and 25 cents per share

on the Class B common stock of the company payable July 20, 1990, to shareholders of record at the close of business on June 20.

The board also announced that Bandag is adopting a dividend re- investment and optional cash purchase plan. This plan enables registered shareholders to re-invest their quarterly cash dividends in additional shares of Bandag common stock with the option of supplementing dividend investments with additional cash contributions. The administrative costs and brokerage commissions on the acquisition of shares will be paid for by Bandag.

In making the announcement, Martin G. Carver, chairman of the board of Bandag, said, "We are happy to institute this plan which will help you, our shareholders, to build your stock holdings conveniently and economically."

Bandag, Incorporated manufactures retreading materials and equipment for its worldwide network of more than 1,000 independent franchised dealers who produce and market cold process retreads.

BOSTON (MAY 9) PR NEWSWIRE - Xtra Corporation (NYSE: XTR) today announced that the second quarter results (three months ended March 31, 1990) from the customary activities of continuing operations were an after-tax profit of $1,389,000 (this result excludes the effect of a writedown of certain revenue equipment of $4,780,000 after-tax). The current period after-tax earnings were also reduced by $5,686,000 because of unusual charges related to the proxy contest as well as certain other costs associated with management changes. Consequently, second quarter results from continuing operations were a loss of $9,077,000 or $1.66 per share.

The company also recorded during the current quarter an after-tax loss from discontinued operations of $3.5 million due to the reversal of investment tax credits related to previously owned international containers, compared to net income from discontinued operations of $180,000 for the same period of the prior year.

The company also announced that it is not presently purchasing shares under the stock repurchase program adopted in December 1988. The board will consider the advisability of share repurchases when the economic outlook is clearer and the benefits of our programs have become apparent.

CHICAGO (MAY 9) PR NEWSWIRE - Intelligent Information Systems Inc. formally announced a new point-of-sale service offering today at the Food Marketing Institute's Supermarket Industry Convention.

The new service, Intelli$hop(SM), integrates both electronic payment acceptance and a frequent shopper program in a single solution for retail grocers. The firm plans to introduce Intelli$hop to the grocery industry and announce several important business developments at the convention in Chicago, which runs from May 6-9.

The grocery industry, long known for operating on margins of 1 to 2 percent, has been struggling in recent years to cope with the growing demand from shoppers to accept personal checks, credit and debit cards and other forms of electronic payment.

The most apparent difference is that Intelligent Information Systems allows its customers to fix the costs of their services over the term of their contract, letting them benefit from the increased margins due to automation. Intelli$hop is being initially offered as a turnkey service with all transaction processing being performed at the company's data processing facility in Pittsburgh. When grocers are ready to own the system outright, the company reportedly will install it as a complete in-house solution, with or without facilities management. The company claims that the switchover can be made invisible to the user with no retraining of staff required.

Intelligent Information Systems is a subsidiary of the Intelligent Technology Group, a leading innovator of advanced software for the retail and financial services industries. Larry K. Geisel, president and CEO of Intelligent Technology, notes that "the retail sector is the fastest growing segment of the systems integration marketplace. Intelli$hop is a critical component in our strategic plan to be the leading supplier of

productivity enhancing systems for this rapidly emerging market."

Intelligent Information Systems has been providing software, systems integration and services to large retail, financial services and government operations for over 20 years. The Pittsburgh firm maintains additional offices in Boston, New York and Washington, D.C., and currently employs approximately 90 people.

#90129p2545 05/09/1990 ~PR Newswire

NEW YORK (MAY 9) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC) of Maynard, Mass., and Palette Systems, Inc. of Nashua, N.H., today unveiled the first commercially available system that automates pharmaceutical manufacturing in a paperless environment. The Electronic Batch Records System (EBRS) streamlines the costly and cumbersome task of preparing, managing, and distributing documentation needed to manufacture drugs.

The Federal Drug Administration requires pharmaceutical makers to fully document the manufacturing processes used to produce each batch-lot of drugs. A typical pharmaceutical plant producing an over-the-counter drug may produce 150-to-200 batches per week, each with 40-to-160 pages of documentation that must be stored for seven years.

The Digital/Palette solution tightly integrates new PALETTE EBRS software with Digital's Electronic Data Control System, EDCS II, to provide a comprehensive management system for tracking and controlling the preparation, approval and release of revisions of manufacturing processes, SOP (Standard Operating Procedure), GMP (Good Manufacturing Practice) and other documents. The EBRS/EDCS II combination supports pharmaceutical product, quality and production goals, by ensuring that new revisions of documents are produced, approved and released in a timely manner, and that the correct revisions of each document are used for each batch that is produced.

PALETTE EBRS software creates an accurate, efficient paperless environment for pharmaceutical manufacturing. It is based on Palette Systems' field-proven Electronic Work Instruction (EWI) software. It enables pharmaceutical manufacturers to create a rigorously controlled paperless manufacturing environment. Detailed, step-by-step instructions describing the manufacturing process are presented to shop floor operators on computer screens; and batch record data are simultaneously collected and validated as operators enter the data directly into fields on the screen.

The PALETTE software allows manufacturers to accurately model their existing paper-based batch record forms on the screen, eliminating the need for the re-training of shop floor personnel. As each operation is completed and checked, both the operator and the checker sign off electronically.

Digital Equipment Corporation, headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise - from the desktop to the data center.

Palette Systems Inc., located in Nashua, N.H., is a leading supplier of engineering and manufacturing software solutions.

PORTLAND, OR (MAY 9) PR NEWSWIRE - NERCO Inc. (NYSE: NER) announced that the company's shareholders elected Lawrence E. Heiner, 51, to the mining and resource development company's board. Heiner was elected president of NERCO in March 1989.

In addition to his role as president of NERCO Inc., Heiner is chairman and chief executive officer of NERCO'S three major subsidiaries, and also continues as president of the company's minerals subsidiary.

"We are pleased to add Mr. Heiner to the company's board of directors," noted NERCO Chairman Gerard K. Drummond. "His experience and leadership over the past nine years has helped guide NERCO's growth and development." Heiner joined NERCO in late 1981, and has held various roles with the company. Heiner also is a member of the PacifiCorp Policy Group.

Also elected to the NERCO board by company shareholders were Gerard K. Drummond, 52, chairman of the board and chief executive officer of NERCO; Roger L. Breezley, 52, chairman and chief executive officer of U.S. Bancorp; Edward H. Cooley, 67, chairman of Precision Castparts Corp.; William J. Fronk, 64, retired president and chief executive officer of Hyster Co.; Stanley K. Hathaway, 65, partner in Hathaway, Speight and Kunz a Wyoming law firm; and James L. Powell, 53, president of Reed College.

NERCO is a leading U.S. and North American producer of coal, gas, oil, gold and silver. Approximately 82 percent of NERCO's common stock is indirectly owned by PacifiCorp (NYSE: PPW), a diversified electric utility.

BLUE BELL, PA (MAY 9) PR NEWSWIRE - Unisys Corp. (NYSE: UIS) announced today product and marketing organization changes designed to enhance implementation of its strategic cooperative network computing approach that allows different classes of products to cooperate on the same network.

Unisys said that it is combining its mainframe and open systems product operations into one unit, Computer Systems Product Group. Cyril Yansouni was named president of the new group and an executive vice president of the corporation. He had been president of the company's Network Computing Group and a corporate senior vice president.

Unisys also said that all Blue Bell-based marketing operations -- United States Information Systems, Pacific Asia Americas Division and Corporate Marketing -- would report to Reto Braun who was named an executive vice president of the corporation. He had been president of Pacific Asia Americas Division, a position he retains, and a corporate senior vice president.

Unisys President and Chief Executive Officer James A. Unruh said, "Our mainframes and open systems are becoming increasingly interdependent as we create in the 1990s the seamless cooperative network computing environment that will provide total solutions users want. Uniting our mainframe and open systems product units under one organization at this time will further enhance our ability to continue to develop state-of-the-art mainframes, add open attributes to them and transfer mainframe functionality to our open systems products," Unruh said.

Unruh said that Braun's new marketing position overseeing the line and corporate marketing organizations in Blue Bell was part of a company-wide drive to leverage existing capabilities in an increasingly competitive marketplace. "The result will be a more efficient, coordinated and focused approach to providing computer users with total solutions that enhance current investments and capitalize on the advantages of open cooperative network computing," Unruh said.

Unisys also announced that Hollis Caswell, senior vice president of the corporation and president of the former Computer Systems Group, has resigned, effective May 14 to join another firm.

CHICAGO (MAY 9) PR NEWSWIRE - EAC Industries, Inc. (AMEX: EAC), today announced the appointment of G. Vern Diedrick as president and chief executive officer of its troubled Ideal Security Hardware unit. Diedrick has extensive operating experience including turnaround activity in several situations. Most recently (1985-1988), he was executive vice president of UNC, Inc., a large diversified NYSE company with interests in aerospace/aviation, defense, telecommunications and environmental services.

Prior to his tenure at UNC, Diedrick spent ten years at Federal Signal Corporation, most recently as executive vice president and chief financial officer. Federal is a diversified NYSE company with interests in emergency signals and sirens, specialty vehicles, precision tools and custom identification signs. Earlier in his career, he spent sixteen years with General Motors, including several overseas assignments.

Diedrick replaces Don MacPherson who resigned as president of Ideal. MacPherson will continue for a period of time as a consultant to Ideal in order to ensure an orderly transition.

EAC is a holding company serving the hardware industry and point-of-purchase advertising market through its subsidiary companies, Ideal Security Hardware Corporation and Goodren Products Corporation.

PITTSBURGH, (MAY 9) PR NEWSWIRE - Genix Enterprises has signed Duracell Inc. to a five-year, $11 million computer operations outsourcing contract, it was announced today.

Duracell Inc., based in Bethel, Conn., is the world's leading producer of consumer alkaline batteries.

Under the terms of the agreement, Genix, through its processing center in Pittsburgh, will provide Duracell with all required mainframe computer capacity, systems software, disk and tape storage, data telecommunications and technical services necessary to support Duracell's business. Duracell will continue to conduct all applications development and maintenance functions with its own staff.

According to Jim Donahue, Duracell's director of communications, the agreement with Genix will allow Duracell to achieve significant cost savings, and allow the company to develop its long-term MIS strategy.

According to Genix Enterprises' Senior Vice President of marketing and sales, Cecil Sexton, "Genix is pleased to count Duracell as a customer and believes that the company's decision to outsource is a strong indication that corporations are realizing the many benefits of utilizing a third party to provide computer operations and related services."

Genix Enterprises is a wholly owned information services subsidiary of National Intergroup Inc., (NYSE: NII) a multibillion-dollar diversified distribution and services firm. Genix Enterprises' principal operating unit is Genix Corp., which operates a large computer processing facility in suburban Pittsburgh, through which it provides computer operations outsourcing services to customers in a wide variety of industries.

BLOOMFIELD HILLS, MI (MAY 9) PR NEWSWIRE - Stoneridge Resources, Inc. (NYSE: SRE) announced today record results for the first quarter ended March 31, 1990, of Acceptance Insurance Holdings Inc., an Omaha, Neb.-based specialty property and casualty insurance company acquired by Stoneridge in April 1990.

Before-tax income was up 27 percent to $1,696,896 in the first quarter of 1990 vs. $1,340,182 during the first quarter of 1989. It is anticipated that Acceptance's future income will be sheltered from federal income taxes by utilization of Stoneridge's existing net operating loss carryforwards of over $19 million.

Premium income for the three months ended March 31, 1990, increased 47 percent to $13,128,547 from $8,985,122 in 1989; investment income increased 22 percent to $1,560,880 from $1,281,343; total revenues increased 44 percent to $14,671,691 from $10,226,214; and cash flow increased 82 percent to $4,637,688 in the first quarter of 1990 from $2,554,504 in 1989.

Acceptance's total assets currently exceed $100 million for the first time in the company's history. In addition, A.M. Best Company announced that it had upgraded the group rating for Acceptance's insurance company subsidiaries from B+ to A-.

Stoneridge also owns 52 percent of Florida-based Orange-co, Inc. (NYSE: OJ), owner of over 26,000 acres of Florida land; 51 percent of Radice Corporation (NYSE: RI), a Florida-based real estate developer; and 33 percent of Major Realty Corporation (NASDAQ: MAJR), a Florida- based real estate company.

CHANTILLY, VA (May 9) PR Newswire - Milton L. Deever, chairman and president of Fairchild Data Corp., has announced that he intends to retire by year-end.

Until then he will be transferring his responsibilities to Brig. Gen. H.R. "Johnny" Johnson (USAF, retired), a senior officer of Fairchild Industries (NYSE: FENPrA). The transition is expected to be completed by July 1, 1990 the beginning of the 1991 fiscal year. After that Deever will assist Johnson in completion of new business programs currently in progress.

Deever entered the electronics industries more than 35 years ago and has been involved in various aspects of the U.S. space program and satellite communications for nearly 30 years. He served 18 years in various engineering, marketing and management positions with Motorola's Government Electronics Group. He then joined Comtech Inc. in Hauppauge, N.Y., in 1976 and served in various executive positions, including chief operating officer, and was a founder and president of Comtech Data Corp. Fairchild Industries purchased Comtech Data Corp. in 1984. Deever graduated with honors in electrical engineering at U.C. Berkeley and was awarded a master's degree in engineering from UCLA.

Johnson has more than 35 years experience in pioneering high- technology communications systems. He is a former staff member to President Lyndon B. Johnson for telecommunications management and served as corporate vice president for both Western Union and American Satellite. He was a founder and senior vice president of Vitalink Communications, which provides private satellite communications. He then became president of Telebit Corp., a supplier of very high speed data phone modems, before coming to Fairchild in 1988.

Fairchild Data Corp., a subsidiary of Fairchild Industries Inc., designs and manufactures communications modem equipment.

NEW YORK (MAY 9) PR NEWSWIRE - Horsehead Industries, Inc. announced today that its subsidiary, Horsehead Resource Development Company, Inc., based in Palmerton, Pa., has filed with the Securities and Exchange Commission a registration statement relating to a proposed initial public offering of 3,250,000 shares of common stock.

The offering will be made through a group of underwriters led by Kidder, Peabody & Co. Incorporated and Alex. Brown & Sons Incorporated. It is currently estimated that the initial public offering price will be between $10 and $12 per share.

The company is a leader in inorganic hazardous waste resource recovery. The company's primary business consists of processing electric arc furnace dust ("EAF dust") generated in electric arc furnace steelmaking from which it recovers useful products, principally zinc. The company is the leading processor of EAF dust in the United States. The company's strategy is to expand its primary business and to broaden its activities into the management of additional waste streams from which useful products can be economically recovered.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state. Copies of the preliminary prospectus relating to the proposed offering may be obtained from the managing underwriters.

CONTACTS: Robert L. Hoguet III of Horsehead Resource Development Company, 212-527-3031, or A. Reid Marsh, Jr. of Kidder, Peabody & Co. 212-510-4034, for Horsehead Resource Development Company.

HOUSTON (MAY 9) PR NEWSWIRE - Conquest Exploration Co. (AMEX: CQX) today reported a net loss for the first quarter of 1990 of $3,540,000, compared to net income of $373,000 for the first quarter of 1989. After giving effect to dividends on the company's preferred stock, the company reported a net loss attributable to common shares totaled $4,074,000, 9 cents per share, in the first quarter of 1990 compared to a loss of $206,000 in the first quarter of 1989. Results for the first quarter of 1990 include the effect of the results of operations of Canadian Conquest Exploration Inc., which was acquired in April 1989. Average shares outstanding were 45,063,209 in the first quarter of 1990 and 45,074,394 in the first quarter of 1989.

Revenues in the first quarter of 1990 totaled $14,318,000 compared to $13,349,000 in the first quarter of 1989. Revenues for the first quarter of 1990 include $2,668,000 attributable to the company's Canadian operations. Revenue for the first quarter of 1989 include $2,160,000 related to the settlement of certain take-or-pay disputes. Operating expenses for the first quarter of 1990 and 1989 include provisions for the impairment of producing properties of $3,640,000 and $2,007,000, respectively.

On Jan. 26, 1990, Conquest announced the retention of the investment banking firm of Morgan Stanley & Co. Inc. to assist in the evaluation of the potential merger or sale of the company. Interested parties are currently evaluating the company's assets and bids are expected to be received by mid-year. In the interim, the company has continued normal operations.

Conquest Exploration Co. explores for, develops and produces oil and gas.

The company's exploration operations are concentrated in the onshore and offshore areas of the Gulf Coast and certain international areas. The company's principal producing properties are located in Louisiana, Mississippi, Montana, North Dakota, Texas, Utah and Wyoming. The company also conducts exploration and production operations in Canada through its subsidiary, Canadian Conquest Exploration, Inc. Conquest is headquartered in Houston.

VERNON HILLS, IL (MAY 9) PR NEWSWIRE - In a move to further the focus on marketing and customer relations it began last fall, Wickes Lumber Co. today announced it will centralize its operational and administrative responsibilities of its Allentown, Pa., and Indianapolis, Ind.. offices to its headquarters in Vernon Hills. Concurrently, William A. Hensler, chairman and chief executive officer, also announced that Frank W. Chambers, formerly vice president of its North Central area, will be promoted to vice president operations for the company. Effective immediately, Chambers, a 12-year Wickes veteran, will report directly to Philip M. Chrusz, president and chief operating officer of Wickes as vice president of operations for Wickes nationwide.

Reporting to Chambers will be three regional managers: Vice President Richard F. Buck, Richard F. Bradford and George C. Finkenstaedt. These individuals will be headquartered in Vernon Hills.

"By centralizing our consumer sales efforts, we will now be able to provide our customers a more consistent and unified marketing effort," Chrusz said. "This move will also allow Wickes to focus and control, form one central location, our pricing, advertising, product assortment and store display efforts. We believe strongly that these decisions will improve even further Wickes overall consistency, and that doing so will make the consumer marketing efforts even more unified, effective and cost-efficient. It will ultimately facilitate faster decisions, resulting in better customer service and improve overall communications company-wide. The strength of Wickes Lumber, our contractor business, will continue to be the responsibility of operations and managed at store level with additional support from the home office," Chrusz said.

Wickes Lumber Co., founded in 1952, has more than 6,000 employees in 30 states, with 190 locations and over $1 billion in annual sales.

#90129p2629 05/09/1990 ~PR Newswire
BOSTON (MAY 9) PR NEWSWIRE - The board of directors noted the acceptable level of XTRA's (NYSE: XTR) cash flow and declared a regular quarterly dividend of 12 cents per share payable on May 31, 1990 to common stockholders of record on May 21, 1990. The board also declared the regular quarterly dividend of $.484375 per share on the $1.9375 Series B Cumulative Convertible Preferred Stock payable on June 1, 1990 to preferred stockholders of record on May 21, 1990.

The board of directors has elected to redeem the company's preferred stock purchase rights for 6 cents per rights. The redemption price will be paid on May 31, 1990 to holders of record as of May 21, 1990. Mr. Goergen, chairman of the board, stated, "Redemption of the rights is consistent with both the XTRA Corporation Independent Stockholders Committee's pledge and the new board's commitment, to maximize stockholder value and not create undue obstacles to acquisition proposals."

It is not the intent of the company to permanently reduce the regular quarterly dividend of 18 cents per share of common stock. However, in view of the significant expenses incurred by the company as a result of the recently completed proxy contest as well as other costs associated with certain management changes, it was deemed prudent to reduce the quarterly dividend to 12 cents per share for the quarter ended March 31, 1990, while at the same time redeeming the Rights under the Rights Agreement. It is expected that the company will resume its regular quarterly dividend of 18 cents per share of Common Stock beginning with the next regular quarterly dividend.

XTRA Corporation is engaged in transportation services, primarily the leasing, on an operating basis, of intermodal equipment, including piggyback trailers and domestic containers and chassis, as well as over-the-road trailers.

POMPANO BEACH, FL (MAY 9) PR NEWSWIRE - As previously reported, Agri-Dade Ltd. -- a majority-owned subsidiary of Agripost, Inc. (NASDAQ: AGRI) -- experienced the failure of an electric motor at its Dade County solid waste composting facility on Feb. 1, 1990.

The failure of this motor has caused the plant to be operated at reduced capacity for the last three months. Agri-Dade, Ltd., has made a claim for business interruption insurance against their insurance policy issued by The Home Insurance Company.

On May 7, 1990, The Home Insurance Company filed a complaint for declaratory judgment against Agripost, Inc., alleging it believes the loss is not covered by the insurance policy and seeking a judicial declaration of nonliability. A declaratory judgment of nonliability in favor of The Home Insurance Company could have a material adverse effect upon the business and financial condition of Agri-Dade, Ltd., and the company. The company believes the loss is covered and intends to vigorously pursue coverage under the policy. The company believes that the loss of revenue from Feb. 1 through replacement of the electrical motor in the first week of May exceeds $1 million.

#90129p2680 05/09/1990 ~PR Newswire

SAVANNAH, GA (MAY 9) PR NEWSWIRE - Gulfstream Aerospace, responding to requests from Gulfstream II and III operators for information on re-engining their Rolls-Royce Spey-powered aircraft with the quieter Tay engines, has released a study report, including wind tunnel evaluations begun in 1983, dealing with the feasibility of such re-engining.

Gulfstream's study advises against offers projecting $8.0 million re-engining conversions for the Gulfstream II and III stating that the real costs of such conversions could well exceed the price of new aircraft.

The study (consolidated report available), conducted in part with Rolls-Royce, plc, contains statements from Gulfstream's Senior Vice President-Engineering & Technology, Charles N. Coppi:

"Gulfstream II range performance with Tay engines and eight passengers would be limited due to the off-loading of approximately 1,000 pounds of fuel to remain at the maximum certified ramp weight of 65,300 pounds. The alternative would be a gross weight increase which is an added expense and further performance degradation."

Coppi reports that the Gulfstream III's range performance with Tay engines and eight passengers, would degrade by an even bigger percentage than the Gulfstream II due to less payload available on the Gulfstream III. Coppi added, "The Gulfstream III would require a gross weight increase to 73,600 pounds to permit full fuel (28,300 pounds) and eight passengers which is, again, an added expense and a performance detractor."

Coppi states that a recently offered $8 million re-engining package is far from a proper answer to the customer's need to retain the performance of the GII/III:

"Re-engining without considering the 25-year-old wing technology and the general configuration of the Gulfstream II, the need to increase the gross

weights of both the GII and III which, in turn, leads to changes in the landing gear and other structural and systems modifications, and, recertification. All of which will generate prices for the modified aircraft-j-comparable to that of new aircraft on the market, today. The end result is still a used aircraft with reduced performance capability.

"All things considered, re-engining (alone) represents a pretty big task with considerable expense. Any shortcuts taken to minimize the job or reduce the expense will produce obvious operational compromises."

Coppi noted that Gulfstream has been working with Rolls-Royce, plc, to find direct engine applications to reduce noise emissions:

"Our work with Rolls-Royce looks quite promising. We're also exploring new opportunities for developing a reasonably priced 'quiet Spey' modification for both the II and III. We expect to have solid information on these programs by mid-year, certainly by the end of 1990."

CHICAGO (MAY 9) PR NEWSWIRE - Circle Fine Art Corp. (NASDAQ: CFNE) today reported revenues and earnings for its second quarter and for the six months ended March 31, 1990.

Second-quarter revenues increased 10 percent to $8,325,000, a new record, up from $7,557,000 for the same period ended March 31, 1989. There was a net loss for the quarter of ($499,000) or ($.20) per share compared to a net gain of $284,000 or $.11 per share for the second quarter ended March 31, 1989.

Revenues for fiscal 1990's first six months ended March 31, 1990, increased 13 percent to a record $17,501,000, up from $15,472,000 for the same 1989 period. The net loss for the six months ended March 31, 1990, was ($406,000) or ($.16) per share compared to a net gain of $694,000 or $.28 per share for the comparable half ended March 31, 1989. Results for the second quarter and first six months are not necessarily indicative of results that may be expected for the full fiscal year.

"The net loss for the second quarter and first half, as anticipated, reflects approximately $1 million in start-up costs, increased overheads, and decreased margins relating to launching The Art Collectors Circle. The Art Collectors Circle is an innovative fine art marketing program introducted recently in association with a division of the American Express Company," Jack Solomon, chairman, said.

"Response during the past six months of the test run of the program exceeded expectations," he reported. "As a result of this success, American Express will bear the cost of mailing Art Collectors Circle materials inviting participation in this program to over five million of its credit card holders. These mailings are scheduled for May and July. It is our belief that the new Art Collectors Circle will now start to contribute to Circle Fine Art's continued profitabilty. A short-term loss of profits was incurred with a view to the medium-term and long- term growth of the company.

"Circle's core art gallery business remains strong," Solomon said. "Same store retail sales during the first six months were 18 percent higher than the comparable period of last year." Solomon forecasts a profitable second half for the company.

Circle Fine Art Corp. publishes and distributes limited edition original graphics, deals in contemporary fine art, manufactures and distributes "Art To Wear" limited edition fine art jewelry designed by a number of the world's leading contemporary artists, and owns and operates 33 fine art galleries and three Tangent, Fine Art for Living(TM) stores in the United States and Canada.

The company also owns the Art Collectors Circle(TM), a club for both beginning and advanced art collectors operated in association with a division of the American Express Company.

ST. LOUIS (MAY 9) PR NEWSWIRE - INTERCO Inc. (NYSE: ISS) announced today a restructuring plan for its existing subordinated debt and preferred stock. Holders of INTERCO's 13 3/4 percent Senior Subordinated Debentures due 2000 would be entitled to exchange each $1,000 principal amount of such debentures for 70 shares of INTERCO common stock and $900 principal amount of a new issue of 6 percent accrual convertible debentures,

interest payable at maturity, convertible into 504 shares INTERCO common stock. Holders of INTERCO's Subordinated Discount Debentures due 2003 and 14 1/2 percent Junior Pay-In-Kind Subordinated Debentures due 2003 would be entitled to exchange each $1,000 principal amount of such debentures for 150 and 130 shares of INTERCO common stock, respectively. Accrued but unpaid interest has been taken into account in determining the terms of the exchange offers, and the company will not make the June 15, 1990, interest payment on the Senior Subordinated Debentures or the Junior Pay-In-Kind Subordinated Debentures.

INTERCO will also solicit shareholder approval to reclassify each share of its existing Series D $7.75 Cumulative Convertible Preferred Stock and Series E Preferred Stock into 100 and 8 shares of INTERCO common stock, respectively. In addition, shareholders will be asked to approve a reverse-stock-split to accommodate the shares to be issued in the restructuring. INTERCO intends to reclassify the preferred stock contemporaneously with the consummation of the exchange offers, following the shareholder approvals.

The exchange offers will be conditioned upon, among other things, acceptance of the exchange offers by at least 90 percent of the outstanding principal amount of the Senior Subordinated Debentures, Subordinated Discount Debentures and Junior Pay-In-Kind Subordinated Debentures, approval by the stockholders of the reclassification of the preferred stock into common stock, and negotiation and documentation of an amendment to INTERCO's bank credit agreement to reflect the terms of an amended credit facility currently being negotiated.

Richard B. Loynd, INTERCO's president and chief executive officer, said, "We believe this comprehensive restructuring creates a long-term solution by alleviating the problems resulting from our over-leveraged capital structure. The plan offers our existing debenture holders and stockholders the opportunity to participate in the future growth of our four core companies: Broyhill Furniture Industries Inc., The Lane Co. Inc. The Florsheim Shoe Co. and Converse Inc."

INTERCO, working with its financial advisors, J.P. Morgan & Co. and Smith Barney, Harris Upham & Co. Inc., is currently planning to file a registration statement with the Securities and Exchange Commission in the next one to two weeks containing the terms of the exchange offers and covering the securities to be issued in such exchange offers and the related consent and approval solicitations. INTERCO intends to commence the exchange offers and solicitation of the approval of shareholders immediately following the effectiveness of such registration statement.

INTERCO announced last week that its bank lending group has agreed to extend to Oct. 1, 1990, certain loan payments due May 7, 1990, including a $225.9 million principal payment on INTERCO's existing bridge loan. This

extension will allow time for the completion of negotiation and documentation of an amendment to INTERCO's existing bank credit agreement.

INTERCO is a major manufacturer of furniture and a manufacturer and retailer of footwear.

This announcement does not constitute an offer to sell or to buy any security or the solicitation of any consents or approvals, which offers and solicitations shall be made only by means of a proxy statement/prospectus to be filed by INTERCO with the Securities and Exchange Commission.

BUTTE, MT (MAY 9) PR NEWSWIRE - Frank V. Woy, executive vice president of finance and a member of Montana Power Co.'s (MPC) (NYSE: MTP) board of directors, has announced he will retire June 1, after 38 years of service with the company. Jerrold P. Pederson, MPC's controller for the past eight years, has been named vice president of corporate finance and controller in the company's Office of the Corporation to succeed Woy effective June 1.

Woy's career with MPC began as a laborer in the gas construction department in 1951 while he was attending business college. A CPA, he rose through a variety of accounting and auditing positions to lead MPC's finance department as executive vice president of finance in 1982. He was elected to the company's board of directors in 1986.

Pederson is a graduate of Gonzaga University with a degree in accounting. He joined MPC in 1965 as a junior auditor and worked his way through positions in the auditing, accounting and tax departments of the company before being promoted to controller in 1982.

WASHINGTON (MAY 9) PR NEWSWIRE - At 6:30 p.m. (EDT) today, Robert J. Herrmann, senior deputy comptroller for Bank Supervision, Office of the Comptroller of the Currency, declared Chancery National Bank, Denver, insolvent, and appointed the Federal Deposit Insurance Corp. (FDIC) as receiver.

Chancery National Bank has been a significant concern to the OCC since 1985 due to poor controls, inadequate management, and poor oversight by the board of directors. The OCC entered into an agreement with the board to attempt to focus their attention on the bank's problems.

The bank's condition improved somewhat in 1987 and 1988. However, in 1989 the bank began experiencing increased loan losses due to poor credit selection, poor loan administration, and poor overall management. These losses eventually exceeded capital, resulting in insolvency.

Chancery National Bank was chartered in 1984. As a Dec. 31, 1989, it had total assets of $18 million.

SEATTLE (MAY 10) PR NEWSWIRE - The Boeing Co. (NYSE: BA) said today that its use of Voi-Shan fasteners has not compromised the integrity of Boeing products.

Boeing originally reached this conclusion last year after four months of scrutinizing Voi-Shan products and procedures. Boeing was addressing the quality issues raised by the execution of a search warrant at Voi-Shan's Chatsworth, Calif. facility by the U.S. Government NORDECON Task Force in February of 1989. The Federal Aviation Administration (FAA) concurred with Boeing's conclusions.

Following reports of quality control issues at Voi-Shan's Chatsworth facility that gave rise to the search warrant, a team of Boeing quality assurance personnel conducted an immediate, on-site inquiry at the facility. The Boeing team confirmed the existence and unauthorized use of an "Inspector 11" stamp and identified other irregularities in Voi-Shan's quality control system.

In light of the information obtained through Boeing's on-site inquiry and the allegations in an affidavit filed in support of the search warrant, Boeing initiated a coordinated company-wide effort to assess Voi-Shan's production and quality control operations and the integrity of Voi-Shan fasteners being received and in Boeing inventory.

Boeing confirmed that the fasteners manufactured by Voi-Shan met Boeing specifications and requirements. It was also concluded that Voi-Shan has the technical capability to produce, test and certify fasteners in accordance with the requirements of Boeing procurement specifications; that Voi-Shan's quality control irregularities were corrected; and that

Voi-Shan parts have not compromised the integrity of Boeing products.

Boeing noted that it has used Voi-Shan fasteners for 40 years and the parts have consistently maintained a very good record for quality and reliability.

WASHINGTON (MAY 9) UPI - While the International Monetary Fund said it got a $60 billion increase in its resources, the World Bank, its sister institution, came away empty handed Tuesday from three days of high level international financial meetings.

The World Bank proposed to the Development Committee, a policy advisory body it shares with the IMF, to double the $1.3 billion capital of the International Finance Corporation, the bank affiliate that helps the private sector in developing countries.

The panel met after the IMF's Interim Committee decided Monday to increase by 50 percent the $120 billion capital of the fund, which makes short- and medium-term loans to countries with shortfalls in their external accounts.

The IMF capital hike was a compromise between the developing nations, which had wanted a 100 percent increase, and the industrial powers, which in a Sunday meeting proposed a 50 percent capital expansion.

World Bank President Barber Conable told a news conference that the IFC capital hike is going to remain under further study.

Sources close to the committee said that the United States and other countries were not interested in the proposal to increase the capital of the IFC, which did receive support from the British Finance Minister, John Major.

Another World Bank proposal to the Development Committee, the creation of a $1.2 billion concessional fund to tackle environmental problems transcending the borders of a single developing country, was tabled by representatives from the U.S. and other countries.

Treasury sources said the fund poses budgetary problems and that its objectives and beneficiaries are ill defined. West Germany and France, the country that originally proposed the fund, as well as many developing countries such as Mexico, Brazil and Ecuador, endorsed the project.

Conable also said that further studies of the proposal would have to be

made.

Earlier, the IMF said the hike in its resources will allow it to strengthen its support for Third World debt reduction, help Eastern Europe's emerging democracies and promote world trade liberalization.

The compromise between developing and industrial nations linked the capital hike to provisions to help the 11 countries with $4 billion in overdue obligations to the fund and called for eventually suspending those refusing to be put under IMF-supervised economic programs to clear arrears.

#90129u0125 05/09/1990 ~United Press International

CHICAGO (MAY 8) UPI - Mark Messier scored two goals and assisted on two others Tuesday night, lifting the Edmonton Oilers to a 4-2 victory over the Chicago Blackhawks to tie the Stanley Cup semifinal series at two games apiece.

The Oilers scored three goals on their first four shots to regain home-ice advantage in the best-of-seven Campbell Conference final, which moves back to Edmonton for Game 5 Thursday night.

The Blackhawks outshot the Oilers 27-16 for the game, but goaltender Bill Ranford was steady throughout. The only time Ranford was unsteady came after a behind-the-net check by Chicago's Jocelyn Lemieux midway through the third period.

Ranford remained in the game after being examined for several minutes, and the play resulted in a five-minute major penalty that killed any chance of the Blackhawks making a comeback.

The Oilers were outshot 11-3 in a first period dominated by the Blackhawks but managed a 2-1 lead on great individual efforts by Glenn Anderson and Messier.

Anderson scored at 15:02, fighting off a check in front of the net and redirecting a pass with a blind backhand past goaltender Greg Millen.

Messier, who is tied for the league lead with 22 playoff points, made it 2-0 just 2:23 later on sheer speed. The All-Star centerman blew past defenseman Bob Murray to scoop up a clearing pass along the left boards, outraced defenseman Doug Wilson to the net and beat Millen to the near side.

Up to that point, Chicago had outshot the Oilers 8-1, and only several good saves by Ranford kept them from scoring. The Oilers never relinquished that lead.

Denis Savard scored for Chicago with 1:38 left in the first to make it 2-1 but Craig Simpson scored for Edmonton 11 seconds into the middle period. Simpson stuffed a loose puck past Millen after the Chicago goaltender failed to clear the slot on a shot he easily could have frozen.

The goal prompted Blackhawks Coach Mike Keenan to replace Millen with Jacques Cloutier. Millen, who stopped 31 shots in his team's 5-1 victory in Game 3, faced only four shots and stopped just one.

After rookie Jeremy Roenick brought Chicago within a goal midway through the second, Messier scored his second goal of the game and eighth of the playoffs to make it 4-2 at 14:06.

Messier made Chicago pay for another mistake, taking advantage of a bad pass by Al Secord and a poor-timed line change. Secord dropped a pass for teammate Troy Murray in the neutral zone, but Murray was headed for the bench on a line change. Simpson poked the puck ahead to Messier, who then moved in alone and beat Cloutier with a backhand.

There was no scoring in the final period. Chicago is 0-8 in the playoffs when trailing after two periods. The Oilers are 7-0 when they lead entering the final period.

The Blackhawks peppered Ranford on a delayed penalty midway through the first, with Wilson firing two slap shots from the right point. But Anderson silenced the crowd with his goal, coming only 11 seconds after Lemieux was called for a high-stick.

(MAY 9) UPI - Government officials in Nicaragua say Contra rebels began handing in their weapons to United Nations peace-keeping forces Tuesday for the first time inside Nicaraguan territory. Some 10-thousand rebels are supposed to disarm by June 10th under terms of an agreement their leaders signed last week with President Chamorro.

The oil industry says if Congress requires greater use of fuel mixtures

such as ''gasohol,'' motorists will end up paying more for dirtier air. The industry stepped up its attack on alternative fuel provisions in pending clean air legislation Tuesday by releasing a study. The study contends the gasoline-grain alcohol mix would increase a vehicle's ozone-forming potential by six percent. A Renewable Fuels Association spokesman disputed the study's conclusions... calling the report- quote- ''part of the greatest oil slick since the Exxon Valdez.''

Student government at the University of California at Los Angeles will have to get along without Bart Simpson. Campus newspaper editor Sarah Suks says the son of the quirky cartoon family on ''The Simpsons'' received 10 write-in votes during last week's U-C-L-A student council election. That's about 22-hundred votes short of what was needed to win a spot on the governing body.

#90129u0335 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - President Bush called a meeting at the White House with congressional leaders to discuss the budget summit that may become a showdown on the record federal deficit as well as personal taxes.

A White House aide said a budget summit date would likely be set at the meeting between Bush and congressional leaders on Wednesday. Party leaders said the talks could begin this week.

The meeting was to include Bush, Senate GOP leader Robert Dole, Senate Democratic leader George Mitchell, House Speaker Thomas Foley and House Republican leader Bob Michel.

The administration wants a new budget proposal to deal with the mounting deficit within a few months, long before a third of the Senate and all of the House face voters in the fall elections.

Congressional Democrats agreed to participate in the summit Tuesday, provided Bush keeps his promise that no possible options for reducing the deficit - including income tax hikes - are ruled out in advance.

''The general consensus of the (House Democratic) caucus was that if the president wanted to talk it was our responsibility to respond and sit down with him,'' said Rep. Steny Hoyer, D-Md., the caucus chairman.

But some Democrats are skeptical, even wary.

''We did a lot of lip-reading in the last presidential election and now it's come home to roost,'' Rep. Richard Durbin, D-Ill., said, referring to Bush's ''read my lips - no new taxes'' pledge.

He said a summit ''could easily be a trap'' for Democrats.

In opening the door to tax increase discussions, Fitzwater said Monday that Bush wants budget negotiations ''unfettered with conclusions about positions taken in the past.''

He reiterated Tuesday that the talks would have ''no preconditions,'' and said, ''these are honest and open discussions designed to resolve a serious problem the country faces.''

Bush is seeking a new round of budget talks amid a rising deficit that appears out of control. Projections are expected to further soar due to a more costly than anticipated bailout of the savings and loan industry.

Republican congressional leaders met with Bush at the White House Tuesday, and afterward assistant Senate GOP leader Alan Simpson of Wyoming sounded off against raising income tax. But he left the door open to raising other taxes.

''Nobody is talking about raising income tax rates,'' Simpson said.

He later backpedaled, however, saying he was only speaking for himself.

In a meeting Sunday with congressional leaders, Bush promised everything, including taxes, would be on the table.

''No preconditions means no preconditions,'' Mitchell said. ''If there are preconditions, we would have to reconsider.''

Still, several lawmakers expressed reluctance to participating in a summit. They noted that a summit last year produced a gimmick-riddled deficit reduction package that was eventually dumped.

Simpson cited a variety of alternatives the administration might consider to reach the goal of bringing the deficit down to the $64 billion level required by the Gramm-Rudman balanced budget law for the fiscal year starting Oct. 1.

''Value-added taxes, additional user fees, taxes on booze and cigarettes, a national lottery, a one-cent national sales tax, all sorts of things like that are in the mix, some of it talked about and some of it not,'' Simpson said.

Fitzwater refused to comment on specific proposals Bush may consider. ''We're not going to prejudge the process by speculating in any fashion,'' he said.

-30- 3746

#90129u0355 05/09/1990 ~United Press International

(MAY 9) UPI - Three-term conservative Republican Senator Jesse Helms easily won re-nomination in Tuesday's primary elections in North Carolina. The question still UNdecided is who will oppose him in November. With most precincts in, it appears Harvey Gantt... the first black mayor of Charlotte... and Michael Easley are headed for a June Democratic runoff.

The U-S-S Conyngham was being towed toward its homeport of Norfolk, Virginia, Tuesday night. Earlier in the day, the 27-year-old guided missile destroyer was damaged when fire erupted in the boiler room and spread to the combat information center. One officer... identified by naval officials as 34-year-old Lieutenant Algernon Pope Gordon Junior of Montgomery, Alabama... was killed in the blaze. 12 sailors were injured.

Cause of the fire is under investigation.

The New York Times says the United States is offering to halt chemical weapons production if the Soviets agree to conditions... including large cuts in the poison gas supplies of both nations. The proposal was first made last month by President Bush during Soviet Foreign Minister Shevardnadze's visit to Washington. It was repeated last week when Secretary of State Baker met with Shevardnadze in Europe.

(MAY 9) UPI - Aides to Bolivian President Jaime Paz Zamora say he asked President Bush during their meeting Tuesday for more U-S aid to help underwrite a campaign to combat Bolivia's coca crop. Coca is the raw material for cocaine. Bush has already asked Congress for 185-Million dollars for Bolivia in fiscal 1991 as part of his Andean anti-drug strategy.

The U-S ambassador to Peru is denying newspaper reports that the Bush administration will send troops to suppress the cocaine trade and Peru's guerrilla war. But Anthony Quainton says talks are under way for the United States to supply 35-Million dollars in equipment and weapons to Peruvian security forces.

A federal court jury in Los Angeles Tuesday awarded singer Tom Waits nearly two-and-a-half Million dollars in damages in a voice piracy

lawsuit. The jury found Frito-Lay and its ad agency illegally impersonated Wait's raspy voice for a radio jingle touting a new corn chip. In 1988, Bette Midler won a lawsuit against an ad agency for misappropriating her voice. UNlike the Midler ruling, the Waits case was the first to involve someone imitating a famous voice but singing original lyrics... instead of a song for which the artist is known.

#90129u0380 05/09/1990 ~United Press International

MEXICO CITY (MAY 9) UPI - Pope John Paul II called on governments of the world to respect international accords on refugees, telling their envoys in Mexico they could benefit tomorrow from the solidarity they show today.

The Pope, entering the fourth day of a week-long visit to Mexico, was scheduled to meet Wednesday with representatives of other Christian churches and the Jewish community at the Apostolic delegation in Mexico City before traveling to the northwestern city of Durango to address inmates and visit a cathedral.

The Pope Tuesday told a gathering of foreign diplomats accredited in Mexico that the church ''cannot and must not remain indifferent to the destiny of so many millions of human beings.''

Referring to the plight of the world's millions of refugees, John Paul II recalled internationally ratified agreements of 1951 that were ''solemnly sanctioned by the United Nations Convention.''

''It is urgent to put (the agreements) into practice,'' he said.

John Paul said he was aware of the problems in solving each case, but added, ''The international community cannot postpone the moral and humanitarian aspects of these dramatic situations.''

''Whoever, for various reasons, enjoys today the benefits of better living conditions also has a greater responsibility,'' John Paul said. ''Maybe tomorrow, that same person will be the beneficiary of the solidarity he fomented before.''

John Paul II also touched briefly on the issue of foreign debt, which he said was hindering development in some countries.

''The mechanism that was to serve precisely as help for developing countries has become a brake, not to speak of, in certain cases, an accentuation of underdevelopment,'' the pope said. ''This shows evidently that technical measures are not enough to solve the serious problems that threaten international balance.''

Earlier Tuesday, the pope celebrated a mass for Mexico's bishops and hundreds of thousands of faithful in Aguascalientes, 300 miles northwest of Mexico City.

''A new perspective of contacts between the church and the political community of this country is taking shape in our days and in this new phase of better understanding and dialogue,'' the pope said.

The Vatican announced Tuesday in Rome that the pope has named Archbishop Girolamo Prigione, already apostolic delegate in Mexico, as the Holy See's permanent special envoy to Mexico - a possible prelude to the establishment of full diplomatic relations with Mexico, which were broken in 1857.

Prigione, 68, has been apostolic delegate in Mexico since Feb. 7, 1978. Vatican sources said he will remain apostolic delegate in addition to his appointment as permanent special envoy.

The Vatican appoints an apostolic delegate in countries that have no regular diplomatic relations with the Holy See. His post is strictly ecclesiastical - to watch over the state of the church in the territory assigned.

President Carlos Salinas de Gortari named his special representative to the Holy See shortly before the pope left for his second Mexican visit. The pope, who began a one-week pastoral visit Sunday, first visited Mexico in 1979.

Later, the head of the Roman Catholic Church traveled to the neighboring town of San Juan de los Lagos in the state of Jalisco to say mass and crown an image of the Madonna.

There he addressed hundreds of thousands of young people, calling on them to stay away from drugs and violence.

''Youth of Mexico, do not destroy your qualities and values by putting them in the service of the powers of evil existing in the world,'' the pope said. ''Will you fall to the temptation ... with the power of destructive and assassin drugs, the blinding force of hedonism or the irrational influence of violence?''

#90129u0382 05/09/1990 ~United Press International

LOS ANGELES (MAY 9) UPI - The Environmental Protection Agency, in the first official government estimate of the toll of ''passive smoking,'' estimates smoking causes more than 3,000 cases of lung cancer in nonsmokers each year, a published report said Wednesday.

The EPA soon will declare second-hand cigarette smoke a known carcinogen and release a draft of an 18-month study on second-hand smoking, along with a proposed guide to reducing the hazard of second-hand smoke in the workplace, the Los Angeles Times said.

The draft risk assessment is expected to be published for public review and submitted later this month or early in June to an independent Science Advisory Board for review.

Among the findings are estimates that 3,000 nonsmokers develop lung cancer each year from breathing the smoke of other people.

The study already has shaken the tobacco industry with the prospect of second-hand smoke being included with radon and benzene on a list of about two dozen so-called Class A carcinogens.

The EPA has received a flood of comment from the industry, the Times said.

Tobacco giant Phillip Morris Inc. is offering a study from a doctoral candidate at Yale University purporting to show no statistically significant cancer risk to nonsmokers exposed to the tobacco smoke of others.

EPA scientists, saying the study is not yet complete, refused to discuss their findings. Bob Axelrod, the EPA's expert on indoor pollution, said the draft and the guidelines will be backed up by 24 studies on passive smoking published in professional journals.

Former Surgeon General C. Everett Koop issued a landmark report in 1986 in which he estimated from ''several hundred to several thousand lung cancer deaths per year'' among nonsmokers could be linked to second-hand smoke.

The EPA has said the cost of all sources of indoor pollution could be in the tens of billions of dollars in medical costs and absenteeism.

Word of the pending EPA findings was welcomed by anti-smoking groups.

''I think this is a major milestone in the protection of nonsmokers,'' said Mark Pertschuk, executive director of Americans for Non-Smokers Rights, based in Berkeley, Calif.

''It tells us just how bad tobacco smoke is compared to other dangerous substances,'' Pertschuk said. ''I believe this is going to radically alter the extent to which we as a society will accept exposure to this toxic source.''

#90129u0390 05/09/1990 ~United Press International
(MAY 9) UPI - Hitting a grand slam home run, particularly against a future Hall of Fame pitcher, was the furthest thing from Gerald Perry's mind Tuesday night.

But it happened.

Perry's first grand slam highlighted Kansas City's six-run first inning off Nolan Ryan and led the Royals to a 10-5 victory over the Texas Rangers at Arlington, Texas.

The victory was the third straight for the last-place Royals. Mark Gubicza 2-4, allowed four hits and struck out eight over seven innings for the triumph.

''I have never thought about hitting a grand slam, especially against a Hall of Famer like Nolan Ryan, and I'm still surprised I hit it,'' Perry said afterward.

The grand slam was the eighth given up by Ryan during his career, one short of the major league record.

''I saw he had been getting behind and I thought he might try to start me off with a fast ball,'' Perry said. ''The location wasn't where he wanted it.''

Perry unloaded the first pitch over the center field fence.

Ryan's rocky first inning was the second straight time he had been hit hard in the opening inning. Ryan retired only two batters and was lifted after pitching 2-3 of an inning for the first time since 1985.

''I deserved to come out in the first inning,'' said Ryan, 4-2, who is seven victories away from the 300-win plateau. ''I'm disappointed because in my last two starts I haven't done the things I need to do to help my team win.''

Ryan said he would like to start again as soon as possible, and Rangers

Manager Bobby Valentine said he might move Ryan up two days. Ryan was not scheduled to pitch again until Sunday but Valentine said he might start Friday because of his short work Tuesday night.

After Perry's grand smash, Bob Boone walked and scored on Terry Shumpert's double.

Texas scored in the first when Jeff Huson doubled, moved to second on a groundout and scored on Ruben Sierra's fielder's choice. Trailing 9-1 ini the seventh, the Rangers added a three-run pinch hit homer by Thad Bosley.

Elsewhere in the American League, Oakland blanked New York 5-0, Chicago topped Toronto 4-1, Milwaukee shaded Detroit 7-5, Minnesota scalped Cleveland 6-5, Seattle edged Boston 2-1 and California blasted Baltimore 6-0.

In the National League, it was: Chicago 10, Atlanta 8 in 11 innings; New York 4, San Francisco 1; Pittsburgh 10, San Diego 2; Montreal 9, Los Angeles 1 and Houston 3, Philadelphia 2 in 10 innings.

-- AROUND THE AL --

Athletics 5, Yankees 0

At Oakland, Mark McGwire drove in two runs in the first inning and Scott Sanderson and Gene Nelson combined on a six-hit shoutout to lift the Athletics. Sanderson improved to 4-1 and Nelson earned his second save. Greg Cadaret, 1-2, allowed three runs in 5 2-3 innings. McGwire's first-inning hit broke an 0-for-18 slump.

White Sox 4, Blue Jays 1

At Toronto, Ron Kittle, who missed most of the 1989 season following surgery to remove a herniated disc, smacked two homers and drove in three runs to lift Chicago. Greg Hibbard, 3-2, scattered seven hits over seven innings for the win. Bobby Thigpen notched his seventh save. John Cerutti, 1-5, held Chicago to six hits over seven innings and took the loss.

Brewers 7, Tigers 5

At Milwaukee, Rob Deer belted a three-run homer in a four-run third inning to power the Brewers. Paul Mirabella, 1-0, relieved in the fifth and pitched 3 2-3 scoreless innings. Dan Plesac earned his sixth save. Frank Tanana, 2-2, allowed six runs on five hits in two-plus innings. Detroit's Cecil Fielder slammed his league-leading 12th homer.

Twins 6, Indians 5

At Minnesota, Gary Gaetti's tie-breaking single helped cap a six-run comeback for Minnesota. Juan Berenguer, 2-0, pitched 3 2-3 innings of relief for the win and Rick Aguilera worked the ninth for his sixth save. The Indians jumped on starter David West for five runs in the first inning but managed just one hit the rest of the way. Steve Olin, 0-2, suffered the loss.

Angels 6, Orioles 0

At Anaheim, Calif., Chuck Finley pitched a three-hitter and Chili Davis and Brian Downing slugged two-run homers to help the Angels snap a five-game losing streak. Finley, 4-2, pitched the Angels first complete game of the season, striking out six and walking three in his second career shutout.

Mariners 2, Red Sox 1

At Seattle, Harold Reynolds doubled home Mike Brumley from first with one out in the ninth inning to lift the Mariners. Brumley drew a one-out walk off reliever Wes Gardner, 0-1, and scored when Reynolds hit a sharp grounder down the right field line. Boston Manager John McNamara argued the winning hit should have been called foul. Reliever Billy Swift, 2-0, combined with starter Matt Young on a four-hitter and earned the victory.

#90129u0433 05/09/1990 ~United Press International

(MAY 9) UPI - The last time Cotton Fitzsimmons coached a winning team at the Forum before Tuesday night, Richard Nixon was President and the New York Knicks were defending NBA champions.

And the Phoenix Suns last won there more than six years ago, until their stunning 104-102 upset of the Los Angeles Lakers at Inglewood, Calif., in the opener of their Western Conference playoff series.

Fitzsimmons' losing streak at the Forum was at 37 games, dating to Feb. 17 1974 when he coached Atlanta. The Suns lost 22 straight on the Lakers' court since April 1984.

''The streak has nothing to do with this building,'' Fitzsimmons said. ''The streak had to do with the fact that the Lakers always had good players and our players weren't so good.''

Usually calm 6-foot-10 Phoenix center Mark West gave credit to Kevin Johnson for his career playoff-high performances of 24 points and seven blocks. West added 16 rebounds to help the Suns gain the homecourt edge in the best-of-seven series.

''We talked about a lot of things,'' West said. ''(Johnson) said everybody has to do their role. He told me I had to stay aggressive and intense for us to have a chance.''

''I told him to be more aggressive,'' Johnson said. ''He said, 'It's not in my personality,' but I told him he's always challenging me in practice. Well, then he said he'd do it.''

Aggressiveness paid off as Phoenix rallied from an eight-point deficit in the final period. Los Angeles, which had beaten the Suns eight straight times in the playoffs - including last year's sweep in the conference final - was held to just one free throw over the final 3:39.

The fact that Phoenix was playing just two days after eliminating Utah in Game 5 of the first round may have been a factor in the win.

''This was a big advantage for us because we jumped from one series to the other,'' said Johnson. ''We didn't want to sit around and rest.''

The series will continue at the Forum in Game 2 Thursday night before shifting to Phoenix for two games.

Despite the loss, Lakers' forward James Worthy was not too shaken.

''We've been down before; it's a seven-game series,'' Worthy said. ''First thing we have to do is win Thursday night. Then we've got to win on the road.''

In other NBA games, Detroit destroyed New York 112-77, and Portland defeated San Antonio 122-112.

Pistons 112, Knicks 77

At Auburn Hills, Mich., Isiah Thomas scored 21 points and James Edwards added 18 to lead Detroit to a club playoff record equaling victory over New York in the opener of their Eastern Conference semifinal series. Patrick Ewing led New York with 19 points despite sitting out the entire fourth quarter. Eddie Lee Wilkins scored 14, and Trent Tucker and veteran Maurice Cheeks added 10 each for the Knicks.

Trail Blazers 122, Spurs 112

At Portland, Terry Porter scored 27 points helping the Blazers take a 2-0 lead in their Western Conference semifinal playoff series. Clyde Drexler scored 22 points and Jerome Kersey added 20 to help Portland to its fifth straight playoff victory and 13th triumph in its last 14 games. Terry Cummings scored 33 points to lead San Antonio and David Robinson added 31.

#90129u0465 05/09/1990 ~United Press International
(MAY 9) UPI - Andre Dawson borrowed power from the wind and the pitcher to hit two homers in a game for the 30th time of his career.

Dawson tied the game with a homer in the ninth and won it with a two-run shot in the 11th Tuesday at Chicago, handing the Cubs a 10-8 victory over the Atlanta Braves.

The blasts came with 25 mph winds blowing out at Wrigley Field.

''I didn't hit it as good as I'd like but with the way the wind was, it went out,'' Dawson said of his ninth-inning solo homer into the empty center field bleachers.

With one out in the 11th against Dwayne Henry, 0-1, Mark Grace singled and Dawson drove a 2-1 pitch to dead center for the game-winner.

''I wanted to let the big right-hander (Henry) provide the power,'' said Dawson, who has 17 hits in his last 49 at-bats (.347), including five homers and 13 RBI. ''I was watching some films today and noticed that I was jumping at the ball. I just wanted to stay back, stay behind with my hands.''

It was Dawson's first two-homer game since Sept. 25 at Montreal.

Cubs Manager Don Zimmer was so excited when Dawson tied the score, he forgot what month it was.

''When he hit the one to tie it up, I thought we'd won the seventh game of the World Series,'' Zimmer said.

Bill Long, 1-0, pitched 2 1-3 innings of relief for his first victory since coming to the Cubs from the Chicago White Sox April 30.

''That man (Dawson) can go out and get five dingers - I'll take it any way I can,'' Long said. ''It was a great two innings.''

The Braves also were beneficiaries of Chicago's legendary winds.

Atlanta cracked three home runs in the game. Jeff Blauser hit his third in two days, and Greg Olson and Ron Gant each hit their first of the season.

''There were several times we should've been bunting and we let them hit '' Atlanta Manager Russ Nixon said. ''When Gant homered (in the eighth), he was supposed to bunt.

''When the wind's blowing out here, you might as well throw all caution to the wind.''

In other National League games, Pittsburgh clubbed San Diego 10-2, Montreal slammed Los Angeles 9-1, New York trimmed San Francisco 4-1, and Houston edged Philadelphia 3-2 in 10 innings.

In the American League, it was Oakland 5, New York 0; Chicago 4, Toronto 1; Minnesota 6, Cleveland 5; Milwaukee 7, Detroit 5; Kansas City 10, Texas 5; Seattle 2, Boston 1; and California 6, Baltimore 0.

-- AROUND THE NL --

Pirates 10, Padres 2

At Pittsburgh, Mike LaValliere and Andy Van Slyke each homered and drove in three runs to key a 16-hit attack and lift the Pirates to their fourth straight victory. Barry Bonds and Wally Backman added two-run singles to back Walt Terrell, 1-1. Eric Show, 0-4, lasted only 1 1-3 innings, allowing four runs on five hits with one strikeout.

Expos 9, Dodgers 1

At Montreal, Tim Wallach drove in three runs with two homers, helping Bill Sampen win his first major league start. Sampen, 1-0, pitched five innings as a late replacement for injured Oil Can Boyd, who was scratched after reporting numbness in the middle finger of his pitching hand. Loser Tim Belcher, 2-3, surrendered five runs on eight hits and two walks over five innings.

Mets 4, Giants 1

At New York, Rick Reuschel walked Kevin McReynolds with the bases loaded to snap a seventh-inning tie and send the Mets to their fourth straight victory. San Francisco lost its third straight game and seventh in its last 11. Sid Fernandez, 2-3, held the Giants to four hits over the first seven innings and John Franco finished for his seventh save in seven attempts. Reuschel fell to 2-3.

Astros 3, Phillies 2 (10 innings)

At Houston, Rafael Ramirez doubled home Eric Yelding from second base with one out in the 10th inning to snap the Astros' three-game losing streak. Yelding singled off Dickie Noles, 0-1, with one out and stole second. Dave Smith, 1-2, pitched the 10th for the victory.

#90129u0493 05/09/1990 ~United Press International

HONG KONG (MAY 9) UPI - U.S. Consul General Donald Anderson cautioned Beijing Wednesday against restricting freedoms in Hong Kong when the communist nation regains sovereignty over the British colony in 1997.

Anderson underlined U.S. involvement in Hong Kong and American support for its free market system in a speech to members of the American Chamber of Commerce and Xinhua, China's official news agency and unofficial consulate in the colony.

''It is vital that Hong Kong remain an open city, an international financial and commercial center which fully participates in the world trading system,'' Anderson said. ''The United States shares Hong Kong's commitment to free-market principles.

''Our fundamental values make us hope the people of Hong Kong will continue to enjoy civil and political liberties and develop democratic institutions within the framework of one country, two systems.

''In our view, the preservation of Hong Kong's free-market principles and individual freedoms are essential to Hong Kong's continued prosperity and stability.''

Under an agreement with London in 1984, China pledged that Hong Kong could keep its free-wheeling capitalist system for 50 years after 1997, when Britain's 99-year lease on the colony expires.

Confidence among Hong Kong's 5.8 million people that China would keep its pledge plunged in the wake of Beijing's military crackdown on mainland democracy advocates in June.

Many people in the colony supported China's democracy movement, and following the crackdown Beijing branded Hong Kong's liberal leaders as subversive and warned that their activities would not be tolerated after 1997.

China's increasingly hard-line stance concerning Hong Kong and a series of diplomatic rows with Britain over the colony's future have heightened the confidence crisis.

On average, more than 1,000 of the colony's residents - mostly middle-class professionals - emigrate each week.

Anderson urged China to preserve Hong Kong's civil liberties after 1997, saying those freedoms played a major role in the colony's success.

''The stability which has helped make Hong Kong so prosperous has not been a stagnant stability,'' he said. ''It has not been a stability which

rigidly restricts people from doing what they want. It has not been a stability based on prohibitions and 'thou shalt not' laws.

''Hong Kong's stability has been an environment of stability, created within a legal and social system which gives individuals the opportunity to live and work freely.''

Anderson said Hong Kong and China were economically interdependent and called on the two governments to ease growing tension over the transition and smooth the diplomatic road toward 1997.

''The political events in Beijing last summer have not modified the important economic and social relations which bind Hong Kong and China, he said. ''It is essential that Hong kong and Beijing maintain a close, cooperative working relationship.''

#90129u0567 05/09/1990 ~United Press International

KATMANDU, Nepal (MAY 9) UPI - A Japanese expedition attempting the first hot-air balloon flight over Mount Everest crash-landed Wednesday on the mountain's Tibet side, injuring one of the three crew members in a fire and stranding them in a remote area, officials said.

Officials of the Japanese Embassy in Beijing and Nepal's Ministry of Tourism said Chinese, Japanese and Nepalese authorities were trying to coordinate a rescue effort to the landing site.

The expedition, sponsored by Japan's TBS television network, was to be the first to balloon over Everest, the world's highest peak at 29,028 feet. The mountain rises from the Himalayas on the Nepal-China border, with Tibet on the Chinese side.

Prachanda Shrestha, an official of the Nepal Ministry of Tourism, said the balloon took off from Tingri in Tibet, on the northern foot of Everest, about 7 a.m. Katmandu time, and headed over Everest for Nepal.

''One hour after takeoff, the pilot reported the winds were not strong enough,'' Shrestha said. ''He therefore reported he was making an emergency landing.''

The copilot, Saburo Ichiyoshi, 44, suffered leg injuries when part of the balloon caught fire during the landing, Japan's Kyodo News Service reported.

The pilot, Michio Kanda, 41, and a cameraman, Atsushi Saito, 37, were apparently uninjured. Shrestha said communications with the crew were sketchy because their hand-held radio transmissions were weak.

The crew was stranded in a remote area, believed to be near the Tibetan town of Nelamo, at an altitude of about 16,400 feet, officials said. They were uncertain about initial reports that the site could be reached by road.

A Nepalese helicopter flew toward the landing site to attempt a rescue, but turned back when the crew determined the location was on the Chinese side, officials said. The helicopter crew communicated with the downed team by radio.

Shrestha said officials were seeking permission from China to allow a Nepalese military helicopter to attempt to reach the site, but said a high-altitude landing would be difficult for the army's French-built Puma and Alouette helicopters.

''We do not know in what type of terrain they have crashed,'' he said.

The balloon crew had planned to fly over the mountain at an altitude of 31,500 feet and land in Nepal in Tumlingtar, about 110 miles east of Katmandu.

Eleven film crews, including one in a jet airplane, were attempting to record the expedition.

#90129u0588 05/09/1990 ~United Press International

TAIPEI, TAIWAN (MAY 9) UPI - The dissident radio ship Goddess of Democracy will apply soon to dock in the northern Taiwan port of Keelung following the government's surprise decision to allow the craft to make a port call, organizers said Wednesday.

''All of the boat's equipment has been shipped from France, and our shipping agent here is actively making all of the necessary preparations '' said Xu Tianfang, deputy director of the Boat for China Foundation, the ship's major organizer.

Government spokesman Shaw Yu-ming announced Tuesday that authorities had decided in an emergency meeting to allow the radio ship to berth in Taiwan to refurbish fuel and supplies for ''humanitarian reasons.''

Taiwan's surprise decision to receive the converted trawler assuaged fears that the boat would not be able to find a port, after Hong Kong rejected its request to dock and Taiwan originally discouraged it from applying.

The Chinese government has harshly denounced the radio ship and warned it will not tolerate support for the boat from other countries or organizations.

The warning was especially threatening to the Nationalist government of Taiwan, which has technically remained in a state of war with Beijing since losing the Chinese civil war on the mainland in 1949.

Local news reports said the radio ship was scheduled to arrive in Taiwan around May 11, less than a week behind schedule after being delayed by storms in the Indian Ocean before reaching Singapore.

The 1,140-ton vessel, which is backed by the Paris-based Chinese dissident group, Federation for a Democratic China, set sail for Asia March 17 from France and arrived March 3 in Singapore to take on fuel, food and 10 journalists.

The pirate radio ship plans to broadcast music, news and pro-democracy messages to the Chinese mainland while anchored in international waters in the East China Sea.

Five legislators and an unknown number of reporters plan to board the ship when it arrives in Taiwan, while a sixth lawmaker, Wang Hsi-hsiung, said he will organize 30 to 50 fishing boats to protect it from possible harassment by Chinese vessels in the sea.

''I believe many of our compatriots are willing to assist and support the goals of the boat,'' Wang said. ''If China tries to harass it, we will warn it to be careful.''

Yan Chiaqi, chairman of the Federation for a Democratic China, arrived in Taiwan Monday, but Xu Tienfang said ''whether the pro-democracy movement activist will board the boat and how he would do so is up to him.''

Chiang Lung, secretary-general of the Keelung Harbor Bureau, Wednesday afternoon said the bureau has not yet received an application from the radio ship to dock, but that it will provide any necessary services upon its arrival.

''We are waiting for its application,'' Chiang said. ''The earlier we get it, the more time we have to make preparations.''

#90129u0615 05/09/1990 ~United Press International

SAN FRANCISCO (MAY 9) UPI - The Public Utilities Commission, faced with a four-year drought that has sapped water reserves, imposed water rationing, raised rates 9 percent and told San Francisco consumers to cut their consumption by 25 percent.

''There is a real emergency,'' PUC President Rodel Rodis said.

Included in the rationing order are a prohibition against hosing down sidewalks and a required shutoff of all decorative fountains. Also, restaurants may not serve water to customers who do not request it.

Rates will go up about 9 percent, increasing the average monthly bill by $6.28.

Water Department General Manager John Mullane said California has gone through four dry winters in a row and ''this was the worst.''

He said the situation is analogous to a person whose bank account keeps dwindling yet who keeps writing checks every day.

Other people also will be affected as 30 Bay Area agencies purchase water from San Francisco. They also will be cut back 25 percent from 1987 levels.

How they pass the reductions on to customers is up to them.

The rationing order is the third imposed on city residents in 13 years. Rationing also was imposed briefly last year.

Mullane said consumpiton in the city already is down 12 percent from 1987 on a voluntary basis so a little more may not be too difficult.

Penalties for using too much water range from double the base rate for those who go 10 percent over the allocation to tenfold for major violators.

The rate increase is needed because hydroelectic power sales have produced less revenue than expected.

Eight-five percent of San Francisco's water comes from the Hetch Hetchy water project in Yosemite National Park.

The PUC said Tuesday it will look for consultants to help conduct a feasibility study of other water resources. This could include tapping more underground wells.

Mullane was not optimistic about finding major new sources because most of the water resources in the Bay Area were tapped years ago.

-30- 2198

#90129u0727 05/09/1990 ~United Press International

EMMAUS, PA (MAY 9) UPI - Mountain bikes have been banned from almost half the nation's parks and forests, a magazine survey released Wednesday said.

The survey by Bicycling and Backpacker magazines, published by Rodale Press in northeastern Pennsylvania, said 44 percent of park and land managers polled do not allow the bikes to use their unpaved trails.

One-third of the managers of parks that do permit mountain bikes said those bikes have damaged their park and forest ecology.

''It's SOS time for off-road cycling to save our sport,'' said James McCullagh, group publisher for the two magazines.

''This is an issue of ethics for all our cyclists, to treat our land as a sacred trust, and also for land managers, to maintain our tradition of multiple trail use,'' McCullagh said. ''We feel it's time to stop focusing on our differences and remember that we all want the same thing - to enjoy and respect our natural resources while also respecting the rights of others to do the same.''

The survey of more than 1,000 park and land managers found that in parks that permit the bikes, 54 percent of managers believe mountain bikers should have the same rights as others to use trails.

The poll also found that tension between cyclists and other trail users is the main reason that recreation managers have prohibited use of the bikes.

''It's not hard to appreciate the perspective of hikers and horseback riders on this issue,'' said Tim Blumenthal, mountain bike editor of Bicycling. ''However, our survey shows most riders can and do coexist peacefully with other trail users.

''It's unfair to this responsible majority to have trails closed. Unless there is compelling evidence to exclude them, mountain bikes should be

permitted to use all non-wilderness trails,'' Blumenthal said.

The survey indicated that opponents and supporters of mountain bikes both agree that education, activism and cooperation are the keys to solving the problem.

#90129u0780 05/09/1990 ~United Press International

(MAY 9) UPI - Flooding drives hundreds from homes in Arkansas and Texas... that story and other top news from the 'round-the-clock wires of United Press International.

Texas authorities say they don't know what to expect when the rain-swollen Trinity River reaches Lake Livingston in southeast Texas.

One official says the consequences could be a ''mega-natural disaster'' that could rank among the largest floods this century.

The Trinity- which is running about eight-feet above flood level- has been causing havoc along its path since heavy rains deluged the Lone Star state about two weeks ago.

A spokesman for the trinity River Authority says the river's crest should reach Lake Livingston later today.

Meanwhile, the crest of the Arkansas River is moving downstream from Little Rock today.

Little Rock city officials say the Arkansas crested about five feet above flood stage yesterday. A spokesman for the state Emergency Services says the river should begin to drop later in the day.

As many as 450 families fled the rising Arkansas as it swelled outside of its banks yesterday.

Voters in four states yesterday kicked off a five-week period in which nearly half the country will choose candidates for the November general election.

In North Carolina, Charlotte Mayor Harvey Gantt and Michael Easley appeared headed for a runoff in June for the Democratic senate nomination.

With more than 94 percent of precincts reporting, Gantt led 38 percent compared with Easley's 30 percent.

If Gantt, the first black to ever run for a U-S Senate seat in North Carolina... receives less than 40 percent of the vote, it's up to the

second place finisher to decide if he can afford a runoff.

The winner will face Republican Senator Jesse Helms in November.

Also in North Carolina, 100-year-old Henry Stenhouse lost to retired Army Major Don Davis of Erwin in the Third Congressional District G-O-P primary.

The other race of note came in Ohio, where Republican Representative Donald Lukens lost his bid for re-election in the G-O-P primary.

Lukens was convicted of a misdemeanor last year for having sex with a 16-year-old girl at his Colombus, Ohio, apartment. He has appealed the conviction... but the long-shot to save his political career failed.

In addition to North Carolinia and Ohio, voters cast primary ballots in Indiana and West Virginia.

-30- 2583

#90129u0785 05/09/1990 ~United Press International

(MAY 9) UPI - A showdown is looming between the Western allies and the Soviet Union over the issue of NATO membership for a united Germany.

West German Chancellor Kohl says he's rejecting a Soviet proposal to delay a decision on German membership in NATO until after Bonn and Berlin are united.

Kohl told reporters yesterday that he considers the Soviet plan to separate the external and internal aspects of German unification nothing more than what he called ''negotiations poker.''

Soviet Foreign Minister Shevardnadze made the proposal during the weekend at the so-called ''two-plus-four'' meeting in Bonn. The Kremlin opposes full NATO membership for a united Germany... but Kohl insists upon it. The East German government also reportedly is giving a cool reception to the Soviet proposal.

The two-plus-four talks on German unification consist of the two Germanys and the four World War Two victors- the United States, Britain, France and the Soviet Union.

Navy officials are looking into the cause of the fire yesterday aboard the 27-year-old U-S-S Conyngham. The blaze... which killed one sailor and injured 18 other seamen... appears to have started in the destroyer's boiler room.

Earlier today, the crippled vessel was towed into its home port of Norfolk Virginia.

The blaze started yesterday morning as the Conyngham performed maneuvers about 80 miles off the North Carolina coast. Flames quickly spread from the ship's boiler room to the combat information center, the area where commanders do their work in combat situations.

The dead sailor has been identified as Lieutenant Algernon Pope Gordon Junior.

Naval investigators are also looking into an incident with a hovercraft in the Chesapeake Bay which cost one sailor his life. The accident occurred when two Landing Craft Air Cushions were completing a towing exercise. The hovercrafts are used to transport troops and equipment.

-30- 2102

#90129u0806 05/09/1990 ~United Press International

(MAY 9) UPI - Jurors in the case of the alleged ringleader of an apparently racially motivated New York slaying are expected to resume deliberations later today.

Yesterday, the panel heard closing arguments in the trial of Keith Mondello.

19-year-old Mondello is charged with inciting a mob of white youths to attack a group of four black teen-agers who entered the predominantly white Bensonhurst neighborhood in Brooklyn last August.

One of the black teens... 16-year-old Yusuf Hawkins... was shot to death.

Mondello's lawyer tried to sway the panel to find his client innocent by telling them that they could safely convict Mondello of being a ''jerk.'' But attorney Stephen Murphy told the jurors point-blank that they could NOT in good conscience find Mondello guilty.

Prosecutor Paul Burns argued on behalf of finding Mondello guilty. Burns told jurors that Mondello rounded up his friends and goaded them into a frenzy to attack the group of blacks.

Today marks the third day of jury deliberations in the trial of accused Bensonhurst gunman Joseph Fama. Fama and Mondello's cases were heard by separate panels because Mondello had given statements to police accusing Fama of pulling the trigger in the August 23rd killing.

The Environmental Protection Agency has released the the first official government estimate of the toll of ''passive smoking.''

The E-P-A estimates smoking causes more than three-thousand cases of lung

cancer in non-smokers each year. A report says the E-P-A soon will declare second-hand cigarette smoke a known carcinogen.

The agency soon will release a draft of an 18-month study on second-hand smoking, along with a proposed guide to reducing the hazard of second-hand smoke in the workplace.

The draft study is expected to be published for public review and submitted this month or next to an independent Science Advisory Board for review.

The study already has shaken the tobacco industry with the prospect of second-hand smoke being included on a list of about two dozen so-called Class-A carcinogens.

The tobacco industry is objecting to the findings.

Phillip Morris is offering a study from a doctoral candidate at Yale University purporting to show NO statistically significant cancer risk to non-smokers exposed to the tobacco smoke of others.

#90129u0810 05/09/1990 ~United Press International

TOKYO (MAY 9) UPI - A team of U.S. Commerce Department officials and their Japanese counterparts opened talks Wednesday aimed at improving the two-way flow of industry-related technology and locating opportunities for American business in Japan.

The two days of talks are not confrontational, said U.S. Commerce Undersecretary Michael Farren, head of the 26-member Commerce Department team, but rather are aimed at forestalling the problems that have led to America's often bitter trade relations with Japan.

''What we hope to achieve is a cooperative relationship among our industries and I believe the Japanese understand it is within their interest to do so,'' Farren said in an interview with United Press International.

Trade friction between the world's two major economic powers has been eased somewhat since they reached an agreement April 5 in Washington on changes both countries need to make to reduce the nearly dlrs 50 billion annual U.S. trade deficit with Japan.

But the lack of foreign access to Japanese research continues to be a source of friction in the United States.

Japan, using relatively modest sums of money, has been able to gain access

to U.S. technology by entering into research projects with U.S. companies or funding research at U.S. universities.

The U.S. Commerce Department team hopes to find ways to make technology transfers mutually beneficial.

Commerce Department officials will meet for two days with their counterparts from the Ministry of International Trade and Industry in Tokyo and then fan out across Japan Friday to tour Japanese factories and research facilities.

The Commerce Department team is working on 14 specific industries - furniture, automotive, amorphous metals, aluminum, construction, machine tools, telecommunications, computers, flat-panel displays, fiber optics, instrumentation, software and textiles. It will report back to specific U.S. industries and industry associations on the results of their trip.

The Japanese say their $1 billion Intelligent Manufacturing System project announced in January is an example of Japanese cooperation in industrial technology transfer.

The 10-year project has a goal of developing worldwide standards for future technologies and integrating existing manufacturing technology.

The Japanese government and business community will contribute $600 million with European and U.S. companies to put up $200 million each. A research facility will be built in North America or Europe.

The Commerce Department was initially reluctant about the project because it had not been consulted prior to its announcement.

But a U.S. official said the Commerce Department now recognizes the project could benefit U.S. industry and generally favors it.

OLONGAPO, Philippines (MAY 9) UPI - Police charged three Filipinos with homicide and attempted robbery Wednesday in the killing of a U.S. Marine sergeant but the prosecutor dismissed the case and ordered the suspects released because the arrests were improper.

In a resolution, Assistant Prosecutor Dorentino Floresca said the arrest of the three without proper judicial warrants was ''unjustified.''

''We cannot help but apply the rules equally regardless of the nature of the offense and the personalities involved,'' Floresca said in dismissing the case and ordering the suspects released.

But Police Lt. Leonardo Esteban said the three suspects would not be freed adding, ''We are going to oppose the resolution.''

Gunnery Sgt. John Fredette, 34, on temporary assignment at the American-run Subic Bay Naval Base from the Marine Station in El Toro, Calif., was fatally shot with a single bullet in the back of the head Friday night in Olongapo, a liberty city 50 miles northwest of Manila.

Police said Reynato Angeles, 33, William Burke, 24, and Johnny Quitlong, 25, were arrested between 10 p.m. Saturday and 5 a.m. Sunday.

Olongapo Police Chief MacArthur Torres told reporters Tuesday that Angeles admitted shooting Fredette, originally of Chicopee, Mass., and a resident of Buena Park, Calif., but Burke and Quitlong denied involvement.

The charge sheet filed Wednesday said the three, believed under the influence of drugs, tried to hold up Fredette but the gun accidentially went off. It said the three panicked and fled without taking the Marine's valuables.

An additional charge of illegal possession of firearm was also lodged, although the weapon has not been found.

Robert Coble, a civilian spokesman at Subic, said the investigation was continuing. Asked if initial reports that communist guerrillas were involved was being pursued, Coble said, ''part of our investigation is to consider all avenues and theories.''

No one claimed responsibility for the slaying of Fredette.

Eight Americans have been killed in the past three years in attacks blamed on the communist New People's Army. The 19,000-strong armed wing of the outlawed Communist Party of the Philippines has been battling the Manila government for 21 years.

Rebels have threatened to kill an American to dramatize opposition to the talks opening Monday on the future of U.S. facilities in the Philippines. U.S. basing rights expire next year.

Following the Fredette killing, U.S. authorities canceled leave and liberty for the 40,000 troops, defense department employees and military dependents at Subic and five other installations in the Philippines.

Rear Adm. Roger Rich, commander of U.S. forces in the Philippines, Wednesday announced additional security measures, including a midnight to 5 a.m. curfew on all American personnel and the enforcement of a personnel tracking system.

''Liberty and travel restrictions will be continuously re-evaluated,'' Rich said. ''The concern is to see to the safety of all Americans at all U.S. facilities.''

Olongapo city Mayor Richard Gordon denied in a radio interview suggestions the police were hurrying up the solution of the case to allow the opening of gates to the city of bars and nightclubs heavily dependent on spending by servicemen.

''We want to make sure the city is secure before the gates are opened,'' Gordon said.

(MAY 9) UPI - Congressional Democrats and Republicans are declaring themselves ready for the budget summit with President Bush. Congressional leaders meet with Bush this morning at the White House for more talks on the proposed summit. Democrats insist that Bush keep his pledge that all options for reducing the deficit... including income tax hikes... are on the table.

Arkansas is suffering the worst worst flooding in 60 years... as parts of the Arkansas River innundate parts of the state. The state Office of Emergency Services says the river is expected to crest today about one foot over flood stage in Pine Bluff, about 40 miles downstream from Little Rock. The river yesterday crested about five feet above flood stage at Little Rock.

Authorities say a fire is burning out of control through thousands of acres of forest in north central Lower Michigan. Officials say destruction in the comparatively remote vacation area includes many buildings... but, so far, NO personal injuries have been reported. Officials do NOT know what sparked the fire. It began yesterday afternoon near Grayling.

The Hubble Space Telescope is facing another test as NASA engineers prepare the instrument to take its first picture of the cosmos. Mike Harrington, who is helping direct the telescope's start-up in Maryland... says the first picture could come as early as today. NASA hoped to take the picture last week, but initial deployment problems put scientists a week behind schedule.

#90129u0879 05/09/1990 ~United Press International

WARSAW, POLAND (MAY 9) UPI - Poland marked the 45th anniversary of the surrender of Nazi Germany with a military parade Wednesday, while

Solidarity said Poland will not be truly free unless Soviet troops leave the country.

The Solidarity newspaper Gazeta Wyborcza carried for the first time detailed information on the presence of 58,000 Soviet troops, revealing they are deployed in 15 of 49 Polish provinces.

The report said the troops occupy thousands of acres and that Poland has lost an estimated $1 billion through deprivation of use of that land since 1956.

The newspaper said legislators demanded that Soviet authorities pay for the use of acreage and dwellings of troops and be fined for any environmental devastation caused by their soldiers. A figure of reimbursement was not set.

Poland celebrated the 45th anniversary of V-E Day - May 8, 1945, the date the surrender of Germany was announced, officially ending World War II in Europe. President Wojciech Jaruzelski and Solidarity Prime Minister Tadeusz Mazowiecki reviewed a low-profile parade of infantry, air force and navy in Victory Square Wednesday before the Tomb of the Unknown Soldier.

''We pay tribute to the heroes who did not allow the Nazis to erase Poland from the map of Europe,'' Mazowiecki wrote in a guest book at the event. ''We have right to live in peace along with the other European nations.''

The parade was broadcast live on television. In its coverage of V-E Day, the television station recalled Poland bore the brunt of Germany's attack in 1939 starting World War II and that 6 million Poles died under the Nazi occupation.

The television report also said the largest resistance movement in Europe, the Home Army, fought the Nazi troops in Poland. By the end of the war, Poland's army had grown to the fourth largest in the world, after the Soviet Union, United States and Britain.

Under a government-in-exile in London, Polish troops helped liberate the Netherlands, Belgium, and part of Czechoslovakia, and beat the Nazi troops in the 1943 battle of Monte Cassino to open the road for Allied troops marching toward Rome.

Communist-led Polish troops helped the Soviets push the Nazis back toward Germany and marched with them into Berlin when the city was seized in 1945.

Soviet troops have been scattered throughout Poland for decades. Gazeta Wyborcza said the pullout of the Soviet troops by the end of 1991 would underscore ''Poland's full sovereignty'' and thus could expedite the

country's admission into the Council of Europe - the body sponsoring the integration of the European countries.

The paper reported on the work of the Parliamentary Foreign Commission, which proposed to introduce amendments to the Polish-Soviet accord on the stationing of the Soviet troops.

There are 13 Soviet airfields covering a total of 145 acres, and 35 garrisons occupying 319,000 acres, including 87,000 acres of forests.

Officers and their families live in 1,157 houses and 9,100 apartments.

#90129u0901 05/09/1990 ~United Press International

(MAY 9) UPI - Police in New York City say a 16-year-old Brooklyn youth was charged with first-degree assault in connection with yesterday's subway shooting of a classmate. Police say the gunman, Andre Aviles, also was charged with criminal possession of a weapon. Police say two shots were fired in the incident and the victim was hit at least once ''square in the chest.'' He's in serious condition.

The Soviet Communist Party newspaper Pravda is ridiculing Lithuanian Prime Minister Prunskiene, who's in London to drum up support for recognition of Lithuania. Pravda noted that Prunskiene is NOT met at airports as a premier. Quoting here- ''There are NO honor guards... and she has to produce her passport.'' Prunskiene met last week with President Bush in Washington.

Vice President Quayle is in France on the last leg of a three-nation European tour. Quayle is to meet with French President Mitterrand today and take part in ceremonies honoring the 100th anniversary of the birth of Dwight Eisenhower, World War Two supreme allied commander and later two-term U-S president. Quayle held talks in London yesterday with British Prime Minister Thatcher. He first stopped in Italy on his tour.

The White House says President Bush will veto a family and medical leave bill because it dictates employee benefits to businesses. The Family and Medical Leave Act would require businesses with more than 50 workers to offer up to 12 weeks of unpaid leave for employees to care for newborns, adopted children or a seriously ill child or parent. House action is expected this week.

#90129u0960 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - President Bush, in a policy shift, has offered a halt on further production as part of a U.S.-Soviet agreement on deep cuts

in stockpiles of chemical weapons, administration officials said Wednesday.

Sweetening his offer to Moscow in hopes of nailing down an agreement for the upcoming superpower summit, Bush has dropped plans to continue chemical weapons modernization even after negotiated reductions begin, the officials said.

That change, which could tie up one of the few remaining loose ends facing U.S. and Soviet negotiators in Geneva, was first broached last month during talks with Soviet Foreign Minister Eduard Shevardnadze in Washington and was discussed again last week when Secretary of State James Baker met with him in Europe.

Settlement of the non-production question would leave one major issue to be resolved before the summit late this month: How and when the superpowers would go about destroying the bulk of their stockpiles to reach the target limit of 5,000 tons on each side.

The United States has an estimated 25,000 tons of chemical weapons and the Soviet Union an estimated 45,000 tons.

Until the latest refinement of his position, Bush insisted that the United States needed to press ahead with production of new-generation chemical weapons even after agreeing to reductions with the Soviet Union.

At the Malta summit in December, he modified that stand by linking the production ban to the signing of a separate worldwide chemical weapons treaty, which could be years away. The Soviets, who claim to have stopped producing chemical weapons two years ago, have opposed any provisions that would permit continued modernization by the United States.

Bush's decision to move up his timetable for an end to production - to a specific date, subject to negotiation, following execution of a treaty to destroy old stocks - was made easier by the fact that the U.S. chemical weapons program has been plagued by technical problems and opposition in Congress.

After considerable political controversy, the United States resumed production of chemical weapons in 1987. Defense officials justified the program as a response to the fact that the United States deployed no new chemical weapons during a 20-year period that saw the Soviets upgrade their own arsenal.

#90129u0979 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - Today's working women will fare no better financially in their retirement than their mothers are now, necessitating

changes in Social Security and pension plans, a report released Wednesday said.

''Women continue to pour into the paid workforce, but retirement income does not reflect their growing contributions,'' the Older Women's League report said. ''For most women, decades of Social Security contributions will translate into virtually the same retirement benefits as those paid to their mothers, who may never have earned wages or paid Social Security taxes.''

The problem is the way Social Security was structured in 1935 and remains today. Although the language was gender-neutral, the Social Security Act was designed to meet the needs of the ''typical'' American family: lifelong paid worker, usually the husband; the lifelong unpaid homemaker, usually the wife; and the dependent children.

Social Security discriminates against women, league President Lou Glasse said, by penalizing dual-earner families (women can only receive the higher of her or her husband's benefit package); divorced spouses, who lose a share of their spouse's benefits after a divorce; caregivers, usually women, whose years of caring for a child or parent are not counted toward retirement benefits; and people who retire early and live long.

''Like Social Security, pensions are based on an antiquated one-worker family model and remain out of reach for most women,'' Glasse said. ''Today, more than three out of four women have no access to their own pensions.''

The league said women, in 1970, received 70 percent of the Social Security benefits men received. In 1989, that percentage grew to just 73 percent.

In 1974, women's average private pension income was 73 percent of men's; by 1987, that ratio had dropped to 58 percent.

By the year 2020, Social Security and pension systems will have practically ended poverty among older men and couples, but poverty will remain widespread among older women living alone - those who are divorced, widowed or never married, the report said.

In addition to changes in Social Security and pension plans, the league urged passage of the Family and Medical Leave Act, which would require businesses with more than 50 employees to offer up to 12 weeks of unpaid leave for employees to care for newborns, adopted children or a seriously ill child or parent. President Bush has threatened a veto.

#90129u0997 05/09/1990 ~United Press International

OMAHA, NE (MAY 9) UPI - Three tiger cubs were born as a result of in vitro fertilization - a scientific first researchers hope will lead to preservation of the animal, the Henry Doorly Zoo announced Wednesday. The cubs were delivered by Caesarian section on April 27 to Nicole, a 9 1/2-year-old Siberian tiger, said Lee Simmons, zoo director.

One of the cubs, a white male, died shortly after birth from respiratory complications. The remaining cubs, a yellow male and female, are strong and healthy, Simmons said. They are being hand-reared by veterinary personnel at the zoo.

Nicole was only a surrogate mother, Simmons said. The eggs from which the cubs were conceived were donated by two Bengal tigers. The father, a seven-year-old white Bengal tiger with black stripes, participated indirectly by providing a sperm sample used to fertilize the eggs in a laboratory Petri dish.

The birth of the cubs was the result of a long collaboration between three zoos - Henry Doorly, the Minnesota Zoological Gardens in Minneapolis, and the National Zoological Park in Washington, D.C.

One of the project leaders, David Wildt of the Department of Animal Health at the National Zoo, hailed the birth as "bringing us one step closer to using reproductive techniques to preserve genetic diversity." He said scientists are now more hopeful that in vitro fertilization may be used to conserve the world's remaining tigers.

The births followed a vast amount of research, Wildt said. The basic in vitro technique for the tiger was pioneered at the National Zoo in 1984 using domestic cats.

A National Zoo team has done similar in vitro studies in a leopard and puma and achieved fertilized embryos. But no births have resulted in the few attempts that were made to transfer the embryos to animals. Last year the Cincinnati Zoo reported the birth of an Indian desert cat kitten produced from an embryo conceived through in vitro fertilization.

#90129u1013 05/09/1990 ~United Press International

LONDON (MAY 9) UPI - Prices on the London International stock exchange were lower at midday Wednesday, with the market lacking strong incentives to move upward.

The blue-chip Financial Times 100-stock index, which rose 29.9 points Tuesday, was down 2.3 points at midday trading to 2,179.7. The narrower top 30 industrial average, which gained 13.8 points Tuesday, was down 7.9 at 1,702.2 at midday. Volume at midday was a low 183.6 million shares, compared with 179.6 million shares traded in the same period Tuesday.

Dealers said investors lacked incentives although they showed some confidence in the underlying strength of the market. The London market was also closely following the U.S. Treasury's $30.5 billion quarterly refunding of notes and bonds.

Among the gainers were Irish paper company Jefferson Smurfit, up 16 cents to $10.24, boosted by a strong earning report. High interest rates negatively affected profits at Trafalgar House, a leading construction company, which was down two cents to $4.72.

Losers included Imperial Chemical Industries, down four cents to $17.64; Barclays, down 24 cents to $8.40; and British Petroleum, down five cents to $5.92.

#90129u1029 05/09/1990 ~United Press International
MOSCOW (MAY 9) UPI - The Soviet Union on Wednesday marked its victory over Nazi Germany by ringing the giant Kremlin bells for the first time since World War II ended and wheeling the latest tactical rockets and heavy tanks through Red Square.

The military, which has been asked to make enormous cost cuts and troop pullbacks under perestroika, put on a grand ceremony to mark the 45th anniversary of its great victory.

The parade at Red Square set off behind the very hammer-and-sickle banner that victorious Soviet troops placed atop the Reichstag in Berlin on May 8

1945, amid the announcement of the end of the war in which 8 million soldiers and 18 million civilians died.

It was the first Victory Day parade on Red Square in five years and several Western diplomats watching the display said it may be the last.

The parade was led by a float that carried a living replica of the World War II victory monument in East Berlin.

High atop the float, a little blonde girl sat hugging the neck of a soldier draped by a brown cape. The girl and the soldier sat unmoving high above Red Square for an hour before the parade kicked off to the martial beat of drums and trumpets.

The military unveiled in public for the first time its latest main battle tank, the T-80 - a vivid contrast to the tiny T-34s of World War II also in the parade.

As the primitive T-34s trundled onto the square, Ivan Zhuravelev, 79, his medals festooned on his chest, waved.

''I feel as if they are my boys,'' said Zhuravlev, who rose to the rank of major in the conflict.

Zhuravlev said his third wound in 1944 ended his chances of going all the way to Berlin.

''I was taken away on a stretcher. I lost a leg,'' he said, tapping his wooden leg.

American comedian Bob Hope, who entertained U.S. Embassy employees Tuesday night at the diplomatic complex, watched the Red Square show of military might.

Hurrying off, he told United Press International: ''It ain't a Rose Parade (in Pasadena).''

Because the Soviets along with the United States have scrapped their medium-range nuclear missiles, the military showed the SA-10 tactical system, known as the ''Grumble'' surface-to-air system with a range of 60 miles.

Also displayed was the BM-22 mulitple rocket system, the missile with a range of 3 to 12 miles that was tested on the battlefields of Afghanistan.

An SS-1 rocket with a range of 168 miles was wheeled out as well, but it had been seen before.

After the Ivan the Great bells chimed for two minutes for the first time since the end of the ''Great Patriotic War,'' as the Soviets call World War II, the voice of Defense Minister Dmitri Yazov boomed through the square.

''In the heroic battle with Hitlerite Germany, the Soviet people not only saved the homeland, but liberated the peoples of Europe from the fascist yoke,'' Yazov said.

Yazov reviewed the rows of troops from atop the burnt-red granite mausoleum containing the remains of Soviet state founder Vladimir Lenin, where he was joined by a fedora-capped Mikhail Gorbachev, Premier Nikolai Ryzhkov and other Soviet leaders.

''The years of the war brought us together,'' Gorbachev said Tuesday on the eve of the national holiday. ''Popular cohesion led us to victory.''

''The memory of that unity gives people confidence that at the present watershed in our history, we shall hold out as well, remaining faithful to the ideals for which our fathers and grandfathers perished and translating them into reality to make life better today and tomorrow,'' Gorbachev said at a Bolshoi Theater gala.

Soviets celebrated the patriotic holiday with their vast country in the throes of an economic crisis and resurgent nationalists from the northern Baltics to Transcaucasia in the south clamoring for freedom from Moscow's rule.

Yazov's address opening the Red Square ceremony also resonated with political overtones tied to current events in the Soviet Union.

The Soviets' wartime triumph over fascism, Yazov said, ''confirmed that any misfortune or difficulty can be overcome not through separatism, but in close union, with mutual respect, aid and cooperation.''

#90129u1032 05/09/1990 ~United Press International

NEW YORK (MAY 9) UPI - Caroline Kennedy Schlossberg has given birth to her second daughter and the second grandchild of former first lady Jacqueline Kennedy Onassis, it was announced Wednesday.

Nancy Tuckerman, spokeswoman for Onassis, said Caroline, 32, had a daughter Saturday at New York Hospital and has returned to her West Side Manhattan home.

''Both mother and baby are doing well,'' Tuckerman said. ''Mrs. Onassis is of course, delighted.''

Tuckerman said the baby was named Tatiana, not a family name but a name both parents ''happened to like,'' and probably would be called Tanya.

Schlossberg, wife of designer Edwin Schlossberg, also is the mother of Rose Schlossberg, who will be 2 years old in June. The daughter of President John F. Kennedy is a practicing attorney.

WASHINGTON (MAY 9) UPI - The driver for Senate leader George Mitchell and House Speaker Thomas Foley, in a hurry to get the top Democrats to an important White House conference on the budget, ran a red light Wednesday on Pennsylvania Avenue.

The two leaders, seated in the back of a black Lincoln Town Car sedan, were expected at the executive mansion down the street from the Capitol for a 10 a.m. budget meeting with President Bush.

At 9:51 a.m., the car and passengers, in an obvious hurry, drove through a red light in front of the District building.

No police officers pursued the high-powered pair. The penalty for the transgression in the District of Columbia is $75.

The driver of the car in question, Foley's driver, Capitol Hill police Sgt. Joseph Powell, later said the traffic light ''was obscured by a truck.''

''Did you see that?'' he asked a reporter at the White House who witnessed the incident.

Powell, on the force for 23 years and a former member of the presidential honor guard, also said, ''I always try to be very careful (in ferrying the Washington Democrat around town).''

''If it was an emergency,'' he added, ''I would have used the red light.''

A red flashing light is mounted on the car's dashboard, a common feature in a city where top officials are frequently whisked through traffic.

Foley and Mitchell, D-Maine, slipped on to the White House grounds in time for the Oval office meeting with Bush, Senate Republican leader Robert Dole of Kansas, House Republican leader Robert Michel of Illinois, Treasury Secretary Nicholas Brady, budget director Richard Darman and chief of staff John Sununu.

The chauffeur-driven sedan carried District of Columbia license No. 18, a low-numbered plate number routinely assigned to ranking public officials in the city.

#90129u1089 05/09/1990 ~United Press International

SELMA, AL (MAY 9) UPI - Schools Superintendent Norward Roussell accepted a $150,000 settlement and resigned as the first black to head public schools in the historic civil rights city of Selma.

Roussell resigned Monday after an agreement was reached with the school board in which Roussell dropped a $10 million discrimination suit against the board and agreed never to apply for the superintendent's job again.

''If I had to do the whole thing over again, the first thing I'd do would be to appoint an interracial group to unify the people behind the school system,'' Roussell said.

Roussell said the lack of racial harmony led to his resignation.

In December, the six white members of the 11-member school board voted not to extend his contract for three years, citing a lack of administrative leadership.

The five black members angrily walked out and called the vote racist and they have not attended school board meetings since.

The decision sparked protests by blacks in Selma, including a school boycott in which schools were closed for three days and a boycott of banks with connections to the school board. Protest marches of 600 or more people were common.

At one point tensions grew so strong that Gov. Guy Hunt sent state troopers and National Guard troops to the schools to maintain order.

In the interim, about 300 white students withdrew from Selma schools and transferred to all-white private schools in the area.

Mayor Joe Smitherman, who also was mayor 25 years ago during Selma's bloody civil rights days, said, ''I wish Dr. Roussell well. In all likelihood his successor will be a black superintendent.''

Black leaders say they are not angry that Roussell chose to accept the settlement and step down because they realize the enormous pressure he has faced, but say the protests will continue.

Roussell said he may stay in Selma and will write a book about his experience.

''I plan to write a book, to address the education of black children, of minority children - and how they're suffering in America,'' he said. ''It's the issue of the 1990s.''

Roussell was hired three years ago from the New Orleans public school system.

NEW YORK (MAY 9) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 73.00-74.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 129.20 c-lb.

Lead, common, U.S. primary producers 45.00 c-lb.; U.S. non-primary (secondary) producers 49.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.45-$4.70 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $118.00-120.25 per troy ounce.

Platinum, soft, 99.5 fine, producer - $482.00-$484.00; dealer-approx., $478.00-$481.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $110.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $109.37 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 306.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 87.00-87.75 c-lb.

#90129u1114 05/09/1990 ~United Press International
WASHINGTON (MAY 9) UPI - Comedic actor Robin Williams, testifying Wednesday on Capitol Hill in support of legislation to help the homeless, did his best imitation of President Bush and said, ''George, read my lips. Help us.''

Williams, the star of last year's hit movie ''Dead Poets Society,'' and fellow comdeians Whoopi Goldberg and Billy Crystal have raised $8.7 million to provide health care for the homeless. The entertainers gathered the money through ''Comic Relief,'' their fund-raising program broadcast on cable television.

Support for the legislation sponsored by Sen. Edward Kennedy, D-Mass., brought Williams and Goldberg to the Capitol to testify three days shy of their next cable special. The bill would provide $265 million to assist homeless people.

The money would be used to establish family support centers and home health service programs in or near low income housing. The money would provide mental health care services to people previously homeless and give funds to Community Development Corporations.

Williams said he is most moved by the plight of homeless children.

''You can't turn your back on them. When people talk about right to life, it doesn't end at birth. It should be amended to a right to a decent life. You need your health and that's why we're here,'' Williams said.

''George, read my lips, help us,'' he quipped.

Goldberg, who has starred in the films ''The Color Purple'' and ''Jumpin' Jack Flash,'' said it is not necessarily the general public that needs to be educated about homelessness.

''It's the education of people who sit in office, who sit in power and have the ability to say yes Panama, Nicaragua, America. It's a very sad state of affairs when we can't take care of our own,'' she said.

''The thousand points of light that they're talking are the people on the streets who are dimming, and should he let us dim, the country will go out '' Goldberg said.

Crystal had been expected to join the other comedians, but Goldberg said he was ill and unable to attend.

Kennedy said the Senate Labor and Human Resources Committee, which he chairs, is scheduled to vote on the bill in June.

The Massachusetts Democrat and other co-sponsors acknowledged there are always supportive voices about the merits of such a bill, but more limited support when it comes time to appropriate the funds.

''We pontificate and give speeches for the authorization bills, but when

it comes to biting the bullet and appropriating the money, we're more reluctant,'' said co-sponsor Sen. Mark Hatfield, R-Ore., who added that the money needs to be spent to attack the causes of the homelessness.

Kennedy said, ''This (bill) is so compelling and the need is so great I'm very hopeful we can convince the president to sign it.''

#90129u1143 05/09/1990 ~United Press International

PITTSBURGH (MAY 9) UPI - The National Environmental Technology Applications Corp. said Wednesday it has identified 11 promising bioremediation technologies for possible use on remnants of the Exxon Valdez oil spill in Alaska this summer.

NETAC, a subsidiary of the University of Pittsburgh Trust, has recommended to the Environmental Protection Agency that laboratory tests be run on select bioremediation proposals. Bioremediation is the use of microorganisms to degrade chemical contaminants such as those found in oil.

The recommendations resulted from the work of an expert panel convened by NETAC at the EPA's request to evaluate 39 proposals submitted by companies in response to the government agency's solicitation in February.

The tests will be conducted at the EPA's Risk Reduction Engineering Laboratory in Cincinnati, Ohio, said John Skinner, acting deputy assistant administrator of the EPA Office of Research and Development.

The laboratory work will determine the ability of the biological methods to degrade weathered crude oil from Prince William Sound, he said. The tests, expected to be completed in May, will identify the most promising new technologies that should be considered for application in Alaska this summer.

The bioremediation proposals were judged according to specific criteria developed earlier this year by NETAC, said Edgar Berkey, the firm's executive vice president and panel chairman.

To identify the best new candidates for a field test, NETAC looked at the effectiveness of products in degrading oil, toxicity, the feasibility of widespread application, and companies' organizational experience and capability, he said.

"NETAC has established a process that will encourage expanded commercial use of bioremediation technologies on oil spills - such as that in Alaska - by allowing companies to know what criteria they must meet to have their products judged effective," Berkey said.

The panel found 11 of the technologies were the most promising but felt that further laboratory testing was needed on weathered crude oil before selecting the best microorganisms for field testing, he said.

NETAC is a non-profit corporation created in 1988 through a unique cooperative agreement between the EPA and the University of Pittsburgh Trust. Its mission is to accelerate the commercialization of innovative environmental technologies such as bioremediation of oil spills.

(MAY 9) UPI - Embankments at some critical points in flood-stricken Arkansas and Texas are keeping water from flooding communities... but officials are wondering just how long they will continue to hold out against rain-swollen rivers. Officials say the Red River levee in southwest Arkansas is in danger of collapse.

Officials in Nepal say Chinese, Japanese and Nepalese authorities are trying to mount a rescue of a three-man Japanese expedition attempting the first hot-air balloon flight over Mount Everest. The balloon crashed today on the mountain's Tibet side, injuring one of the three crew members in a fire.

President Bush wants a new budget proposal to deal with the mounting deficit within a few months... and to that end he's hosting a meeting of congressional Democrats and Republicans this morning at the White House. Democrats insist that Bush be prepared to negotiate on his no-tax pledge.

The Coasts Guard says at least 10-thousand gallons of premium unleaded gasoline leaded from a barge in a waterway separating Staten Island and New Jersey. Officials say the early morning spill has prompted the Coast Guard to close the area to all vessel traffic ''for safety reasons.''

The crippled guided-missile destroyer U-S-S Conyngham arrived early today at Norfolk, Virginia. The Navy has launched an investigation of a boiler-room fire that killed one sailor and left 12 more injured. The destroyer was on routine maneuvers when the fire started early yesterday.

#90129u1157 05/09/1990 ~United Press International

BOGOTA, COLOMBIA (MAY 9) UPI - The attempt by two Colombians to buy Stinger missiles in Florida is linked to a larger terrorist plan by cocaine traffickers, including a failed plot to shoot down President Bush's plane last February, Colombian newspapers said Wednesday.

Colombian authorities discovered 10 French-made anti-aircraft missiles in

the hands of cocaine traffickers Feb. 12, prompting the White House security team to recommend Bush cancel his trip to a Feb. 15 anti-drug summit in Cartagena, Colombia, the newspaper El Tiempo reported.

But Colombia assured the White House that the summit was secure after the missiles were captured, the newspaper said, and Bush attended without incident.

El Tiempo and other newspapers said the French-made missiles and other weapons were to be used in an attempt to shoot down Air Force One as Bush was flying to Cartagena, as well as in a larger plan to attack planes belonging to President Virgilio Barco, the U.S. Embassy in Colombia, and other targets.

The newspapers, citing the arrest of two Colombians who were arrested trying to buy sophisticated Stinger anti-aircraft missiles in Florida last week, said the Medellin cocaine trafficking cartel has apparently not given up that plan.

Alfredo Antonio Ramos Rinoco, 47, and Luis Fernando Arcila Giraldo, 28, were detained in Florida and charged with attempting to buy 120 Stinger missiles and other arms. The arms were to be used to attack government aircraft, FBI officials said.

Broadcast and newspaper stories also said Ramos Tinoco had been detained in 1986 under suspicion of having participated in the murders of a crew of 11 Honduran fishermen off the island of San Andres in the Caribbean.

The massacre was staged in order to capture the fishing boat for use by cocaine traffickers, the reports said. The final disposition of the case was not revealed.

#90129u1160 05/09/1990 ~United Press International

GENEVA (MAY 9) UPI - Diplomatic maneuvering has produced a plan to resolve a dispute over proposed Palestinian membership in the World Health Organization that could have triggered a cutoff of vital U.S. funds to the U.N. agency, WHO officials said Wednesday.

The Palestine Liberation Organization agreed to go along with a resolution indefinitely deferring its bid to join the agency after realizing its efforts faced certain defeat, WHO officials and delegates said.

For the second year in a row, the PLO triggered a controversy by demanding membership for its self-declared ''State of Palestine,'' which Washington and most other Western countries says does not exist because of lack of territory, capital and borders.

By law, the U.S. administration is obliged to immediately cease paying all assessed and voluntary contributions to any organization recognizing such a state.

''That is American blackmail,'' a PLO observer delegation statement said, although PLO officials also said they would not fight deferral ''for the good of WHO and all people.''

The annual assembly of the 167 WHO member states will vote Thursday afternoon on the draft resolution submitted by 19 countries representing Western Europe, Africa, Asia and Arab nations.

Approval by overhelming majority was considered certain.

According to the draft's text, WHO Director General Hiroshi Nakajima would''continue his studies'' on the application of Palestine and report ''at the appropriate time'' - meaning he could defer the question indefinitely.

Although that is what the United States has demanded, observers speculated the United States and Israel may vote against the resolution because the current draft also expresses hope the Palestinian people will at some time be fully represented in WHO ''by their legitimate representatives.''

''That means we could only vote for the resolution if the word 'elected' were inserted between 'legitimate' and 'representatives,''' one U.S. official said.

The United States has always argued the PLO was never elected by the people it claims to represent.

Moderate Arab and other Moslem backers of the resolution - Egypt, Morocco, Oman, Pakistan and Senegal - rejected any changes.

Western sponsors of the text also advised against modification in order to assure majority approval. Those countries were Austria, Finland, France, Ireland, Luxembourg, New Zealand, Spain, Sweden, Switzerland, Denmark, Greece, Italy and Portugal. Yugoslavia was the 19th sponsor.

''It may well be that only two countries will be voting against, as long as the resolution doesn't say 'elected representatives' of the Palestinians,'' said the American official, meaning the United States and Israel.

The United States provides roughly 25 percent of the WHO budget. Last year the U.S. share of the regular WHO budget was $78 million, and it also paid $25 million towards the WHO Global Program on AIDS.

John Bolton, U.S. Assistant Secretary of State for International Organizations, as well as Nakajima warned before the conference began Monday that loss of American funds would be a ''devastating blow'' and ''cripple'' the agency and its fight against disease.

A first PLO attempt to secure WHO membership for its self-declared ''State of Palestine'' was defeated at the 1989 assembly by procedural maneuvering involving secret ballots. But the issue was placed on the 1990 agenda.

#90129u1194 05/09/1990 ~United Press International

GRAYLING, MI (MAY 9) UPI - Fires that swept through tinder-dry northern Lower Michigan, charring thousands of acres of forest land and destroying about 75 homes, were declared contained Wednesday as officials hoped for more rain.

''We're on our knees, hoping for more rain,'' said Scott Heather, assistant regional forest manager at the state Department of Resources field office in Roscommon. ''The little bit we got definitely helped but in a couple days it's going to be dry again. We may see similar conditions next week.''

Gov. James J. Blanchard on Wednesday ordered the Michigan National Guard to help people left homeless by the fire and continue to provide shelter at Camp Grayling. He also ordered Michigan State Police to make a damage assessment.

The largest of the fires that broke out Tuesday afternoon burned an estimated 6,000 acres of forest land and destroyed about 100 buildings, 75 percent of them private homes or vacation cabins, east of Grayling, Heather said.

A second fire north of Roscommon destroyed another 800 acres and 10 to 15 structures, he said.

''We have just about a safe containment line all around it,'' Heather said of the major fire. ''The estimate is 6,000 acres burned. One-hundred structures are lost. Seventy-five percent of those are residences, the others outbuildings.

''We figure that we probably evacuated somewhere in the neighborhood of 300 people. Most of them have been allowed to return to the surrounding area. Those right in the fire area have not been allowed to return.''

Heather said there were also an additional 12 to 15 smaller fires in a large stretch of northern Lower Michigan, ranging from just north of Clare all the way north to the Mackinac Bridge.

''We were able to contain all of those smaller fires at 40 acres or less '' he said. ''From what we can determine, we didn't lose any structures in any of those fires.''

Hardest hit was prime Au Sable River vacation area 10 to 15 miles east of Grayling, Heather said. An estimated 300 people were evacuated Tuesday, and about 50 to 100 of them were still in temporary shelters at Camp Grayling Wednesday morning.

Heather said officials hoped to have all the fires completely under control and the remaining evacuated residents back in their homes by nightfall Wednesday.

''It won't necessarily be out. Six-thousand acres is a lot of fire to mop up,'' he said. ''But we definitely hope to have it contained and safe for

people to return to their homes.''

There was a 70 percent chance of rain in the region Wednesday, with three-quarters of an inch of rain possible, he said.

One firefighter was treated for smoke inhalation. No other injuries were reported.

''The sky itself looked like it was burning,'' Lt. Col. Wayne C. Koppa, commander of the Camp Grayling National Guard base, said of the flames that were fanned by 20-mph winds. ''It was monstrous.''

''The thing that was really scary about it was that the winds were just whirling, going about 60 miles an hour at times and gusts,'' said J.B. Mack, 28, the operations manager at WGRY radio in Grayling.

Mack, whose home is about 3 miles from one of the fires and 10 miles from another, spent the night at a motel in Grayling and was relieved to learn the next morning that his home had been spared.

As he and his fiance and their three dogs were driving into Grayling, they saw flames shooting 100 feet into the air above the treetops three miles away.

''But for the grace of the wind blowing in our direction ...,'' Mack said.

William Witt, 63, one of the evacuees who spent the night at Camp Grayling said his home burned to the ground.

''When I first saw it (the fire), I knew they weren't going to stop it,'' said Witt, who took two elderly women to safety with him.

Larry and Cindy Lingle and their three children, who live east of Grayling were evacuated at 6 p.m. Tuesday as the flames reached their back yard woods. They managed to take a hurried collection of possessions, including important papers, two dogs and eight pet birds.

''It was phenomenal. I feel fortunate we got out when we did,'' Larry Lingle said. ''I'm pretty sure the fire got our house.''

As part of the mop-up efort, the Michigan National Guard provided four helicopters, each carrying 185-gallon buckets of water to be dropped on the smoldering forest land.

Authorities believe one of the fires, which started around 3:30 p.m. Tuesday about 4 miles east of Grayling, began on civilian property - perhaps from a trash fire - and went through part of Camp Grayling.

The main branch of the Au Sable River area was affected by the blaze and the fire burned through the northeast corner of Camp Grayling.

''A lot of nice cottages along the Au Sable are gone,'' said Lt. Col. Brian Downey, a spokesman for the Michigan National Guard.

#90129u1209 05/09/1990 ~United Press International

BASEL, SWITZERLAND (MAY 9) UPI - Asia, especially its newly industrialized nations, will enjoy continued growth but countries of black Africa are rapidly becoming a "Fourth World," an economic research institute said Wednesday.

A study by Prognos AG said democratic reforms in Latin America will bring economic benefits although, with the exception of Argentina, they will be largely cancelled out by debt-repayment burdens. Prognos is a shortened name for the European Center for Applied Economic Research. It has branches in the United States, Belgium, and West Germany.

"All attention is currently centered on the economic potential of an opening East Europe but that can lead to forgetting the possibilities and problems of other economic regions," the latest study said.

Growth forecasts based on per capita gross domestic product for the year 1994 were made for 36 developing and newly industrialized countries (NICs) of Asia, Latin America, and Africa.

Of 14 Asian countries, steady and in some cases sharp growth was predicted for 11 - Hong Kong, India, Indonesia, Iraq, South Korea, Malaysia, Pakistan, Philippines, Singapore, Taiwan, and Thailand. Declines were forecast for Iran, Kuwait, and Saudi Arabia.

The biggest gains were forecast for Hong Kong, South Korea, Malaysia, Singapore, Taiwan, and Thailand. "The three NIC 'tigers' of Taiwan, South Korea and Hong Kong will continue to show above-average growth, although the double-digit rates of the mid-1980s are a thing of the past," the study said.

In Latin America, the study said, seven countries can expect small growth - Argentina, Bolivia, Brazil, Colombia, Mexico, Uruguay, and Venezuela. But there will be declines in Chile, Ecuador, and Peru, it added.

Finally, looking at Africa, the study said "black African countries remain in increasing measure the problem children of the world." "Some of them, like Kenya and Zimbabwe, can and do achieve respectable growth rates but all successes in this underdeveloped part of the world are nullified by a fast-growing population," it said.

"The problems are even worse in some countries like Zaire and Zambia where population growth is not nearly compensated for by a corresponding growth in income," it said. "Per capita income is even sinking below already-low levels.

"In this way the black African countries of the Third World are increasingly turning into a Fourth World while the newly industralized nations of Asia are fast catching up on the industralized countries."

Of 12 African countries, the study forecast by 1994 declines in seven - Algeria, Ivory Coast, Libya, Nigeria, Senegal, Zaire, and Zambia. It said there will probably be small gains in Egypt, Morocco, Tunisia, and Zimbabwe, while per capita GDP will remain unchanged in Kenya.

#90129u1211 05/09/1990 ~United Press International

BOSTON (MAY 9) UPI - The Navy has dropped its demand for the return of scholarship funds given to a Reserve Officer Training Corps cadet who was dismissed from the Massachusetts Institute of Technology's ROTC program after he acknowleged he was homosexual.

Robert L. Bettiker, 23, will not have to return the ROTC scholarship funds according to a memorandum from Barbara S. Pope, the Navy's assistant secretary for reserve affairs. Bettiker said Tuesday he had received the news in a letter form the Navy.

Bettiker, a chemistry major at MIT, was dropped from the university's ROTC program after he told his superiors he is homosexual. The military has a ban against homosexuals and thus exludes homosexuals from ROTC. The military has recently begun demanding the return of scholarship funds students earn for their participation in the ROTC program.

The Navy had sought reimbursement from Bettiker and from a 23-year-old Naval cadet at Harvard University and a 24-year-old cadet at Washington University in St. Louis. All three refused to return the scholarship money.

The policy barring homosexuals from military service has sparked concern and protests on campuses where universities prohibit discrimination on the basis of sexual orientation.

WASHINGTON (MAY 9) UPI - The Justice Department said Wednesday it found no evidence warranting the prosecution of Rep. Gus Savage, D-Ill., but sent its findings in a ''ghost employee'' investigation to the House ethics committee.

The 15-month investigation involved the hiring of Savage's son, Thomas, by Democratic Del. Walter Fauntroy, the District of Columbia's non-voting congressional representative.

Parallel investigations of Fauntroy and Thomas Savage also have been closed without prosecutions.

Thomas Savage was on Fauntroy's payroll while he also was campaigning for office in Illinois. Under House rules, congressional employees must work in Washington or in a member's district, which in Fauntroy's case is the capital city.

David Runkel, spokesman for Attorney General Dick Thornburgh, said the Justice Department's Public Integrity Section had decided against prosecuting Gus Savage.

''We are declining prosecution against Rep. Savage,'' Runkel said.

Runkel said the decision was made by officials in the Public Integrity Section and Thornburgh ''did not get involved in that decision.''

However, Runkel said department officials have passed along ''information of interest'' to the Committee on Standards of Official Conduct, as the ethics panel is known.

A spokesman for the committee would not discuss the matter.

Last month, the Justice Department closed its investigation of Fauntroy, who now is running for mayor of the District of Columbia. Runkel said Wednesday an inquiry into Thomas Savage also has been closed.

Thomas Savage was on Fauntroy's payroll from September 1987 until June 1988, except for an unpaid leave of absence, and was paid almost $22,000.

Thomas Savage waged an unsuccessful primary campaign for the Illinois legislature. According to House payroll records, he took 10 weeks of unpaid leave beginning Jan. 1, 1988.

Fauntroy said he did nothing wrong and his lawyer said it was ''routine'' for the ethics panel to review the matter.

Gus Savage won a resounding victory March 20 in the Illinois Democratic primary, despite controversy over reports he made improper sexual advances to a woman employee of the Peace Corps during a visit to Zaire.

Savage initially denied attempting to force himself on the woman but later wrote her a letter of apology. The House chastized Savage for the incident but stopped short of a reprimand.

GENEVA (MAY 9) UPI - Government experts began a three-day meeting Wednesday to prepare for a full international conference in London in June to review progress on implementing a 1987 ozone protection convention.

Convened by the U.N. Environment Program, known as UNEP, the closed-door Geneva session centered on possible ways of financing reduced Third World use of ozone-depleting chlorofluorocarbons, or CFCs.

CFCs are mainly used in refigeration and air conditioning and are known to reduce the earth's vital ozone layer which filters cancer-causing and climate warming solar radiation. Environmental agencies and scientists estimate United States accounts for roughly 25 percent of global CFC use.

UNEP officials said various agencies such as UNEP itself and the World Bank, as well as several governments, have proposed various possible ways to help developing countries gradually replace CFC's with safe chemicals.

They said the United States and expert consultants estimated the cost of such assistance at as much as $100 million.

''But there are wide differences on how the money would or could be obtained,'' one UNEP executive said. ''It could be done by means of voluntary contributions or partly by special taxes or by a combination of possible methods.''

The 1987 agreement on a gradual phasing out of CFCs was reached in Montreal and is known as the Montreal Convention.

The June conference in London will review what progress has been made and how faster progress can be achieved in implementing the convention.

SEOUL, SOUTH KOREA (MAY 9) UPI - South Korea will import 390 tons of enriched uranium from the Soviet Union over a 10-year period starting this year, a spokesman for the Energy-Resources Ministry said Wednesday.

The spokesman said the government has approved a contract the Korea Electric Power Corp. signed in March with Techsnabexport, a Soviet nuclear fuel exporting agency, for the uranium import.

This is the first time South Korea will import enriched uranium from a communist country. Nuclear fuels have been imported from the United States France, Canada and Australia.

Under the government's approval, which took effect Monday, the first 40 tons of Soviet uranium concentrates will be imported in November to fuel atomic power plants run by the corporation, the spokesman said.

The remaining 350 tons will be imported based on a long-term nuclear fuel supply plan ending in 1999, the spokesman said.

The import prices of Soviet-produced uranium are expected to be about 55 percent of the prices of imports from other sources which average $1,073 per kilogram (2.2 pounds), the spokesman said.

The import prices for Soviet uranium will be at a fixed level until 1993 when prices will be readjusted within a range of five percent considering the change in the strength of the U.S. dollar, according to the spokesman.

He said about 30 percent of the transactions will be in the form of barter trade with the Soviets buying consumer electronic products from South Korea each year. For this year the Soviet purchase will amount to around

$7 million, the spokesman said.

BUDAPEST, HUNGARY (MAY 9) UPI - Parliament agreed Wednesday to consider suspending Hungarian membership in the Warsaw Pact and opposition leaders urged the government to negotiate a permanent break with the Soviet-led alliance.

In an indication of widespread support, members of the recently elected Parliament applauded loudly when the suspension proposal was introduced by Mikos Vasarhelyi, a deputy of the opposition Alliance of Free Democrats. Lawmakers voted to consider the proposal at their next session.

Approval would make Hungary - whose once-dominant Communist Party has been removed from power and reformulated itself into a Socialist Party - the first East bloc country to suspend Warsaw Pact membership since last year's wave of anti-communist reforms in Eastern Europe began.

Hungary withdrew from the alliance briefly during the 1956 uprising that was crushed by Soviet tanks.

Vasarhelyi was the spokesman of the Imre Nagy government that was dissolved after the failed uprising. The Nagy government's Nov. 1, 1956, announcement that it was withdrawing from the Warsaw Pact was followed three days later by the Soviet invasion.

''We wanted to express the historic continuity with this proposal and we wanted to carry on the traditions of the government in 1956,'' Vasarhelyi said at a news conference after introducing the suspension legislation. ''What that government was unable to carry through, we now present to Parliament.''

Supporters said it was hoped the measure would allow Hungary to gradually withdraw from the alliance and avoid a direct confrontation with Moscow. But Vasarhelyi stressed the opposition's ultimate goal is a break with the Warsaw Pact.

Prime Minister-designate Jozsef Antall has said, however, that his center-right Democratic Forum government intends to honor all previous commitments to foreign nations, including its Warsaw Pact obligations.

The suspension legislation, which has the support of the opposition Free Democrats and at least some Democratic Forum members, would suspend Hungary's membership in the Warsaw Pact pending a parliamentary study and government negotiations with alliance partners on a permanent break with the Soviet-led pact.

''Hungary should not be under the joint command of the Warsaw Pact,'' Vasarhelyi said when asked what a ''suspension'' of Hungary's Warsaw Pact membership would mean.

''Hungary should not take part in military maneuvers, nor should the troops of other countries have military maneuvers on the territory of Hungary,'' he said.

After the pullout from the Warsaw Pact is complete, Hungary would be free to enter into bilateral friendship and mutual assistance treaties with Warsaw Pact countries, Vasarhelyi said. He rejected the idea of turning Hungary into a neutral zone, like neighboring Austria, saying this type of neutrality is becoming obsolete with the end of the Cold War.

Instead, he said, Hungary should become an active partner in the creation of a new European security system.

Referring to Antall's recent prediction that the Warsaw Pact would dissolve by itself within a few years, Vasarhelyi said, ''We do not want to trust the issue to time.

''We want to persuade the government and our fellow members of Parliament to start these negotiations,'' said Vasarhelyi, who declined to suggest a timetable for withdrawing from the alliance.

In another development, Parliament voted, 308-14, to approve several amendments to the Constitution to accomodate the shift from one-party communist rule to multi-party democracy. One amendment allows the prime minister to appoint his cabinet ministers, rather than having each elected individually by the Parliament.

Another amendment would allow most ordinary legislation to become law if approved by a simple majority of the Parliament, instead of by two-thirds majority.

#90129u1292 05/09/1990 ~United Press International

(MAY 9) UPI - Flood waters continue rushing downstream along rain-swollen waterways in Texas and Arkansas. Officials in both states are keeping their fingers crossed that levees and dikes will impede giant walls of water from causing too much damage. So far, high waters have forced hundreds of families in each state from their homes and caused Millions of dollars in damage. The main points of concern today are the Trinity River in southeast Texas and the Red River in southwest Arkansas.

Presidential spokesman Marlin Fitzwater has refused to reveal what types

of revenue enhancers President Bush might approve to gain favor among leaders in congress to hold a budget summit. Bush is scheduled to meet Capitol Hill leaders this morning in the second phase of preliminary talks aimed ironing out problems with the fiscal 1991 budget. Some Democrats fear Bush may be setting them up to take the blame for the huge federal deficit.

New York's busiest waterway suffered its sixth fuel spill since January this morning. Coast Guard officials say 10-thousand gallons of unleaded gasoline seeped out of a barge as it was being loaded in Arthur Kill- the sliver of water that separates Staten Island from New Jersey. Emergency crews have clogged the leaking barge, but Arthur Kill remains closed at least through this morning.

Under a proposal announced today in the Hungarian Parliament, Hungary conceivably could become the first Warsaw Pact nation to withdraw from the Soviet-led alliance. An opposition deputy was enthusiatically greeted when he announced the possible suspension of Hungary's membership in the Warsaw Pact. The unprecedented move is said to be contingent upon talks aimed at clarifying Hungary's future role in the alliance.

#90129u1298 05/09/1990 ~United Press International

CARTERET, NJ (MAY 9) UPI - A barge being loaded with premium unleaded gasoline sprang a leak Wednesday, spilling 10,000 gallons of the fuel into Arthur Kill and closing the commercial waterway separating Staten Island and New Jersey for five hours.

The waterway was reopened at 8:15 a.m., said Coast Guard spokeswoman Jodi Hoffmaster, who said the gasoline was rapidly evaporating.

''The dissipation has gone so well that there is no apparent damage to wildlife in the area,'' Hoffmaster said.

The spill off the barge Victoria 21 at 2:50 a.m. prompted the Coast Guard to close the Arthur Kill for 2 1/2 miles to all vessel traffic at about 3:15 a.m., Hoffmaster said. The closed area reached from Tufts Point to Trembley Point.

It was the sixth spill of pollutant in the Arthur Kill since January. Islands in the kill are rookeries for hundreds of waterbirds that are now nesting.

Chief Warrant Officer John Hollis of the Coast Guard said the barge, owned by Victoria Transportation of Elizabeth, N.J., was loading its right No. 1 tank at the GATX Terminal when workers noticed gas leaking below the water line.

The tank contained 58,000 gallons at the time the leak was noticed. By 5:30 a.m., the leak was stopped - but not before 10,000 gallons - considered a ''medium'' spill - had polluted the waterway, Hollis said.

The Arthur Kill has been the site of at least five other spills this year ranging from 100 gallons of naptha to 500,000 gallons of heating oil.

#90129u1299 05/09/1990 ~United Press International

(MAY 9) UPI - The U-S-S Conyngham made its way back to Norfolk, Virginia, early today under tow after a fire crippled the vessel yesterday. Navy crews are aboard the 27-year-old destroyer cleaning up the mess left by the blaze, which killed one sailor and injured 18 of his shipmates. Naval investigators say the fire started in the scheduled-to-be-decommissioned ship as one of its boilers was being lit. An investigation is planned.

Environmental Protection Agency officials decline comment about allegations by the oil industry that supposedly clean-burning ''gasohol'' leads to greater emissions of smog-causing pollutants. The oil industry revealed their charges yesterday in the form of a study performed by a consultant hired by the American Petroleum Institute. The study says ''gasohol'' increases ozone-destroying emissions of hydrocarbons and nitrogen oxides.

In an apparent about-face, Taiwan has O-K'd a port call for the dissident radio ship Goddess of Freedom. The 11-hundredton vessel is slated to beam pro-democratic programming toward mainland China from international waters. It appeared as if Taiwan would follow the lead of Hong Kong, which refused to allow the ship to dock. However, Taiwanese legislators have downplayed threats from Beijing and decided to let the craft refuel and re-supply.

The leading organization of American businesses in Beijing says withdrawal of preferential trade status for China would severely chill both trade and political relations between the United States and China. The American Chamber of Congress in Beijing warned lawmakers considering revoking most-favored-nation status for China that such a move would be ''shortsighted.''

#90129u1322 05/09/1990 ~United Press International

TIGARD, OR (MAY 9) UPI - A Japanese company has paid more than $67 million for the Lincoln Center office park and may finance development on an adjoining 100 acres.

Seiyu International Corp. bought the 55-acre office campus from Trammell Crow Co., which developed the project over the past 10 years.

Trammell Crow officials said the Japanese company has an option to invest in buildings to be developed in a proposed urban-renewal district next to Lincoln Center. Voters will decide Tuesday whether to form the district.

Included in the purchase were the 12-story Lincoln Tower, a parking structure, and a small retail building.

In a news release Tuesday Seiyu president Yoshimitsu Misawa called Lincoln Center ''the finest and most prestigious office complex in Oregon'' and said Seiyu was ''pleased to have invested in such an excellent property.''

The Seiyu purchase comes on the eve of a public vote on Tigard's $57-million Presidents Parkway urban-renewal plan. The proposal calls for redeveloping the 100-acre tract adjacent to Lincoln Center into a $300 million office park.

The city and Trammell Crow have a handshake agreement that the latter will be awarded rights to the project, said Ed Murphy, Tigard community development director.

Opponents of the project complain that redevelopment would displace almost 90 homes, force relocation of an elementary school, increase traffic to unacceptable levels and destroy wetlands.

#90129u1323 05/09/1990 ~United Press International

PEMBROKE PINES, FL (MAY 9) UPI - A campaign to control the burgeoning Muscovy duck population by stealing their eggs may have backfired, prompting the ducks to seek revenge by attacking humans, condominium officials suspect.

Some residents at the Century Village retirement complex believe the ducks are frustrated at the egg pilfering and are pecking humans as an emotional outlet.

Another theory holds that the ducks have grown used to being fed by humans and the attacks are simply a signal that the animals are hungry.

''How can you figure what's in the mind of a duck?'' asked City Commissioner Kitty Thibault, executive coordinator of the Condominium Owners of Pembrook Pines Association.

Whatever the cause, residents at the Century Village and nearby neighborhoods have complained of increasingly frequent attacks by the fat,

prolific muscovies.

Maintenance crews at the complex and residents throughout Pembroke Pines have been removing duck eggs from nests for about a year. They insist the duck attacks have grown more common since the program began.

''I don't know if it's what made them more disagreeable ... but I think taking the eggs may have something to do with it,'' said Thibault.

Wildlife experts said the ducks' behavior poses no threat of injury.

''If you're not used to it and a great big duck nibbles your arm, it could be frightening,'' said Gill Monteiro, interim director of the Wildlife Care Center in Fort Lauderdale.

''But I've never known these ducks to actually attack,'' she said. ''They'll peck at you but it's their way of communicating. They're frustrated. They're looking for affection to fullfill their motherly instinct.''

It is annoying, however, especially for older people less able to maneuver around duck droppings.

''I like ducks but I don't like getting slobbered on or getting my nylons ripped by hordes of those big, ugly ducks,'' Thibault said.

The egg removal campaign has drawn some complaints from animal rights activists, but wildlife experts said it does not harm the ducks,

''It isn't cruel,'' Monteiro said. ''The baby ducks aren't going to suffer. The female will rebreed and lay again. You eat eggs, don't you?''

#90129u1349 05/09/1990 ~United Press International

BRUSSELS, BELGIUM (MAY 9) UPI - Luxembourg's ambassador to NATO was relieved of his post last month for violating NATO security rules, officials said Wednesday. The move came amid reports the ambassador gave a classified NATO document to a Soviet contact.

Guy de Muyser, 64, once an envoy for his tiny country to Moscow, resigned from the sensitive NATO post April 25 after the prime minister took away his security clearance, said Foreign Minister Jacques Poos.

''In early April, NATO security services gave Luxembourg authorities information indicating that de Muyser violated security rules set by the alliance,'' Poos told his country's parliament.

''The Luxembourg security service, after investigation, proposed on April 18 to preventively withdraw his security clearance,'' he said. ''On April 25, the prime minister withdrew this clearance.''

The foreign minister did not specify which NATO security rules were involved.

Luxembourg's military attache to NATO, Col. Jean-Paul Heck, said he could not confirm reports that de Muyser made several trips to Moscow without approval from NATO's secretary-general and delivered a classified NATO document to a Soviet contact.

De Muyser had been Luxembourg's permanent representative to NATO, or ambassador, since 1986, and was ambassador to Moscow from 1981 to 1983.

While serving as his country's top NATO official, he was also ambassador to Belgium. Dual posts are common for Luxembourg officials. Poos, for example, is also defense minister.

Luxembourg's foreign minister said he informed NATO Secretary-General Manfred Woerner on April 30 that de Muyser was being replaced by his deputy, Francois Bremer. Bremer was in Canada on Wednesday at a meeting of NATO's Nuclear Planning Group.

The last reported security breach at NATO occurred last month when a decoder for NATO's West German delegation was arrested on suspicion of spying for East Germany and the Soviet Union.

NATO's official press service does not comment on security matters, leaving such announcements to individual countries in the 16-member alliance.

#90129u1371 05/09/1990 ~United Press International

PARIS (MAY 9) UPI - South African President Frederik de Klerk received a warm welcome to France Wednesday as he began a nine-nation effort to persuade European leaders that his nation's progress toward dismantling apartheid warrants a lifting of international sanctions.

De Klerk, embarking on what is widely regarded at home as the most important mission abroad by a South African leader in more than four decades of apartheid rule, was to meet Thursday with President Francois Mitterrand. It was to be the highest level meeting between France and South Africa since the South African Republic was proclaimed in 1961.

A squad of the silver-helmeted Republican Guard stood at attention on the runway Wednesday at Orly Airport as De Klerk stepped out of his jetliner.

De Klerk was greeted by beaming officials from the French Foreign Ministry in keeping with the official protocol level of what Pretoria has termed a private visit.

But analysts in France said Thursday's meeting with Mitterrand at the Elysee Palace will mark a watershed in relations between the two countries.

It will be the first encounter between a South African leader and a French head of state since the South African Republic was proclaimed in 1961. Mitterrand has always been a fierce opponent of the apartheid system of racial discrimination.

Jan Smuts, prime minister of the South African Union when it was still a member of the Commonwealth, was received at the Elysee in 1947. Then-South African Prime Minister John Vorster met with then-Prime Minister Jacques Chaban-Delmas in 1970 in Paris.

But Mitterrand deliberately snubbed De Klerk's predecessor, Pieter W. Botha, when the South African leader visited France in 1984 and 1986. An embittered Botha last week announced he had not renewed his membership in the ruling National Party to protest de Klerk's path toward ''gradual abdication.''

De Klerk's European tour will attempt to capitalize on the successful conclusion of a round of talks last week with the anti-aparhheid African National Congress and on positive international response to recent racial reforms.

''It's wonderful to go to Europe with the knowledge that South Africa already is making a breakthrough toward attaining its rightful place in the international community,'' de Klerk said shortly before his departure from South Africa.

''Inasmuch as it might have been argued that there were grounds for such pressure (as sanctions), we sincerely believe that those grounds have fallen away,'' de Klerk said. ''South Africa is moving in a positive frame of mind toward the resolution of the problems which have plagued it for so long.''

The French Foreign Ministry issued a statement saluting de Klerk's ''courage'' after he announced the release earlier this year of anti-apartheid activist Nelson Mandela, who Mitterrand has invited to see him at the Elysee June 6.

But Mitterrand also has made it clear he expects South Africa to press on with reforms aimed at dismantling apartheid. Elysee sources said Mitterrand will ''plead in favor of the pursuit of peaceful dialogue that

rejects extremists of both camps.''

France does not exclude some easing of sanctions against Pretoria, but wants any such gesture to be approved by all 12 European Community members sources said. France's only bilateral sanction against South Africa affects coal trade between the two countries.

In the 1960s and 1970s, France was a leading exporter of arms - especially Mirage jet fighters - to South Africa. But Paris now adheres to the international arms embargo against Pretoria.

France is currently South Africa's sixth-largest foreign trade partner, after West Germany, Japan, the United States, Great Britain and Italy. Fruit and uranium for French nuclear plants and bombs are the main South African exports to France, which exports mainly machinery and industrial equipment to South Africa.

De Klerk will visit Britain May 19 to hold talks with Prime Minister Margaret Thatcher, the European leader thought to be most sympathetic to his position on lifting sanctions. He will also tour West Germany, Switzerland, Greece, Portugal, Spain, and two other countries, believed to be Italy and Belgium.

Spain evidently has decided on a token reward for de Klerk. A Spanish diplomat said the government had removed a ban imposed in 1986 on Iberia Airlines cargo flights to South Africa.

#90129u1374 05/09/1990 ~United Press International

LONDON (MAY 9) UPI - Digging on the Channel Tunnel was halted while safety inspectors investigated the sixth fatal accident on the British section of the project, officials said Wednesday.

The Health and Safety Executive agency is examining the circumstances that led to the death of William Cartman, 33, who was crushed by a crane Monday night while working in one of the marine running tunnels being drilled under the English Channel, a spokesman said.

Cartman was the sixth British worker to be killed in 18 months. His death prompted calls by union leaders and politicians for an investigation of safety procedures at the site.

One death has been reported on the French side of the project.

''We are trying to learn what circumstances led to this unfortunate fatality and to see whether there's any formal enforcement action on our part,'' said agency spokesman Mark Wheeler.

''We're very saddened, concerned that the management and safety is not as tight as it should be because most of these accidents in the construction area are preventable by management action,'' Health and Safety Executive Deputy Director General David Eves told the British Broadcasting Corp.

Tunnel workers in Folkestone have said safety measures have frequently been ignored in the rush to finish the $12.3 billion project, according to The Independent newspaper.

The 31-mile Channel Tunnel rail line, set for completion in 1993, will be the first fixed link between Britain and continental Europe.

Wheeler said Transmanche Link, the Anglo-French consortium of construction companies building the tunnel, halted digging work voluntarily after the fatal accident occurred.

''We asked them not to start until we gave them the-go ahead and they have complied,'' Wheeler said.

The accident occurred six weeks after five British construction companies taking part in the project were fined $80,000 for failing to ensure safe working conditions in connection with an accident in which one tunnel worker was killed last year.

#90129u1382 05/09/1990 ~United Press International

NEW YORK (MAY 9) UPI - Four crewmembers of a Rhode Island yacht that sunk in the Atlantic southwest of Bermuda were rescued from a drifting raft Wednesday by a merchant ship, the U.S. Coast Guard reported.

The crew of the 57-foot sailing ship Misconduct, on a cruise from Rhode Island to Bermuda, radioed about 11 p.m. Tuesday that the vessel had hit a submerged object and was sinking, according to spokeswoman Jody Hoffmaster.

Rescue planes found that the location given for the ship, 150 miles north of Bermuda, was incorrect, and a Coast Guard C-130 from Elizabeth City, N.C., did not locate the four survivors until about 4:47 a.m. Wednesday, she said.

''The planes continued to circle until the merchant ship Baron Trader, which was nearby, arrived on the scene and picked up the men from the raft at 9 a.m.,'' Hoffmaster said. ''They were all reported in fine condition.''

The crewmen were not immediately identified. Hoffmaster said the Misconduct was chartered from its owner, Paul Harron of Newport, R.I.

The Baron Trader will take the men to Baton Rouge, La., where it is expected to arrive about midnight next Sunday.

#90129u1386 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - President Bush believes there should be a phaseout of ozone-depleting chlorofluorocarbons, but opposes a proposal to provide $100 million to Third World countries to reach that end, a spokesman said Wednesday.

Deputy press secretary Roman Popadiuk confirmed the U.S. position taken at a three-day international conference on chlorofluorocarbons (CFCs) in Geneva, Switzerland, being held to prepare for a full international conference in London in June to review progress on implementing a 1987 ozone protection convention.

U.N. Environment Program officials said various agencies such as UNEP itself and the World Bank, as well as several governments, have proposed various possible ways to help developing countries gradually replace CFC's with safe chemicals.

They said the United States and expert consultants estimated the cost of such assistance at as much as $100 million.

The Washington Post said Environmental Protection Agency Administrator William Reilly and top State Department officials urged U.S. support for the plan but it was shot down by White House chief of staff John Sununu and budget director Richard Darman.

Sununu and Darman were reported to be opposed to providing any additional funds outside of existing international organizations. The U.S. share would be $25 million over three years.

Popadiuk told reporters ''there are all kinds of views'' in the administration on the plan.

''The United States believes that the health of the global environment is everyone's responsibility,'' he said. ''We support a worldwide phaseout'' of chlorofluorocarbons.

The United States, he added, believes that the Third World should be provided with financial support to carry out the goal. ''However,'' he said, ''we believe it is more sensible to use existing systems and financial mechanisms already established by the World Bank.

''We do not feel it's sensible to set up new rules and new regulations,'' which would require the signing of new protocols, he said.

''The World Bank should use existing resources,'' he said, adding, ''They have worked in the past.''

''The resources are sufficient at this time,'' he insisted.

#90129u1392 05/09/1990 ~United Press International

AKRON, OH (MAY 9) UPI - A group of 115 Uniroyal Goodrich Tire Co. managers who invested $12.7 million in the company received $58 million when the tire maker was bought by Michelin last week.

About 12,000 other employees will share $29 million through a stock appreciation rights program.

The Akron Beacon Journal reported Wednesday the managers received an average of $504,350, led by Uniroyal Goodrich President Sheldon Salzman at $3.5 million for his 700,000 shares. He also was paid a salary of $736,083 last year.

Union workers, by comparison, are expected to receive between $1,500 and $2,000 each during the next two months. They took cost-of-living concessions in early 1988.

''We had a feeling that the rich got the spoils and we got the dribblings '' said Darrel Wekkin, president of the United Rubber Workers local at the Uniroyal Goodrich plant in Eau Claire, Wis. ''As you see, we saved the company and they got the money.''

Uniroyal Goodrich spokeswoman Athene Karis said it wasn't fair to compare the payouts to the two groups.

The top-level managers put up $1 per share, or about $12.7 million, for privately held stock in the company.

The other 12,000 workers were compensated for frozen salaries or cost-of-living concessions accepted during 1988 union negotiations.

Michelin paid about $5 a share for Uniroyal Goodrich, which was entirely owned by the New York City investment firm of Clayton & Dubilier since Goodrich sold its 50 percent share in the company in 1988.

''When we bought the company it was almost bankrupt,'' Chairman Martin Dubilier said. ''We satisfy Michelin's needs and offer our employees the opportunity to grow with Michelin.''

#90129u1404 05/09/1990 ~United Press International
KANANASKIS VILLAGE, CANADA (MAY 9) UPI - Defense Secretary Dick Cheney briefed NATO defense ministers Wednesday on President Bush's decision to cancel new short-range, ground-based nuclear weapons for Europe and to seek a sweeping review that could reshape the Western alliance.

NATO's Nuclear Planning Group, which includes 14 defense ministers of the 16-nation alliance (France and Iceland do not participate militarily), opened a two-day meeting here, the former 1988 Winter Olympics site nestled in the towering, snow-capped Rocky Mountains some 50 miles west of Calgary.

NATO members applauded Bush's announcement last week that the United States was canceling plans to replace the aging Lance short-range nuclear missile and nuclear artillery in Western Europe with new, more poweful versions.

''It's a matter for the alliance to decide what comes next,'' Cheney said.

''I think that we will take note of the president's statement and we'll be supportive of having negotiations'' with the Soviets to remove the current short-range, ground-based weapons from Europe, said Bjorn Kristvik, the Norwegian ambassador to NATO.

A British defense spokesman also favored negotiations over a unilateral withdrawal of the NATO short-range nuclear weapons, saying, ''Our view is that they should stay there as long as they're viable systems.''

NATO Secretary-General Manfred Woerner said he would ask the defense ministers to figure out how to conduct the review of NATO strategy, particularly its military and nuclear future.

The review, which will also define goals for short-range nuclear negotiations with the Soviets, will get under way at the NATO summit of heads of state in London in July.

Cheney said a ''reasonable guess'' would be that the review would not be completed until sometime after this year.

Included in the review will be NATO's military strategy of ''flexible response,'' which includes the option of launching a nuclear first-strike in case of an overwhelming Soviet attack with conventional forces.

This strategy was adopted because of the Soviet Union's superiority in numbers of troops in Europe.

Cheney, in what may become a controversial issue, said Tuesday he wants

NATO to retain its nuclear first-strike option even if U.S.-Soviet conventional forces reach parity in Europe, as appears likely.

''I would not want to give that up,'' Cheney told reporters aboard his flight to Canada.

Another potential area of conflict is the U.S. development of a short-range Tactical Air-to-Surface Missile, or TASM, that could replace the short-range nuclear weapons that will become obsolete in Europe in the mid 1990s.

Cheney said he would not seek a commitment from NATO members any time soon on such a new weapon. ''I don't see any reason to discuss it. ... It wouldn't come into force until the mid-1990s,'' he said.

West Germany and the Netherlands had opposed replacing the Lance missile with a new version on European soil, and they are not believed to be enthusiastic about putting TASM on their soil.

''We would not insist that any member of our alliance base nuclear weapons on their soil,'' Canadian Defense Minister Bill McKnight said when asked what Canada's reaction would be to a German refusal to take any more nuclear weapons.

#90129u1423 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - Attorney General Dick Thornburgh's spokesman strongly indicated Wednesday that the government will not reopen an investigation of a police bombing of black militants in Philadelphia that caused a fatal fire. The Justice Department has received no evidence to warrant a new investigation, Thornburgh spokesman David Runkel told reporters.

Six adults and five children died on May 13, 1985, when police dropped a bomb on a West Philadelphia home occupied by members of the black radical group MOVE. The bomb set off a fire that was allowed to burn out of control.

The incident sparked increased racial tensions in Philadelphia. Civil rights leaders and many other groups said police never would have bombed a home in a white neighborhood.

Sen. Arlen Specter, R-Pa., asked the Justice Department to revive the investigation to consider civil rights prosecutions. The five-year statute of limitations on civil rights crimes expires on Saturday.

Specter met Tuesday with John Dunne, the Justice Department's new civil

rights chief, but Dunne said it would be a "long shot" for the government to reopen the investigation.

"No additional information was presented at that meeting which would lead to a reversal of the Justice Department's position," Runkel said Wednesday. While it is theoretically possible that new information could be received by federal prosecutors before Saturday, Runkel made it clear he considered it unlikely.

Dunne said, "There must be hard evidence to prove guilt beyond a reasonable doubt that a party or parties intended to deny people within our community their civil rights. To date ... there is not sufficient evidence."

The fire began when police dropped the bomb on a heavily fortified rowhouse occupied by the back-to-nature group. City officials allowed it to burn out of control and flames engulfed more than 60 homes in the mostly black neighborhood.

A 38-month investigation by federal and city prosecutors found that Philadelphia Mayor Wilson Goode and other officials mishandled the tragedy but no criminal charges were filed.

Specter has championed a new investigation for two years. "You have tremendous firepower," Specter said. "You have an explosive which is a bomb. You have a raging fire. You have no effort by the fire department to put it out, and the question is ... was there an intent that somebody should die or that somebody should be injured or that a civil right should be violated?"

GENEVA, SWITZERLAND (MAY 9) UPI - Government experts began a three-day meeting Wednesday to prepare for an international conference in London in June to review progress on implementing a 1987 ozone protection convention.

Convened by the U.N. Environment Program, known as UNEP, the closed-door Geneva session centered on possible ways of financing reduced Third World use of ozone-depleting chlorofluorocarbons, or CFCs.

CFCs are mainly used in refrigeration and air conditioning and are known to reduce the earth's vital ozone layer which filters cancer-causing and climate warming solar radiation. Environmental agencies and scientists estimate United States accounts for roughly 25 percent of global CFC use.

UNEP officials said various agencies such as UNEP itself and the World Bank, as well as several governments, have proposed various possible ways to help developing countries gradually replace CFC's with safe chemicals.

They said the United States and expert consultants estimated the cost of such assistance at as much as $100 million.

''But there are wide differences on how the money would or could be obtained,'' one UNEP executive said. ''It could be done by means of voluntary contributions or partly by special taxes or by a combination of possible methods.''

The 1987 agreement on a gradual phasing out of CFCs was reached in Montreal and is known as the Montreal Convention.

The June conference in London will review what progress has been made and how faster progress can be achieved in implementing the convention.

DALLAS (MAY 9) UPI - A European firm controlled by a man described as "the Donald Trump of Europe" has purchased the landmark Southland Center complex in downtown Dallas, in partnership with a previous owner, officials said.

Lars-Erik Magnusson, head of Larmag Investments Group in Amsterdam, estimates the cost of the acquisition and planned major renovations will total about $190 million.

"I believe Dallas is on the way up," said the 36-year-old real estate investor, whose company entered the U.S. market in 1989 with the $630 million purchase of two skyscrapers in Chicago and one in Manhattan. The company already has resold one of the Chicago towers.

Southland Center is composed of two office towers, with more than one million square-feet combined, and the 503-room Sheraton Hotel. Two years ago, Southland Financial Corp. sold the property for an undisclosed price to a partnership of Saudi Arabia-owned Jaymont Properties, which held the majority interest, and Aston Property Corp., owned by New York investor Ian Kean.

To buy out Jaymont's share, Kean formed KTI Associates with Paris-based investor Mark Tompkins and brought in Magnusson as an equity partner. Magnusson created Maglantic Holding for the Southland Center purchase and future international real estate acquisitions.

KTI and Maglantic assumed the $60 million existing mortgage on the property and paid an undisclosed sum to buy Jaymont's share, according to Perry Sudduth of Jones Lang Wootton USA, the property company that advised on the deal.

The new owners will face the hurdle of convincing prospective tenants that the planned renovation is more than a face lift, said Bob Edge, executive vice president of Cushman & Wakefield in Dallas.

SEOUL, SOUTH KOREA (MAY 9) UPI - Tens of thousands of students and other dissidents rioted across the country Wednesday, torching police cars and firebombing a U.S. government building in stormy protests as South Korea's new ruling party confirmed its leadership.

Streets in the capital turned into battlefields toward evening as more than 10,000 protesters clashed with riot police in demonstrations against the Democratic Liberal Party (LDP), born in the merger of three conservative political groups.

Critics say the government was failing to continue instituting promised democratic reforms, and that people are angry over what they consider declining economic and social conditions. There has been skepticism over whether the government can bring about stability.

Tens of thousands of tear-gas bombs and firebombs were exchanged in Wednesday's clashes between demonstrators and police. Rioters smashed concrete blocks torn from the pavement and hurled the chunks at riot squads.

Dozens of arrests were made in the nationwide protests and a number of people were injured. Precise figures, however were not immediately available.

Demonstrators threw firebombs at the U.S. Information Service building in the heart of Seoul in the evening, igniting a blaze that burned the first floor. No injuries were reported and the fire was put out in 90 minutes.

In Washington, State Department spokesman Richard Boucher said windows were broken in the attack and the fire caused ''considerable damage'', but a dollar estimate could not be made immediately because the building was too hot to enter Wednesday night.

Protesters also set afire two police vehicles across the street from the USIS.

The widespread protests were touched off by an LDP national convention held in the morning to finalize the party's leadership structure. President Roh Tae-woo was unanimously elected the top party leader.

A coalition of 17 dissident organizations had said they would stage

rallies in major cities coinciding with the convention ''to crush one-party dictatorship'' being pushed by the new government party.

A group of 1,041 professors from 57 universities and colleges demanded dismantling of the party.

''The merger of the three parties into the new ruling camp aimed at protecting the interests of monopoly businesses and the well-to-do and smothering movements for basic rights of the people,'' they said in a statement.

More than 40,000 students rallied at 95 universities across the country, demanding dissolution of the ruling party, news reports said. They fought with about 40,000 police trying to quell the disturbances.

In the capital city, nine students started the day's actions with a brief sit-down protest before noon in front of the U.S. Embassy downtown, putting up a placard reading, ''Disband DLP, oust (U.S. Ambassador Donald) Gregg.'' They were taken away by police within 10 minutes.

About 2,000 students gathered near the City Hall Plaza at about seven hours later as 17 hard-line dissident groups tried staging a rally. When police charged firing volleys of tear-gas bombs, most of the crowd laid down in the street. About 150 people were arrested on the scene, witnesses said.

The protesters dispersed but soon regrouped near a circle in front of a department store about three blocks away. Witnesses indicated crowds had swelled to 5,000.

When the attack on the USIS building erupted, there were five Korean policemen standing guard nearby. They were taken captive by protesters, disarmed and then freed, witnesses said.

At one point, the number of protesters grew to about 20,000, according to witnesses. Rioters were in control of two major downtown streets, paralyzing traffic for more than three hours.

Police kept firing volleys of tear gas from eight mobile launchers to disperse rioters, who began breaking up around 9:30 p.m. local time.

During the day in Seoul, three police vehicles were burned and three buildings were firebombed - the USIS, a police substation and a provincial chapter office of the government party, news reports and witnesses said.

The day's protests were the largest and most violent in recent months. They erupted despite strong government warnings against violence and illegal demonstrations.

MIAMI (MAY 9) UPI - More than 4 tons of marijuana were confiscated from an American boat just off the Mexican coast Wednesday by the U.S. Coast Guard, the largest such seizure by the agency this year, officials said.

Two crew members, Joseph Glow Jr. and Robert Melley, both of the St. Petersburg area, were arrested and charged with possession of marijuana with intent to distribute and importation of marijuana, said Gerald Hochman, co-director of the federal Florida Joint Task Group.

The task group, a joint operation with 60 agents of the Drug Enforcement Administration and the U.S. Customs Service, were trying to determine where the marijuana originated, as well as its destination, Hochman said.

The boat was towed to Key West and turned over to U.S. Customs authorities Coast Guard Petty Officer Veronica Cady said.

Hochman estimated the wholesale value of the marijuana at $700 to $800 a pound, or $5 million to $6 million.

''It's a pretty sizable amount,'' Hochman said. ''The Coast Guard made a very good hit in this one.''

The crew of the Coast Guard cutter Tahoma boarded the 40-foot La Fiesta sailboat, which was registered in Mobile, Ala., about 350 miles southwest of Miami for a routine check, Cady said.

The Coast Guard found 8,210 pounds of marijuana, an unusually large amount for the size of the vessel, Cady said.

''It was a routine boarding. We found the marijuana, and they were arrested,'' Cady said. ''It was unusual because there was so much on such a small boat.

''What was unusual is the the marijuana was not concealed,'' Hochman said. ''It was simply stacked in the vessel. But, with that kind of bulk, it's very difficult to conceal.''

#90129u1493 05/09/1990 ~United Press International
(MAY 9) UPI - U-S Consul General Donald Anderson is warning China against restricting freedom in Hong Kong when it regains sovereignty over the British colony in 1997. Anderson told members of the American Chamber of Commerce in Hong Kong today that it is ''vital'' that Hong Kong remain an

open city and a financial center. He underlined U-S support for Hong Kong's free-market system.

As many as 300 Texas National Guard troops, Marine reservists and volunteers from three states worked through the night to fill sand bags to shore up levees north of Texarkana, where the Red River is on the rise. Authorities say last week's heavy rains in Oklahoma sent eight to nine feet of water into some homes near the Red River. Farm and ranch workers have been evacuated and about 200 head of cattle are reported stranded north of DeKalb, Texas.

Fires that burned thousands of acres of forest and destroyed about 75 homes in northern Michigan were declared contained today... but officials say the danger remains. In the words of a forest official- ''We're on our knees, praying for more rain.'' The largest blaze broke out east of Grayling, burning about six-thousand acres of forest land and destroying about 100 buildings.

#90129u1497 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - An American pilot, a British adventurer and a Soviet cosmonaut announced Wednesday they will attempt the world's first trip around the globe by helium balloon.

The flight, scheduled to begin sometime in November, would set the world distance record for balloon flight, mark the first time a manned balloon had circled the globe and also help study the state of Earth's atmosphere.

''This trip will be partly symbolic and partly scientific. Through NASA and the Russian space agency ... working together we should learn more about the damage we are doing to our atmosphere,'' said British entrepreneur Richard Branson.

''The other reason for doing this trip is it's an incredible personal challenge ... perhaps the greatest personal challenge we're ever likely to face,'' Branson said at a news conference.

Branson will be joined by American Larry Newman and Russian Vladimir Dzhanibekov for the dangerous flight, which will take 12 to 21 days to cover 18,000 to 22,000 miles, depending on the weather.

Newman set the current world record for balloon flight in 1981 when he flew 5,209 miles from Nagashima, Japan, to Covelo, Calif. It was the first Pacific Ocean crossing by balloon.

The three plan to take off in the ''Earthwinds'' balloon from the Loral Airdock in Akron, Ohio, and fly northeasterly at between 75 and 150 mph at

35,000 to 45,000 feet above sea level.

The balloon will pass over the United States, the Atlantic Ocean, Ireland, England, France, West and East Germany, Czechoslovakia, Poland, the Soviet Union, Japan and the Pacific Ocean before landing somewhere east of Akron.

The flight, which will cost ''hundreds of thousands of dollars,'' is being sponsored by Allied Signal Aerospace Corp., American West Airlines, Virgin Atlantic Airways, which Branson founded, and ESPN of Bristol, Conn., a cable television network that will broadcast the trip.

The Soviet Space Agency Glavkosmos and the U.S. National Aeronautics and Space and National Oceanic and Atmospheric administrations will provide technical support for the flight, including communications and weather reports.

The high-tech balloon will be 300 feet high and 140 feet in diameter and contain more than 1 million cubic feet of helium. It will carry a pressurized 1,200-pound oblong gondola measuring 24 feet long and 10 feet in diameter.

The balloon will carry several NASA instruments to study atmospheric turbulence, such as wind shear, and take measurements to study ozone in the atmosphere. Scientists fear protective ozone is being depleted by air pollution.

Newman, 42, a pilot for America West Airlines who lives in Scottsdale, Ariz., is the only man alive to have crossed both the Atlantic and Pacific oceans by balloon. He was the first to cross the Atlantic in 1978 and the Pacific in 1981.

Branson, 39, of London, is founder and chairman of the Virgin and Voyager Groups companies, which includes Virgin Records. He was the first to cross the Atlantic in a hot air balloon in 1987 and crossed the Atlantic in the fastest recorded time ever in a boat in 1986.

Dzhanibekov, 47, a major general in the Soviet air force and chief of cosmonaut training, has spent 146 days in space. Most recently he commanded a June 1985 mission to rescue the Salyut 7 space station.

The around-the-world flight has been made possible by technological advances as well as reforms in the Soviet Union that permitted approval for the balloon to pass over that country, Newman and Branson said.

''Only three years ago such a trip as this would have been considered unthinkable,'' Branson said. ''Now, hopefully ... instead of spending billions on arms to try to protect ourselves against each other we can start to work together, to battle together against what is a real threat -

the damage we all face to our environment.''

#90129u1518 05/09/1990 ~United Press International

JERUSALEM (MAY 9) UPI - Labor Party leaders, lobbied by a religious faction in Parliament, announced their readiness Wednesday to join another coalition with the right-wing Likud Party although questions on advancing the peace process remain unresolved.

More dovish Labor members were outraged by the decision, saying Likud was not a partner for pursuing the peace process. Acting Prime Minister Yitzhak Shamir said he was studying the latest development in the see-saw world of Israeli government formation that is nearing the start of its second month.

Shamir is trying to form a Likud-led coalition with right-wing and religious parties but he has not ruled out another ''national unity'' government with the Labor Party. Despite the Labor decision, Peres said he was skeptical another coalition with Likud would succeed.

''I think at this stage there is a lot of good will, but the chances are low,'' Peres said.

In its decision, Labor said a new ''national unity'' government would be based on the guidelines of the previous coalition, Israel's 1989 peace initiative and a Cabinet decision in November that conditionally accepted a U.S. formula for Israeli-Palestinian talks, Army Radio reported.

But questions on the makeup of a Palestinian delegation for such talks and when a decision would be made on the issue remain unanswered. Israel's Labor-Likud coalition collapsed March 13 over the parties' disagreement over the makeup of a Palestinian delegation and participation of East Jerusalem Arabs.

The right-wing National Religious Party, whose support Shamir would need to form a Likud-led coalition without Labor, has advocated another broad Likud-Labor coalition. The NRP asked Labor to accept a compromise proposal aimed at resolving differences over the peace process.

Labor leaders accepted the proposal but with amendments made by former Defense Minister Yitzhak Rabin, a possible challenger to Shimon Peres for Labor Party leadership. Rabin deleted a proposal that the new government would decide within two months on the steps toward pushing the peace process further, Army Radio reported.

The proposal said elections would be held wihin 100 days if the coalition disintegrated, Army Radio reported. It also seeks a balance in power

between Likud and Labor, which Shamir may oppose.

''I have only one purpose which is to form a government, a stable government, with a majority in the Knesset (Parliament) that will be able to control the matters,'' Shamir said.

Intense, often bewildering political negotiations ensued after Shamir's government fell in a no-confidence vote March 15. After Peres was unable to establish a coalition, the task was given to Shamir, who has slightly more than a week left in his presidential mandate.

The National Religious Party has been shuttling between Israel's two major parties in recent days urging them to unite in what would be their third ''national unity'' government.

Maverick veteran politician Ezer Weizman attacked his party leadership for suggesting a reunification with Likud and called Labor leaders ''abusers of the people.'' Weizman said there were basic differences between Likud and Labor on the peace process and since 1984 when the two parties first joined in a coalition the process had receded.

''Therefore today we should have said in a democratic manner, 'Shamir, form a government. Show what you can do. If you succeed, our blessings,''' Weizman said. ''If he doesn't succeed, at least there will be an opposition that knows what it wants.''

Among the other points in the Labor-accepted NRP proposal is the decision to do away with Israel's inner Cabinet, which had been evenly split between the Labor and Likud, and allowance for political and security issues to be decided by the entire government forum.

#90129u1529 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - Disputes over abortion, the death penalty, and "pork barrel" spending faced congressional negotiators Wednesday as they began work on an emergency spending bill that includes aid for Nicaragua and Panama.

The differing supplemental appropriations bills passed by the House and Senate respond to President Bush's request for $870 million in emergency foreign aid - $500 million for Panama, $300 million for Nicaragua, and $70 million for refugees.

Both bills contain nearly all of the president's request for the two new U.S.-backed governments in Central America - $420 milion for Panama and $300 million for Nicaragua - and $100 million for refugee assistance.

But Bush's success at obtaining foreign aid carries a price. Both houses added hundreds of millions of dollars in more spending, and the Senate tacked on an amendment allowing the District of Columbia to use local tax money for abortions and permitting the death penalty for drug-related murders in the district.

Bush has said he will veto the spending bill if it reaches his desk with the abortion provision and liberals in both chambers object to the death penalty provision.

In all, the House bill authorizes $2.4 billion in new appropriations and the Senate measure authorizes $3.7 billion - although in both bills much of the spending actually would come after the current budget year ends Sept. 30.

House and Senate negotiators began Wednesday afternoon sorting through 180 amendments added to the bill by the Senate, seeking to develop a compromise version that can win approval from both houses.

However long it takes the negotiators to produce a final bill, the money is too slow in coming for Bush, who wanted the aid in time for Nicaraguan President Violeta Chamorro's inauguration April 25.

The House voted to instruct its negotiators to oppose all items added by the Senate. Rep. Silvio Conte of Massachusetts, ranking Republican on the House Appropriations Committee, accused the Senate of adding "pork barrel" amendments to what had been a bill providing for emergencies.

Two of those amendments deal with Lithuania - one providing $10 million for a U.S. Embassy in that country if the president decides one is needed, and another urging Bush not to expand trade ties with the Soviet Union until it ends its crackdown in the breakaway Baltic republic.

Another program expected to generate controversy would spend $185 million for a new fingerprint laboratory likely to be built in West Virginia, home of Sen. Robert Byrd, Democratic chairman of the Senate Appropriations Committee.

#90129u1535 05/09/1990 ~United Press International

TEHRAN, IRAN (MAY 9) UPI - Iraq has signaled "inclinations" to make a lasting peace with Iran but Tehran still has no confidence in Baghdad's good will, Iranian President Akbar Hashemi-Rafsanjani said Wednesday.

Rafsanjani, speaking at a ceremony for a visiting Chinese delegation, was apparently speaking of a letter last week from Iraqi President Saddam Hussein. The official Islamic Republic News Agency said the letter was the

first of its kind since a cease-fire between Iran and Iraq in August 1988, ending eight years of war.

"As we have shown, we shall try seriously to establish a lasting peace in the region," Rafsanjani told the Chinese delegation. "We still do not have confidence in the good will of the other side, although signs of their inclinations are being seen," he said.

The contents of Hussein's letter have not been made public. Reports in Tehran said it was handed to Iranian Foreign Minister Ali Akbar Velayati during a visit to New York to address the U.N. General Assembly.

Iran and Iraq began peace talks days after the cease-fire took effect but the discussions, held under U.N. auspices, broke down early last year. Tehran accused Baghdad of not abiding by U.N. Security Council Resolution 598, which set out steps toward establishing a lasting peace.

Iran said Iraqi troops were holding onto some 800 square miles of Iranian territory, though the resolution calls for each side to pull back its troops from territory taken during the war.

Reports outside Iran suggested Hussein's letter called for Iran and Iraq to continue the peace talks without assistance from U.N. Secretary-General Javier Perez de Cuellar, but there was no immediate confirmation in Tehran.

#90129u1544 05/09/1990 ~United Press International

PALO ALTO, Calif. (MAY 9) UPI - In the latest in a string of deals to acquire new technologies, Hewlett-Packard Co. said Wednesday it had bought a minority stake in a small Oregon semiconductor measurement company.

Hewlett-Packard invested an undisclosed amount for a minority interest in Cascade Microtech of Beaverton, Ore., the two companies said.

Terms of the deal were not disclosed.

In return, Hewlett-Packard licensed Cascade's technology for high-speed measurement of silicon wafers during the design and manufacturing of computer chips.

The deal is the latest in a string of technology-driven investments by Hewlett-Packard since 1988.

The company's most visible acquisition was its $500 million purchase of Apollo Computer Inc. in 1989. H-P has also bought stakes in semiconductor maker Actel Corp., computer networking concern 3Com Corp. and telecommunications company Octel Communications Inc.

#90129u1551 05/09/1990 ~United Press International

NEW DELHI, INDIA (MAY 9) UPI - A flight attendant who survived the crash of an Airbus A-320 jet airliner told a court Wednesday that the captain never complained about the quality of the aircraft, but said it required constant concentration to fly, a published report said.

Sadhana Pawar testified in the southern city of Banglaore before a court of inquiry investigating the Feb. 14 crash of the Indian Airlines A-320 outside the city in which 92 people died and 54 others were injured. The captain, Satish Gopujkar, and his co-pilot, Cyril Fernandes, were among those killed in the disaster.

Pawar told the court that she had never heard Gopujkar make any adverse comments on the quality of the advanced passenger plane, built by France-based Airbus Industrie, the Press Trust of India reported.

However, the commander often said the planes required his complete, undivided concentration right from takeoff to landing, Pawar told the court headed by High Court Justice Shivshankar Bhat.

Pawar relived for the court the crash, which occurred as the plane approached the runway at Bangalore airport, describing the two terrifying skips it made across the ground before coming to rest.

She told the court that two explosions occurred after the aircraft stopped just short of the runway and she heard one passenger screaming that the plane was going to explode.

The crash sparked a controversy over the safety of the planes, with the government of Prime Minister V.P. Singh grounding the remaining 14 Indian Airlines A-320s pending a decision on their airworthiness by an expert committee. The airline also refused to take delivery of 18 more planes it had ordered.

The crash rekindled allegations that senior officials of the government of former prime minister Rajiv Gandhi received kickbacks in the $1.4 billion purchase of 31 A-320 Airbus jets.

The Central Bureau of Investigation - India's premier criminal investigation agency, has filed corruption charges against four former officials, four unnamed Indian citizens, Airbus Industries and U.S.-based International Aero Engines of East Hartford. The companies denied any wrongdoing.

#90129u1601 05/09/1990 ~United Press International
BEIRUT, LEBANON (MAY 9) UPI - Rival Christian forces exchanged rocket and cannon fire Wednesday in fierce shelling that set houses and cars ablaze and killed at least six people, while Gen. Michel Aoun declared territorial waters off limits in an attempt to keep weapons out of his foe's hands.

Black smoke settled over war-battered east Beirut from artillery fire that police reports said wounded 20 people. Three of the six killed were from one family.

The shelling came as President Elias Hrawi held a summit meeting in Damascus with Syrian President Hafez Assad to discuss the Lebanese crisis, radio stations reported. Hrawi apparently failed to get a Syrian pledge to become more involved in the conflict, sources said.

Witnesses and police said large clouds of the smoke rose over east Beirut during the afternoon as troops of Aoun and militia chief Samir Geagea sent hundreds of shells crashing onto deserted streets and into apartment buildings.

The fighting broke out after Aoun declared he was barring navigation within territorial waters off the coast stretching from the militia-controlled Beirut port to the Madfoun bridge, 23 miles north of the capital.

"Any vessel moving within the territorial waters will be targeted with gunfire," his statement said, referring to vessels carrying shipments of supplies or ammunition to the Geagea's militia.

The militia has several harbors along the Christian heartland's coast. Aoun has repeatedly accused Geagea's militia of piracy and smuggling drugs and weapons. The Lebanese Forces militia warned it would "retaliate fiercely" if Aoun attacked any ship or harbor.

Exploding shells and rockets set many houses and cars ablaze in Wednesday's artillery attacks. The Christian Voice of Lebanon radio station appealed to fire brigades to extinguish the flames, but firemen couldn't act immediately because of the intensity of the battle, which started at midday.

The rivals' gunners, while hitting many civilian targets, tried bombarding each other's headquarters, police said. They said shells roared in the direction of the militia command in the waterfront area of Karantina and Aoun's headquarters in the district of Baabda, five miles southeast of Beirut. Radio reports said fires raging across the densely populated Christian area were allegedly triggered by phosphorus bombs.

Amid the rumbling blasts, the militia-run Voice of Lebanon radio station

contacted Geagea and asked whether he saw a near-end to the indiscriminate violence that has forced thousands of families to live underground in shelters.

"I don't know when this crisis will end," Geagea said. "But I know that Aoun is the biggest obstacle on the way of the peace process." Geagea reiterated his call on the general to step down and deliver powers to the pro-Syrian Hrawi.

In a bloody escalation of their warfare, forces of Aoun and Geagea have battled fiercely since Monday in and outside the capital, killing at least 27 people and wounding 74 others.

At least 980 people have been killed and 3,660 others wounded since fighting between the rivals for the control of the Christian enclave broke out Jan. 31.

Hrawi, a Christian Maronite who Aoun has dismissed as a "Syrian puppet," apparently failed Wednesday to obtain a Syrian pledge to become more directly involved in the Lebanese conflict, Arab diplomatic sources said.

Syria is a key power-broker in Lebanon and maintains some 35,000 troops there. Iraq has admitted supplying arms to Christian Lebanese forces opposed to Syrian control.

Moslem sources in Beirut said Hrawi, who arrived in the Syrian capital with his Sunni Moslem Prime Minister Selim Hoss, had asked Syria for help in implementing a security plan for greater Beirut that would ensure the expansion of his legitimate authority over the Christian and Moslem sectors of the capital. "(Assad) does not want at this stage to get involved in the struggle in the Lebanese Christian camp," the diplomatic sources said.

#90129u1609 05/09/1990 ~United Press International

NEW YORK (MAY 9) UPI - A funny thing happens to stage and screen actor Kevin Kline on the way to Elsinore. He is overshadowed by Claudius.

Claudius, Hamlet's devious uncle who killed his brother and married his brother's widow, is one of the major characters in the Shakespeare canon but ''Hamlet'' has always been the Prince of Denmark's play as indicated by the title. Hamlet's rage at the perfidy of Claudius and his co-conspirator, Queen Gertrude, is the guts of this great tragic drama.

It is Kline's inability to get inside Hamlet and really feel this rage that makes it possible for Brian Murray, a versatile actor and director, as King Claudius to dominate the off-Broadway Public Theater production which opened Tuesday.

This is the 13th of Shakespeare's plays to be performed in producer Joseph Papp's marathon presentation of all of the Bard's work over a period of several years.

Handsome Kline has the look of a romantic poet and a talent for acting classic roles that is unmatched in the American theater today, judging by his Richard III and Henry V. When he first tried his hand at Hamlet for Papp in 1985, his performance was thought to be promising but not fully realized.

In this second time out, Kline is still dancing around the essence of the neurotic, indecisive, ill-fated young intellectual who ponders suicide and brings himself to the very point of killing his uncle but does neither. This is a virile Hamlet but not one whose passion burns brightly enough to dazzle us as Richard Burton did 25 years ago on Broadway.

Kline is too bouyant, too eager to seize the sardonically merry moments of the drama, such as directing the play within a play, to make us believe he is the introspective and enigmatic Hamlet spelled out in the ''To be, or not to be'' soliloquy. Kline speaks these famous lines beautifully, even lyrically, but it is a solo performance not in synch with his generally bland Hamlet.

Kline also is making his directorial debut and has done a commendable job in bringing us a direct, uncluttered ''Hamlet'' with a strong cast, strong on enunciation, and logically thought out stage movement. There are some judicious cuts and he brings in this ''Hamlet'' in slightly more than three hours.

His decision to play it in modern dress in no way distracts our attention, since there are no sets and little stage furniture to indicate a historic period. Two black pillars, a raised platform, a maroon curtain, and a few props such as silver candelabra are enough to support the action, leaving the trappings of the Danish court to our imagination.

Murray as Claudius wears a be-medalled, be-ribboned military costume worthy of a banana republic dictator. He makes the king a fair, feeling, courteous man at the beginning of the play, then gradually peels away his gentility to reveal the raw lust for power that has fed his appetite for Gertrude and the throne.

This transformation is so subtley played, that we watch Claudius with growing fascination and a realization that Shakespeare has used all of his skill in crafting this obnoxious character who, until now, has always played second fiddle to Hamlet's strad. Murray's king-by-regicide is not simply a villain, but a man of considerable ability as a ruler who was not content to play the waiting game.

Another outstanding performance is being given by Josef Sommer whose Polonius is indeed loquacious but not without a claim to respect. Dana Ivey's Gertrude is too stiff-spined to be really affecting, but Diane Venora (who played Hamlet at the Public Theater a few years back) makes a vulnerable and touching Ophelia whose madness is restrained enough to be credible.

Peter Francis James makes a winning Horatio and Michael Cumpsty is stalwart as Laertes. The Rosencrantz-Guildenstern interchangeables, to judge by Gertrude's greeting to them in this production, are equally yuppie in the hands of Philip Goodwin and Reg E. Cathey.

Robin Wagner's minimal scenic design and Martin Pakledinaz's costumes are worthy of praise and Jules Fisher's lighting is marvelously atmospheric except for the inappropriately bright illumination of the ghost of Hamlet's father, all too solidly played by Robert Murch. Bob James has contributed some charming incidental music.

WASHINGTON (MAY 9) UPI - U.S. participation in a new international bank to foster capitalism in former Soviet bloc nations was criticized Wednesday on Capitol Hill as not ensuring that funds go directly to people rather than governments.

The European Bank for Reconstruction and Development, formed in January with 40 member nations, expects to lend up to $12 billion in its first five years of operation.

If its participation is approved by Congress, the United States would be the largest single member, contributing about 10 percent of the bank's budget.

David Mulford, Treasury undersecretary for international affairs, told a House subcommittee on international development that the United States had received guarantees that at least 60 percent of the bank's money would go to the private sector.

But Mulford, under questioning from subcommittee chairman Rep. John LaFalce, D-N.Y., acknowledged he was unsure whether the bank's proposed charter requires the private sector in such cases to be the initial recipient of the funds or an end beneficiary.

''It's not that clear on that,'' Mulford said.

Despite his concern for guaranteeing that the bank's money primarily encourage small, private ''mom-and-pop'' operations, LaFalce said he nevertheless supports congressional endorsement of U.S. participation.

''What sort of political statement would the American people be making to those struggling in Central Europe if we were to turn away now?'' he asked.

The bank's very existence would encourage private investment from the United States and elsewhere, he added.

LaFalce's reservations were amplified, however, by the conservative Heritage Foundation's Edward Hudgins, who ticked off 10 objections, including a prediction the bank would be no more successful in Eastern and Central Europe than the World Bank has been in other Third World countries.

Hudgins cited a report last year by the U.S. Agency for International Development, which he said found little correlation between foreign aid and development.

''In Latin America, massive loans generally have delayed economic change and helped the very politicians responsible for a country's economic problems to hang on to power,'' he said.

Hudgins said the United States should instead take its own direct actions, giving proportional awards to those countries that allow economic freedom and establishing ''free-trade areas'' that remove all tariffs and many non-tariff barriers between the United States and the targeted countries.

Also presenting testimony was Horst Schulmann, managing director of the Institute of International Finance, an international group of commercial banks, who praised the new bank for its symbolism and uniqueness.

Schulmann said creating a new development bank would assure other Third World countries they are not being abandoned by the World Bank and ''will be an opportunity for the international community to judge how the Soviet Union might act as a future member of Washington-based institutions.''

KARACHI, PAKISTAN (MAY 9) UPI - Gunbattles between youths from rival ethnic groups in Pakistan killed at least five people and injured 10, police and hospital sources said Wednesday.

Police officials said trouble broke out Wednesday morning when gun-wielding youths from one community attempted to rob members of another community in an eastern neighborhood of Karachi, Pakistan's largest city.

Gunbattles ensued between Mohajir immigrants from India and natives of northeastern Punjab Province, police said. They said some youths also fired indiscriminately on passersby, looted stores and attacked a police station.

Hospital sources said at least five people were killed and 10 wounded during the two hours of unrest.

Karachi and surrounding Sind Province have been wracked by ethnic and political violence that has left hundreds dead in recent years.

Recent clashes have ocurred between members of the Mohajir Qaumi Movement, an opposition party set up to protect the interests of the Mohajirs, and members of the local student wing of Prime Minister Benazir Bhutto's Pakistan People's Party.

Mohajirs came to Pakistan from India following the partition of the subcontinent in 1947.

#90129u1631 05/09/1990 ~United Press International

(MAY 9) UPI - North Carolina Democrat Michael Easley, a close second to former Charlotte Mayor Harvey Gantt in Tuesday's Senate primary, said Wednesday he would demand a June runoff to decide who will challenge Republican Sen. Jesse Helms in November.

With more than 96 percent of North Carolina's precincts counted in the six-man race, Gantt led with 252,250 votes, or 38 percent, compared with Easley's 198,920 votes, or 30 percent.

A candidate needed to get more than 40 percent of the votes to avoid a June runoff and Easley said Wednesday he would call for the runoff.

A state Board of Elections aide said Easley had the right to ask for the runoff, which would be denied only if final vote totals gave Gantt more than 40 percent.

Gantt, at a news conference, urged Easley to not push for the runoff, arguing it would only help Helms, a three-term conservative stalwart who

easily won his primary Tuesday.

''Before Mike Easley takes that walk to the board of election I'm asking him to think twice, to chose unity over divisiveness, victory in the fall over another battle in the spring,'' Gantt said.

But Easley, a district attorney, said the close tallies show voters apparently wanted to hear more from the candidates and he was confident he and Gantt would run ''clean, issue-oriented'' campaigns.

''We are not going to divide anybody,'' Easley said. ''You won't see Mike Easley and Harvey Gantt fighting each other. Instead they are going to contrast their records with Jesse Helms.''

Finishing third in the race was former North Carolina Insurance Commissioner John Ingram with 17 percent and former State Sen. R.P. ''Bo'' Thomas with 12 percent.

The race was the highlight of a series of Tuesday primaries in which four states - North Carolina, Ohio, West Virginia and Indiana - chose candidates for the November general election.

In the only other race that drew significant national attention, Rep. Donald Lukens, R-Ohio, convicted in a sex scandal last year, lost his bid for a re-election nomination.

The 59-year-old Lukens, virtually abandoned by mainstream Republicans after being convicted of a misdemeanor for having sex with a 16-year-old girl, finished a distant third to state Rep. John Boehner, who received 49 percent, and former Rep. Tom Kindness, who had 32 percent. Lukens garnered 17 percent.

''I've never argued with the voters of this district,'' said Lukens. ''Maybe now I can get back to a normal life.''

The November election will match Boehner against Greg Jolivette, who picked up 52 percent of the Democratic vote in defeating two primary opponents Tuesday.

The voting in the four states Tuesday kicked off a five-week period in which 22 states will choose candidates for the November general election.

Generally, the most important November battles in the four states - a gubernatorial race in Ohio and Senate races in the other three - were not major features Tuesday, since the candidates faced either little or no opposition.

Also in North Carolina, 100-year-old Henry Stenhouse of Goldsboro was

defeated Tuesday by retired Army Maj. Don Davis of Erwin in the 3rd Congressional District Republican primary.

New Jersey is one of nine states that will hold primaries June 5, but voters in Atlantic City on Tuesday voted in a non-partisan race for mayor.

Republican incumbent James Usry, 68, the city's first black mayor who is under indictment on corruption charges, will face James Whelan in a June 12 runoff.

Usry captured 2,940 votes to Whelan's 3,557 votes, topping a field of seven candidates. The runoff is necessary because neither captured more than 50 percent of the 10,273 votes cast.

Despite the lackluster primaries, the four states will have important statewide contests in November.

In Ohio, the key general election battle will be for governor, with Democrat Anthony Celebrezze facing Republican George Voinovich, former mayor of Cleveland.

Senate races are the critical contests in the other three states.

In addition to the re-election bid by Helms, Sen. John Rockefeller, D-W.Va., makes his first re-election run, and Sen. Dan Coats, R-Ind., who was appointed to fill Vice President Dan Quayle's seat, runs in his first Senate contest.

#90129u1657 05/09/1990 ~United Press International
CHICAGO (MAY 9) UPI - Aggressive professional buying rallied soybean complex futures to sharply higher levels in active trading Wednesday on the Chicago Board of Trade.

Closing prices were higher across the floor and were at or near session highs.

After some early selling pressure, the market turned higher and continued to rally the rest of the day.

July beans reached a high of $6.61 per bushel and November topped at $6.76 partly on spillover from soybean oil. The rally was triggered by active buying of oil in hopes of a large sale Thursday to Pakistan.

Corn and wheat took their cue from soybeans and were moderately higher at the final bell.

Locals were featured buyers of corn and commission houses in wheat, although gains were limited by light selling activity.

Reports the Agriculture Department had rejected the Soviet Union's bid for 550,000 tons of wheat kept a lid on wheat values.

Beneficial rain across much of the Upper Midwest also kept corn and soybeans on the defensive as it has interrupted field work.

Some positioning was evident ahead of the crop report to be released Thursday afternoon by the USDA.

Country movement was light.

At the close, corn was up 1 to 3 3/4, soybeans up 13 to 14, wheat off 1/2 to up 2 and oats off 1 to 2 1/4.

#90129u1680 05/09/1990 ~United Press International

SEATTLE (MAY 9) UPI - The Boeing Co. reacted cautiously to Wednesday's announcement that French and British aviation companies signed an agreement to study the feasibility of building a new generation of supersonic passenger jet.

Boeing officials have said in the past that supersonic transports, or SSTs will be the wave of the aviation future and that Boeing is likely to jump into the market.

But Mike Henderson, manager of Boeing's high-speed civil transport program said the Seattle company will proceed cautiously in deciding what type of SST it would build and who it may take on as a partner in the expensive and complex project.

''It's too early for us to pick partners,'' Henderson said. ''We're talking to all the interested parties about the possibility ... and that will probably go on for years.''

British Aerospace PLC and France's Aerospatiale said they would team up to study the possibility of building a new SST to replace the aging Concorde.

Officials said the new plane likely would fly up to 7,500 miles and would be able to carry nearly double the number of passengers as the existing Concorde, which carries 128 passengers and has a range of 3,750 miles.

It would have a cruising speed of Mach 2.4, compared to Mach 2.2 for the current Concorde. Mach 1 is the speed of sound.

Officials with the two European companies said a decision probably would be made within five years on whether to build the plane.

Henderson said despite the Europeans' experience with the Concorde, they probably would have to ''start from scratch'' with a new SST rather that remake the Concorde to achieve efficiency, capacity and noise levels that would make the plane commercially successful.

A major hurdle in developing a new generation SST, Henderson said, is designing engines that would not produce any more noise than those on the Boeing 747-400 jumbo jet.

Because of the Concorde's engine noise, New York and Dallas are the only two U.S. cities that allow the jet to land at their airports.

Other problems include developing adhesive resins that will hold the plane together when subjected to high temperatures created by supersonic speeds and what to do about sonic booms created by the plane. It is currently illegal for a commercial supersonic plane to fly over the United States.

#90129u1690 05/09/1990 ~United Press International

CHICAGO (MAY 9) UPI - A judge Wednesday agreed to allow a videotape of the Chicago Mercantile Exchange Swiss franc trading pit to be shown to jurors at the fraud and racketeering trial of three traders.

Swiss franc traders Robert Mosky, Danny Scheck and David Zatz are the first defendants to face trial on charges arising from a two-year FBI undercover investigation at the Mercantile Exchange and the Chicago Board of Trade that led to the indictments of 47 traders and a clerk.

Jury selection was completed Wednesday morning, with the selection of 13 women and four men as jurors and alternates. Which of the 17 will actually decide the case will be determined only after the evidence has been presented and closing arguments heard. The trial was expected to take six to eight weeks.

Opening statements were scheduled Wednesday afternoon. Prosecutors said they expected their opening statements to take about two hours.

U.S. District Judge Ann Williams Wednesday approved a defense request to introduce a videotape of trading in the Swiss franc pit during a heavy trading period as evidence in the case.

Defense attorney Harvey Silets, who represents Scheck, said the tape will show the trading pit is too hectic for any kind of organized racketeering scheme to function.

The star prosecution witness will be Randall Jannett, the FBI undercover agent who spent more than a year as a trader in the Swiss franc pit.

The prosecution's evidence will include extensive audio tapes secretly recorded by Jannett. The tapes - made in the trading pits and elsewhere - include conversations and transactions involving defendants and other traders.

Other expected prosecution witnesses include Swiss franc traders William Walsh and Mark Fuhrman, who have pleaded guilty and agreed to cooperate with prosecutors.

Prosecutors Dan Gilogly, Mark Pollack and James Fleissner have said explaining the complexities of commodities trading - carried out in so-called pits where screaming brokers huddle together executing buy and sell orders with frenzied shouts and hand signals - will be a big part of their job.

Prosectors have described Mosky as the organizer and head of a band of Swiss franc brokers who rigged trades to cover their mistakes and line their pockets at the expense of clients.

Mosky, 33, of Chicago, is charged with racketeering conspiracy, 28 counts of fraud and 51 counts of violating trading rules and could face 415 years in prison and fines of more than $12.4 million if convicted.

Scheck, 28, of suburban Skokie, is charged with eight fraud counts and 10 counts of violating trading rules. Conviction on all counts could bring a sentence of up to 90 years in prison and a fine of up to $3 million.

Zatz, 43, of Chicago, is charged with six counts of fraud and eight counts of violating trading rules. He could face up to 70 years in jail and a fine of up to $2.1 million if convicted.

#90129u1698 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - A U.S. trade official told Congress Wednesday that despite estimates of $1 billion per year in losses in the U.S. semiconductor industry, the administration feels no further trade action is needed against Japan.

Donald Phillips, assistant U.S. trade representative for industry, told a House commerce subcommittee it is unlikely the U.S. industry will meet the goal of providing by next summer 20 percent of Japan's semiconductor market as set out in a U.S.-Japan trade agreement.

But Phillips said considerable progress has been made in the past year on that and related goals and that the administration is satisfied with policy changes already approved by the Japanese government.

''We did succeed in changing the Japanese attitude and Japanese performance,'' he said. ''So we have had some success in that respect.''

Phillips said that among the changes, the United States has experienced an increase in the number of Japanese firms using semiconductors - particularly makers of personal computers - that are setting up production facilities in the United States.

(MAY 9) UPI - Vice President Quayle says the United States backs a French-German statement urging Lithuania to suspend the effects of its declaration of independence. At a ceremony honoring Dwight Eisenhower today in Paris, Quayle said the former president predicted the current changes in Europe.

The Kremlin's giant bells rang for the first time since the end of World War Two today as the Soviet Union marked its victory over Nazi Germany. Rockets and heavy tanks rolled through Red Square in a parade celebrating the 45th anniversary of the end of the war, in which 26-Million Soviets died.

Poland's military staged a parade today to observe the 45th anniversary of

the surrender of Nazi Germany. Solidarity Prime Minister Tadeusz Mazowiecki reviewed the parade and said ''We pay tribute to the heroes who did NOT allow the Nazis to erase Poland from the map of Europe.''

Legislation proposed today in the Hungarian Parliament would make Hungary the first East Bloc country to suspend its Warsaw Pact membership since the wave of reforms began last year. The Parliament agreed to consider suspending Hungary's membership in the Warsaw Pact pending negotiations on its future role in the Soviet-led alliance.

President Bush is offering to stop further production as part of a U-S-Soviet agreement on deep cuts in stockpiles of chemical weapons. Administration officials say the shift in policy comes as Bush tries to nail down a pact for the coming super-power summit late this month in Washington.

(MAY 9) UPI - A merchant ship is on its way to rescue four crew members of a yacht that sunk last night southwest of Bermuda. The four people who were on the boat are drifting in a raft. The Coast Guard says one of its planes is circling the area until the rescue ship arrives on the scene.

Singer Tom Waits says even he is surprised by the size of a verdict that awards him two-pointMillion dollars in damages. The ruling issued yesterday in Los Angeles found that Frito-Lay and its ad agency illegally impersonated the blues singer's voice for a radio jingle to advertise a new corn chip.

A report released by the Older Women's League says today's working women will be NO better off financially when they retire than their mothers. The league said women in 1970 received 70 percent of the Social Security benefits men received. In 1989, that percentage grew to just 73 percent.

BONN, WEST GERMANY (MAY 9) UPI - East German figure skating star Katarina Witt said she refused offers of millions of dollars to work for her country's secret police, the West German Stern magazine reported Wednesday.

The Olympic champion, contradicting claims she had been the spoiled brat of ousted communist leaders Erich Honecker and Egon Krenz, said they had given her no breaks when it came to ''idiotic'' formalities.

Witt said the now-dismantled East German Ministry for National Security - or Stasi - attempted to use her as an informer by offering her up to $3.1

million for appearances abroad. Witt said she refused Stasi's offers.

Under the former hardline communist government, paid appearances abroad were officially forbidden for sports stars.

Witt said in spite of repeated, attractive, offers by Stasi officials, she did not sign any of the contracts offered her between 1984 and 1988.

''Luckily I had friends who I could talk to about it (the offers),'' Witt said.

Witt, who won the gold medal at the 1984 Sarajevo Winter Olympics and retained her title four years later at Calgary, said one of the Stasi officials quoted the devil when making his offer.

''I couldn't sleep the night before the next meeting and drank glass after glass of pina coladas. The men came and left three hours later without my signature,'' the 24-year-old skater said.

She admitted to have reservations about her decision: ''Honestly, I later sometimes regretted it,'' she said.

Witt complained about frustrating restrictions.

''Even in my case were there idiotic things,'' she said. ''For example, I used to have to report each and every person whon sent me mail from abroad. After my Olympic victory I got thousands of letters from all over the world. I ignored their (Stasi's) ridicuolus command. That's when they started opening my mail,'' the star said.

Witt, on a lucrative skating tour of major U.S. cities, had nothing but compliments for the United States.

''Here, no one tries to ruin me,'' she said.

IRVING, Texas (MAY 9) UPI - Greiner Engineering Inc. said Wednesday a consortium in which it is the lead participant has been selected by the Hong Kong government to serve as planning and engineering consultant for a new $4.1 billion airport in the British colony.

The Greiner Airport Consortium will plan the airport, one of the largest public works projects in Hong Kong's history, to be constructed on Chek Lap Kok Island.

Besides Greiner, the consortium includes Maunsell Consultants Asia Ltd.

and J. Roger Preston & Partners, both of Hong Kong, and St. Louis, Mo.-based Hellmuth, Obata & Kassabaum Inc.

The new airport, expected to handle 50 million passengers by the year 2011 will have an ultimate annual capacity of 80 million passengers, 320,000 aircraft movements and over 4 million tons of cargo, according to Greiner.

Greiner representatives said planning and design for the airport will proceed on an accelerated schedule so as to open the facility by early 1997. The existing airport will have reached its maximum capacity by 1996.

''The airport project is the focal point of a major development program in Hong Kong, which includes additional seaport facilities, two new bridges to connect Lantau Island with the population centers of Hong Kong and a rail line connecting the airport with central Hong Kong and Kowloon,'' said Greiner's T. Wallace Hawkes.

#90129u1782 05/09/1990 ~United Press International
WASHINGTON (MAY 9) UPI - Charles Keating, the man blamed for the worst savings and loan collapse in American history, said Wednesday he is broke and apologized to investors who lost millions of dollars, saying, ''I'm dreadfully sorry.''

In a speech to the National Press Club, Keating, chairman of the failed Lincoln Savings and Loan of Los Angeles, also said the mortgage on his home in Phoenix is being foreclosed.

''I'm broke,'' Keating said. ''My family is broke.''

The government seized control of Lincoln, a subsidiary of Keating's American Continental Corp., in April 1989, charging the real estate promoter and others with racketeering and fraud in the $2.5 billion collapse of the thrift.

Keating has maintained his innocence and filed a suit to regain control of the institution.

''If I was a crook, if I was the greediest man in the world, you'd have to call me stupid ... because nothing stuck to my palms,'' he said.

Keating also apologized to the holders of worthless bonds in American Continental Corp. A lawsuit has alleged investors were misled into believing the bonds were insured by the federal government.

While admitting no wrongdoing, Keating said, ''I really am sorry. It's the biggest pain in my life. ... I'm sorry they had problems. I'm dreadfully sorry and everybody in my family is.''

He also said there is ''an excellent chance'' the money will be repaid.

As for the ''Keating Five'' - the senators who intervened in the federal investigation of Lincoln on Keating's behalf - the fallen thrift chairman said, ''I think they did darn well. They should be congratulated.''

But he contended, ''Nobody listened to them.''

The five senators, all feeling political heat because of the Lincoln case, are John Glenn, D-Ohio, Donald Riegle, D-Mich., Alan Cranston, D-Calif., John McCain, R-Ariz., and Dennis DeConcini, D-Ariz.

On his dealings with billionaire junk bond financier Michael Milken, who agreed to pay $600 million and plead guilty to settle a federal fraud case Keating said, ''I don't think Mike'll say anything about us because we didn't do anything.''

Keating also took a swipe at Federal Deposit Insurance Corp. Chairman William Seidman's plan to slash the price on some real estate seized by the government from defunct savings institutions.

''He's helping the rich,'' said Keating, who lived a life of opulence. ''Only the rich will be able to acclimate to the system.''

Keating, who disclosed he is paying his huge legal bills through insurance policies held by his companies, said he is looking to the future and intends to clear his name.

But he added, ''Anybody who serves on the board of a bank or a savings and loan ought to have his head examined.''

#90129u1807 05/09/1990 ~United Press International

NORFOLK, VA (MAY 9) UPI - Naval investigators searched the fire-scarred interior of the guided missile destroyer USS Conyngham Wednesday in an effort to determine what set off the blaze that killed one sailor and injured 18.

A team of investigators and Naval Investigative Service agents were interviewing crew members and examining the ship. The fire erupted in one of the Conyngham's four boilers as it was being lit during routine maneuvers early Tuesday, about 80 miles off the North Carolina coast.

Capt. Paul Hanley, senior public affairs officer for the Atlantic Fleet, said the ship was preparing for an inspection when the fire occurred. He did not know of any prior mechanical problems aboard the ship.

''We don't know what the precise circumstances were - whether the procedures and the circumstances were routine or whether something unusual happened,'' Hanley said. ''That's one of the things that the investigative team will try and find out.''

The investigation will focus on equipment, procedures and events leading up to the fire, he said. The investigative team is headed by Capt. Raymond Sharpe Jr., commander of Destroyer Squadron 10 in Norfolk.

The crippled 437-foot destroyer was towed into Norfolk by the USS Opportune, a Navy salvage ship, at about 2:30 a.m. Wednesday. About 200 family and friends greeted the ship in what Navy officials called an

emotional reunion.

A dark blistered area on the ship's starboard side bore evidence of Tuesday's roaring fire. One sailor told his mother the flames became so hot that they caused metal decks to bubble and firefighting masks on sailors to melt.

The fire started in the forward boiler room and thrived on diesel fuel, said Capt. Joseph Perrotta Jr., skipper of the USS Normandy, which assisted the Conyngham in the Atlantic Tuesday.

Perrotta praised the Conyngham crew, saying their fire-fighting efforts kept weapons and ordnance areas cool. At no time was ordnance in danger of being set off, he said.

By Wednesday afternoon, 10 of the 18 injured sailors remained at Portsmouth Naval Hospital. Five taken to the hospital Tuesday by helicopter were released, along with five who were admitted for examination Wednesday morning.

Listed in guarded condition were: Lt. j.g. Oscar Dansby of Atlanta; Lt. j.g. John Beaver of Falls Church; Petty Officer 3rd Class John Repik of Albuquerque, N.M.; and Petty Officer 3rd Class Paulo Acedra, of San Pedro Laguna, Puerto Rico.

In satisfactory condition: Petty Officer 3rd Class Joseph Hoff of Kingsport, Tenn.; Petty Officer 3rd Class Randall Valentine of Lapeer, Mich; and Lt. Cmdr. Martin Moody of Indian Head, Md., the ship's executive officer.

Hanley revealed Wednesday that Lt. Algernon Pope Gordon Jr., 34, of Montgomery, Ala., likely died of smoke inhalation. He declined to comment on circumstances surrounding Gordon's death. Gordon, the ship's operation officer, lived with his wife and three children in Norfolk.

The 27-year-old ship lost power shortly after the blaze was extinguished and had to be towed about 60 miles. Navy officials said a fuel leak caused the Conyngham to shut down its engines. It was not known if the leak was linked to the cause of the fire.

The Navy is also investigating a separate accident that occurred Tuesday in the Chesapeake Bay. A sailor aboard a hovercraft, known as a Landing Craft Air Cushion, was killed when one of its propellers broke apart, striking him.

The victim was identified Wednesday as Petty Officer 3rd Class Norbert Thomas Hanke, a gas turbine specialist from Louisville, Ky.

#90129u1810 05/09/1990 ~United Press International
(MAY 9) UPI - President Bush and members of Congress agreed today to begin formal negotiations on the budget in talks that could become a showdown on the record federal deficit. Bush spokesman Marlin Fitzwater says a bi-partisan budget group will begin work on Tuesday in discussions that hold open all options, including higher taxes. The budget talks were set during a meeting today between Bush and congressional leaders at the White House.

Next week's scheduled launch of the space shuttle Columbia could be delayed for at least two weeks. Sources say NASA engineers have recommended replacement of a troublesome cooling system valve aboard the shuttle. The recommendation was made to space agency managers attending a flight readiness review at the Kennedy Space Center, but it was NOT immediately known whether the proposal will be accepted.

Tens of thousands of protesters rioted across South Korea today. The dissidents torched police cars and firebombed a U-S government building in Seoul as they protested against South Korea's new ruling party on the day the party confirmed its leadership. Streets in the heart of the capital turned into battlefields as more than 10-thousand protesters clashed with riot police.

Nerves are fraying in flood-stricken parts of Arkansas and Texas... where levees have so far kept giant walls of water from flooding communities. In southwest Arkansas, the Red River levee in Fulton is weakening and is in danger of collapse. And in Texas, National Guard troops are helping shore up a levee threatened by rising Red River waters in Bowie County.

#90129u1812 05/09/1990 ~United Press International
WASHINGTON (MAY 9) UPI - Sen. Joseph Biden, D-Del., said Wednesday he thinks ground-based nuclear weapons in Europe should be eliminated and he questioned the need for air-launched systems to guarantee there is no conventional war.

Biden's comments came during a hearing of his Senate Foreign Relations Committee subcommittee on European Affairs, a session at which Paul Wolfowitz, undersecretary of defense for policy, said nuclear weapons must remain part of the NATO doctrine.

President Bush, who has decided not to modernize the European-based Lance missile and nuclear artillery shells, has called for a North Atlantic Treaty Organization summit to develop its political and military strategy to deal with the reduced threat in Europe posed by Moscow and its Warsaw

Pact allies. And the United States hopes to move on to negotiations about reduced levels of short-range nuclear forces in Europe once a conventional forces pact is in place.

Biden said he believes that the United States - after the equalizing conventional force treaty is put into effect - no longer will need ground-based weapons to compensate for Soviet numerical advantages in conventional arms. Those, he said, should be removed either by negotiation or unilaterally.

Much of the attention has now shifted to the Tactical Air-to-Surface Missile, or TASM, as a weapon that could be flown to targets in place of the other systems and deter against a conventional attack.

But Biden told Wolfowitz he had doubts about the need for the TASM and said the United States will have to present a convincing case to a soon-to-be unified Germany for deploying the missile.

Wolfowitz said the administration believes it would be wrong to denuclearize NATO and ''we don't believe that is an issue for review'' in a new NATO strategy.

He said that militarily significant numbers of U.S. forces must remain in Europe after a conventional forces trety is signed.

''Only a combination of conventional and nuclear forces can deter ensure peace in Europe,'' he said.

#90129u1837 05/09/1990 ~United Press International

NEWTOWN SQUARE, Pa. (MAY 9) UPI - ARCO Chemical plans to spend $2.5 billion to double the size of the company over the next five years, ARCO President and Chief Executive Officer Harold Sorgenti said Wednesday.

ARCO will increase production by building and expanding plants and will continue its push into overseas markets, Sorgenti told stockholders at its annual shareholders meeting in Delaware County.

The company, a subsidiary of Atlantic Richfield Co., plans to fund the expansion in part from its own resources and by raising money either from banks or capital markets, company spokesman Gerald Davis said. ARCO Chemical shares are traded on the New York Stock Exchange.

The chemical company will increase production of propylene oxide by one billion pounds to four billion pounds, Sorgenti said.

To achieve this ARCO will build a new propylene oxide plant in Channelview

Texas, complete a joint venture in South Korea and expand its facility in Fos-sur-Mer, France, Sorgenti said.

The move was expected to create some 200 more jobs in Texas and France, Davis said.

''The increased capacity is needed to meet the long-term demands of the merchant market and to supply our own internal growth in propylene oxide derivatives,'' Sorgenti said.

Propylene oxide is an intermediate chemical used to manufacture a number of products ranging from seat cushions and anti-freeze to pet foods and perfumes. Derivatives of the chemical are also used to make plastics and rubber products.

Early this year, ARCO started up a new plant to make butanediol, which is used in automotive parts and household appliances. Last year the company acquired a number of Union Carbide plants that make polyols, another propylene derivative.

The company's push into overseas markets and its focus on businesses where it has technological, logistical or economic advantages has helped spur the companies growth in the last five years, Sorgenti said.

ARCO's net income has grown from $89 million to $405 million dollars since 1985 and sales have increased from $1.6 billion to $2.7 billion.

Foreign sales and exports now account for 44 percent of ARCO's revenues, Sorgenti said.

Sorgenti pledged the planned expansion will not be achieved at the expense of the environment.

By 1992, ARCO will reduce dangerous air emissions at its plants by 85 percent from a 1986 baseline and other waste emissions will be cut by 40 percent, Sorgenti said.

ARCO Chemical expects continued growth in demand for MTBE, an octane-enhancer for gasoline that helps reduce auto emissions.

The company also called on other chemical makers to help set up a national company to recycle polystyrene plastics.

#90129u1845 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - A study called Wednesday for a major change in Pentagon focus away from the diminishing threat of a full-scale war in

Europe to a rising threat of conflict in the Third World.

"We believe the current makeup of forces is ill-prepared to deal with the threat as it emerges," said Rep. Dave McCurdy, D-Okla., "and that the resistence within the administration, the Pentagon, to develop planning guidance is inhibiting our ability to aggressively deal with the most likely levels of conflict in the future."

McCurdy, along with Rep. John Rowland, R-Conn., both members of the House Armed Services and House Intelligence committees, participated in the year-long study and released its findings.

The work was produced by a panel of 22 experts at the non-profit independent Center for Strategic and International Studies. McCurdy and Rowland said it was released in draft form Wednesday to get it out more quickly into the policy debate.

The lawmakers urged the Pentagon to take the initiative in shifting U.S. military priorities rather than be overtaken by similar efforts in Congress. The study concluded that it is becoming more likely that U.S. forces would be involved in a middle intensity conflict in the Middle East or southwest or southeast Asia.

"We have got to refocus our energies which have been focused on the Soviet Union for the last 30 or 40 years," Rowland said. "The biggest challenge will be working with the Pentagon to ... redirect our resources." The report's major recommendations include:

- Invest more money in long-range cargo planes and cargo ships.
- Maintain and modernize long-range bombers, cruise missiles and carrier-based aircraft.
- Develop mid-level forces with armor light enough to be hauled by air but packing enough firepower to take on heavy armor.
- Boost Strategic Defense Initiative efforts to develop defenses against tactical ballistic missiles, which are rapidly proliferating. Such missiles can be armed with nuclear or chemical weapons.
- Concentrate research and development on five critical combat needs, including reconnaissance, long-range strike systems, battle management, survivability and training.
- Exploit space for conventional combat with kinetic energy weapons.

Charles Vollmer, a General Dynamics executive who participated in the study, said the defense industry has "a great sense of urgency" about how shrinking defense spending will affect the defense industrial base.

"You're industrial base is panic-striken right now," he said, urging that the government carefully manage the defense spending decline to preserve the industrial base that does much of the Pentagon's research. The bigger

firms, he said, will survive, but unless the decline is handled carefully it could have a major impact on small subcontractors.

#90129u1862 05/09/1990 ~United Press International

VANDENBERG AIR FORCE BASE, CA (MAY 9) UPI - A solid-fuel Scout rocket boosted a pair of small research satellites into orbit Wednesday to demonstrate the feasibility of using low-cost radio relay stations for tactical military communications.

The 73-foot-long Navy-owned rocket blasted off at 10:49 a.m. PDT and quickly shot away from Earth, disappearing from view as it knifed through a low deck of clouds. Long-range tracking cameras were able to follow the flight through ignition and burn out of the rocket's third stage motor.

Mounted atop the workhorse rocket were two Multiple Access Communications Satellites - MACSATS - developed by Defense Systems Inc. for the Defense Advanced Research Projects Agency, or DARPA.

The small 150-pound satellites are capable of receiving, storing and then forwarding UHF radio communications. Both were placed in a polar orbit with a low point of 432 miles and a high point of 461 miles.

The idea is to demonstrate the feasibility of using small, low-cost satellites to improve tactical military communications that otherwise would not have access to space-based relay stations.

''DARPA did not press the state of the art in the technology,'' said Defense Department spokeswoman Jan Bodanyi. ''The new thing is what use they're going to be put to.

''They're going to run some demonstrations over the next year or so, working with tactical commanders to see how they can use these types of satellites during exercises. Right now, the military has a lot of satellites. They're very expensive, difficult to get time on.''

She said with the smaller satellites, ''we could put up more of them and they would be more available to commanders. The demonstrations will give us a feel for how the military can use small satellites.''

Seven smaller, 50-pound satellites called ''Microsats'', are scheduled to be launched by a Pegasus rocket later in the program.

#90129u1886 05/09/1990 ~United Press International

NEW YORK (MAY 9) UPI - At an annual meeting Wednesday filled with more compelling drama than many of CBS Inc.'s television shows, President Laurence A. Tisch acknowledged the network's prime-time programming was a ''total disaster'' and vowed improvements.

CBS, mired at the bottom of the ratings and embroiled in recent controversies including the suspension of ''60 Minutes'' commentator Andy Rooney and the firing of sportscaster Brent Musberger, will have a new look to its programming this fall - one designed to attract younger viewers, said Tisch.

Programming is a ''total disaster in prime time and we will correct it,'' said Tisch, responding to a statement by a shareholder.

Evening programming is the most critical to a network's success and CBS shows - with the exception of ''Murphy Brown,'' ''Emergency 911'' and ''Major Dad'' - are failing to capture viewers in numbers necessary to excite advertisers.

Pointing to the strength of news and sports programming, for which the network has paid about $2.5 billion to secure long-term exclusive rights to broadcast the World Series, the NCAA basketball playoffs and the 1992 and 1994 Winter Olympics, Tisch promised the entertainment division would be rebuilt.

To that end, CBS - the most watched televsion network in earlier days of TV - has hired programming whiz Jeff Sagansky, whose imprint will be seen at the start of the new TV season next fall, Tisch said.

For two decades CBS dominated the network ratings race and was known as the Tiffany of broadcasting.

CBS won the ratings race for the 1956-57 season - the first season for which ratings were available - until 1975-76, when ABC took over the lead and held onto it for three years.

CBS recaptured the lead in the 1979-80 season and stayed on top through the 1984-85 season. NBC won in 1985-86 and has been tops ever since. CBS sank to third in 1987-88 and has since failed to move up.

''Turning a network around is like turning an oil tanker around,'' Howard Stringer, president of the CBS Broadcast Group told shareholders. ''It does take time.''

''Rushing in response to criticism and anxiety is the surest way to a disaster,'' he said.

Among the CBS board members in attendance were former network anchorman Walter Cronkite and former Secretary of State Henry Kissinger.

They heard pointed questions from shareholders as to whether all 14 members of the CBS board had the appropriate background to steer the network through a difficult time.

''I'd like to hear what Walter Cronkite and Henry Kissinger have to say about CBS programming,'' said David Brown, a shareholder's representative.

''They say the same thing you are saying,'' replied Tisch, drawing laughter from the audience.

Later, Stephen G. Patten, a CBS news correspondent in the of Middle East from 1979 to 1985 who was fired, railed against the company, alleging that CBS management has refused to tell him the sources of rumors that he is an agent of the Central Intelligence Agency.

CBS executives said an investigation showed that Patten may, himself, have been the source of the accusation.

Shareholders had to pass through pickets from the Theatrical Stage Employees Union to get to the meeting held in the auditiorium of the Museum of Modern Art.

Some 200 CBS stagehands and set technicians have been striking the network since April 13 in protest of concessions the union said will cost members 35 percent of their pay.

Evelyn Y. Davis, a familiar figure at many annual meetings who is known for her diverse diatribes, saw her resolution go down to defeat that urged the board to require all directors to own at least 1,000 shares of CBS stock.

Nevertheless, Davis shouted down Tisch at several points during the meeting.

Tisch asked an usher to take the microphone from Davis and at one point threatened to have her removed.

Two other shareholder proposals - one recommending that CBS name all of its executives who make more than $100,000 a year and another for cumulative voting in the election of directors - were both defeated.

LAS VEGAS, NV (MAY 9) UPI - Japanese billionaire Masao Nangaku, owner of the Dunes Hotel and Country Club, announced plans Wednesday to launch a $200 million construction and remodeling project at the Las Vegas Strip resort.

Nangaku said his firm, Minami Nevada Inc., has hired the architectural firm of Hellmuth, Obata and Kessenbaum to develop and design a high rise tower at the gambling resort. Nangaku purchased the Dunes Hotel and Country Club out of bankruptcy in 1987 for $155 million cash.

The Japanese developer recently broke ground on the $100 million, 35-story Minami Towers, which will provide 500,000 square feet of office space in downtown Las Vegas. Nangaku also will build a $35 million, 300-room hotel adjacent to the downtown business tower.

WASHINGTON (MAY 9) UPI - Eight Democratic senators criticized President Bush on Wednesday for his "short-sighted" opposition to an international aid plan to help Third World countries phase out ozone-depleting chlorofluorocarbons.

The senators called on Bush to reverse the U.S. stance against a proposal that Western industrialized nations provide $100 million to help countries such as India and China move toward ozone-safe chemical substitutes for CFCs, which are widely used as refrigerants and cleaning solvents.

Deputy White House press secretary Roman Popadiuk confirmed that U.S. officials were instructed to oppose the aid plan unveiled at a three-day international conference on CFCs in Geneva, Switzerland.

The Geneva conference is being held to prepare for a full international conference in London in June to review progress on implementing a 1987 ozone protection convention.

Proponents of the aid plan say Third World countries do not have the money to adopt more expensive CFC substitutes on their own and that their participation is essential to protecting Earth's ozone layer, which screens out harmful ultraviolet sun rays.

Health experts warn that higher ultraviolet radiation would cause millions more cases cases of skin cancer and cataracts and also weaken human immune systems.

Supporters say that, without aid, many rapidly industrializing Third World nations likely will increase CFC use, negating efforts by developed countries to eliminate their use.

In view of those considerations, the senators said Bush should embrace the international aid plan as an investment in America's health and environment.

"This is not foreign aid," said Sen. John Kerry, D-Mass., "This is a domestic concern. This is in our interest." Added Sen. Albert Gore, D-Tenn.: "The administration's action is extremely short-sighted."

Sen. Claiborne Pell, D-R.I., chairman of the Senate Foreign Relations Committee, said the three-year aid plan would have required a relatively modest U.S. contribution of $8 million a year. "It's a bargain," Pell said. "It's one of the best long-term investments in protecting human health and the environment that we could ever take."

The senators said the aid plan had once again illuminated a familiar split within the administration on environmental policy: They said Environmental Protection Agency Administrator William Reilly and top State Department officials urged U.S. support for the plan but it was shot down by White House chief of staff John Sununu and budget director Richard Darman.

A similar split was evident earlier this year on the issue of global warming, with Bush ultimately being criticized by European officials for dragging his feet on possible international action.

The senators said Bush's opposition to the CFC aid plan would further damage the United States' standing in the international community, especially since most European countries support the proposal.

Popadiuk told reporters the president supported a CFC phaseout, but opposed the aid plan because there already are other institutions providing assistance. Popadiuk confirmed "there are all kinds of views" in the administration on the plan.

"The United States believes that the health of the global environment is everyone's responsibility," he said. "We support a worldwide phaseout (of CFCs)."

The United States, he added, believes that the Third World should be provided with financial support to carry out the goal. "However, we believe it is more sensible to use existing systems and financial

mechanisms already established by the World Bank," he said.

"We do not feel it's sensible to set up new rules and new regulations (which would require the signing of new protocols)," he said. "The World Bank should use existing resources," he said. "They have worked in the past. The resources are sufficient at this time."

#90129u1911 05/09/1990 ~United Press International

SYRACUSE, NY (MAY 9) UPI - A zoo director rejected a suggestion that an Asian elephant fighting to survive a Caesarean section be put to sleep, while debate raged Wednesday over whether zoo officials erred in attempting to breed the pachyderm.

Onondaga County Legislator Joyce Goike, who said she opposes the zoo's breeding program, suggested the 36-year-old elephant, named Babe, be killed to relieve the pachyderm of any suffering she may be experiencing.

But Burnet Park Zoo Director David Raboy said there was no evidence Babe is suffering and she appears to be recovering slowly from a Caesarean section performed Apr. 23 at the zoo.

''She is getting support, she walks around, she interacts with her keepers '' said Raboy. ''I don't have any indication that she is suffering, and in terms of euthanasia, in terms of killing her, that is absolutely absurd.

''We are dealing with an animal that is vigorous, an animal that shows every possibility of a full recovery, and under those conditions you don't even consider euthanasia.''

Babe would have been the oldest Asian elephant in captivity to give birth for the first time, but her calf was stillborn when it was removed from her by Caesarean section five days after she went into labor.

A team of veterinarians conducted the surgery, and said the approximately 260-pound bull calf may have suffocated because it was in an akward position within the elephant's womb.

Although she remained in critical condition Wednesday and was still avoiding solid foods, Raboy said Babe showed signs of improvement after a difficult weekend during which she displayed signs of a slight loss of kidney function.

#90129u1926 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - In a move that could benefit Western hostages in Lebanon, negotiators for Iran and the United States reached substantial agreement on closing thousands of outstanding small claims cases, officials said Wednesday.

The settlement closes some 3,000 cases with a net payment to the United States of about $105 million, U.S. officials said. The disputes date back to the Islamic revolution that forced the shah out of Iran in January 1979.

One official said the only unsettled issue is some technical language in the final agreement, which is being negotiated in The Hague, Netherlands.

The State Department has insisted there is no connection between the technical negotiations, which began in 1981 after the U.S. Embassy hostages were released from Tehran, and the cases of American and other Western hostages being held by pro-Iranian radicals in Lebanon.

But some Iranian officials have made such a link, saying that an end to the hostage-holding must be preceded by a show of good will from the United States. A settlement of the claims is one of the examples of ''good will'' cited by some Iranian officials.

Two American hostages, Robert Polhill and Frank Reed, were freed in the past three weeks, but U.S. officials have said there is no reason to expect further releases at this time. Six Americans and 10 other

Westerners are still believed held in or near Beirut.

In the announcement from Tehran, monitored in Washington, Ali Nobari, Iran's representative at the claims tribunal, was quoted as saying the agreement ''has no relation with political and economic issues including, as the Western media have said, the question of the hostages.''

The small claims, under $250,000, result from contracts that were suspended or broken when militant followers of the Ayatollah Ruhollah Khomeini seized the American hostages in the Tehran embassy in November 1979.

Under the agreement, expected to be made public this week, both countries agree to drop their claims against the other. Iran says that 3,100 separate cases are involved, but the State Department put the the number closer to 2,500.

Larger claims, some of them involving weapons ordered by the shah but never delivered by the United States, remain unsettled.

The negotiations at The Hague are the only formal direct contact between the two governments, although the State Department has said there have been frequent communications through third parties, mainly Switzerland, which represents U.S. interests in Iran.

#90129u1929 05/09/1990 ~United Press International

PHOENIX (MAY 9) UPI - More than two dozen search warrants have been served in 15 cities across the nation in a probe of computer hackers who are responsible for an ''astronomical'' white-collar crime wave of the 1990s, federal and Arizona authorities announced Wednesday.

No arrests were made for computer crimes although three people were taken into custody on unrelated charges, such as weapons violations, said Stephen M. McNamee, U.S. attorney for Arizona.

While officials confirmed that agents from the U.S. Secret Service and the Arizona attorney general's office served 28 search warrants in the last two days, McNamee said it was impossible to determine how many people may have been involved.

Garry M. Jenkins, assistant director of the Secret Service in Washington, D.C., told a news conference that 42 computer systems were seized along with thousands of computer disks that will have to be analyzed for possible criminal wrongoing.

Jenkins said similar cases are being investigated in other parts of the

nation.

Possible crimes discovered in the 18-month joint investigation included credit card fraud, theft of long distance telephone and data communications services and improper entry into computer systems operated by government agencies, private corporations, telephone companies, financial insititutions, credit bureaus and hospitals.

''We are experiencing a crime wave in the computer area that is just astronomical,'' said Gail Thackeray, an assistant Arizona attorney general who headed the state's part of the investigation.

''We can't keep up. Part of it is that computers have gotten cheap and kids of younger and younger ages have access to computers that when I was in college filled a room,'' she said.

Thackeray said the speed of computers can lead to ''colossal losses'' as the hackers quickly trade information.

''This is not a victimless crime,'' Thackeray said. ''We are all victims.''

McNamee called computer hacking the ''white-collar crime of the 1990s.'' He said anyone convicted of computer crimes could face prison sentences of up to 10 years along with a substantial fine.

State Attorney General Bob Corbin said the public needs to take the matter of computer crimes seriously.

''This is not a game,'' Corbin said. ''Most of you have been taking this as a game by hackers.''

Corbin said one victim alone suffered a $1.7 million to the hackers, but the officials said it was difficult to pinpoint an estimated loss.

Thackeray said suspects included both adults and young people and warned that parents have to be aware of what their children are capable of doing with their computers.

''The parents have no idea what danger they can expose their children to if they do not supervise them in using that,'' Thackeray said.

The warrants were served in San Francisco; Los Angeles; San Diego; Phoenix Ariz.; Tucson, Ariz.; Plano, Texas; Miami; Saginaw, Mich.; Chicago, Detroit, Cincinnati; Richmond, Va.; Newark; Pittsburgh and New York City.

McNamee said the investigation was centered in Phoenix because of the expertise involving computer crimes within Corbin's office.

Tom Holtzen, an assistant U.S. attorney, said the suspects who are being investigated ''are linked on one way or another,'' and may have exchanged information about such things as stolen credit card numbers through computer ''bulletin boards.''

#90129u1944 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - Levels of the potent ''greenhouse'' gas methane have fluctuated widely over the past 160,000 years and probably played a major role in warming between Ice Ages, scientists reported Wednesday.

Scientists have known for years that concentrations of the most common greenhouse gas, carbon dioxide, varied naturally even before human activities, like burning fossil fuels and clearing forests, stepped up carbon dioxide emissions. But questions have remained over whether methane underwent similar long-term swings.

Acting like the glass windows of a greenhouse, methane and other so-called greenhouse gases trap heat in Earth's atmosphere and prevent it from escaping into space. Many scientists think an increase in worldwide temperatures will result from increased emissions of such gases.

Methane - a colorless, odorless and tasteless gas - is a chief component of natural gas and is also released by livestock and other agricultural activities.

A team of Soviet and French scientists, using measurements performed on ice samples taken from up to 6,800 feet below Antarctic ice sheet, said it found ''strong variations'' in levels of methane in the atmosphere over the past 160,000 years.

Like carbon dioxide, the highest levels of methane corresponded to the warmest periods between glacial Ice Ages, while the lowest levels occurred during the coldest periods, marked by glaciation.

But the researchers noted pre-industrial methane levels - ranging from 350 parts per billion to 650 parts per billion - were still well below current atmospheric concentrations of about 1,700 parts per billion. Levels of methane were about 700 parts per billion about two to three centuries ago.

''Not only is the present-day methane concentration the largest reached in the past 160,000 years, but it also seems that the present rate of increase was not experienced before anthropogenic perturbation (human interference),'' France's J. Chappelaz and his colleagues wrote in their study published in the British journal Nature.

Based on their findings, the researchers estimated methane's warming power

to be about 30 percent of carbon dioxide's, even though there is far less of it in the air than carbon dioxide.

#90129u1954 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - Spurred by economic jitters, President Bush and Congress agreed Wednesday to begin bipartisan budget talks next week that will consider all options, including higher taxes, to cut a soaring federal deficit.

During an hour-long Oval Office meeting, Bush and the top four congressional leaders firmed up plans to throw the deficit problem to a special bipartisan negotiating group that will meet with no conditions or deadlines.

The talks are set to begin Tuesday at the White House with Bush leading the negotations between the 17 congressmen and the administration team. The talks will then move to Capitol Hill, where House Democratic leader Richard Gephardt of Missouri is expected to preside.

''They are going to sit down and consider everything,'' White House press secretary Marlin Fitzwater told reporters. ''Every idea that anybody wants

to bring up will be talked about and considered.''

Senate Democratic leader George Mitchell of Maine said Bush's invitation was accepted ''without preconditions of any kind.''

''We may not succeed,'' Senate Republican leader Bob Dole of Kansas said. ''It's like putting Humpty Dumpty back together again. It's not impossible but it's almost. We'll need public support.''

Taxes will not be the only hot issue to be negotiated. Congressional leaders expect several politically sensitive areas, such as Social Security, to be thrown into the mix along with deeper defense and domestic program cuts.

Hoping for rapid progress and a multi-year plan, all sides acknowledged the agreement was driven by mounting concern about the economy and signs the savings and loan industry bailout will far exceed earlier cost estimates of $150 billion, pushing up the deficit.

Fitzwater said up to $100 billion in additional savings - way above the $36 billion in spending cuts and revenue increases originally thought necessary - may be needed to meet the fiscal 1991 deficit limit of $64 billion.

''The question is: Can the American people count on their elected leadership to deal with the deficit problem?'' he asked. ''And what the president said today is, 'We want to sit down and negotiate. We want to deal with this problem. We want good-faith efforts by all parties.'''

Dole urged Republicans, some of whom have vowed to oppose any tax hike negotiators may recommend, to be more flexible.

''Let's not lock ourselves in,'' Dole said. ''Let's give the president a chance, if you're a Republican, and, if you're a Democrat, give the Democratic leadership a chance.''

But some Republicans ignored him.

''The president feels about taxes the way he feels about brocolli - you can put it on the table in front of him but he's not going to eat it,'' Rep. Jon Kyl, R-Ariz., said on the House floor. ''If somebody is going to propose new taxes, it's got to be somebody other than George Bush.''

Earlier, after a House GOP caucus Wednesday, Rep. Vin Weber, R-Minn., said ''somebody has to convince us that raising taxes is good for the economy. We're not ready to give up on the basic premise of the Reagan revolution.''

Rep. William Archer, R-Texas, ranking Republican on the tax-writing House

Ways and Means Committee and a summit negotiator, said ''taxes are the last thing we need to consider.''

Bush budget director Richard Darman, in a CNN interview, said ''an excessive tax increase or the wrong kind of tax measures could adversely affect economic growth'' and Bush would oppose them.

''We would be very adverse to anything that would threaten continuing economic growth,'' Darman said before apologizing for negotiating through the media, which summit participants had promised to avoid.

On behalf of Democrats, House Speaker Thomas Foley, D-Wash., promised ''we're not going to attempt to politicize (the talks) on either side or utilize the discussions as an opportunity to renew old political battles.''

Fitzwater insisted the lack of ''preconditions'' did not necessarily mean higher taxes would be in the final package. He said it underscored the commitment by all sides to have talks ''void of the normal political posturing, politics and perceptions.''

Congress will have 17 negotiators at the summit - four appointed by each leader and Foley getting an extra appointment. Most congressional participants were named Wednesday with party leaders on the House and Senate tax, spending and budget committees selected.

Darman and Treasury Secretary Nicholas Brady were to lead Bush's negotiating team.

#90129u1971 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - The release of American hostages Robert Pohill and Frank Reed attracted more public interest than any story this year, according to a survey released Wednesday.

The monthly news interest survey, produced by the Times Mirror Center for the People and the Press, showed that 46 percent of those polled said they ''very closely'' followed the release of the two Americans who were held hostage in the Middle East.

''No other story in the first four months of 1990 was closely followed by more than a third of the public,'' the center said in a statement.

''Times Mirror respondents also cited the Polhill-Reed releases as the most important news event of the month, making this the first time this year that some aspect of political change in Eastern and Central Europe has not been seen as the most significant story of the month by a plurality of Americans,'' it added.

Second to the hostage story in the latest survey was the 20th anniversary of Earth Day, which 31 percent of those polled said they followed very closely.

The independence movement in Lithuania was third with a 27 percent rating and 24 percent of the people said they very closely followed stories about the Hubble space telescope and difficulties with census forms.

The survey also showed that large majorities of those polled believed the media was doing an excellent or good job covering those four stories.

The telephone survey of 1,218 adults was conducted from May 3-7. It had an error margin of 3 percentage points.

#90129u1973 05/09/1990 ~United Press International

LOS ANGELES (MAY 9) UPI - A freeway motorist slain by shots fired from another car apparently was killed as a result of a traffic confrontation between the two drivers moments earlier, police said Wednesday.

Baltazar Bustamante Ayala, 29, was shot to death about 5 a.m. Monday as he was driving through southwest Los Angeles on the Harbor Freeway, heading to a fast-food restaurant that he managed in Gardena.

Detectives have been trying to find two men who were in a yellow Trans Am that pulled alonside Bustamante's red sportscar when the shots were fired.

Homicide Lt. Bruce Hagerty said witnesses from other vehicles on the freeway at the time of the shooting were interviewed Tuesday and told investigators that Bustamante and the driver of the Trans Am had been involved in a traffic dispute immediately before the shooting.

''There was some type of confrontation on the freeway - a conflict between the two cars,'' Hagerty said.

A motive for the shooting emerged from ''bits and pieces'' of information provided by ''five or six'' witnesses who were in cars in the immediate area, Hagerty said. He declined to provide details about the witnesses' accounts of the confrontation.

Hagerty said at least 50 other cars were on the freeway in 55 mph to 60 mph traffic when the shooting occurred at the beginning of the morning rush hour.

During the summer of 1987, Southern California was plagued by a spate of more than 50 incidents of freeway violence in which five people were

killed and 16 wounded. The gunplay between drivers, in several cases amounting to mere brandishing of weapons, attracked nationwide attention.

Though the random attacks appeared to end in March 1988, violence continues to be reported between drivers on the region's packed freeways.

In September 1988, the woundings of five people in three freeway shootings in one week sparked concern about another wave of attacks.

Last month, Alex Rivera, 16, was shot and killed on the Long Beach Freeway by a gunman in another car following an off-road verbal exchange between the occupants of the two cars.

#90129u1980 05/09/1990 ~United Press International

ANCHORAGE, AK (MAY 9) UPI - Exxon oil still fouls one-third of the beaches hit by last year's Exxon Valdez spill, according to reports Wednesday by the oil company and federal officials.

Oil was found on 358.3 miles of shoreline during a survey of 1,062 miles of beaches struck by oil last year in Prince William Sound, the Kenai Peninsula and Kodiak Island, Exxon said in a progress report to federal and state cleanup coordinators. Most of the shores are only lightly oiled.

An assessment by the National Oceanic and Atmospheric Administration supported the Exxon analysis even though the numbers differed slightly, apparently because Exxon was faster than the government in processing data sent in by beach survey crews, said Burl Wescott of NOAA.

Alaska spill coordinator Randy Bayliss said the state had no dispute with the findings of how much oil remained at various locations in a rare display of agreement between Exxon, the state and the federal government.

Exxon cleanup crews hit the beaches last weekend to initiate a second season cleaning up the mess made when the tanker Exxon Valdez grounded on Bligh Reef March 24, 1989, broke open and poured 11 million gallons of oil into pristine Alaska waters, the worst spill in U.S. history.

Shoreline survey teams still must inspect some Kodiak Island beaches and NOAA still must analyze data from shores already inspected, but conclusions can already be drawn that roughly one-third of the shores hit by Exxon's oil still have oil on them 13 1/2 months after the spill.

The other side of the coin is that two-thirds of the shores have no oil after a $2 billion scouring during the first year of the Exxon cleanup and after a winter of battering waves.

Of beaches found with oil in the nearly-complete survey, 245.7 miles are lightly oiled, 62.7 miles have narrow bands of oil, 35.1 miles are moderately oiled, and 14.8 miles are heavily oiled. Two-thirds of the oily shores are in Prince William Sound.

Exxon beach survey coordinator Andy Teal noted that the miles of oiled shoreline are not continguous but include many widely scattered segments of beach of varying lengths.

Eight cleanup crews have worked on more than two dozen beaches so far, said Randy Buckley, an Exxon cleanup official.

One of those beaches was supposed to be off limits because it was an eagle nesting grounds that officials wanted left undisturbed until later in the summer, said Rear Adm. David Ciancaglini. He said once the mistake was discovered, workers left.

Unlike last year when thousands of workers attacked the oil using high-pressure hot-water hoses mounted on barges, this year's cleanup involves 10 percent of that workforce doing mostly manual pickup of tarballs, oily mousse patties and other oily debris.

Ciancaglini said he is still studying Exxon's detailed workplan and reaction to it from local communities and government agencies and expects to attach some conditions when approving it later this week.

Meanwhile, he said, ''We're here to clean oil.''

WASHINGTON (MAY 9) UPI - Congress will have 17 negotiators at the budget

summit with President Bush that begins next week, selected by House Speaker Thomas Foley, D-Wash., and three other congressional leaders.

Foley, who had five picks, named Appropriations Committee Chairman Jamie Whitten, D-Miss., Budget Committee Chairman Leon Panetta, D-Calif., Ways and Means Committee Chairman Dan Rostenkowski, D-Ill., House Democratic leader Richard Gephardt of Missouri, and assistant Democratic leader William Gray of Pennsylvania as his personal representative.

Senate Democratic leader George Mitchell of Maine, who had four choices, tapped Appropriations Committee Chairman Robert Byrd, D-W.Va., Budget Committee Chairman James Sasser, D-Tenn., Finance Committee Chairman Lloyd Bentsen, D-Texas, and Sen. Wyche Fowler, D-Ga., as his personal representative.

House Republican leader Robert Michel of Illinois, also with four choices, named assistant House GOP leader Newt Gingrich of Georgia as his representative and Reps. Silvio Conte, R-Mass., Bill Frenzel, R-Minn., and Bill Archer, R-Texas, the ranking Republicans on the Appropriations, Budget and Ways and Means Committees, respectively.

Senate Republican leader Robert Dole of Kansas was expected to name his four negotiators either later Wednesday or Thursday.

They are expected to be Sens. Mark Hatfield, R-Ore., ranking Republican on the appropriations panel, Pete Domenici, R-N.M., top budget panel Republican, and Robert Packwood, R-Ore., top Republican on finance, along with a personal representative - perhaps assistant Senate GOP leader Alan Simpson of Wyoming.

#90129u1995 05/09/1990 ~United Press International

(MAY 9) UPI - White House spokesman Marlin Fitzwater says a special bi-partisan congressional group will begin formal negotiations on the budget on Tuesday. The announcement came after President Bush met for the second time in four days with top congressional leaders. Fitzwater said Bush and the congressional leaders agreed that there will be ''NO pre-conditions for negotiation.''

A Colombia newspaper says cocaine traffickers plotted to shoot down President Bush's plane last February. But Colombian authorities assured the White House that the summit was secure after they captured 10 anti-aircraft missiles from traffickers three days before the summit in Colombia began. The traffickers reportedly were targeting Air Force One and the U-S Embassy in Colombia.

Officials in Little Rock, Arkansas, say they think the floodwaters headed

their way may NOT be as bad as expected. About 100 homes in the Pine Bluff area were already flooded by mid-morning and about 150 more are expected to be flooded when the river hits its crest of about 48 feet. That would be one-half-foot lower than earlier estimates and could mean less damage. Flood stage is 47 feet.

In Texas, Governor Bill Clements called out the National Guard to help shore up a levee threatened by rising Red River waters in Bowie County.

Michigan Governor James Blanchard today ordered the National Guard to help people left homeless by fires that burned thousands of acres in northern lower Michigan. The largest of the fires that broke out yesterday burned an estimated six-thousand acres of forest land and destroyed about 100 buildings, 75 percent of them private homes or vacation cabins. Officials say the fires are contained.

#90129u2005 05/09/1990 ~United Press International

NEW YORK (MAY 9) UPI - The European Community remained the powerhouse of international mergers in the first quarter of 1990 and U.S. corporate acquisitions overseas plunged 90 percent compared with the same period last year, a consulting firm said Wednesday.

Foreign buyers made 493 acquisitions worldwide, in deals worth a total $26.2 billion in the first quarter of 1990, said KPMG Peat Marwick, an accounting and consulting firm monitoring international corporate transactions.

In the year-earlier period, foreign companies were involved in 518 acquisitions worldwide, worth a total $26.4 billion, KPMG said.

The number of overseas acquisitions by U.S. companies dropped dramatically in the latest first quarter, to $909 million from $8.7 billion, reflecting the slowdown of the U.S. economy and the collapse of the junk bond market, which had provided the financing for many U.S. acquisitions in recent years.

''The collapse of the junk bond market has made it difficult to finance cross-border transactions,'' said Herbert Adler, merger and acquisition partner for KMPG in the United States.

Adler also cited higher interest rates in the United States as a reason for the decline in U.S. investments overseas.

The United States remained the world's prime target for foreign acquisitions, with 148 U.S. companies falling under foreign control in deals worth $15.6 billion, compared with 194 acquisitions of U.S. corporations worth $12.8 billion in the year-ago quarter.

Eight of the nine international transactions worth more than $500 million involved a U.S. target, including the acquisition of mining and oil consortium Freeport McMoRan Inc. by South Africa's Minorco. The only major acquisition outside the United States involved the takeover of Britain's Yorkshire Bank by National Australia Bank for $1.6 billion.

The European Community, which will abolish its internal trade barriers by 1993 to become the world's largest single-market economy, led mergers and acquisitions activity.

The world's largest acquisition completed in the opening quarter of 1990 was the $3.2 billion takeover of Rorer Group Inc. by France's pharmaceutical and chemical giant Rhone-Poulenc.

The second largest deal was also in the pharmaceutical sector, with the $2.1 billion acquisition of Genentech Inc. by Switzerland's Hoffman LaRoche.

Foreign acquisitions by EC members, which includes transactions among the community's 12 members, rose to $14.2 billion, financing 312 deals, and accounting for more than half of the world's mergers and acquisitions activity for the quarter. The EC already was the steam engine for mergers in the opening quarter of 1989 with $10 billion and 316 transactions.

France was the most active country for major mergers, investing $5.2 billion in 59 acquisitions, the same amount spent by British companies on 148 deals.

Another major EC acquisition was MGM/UA Communications Co.'s takeover by Italy's Pathe Communications.

Adler pointed out that 1993 has diverted the focus of international acquisitions toward the EC, resulting in the ''leveling off of foreign mergers and acquisitions in the United States.''

There were only 53 U.S. acquisitions of foreign companies in the first quarter of 1990, down from 95 in the same period of 1989.

EC-based companies also negotiated larger takeover deals than U.S. corporations, with the average value of mergers by the community amounting to $45.5 million, compared with only $17.1 million by U.S. companies.

Acquisitions of EC-based companies rose to a total $7.3 billion from $5.2 billion.

Acquisitions outside North America and the EC also rose to $10.2 billion from $6.8 billion, while sales outside those two main markets were only $2.7 billion, which was almost double 1989's first-quarter figure of $1.4 billion.

WASHINGTON (MAY 9) UPI - House-Senate negotiations on a supplemental spending bill containing emergency aid for Panama and Nicaragua broke down within minutes Wednesday, further delaying assistance that President Bush wanted weeks ago.

Rep. Jamie Whitten, D-Miss., chairman of the House Appropriations Committee, began talks on crafting final legislation by saying his side needed more time to understand the 180 amendments the Senate added to the House version of the measure.

Sen. Robert Byrd, D-W.Va., chairman of the Senate Appropriations Committee reluctantly agreed to a delay, and he and Whitten said they would meet Monday to discuss when full-scale talks might resume.

During a meeting that lasted less than half an hour, House members said they hoped to ''slim down'' the Senate legislation, which added hundreds of millions of dollars in spending as well as controversial amendments on

abortion and the death penalty.

Senators expressed disappointment the House was not ready to negotiate, and suggested it is wrong for the United States to keep telling its allies in Central America that ''the check is in the mail.''

Bush had sought $500 million for Panama, $300 million for Nicaragua and $70 million for refugees by April 5. Both the Senate and House bills grant $420 million for Panama, $300 million for Nicaragua and $100 for refugees.

However, Bush's original request had ballooned to include a total of $2.4 billion in new spending by the time it left the House April 3 and $3.7 billion by the time the Senate finished it May 1. Most of the spending is offset by cuts in military appropriations.

The House voted last week to instruct its negotiators to oppose all the Senate amendments and they did that Wednesday - objecting to the extra spending as well as a provision allowing the District of Columbia to use its tax money for abortions and calling for the death penalty in Washington.

''The House exercised considerable restraint,'' said Rep. Silvio Conte, R-Mass. ''I would hope we could slim the (Senate) bill down.''

Among the Senate proposals the House objects to is one that would spend $185 million for an automated FBI fingerprint center that is expected to be located in Byrd's home state of West Virginia.

Sen. Patrick Leahy, D-Vt., chairman of the subcommittee on foreign appropriations, said even though he did not support Bush's foreign aid priorities, it is important to stop saying the ''check is in the mail.''

''I think the president is justified in saying ... he wants that aid package quickly,'' Leahy said, predicting it would take only about an hour to resolve differences on foreign aid.

Bush has said the delay in foreign aid - intended to bolster the new U.S.-backed governments in Panama and Nicaragua - is ''embarrassing.''

#90129u2051 05/09/1990 ~United Press International

NEW YORK (MAY 9) UPI - Columnist Jimmy Breslin, under fire for making racial slurs to a Korean-American reporter, was suspended without pay for two weeks after calling a radio show to discuss the flap, Newsday said Wednesday.

Newsday editor Donald Forst announced the suspension in a statement printed in the newspaper, citing a conversation the Pulitzer Prize-winning writer had Tuesday when he called the Howard Stern program on WXRK-FM.

''Last Friday's outburst by Jimmy Breslin was ugly and outrageous, and I'm sorry that it took place,'' Forst said. ''There's simply no way to rationalize it or explain it away.

''We decided on Friday that a reprimand and an apology was an appropriate response,'' Forst said. ''We felt then that his apology then was genuine and sincere.

''But his radio conversation Tuesday morning with Howard Stern indicates a lack of sensitivity to what has been and continues to be a painful episode for all of us at Newsday and New York Newsday, and for the community. And we have told him so,'' the Newsday editor said.

The newspaper reported that Forst telephoned Breslin Tuesday night and notified him of the suspension.

According to the Newsday account of the incident, Breslin called the Howard Stern program and said he was worried that the controversy would prevent him from attending a wedding of a nephew who is marrying a Korean woman.

''My nephew, Donald Noonan, is in September marrying a young woman named Fay Kim, who happens to be Korean,'' Breslin reportedly said. ''Does this mean I can't go to the wedding?''

Breslin last week called Ja-Yeon Yuh, a Korean-American reporter at Newsday, a ''yellow cur,'' and ''slant-eyed'' after she sent him a message through the newspaper's computer system criticizing a column about Breslin's wife as sexist.

Stern said he was sorry that Breslin had to apologize to the reporter, according to Newsday, and Breslin responded: ''All my apologies are carbons.''

Newsday said it reached Breslin at home late Tuesday, and asked him if his comments might be labeled insensitive in light of the controversy.

''The thing is called freedom of speech, in case people have forgotten such a thing does exist,'' Breslin told Newsday. ''What are we in, a totalitarian state? I can say anything I ---- please.''

Breslin's wife, Manhattan City Councilwoman Ronnie Eldridge, poked fun at her husband while defending him in a prepared statement.

''Jimmy is not a sexist. He is a working man who needs a lot of attention and a column,'' Eldridge said. ''So sometimes he exposes his need for both in the paper. He delights in his wife's accomplishments and always supports her efforts.

''He is also not a racist. People in need of power have rarely had a more ardent spokesperson,'' Eldridge's statement said.

''Life with him is always a challenge,'' Eldridge added. ''I hope that he is home now working on his book, and if I'm lucky he'll have supper ready when I get there later.''

#90129u2085 05/09/1990 ~United Press International
WASHINGTON (MAY 9) UPI - Rep. Denny Smith, R-Ore., said Wednesday the $1.34 billion request for a new air-to-air missile should be pulled out of the Pentagon budget until the Air Force can prove the weapon works.

Releasing a General Accounting Office report recommending the action, the

former fighter pilot said spending for the advanced medium range air-to-air missile known as AMRAAM should be discontinued until problems with its performance, reliability, producibility and affordability are resolved.

The Air Force has quit accepting deliveries of the missiles from Hughes Aircraft Co. and Raytheon until quality control problems are resolved. It is also conducting additional tests on the missiles - designed as a ''fire and forget'' weapon to allow pilots to promptly turn their attention to other targets.

So far the two firms have delivered a total of 141 missiles to the Air Force.

The missile, said Smith, ''should not recieve any further funding until the Air Force can prove that the missile works. They can't do that right now. ... There's no reason we should spend another $1.34 billion toward production of an unproven program.''

So far Congress has appropriated money for 2,400 missiles, and the Pentagon has ordered and paid for 1,500 missiles. In the fiscal 1991 budget the Pentagon wants money for another 1,800 missiles.

Initially the Air Force wanted to buy 24,320 of the missiles for itself and the Navy, but it has since reviewed the program and is assuming that only 15,500 of the missiles will be bought. The program is now estimated to cost $13.5 billion.

The GAO report said denying money to the program in fiscal 1991 would reduce financial risks while the Pentagon determines if reliability problems can be resolved and the contractors can make up delays in delivery schedules.

#90129u2087 05/09/1990 ~United Press International
WASHINGTON (MAY 9) UPI - The Pentagon and General Services Administration teamed Wednesday to oppose legislation to direct the GSA to supervise a $1.2 billion renovation of the world's largest office building.

At a hearing of the public buildings subcommittee of the House Public Works and Transportation Committee, the GSA and Department of Defense said the Pentagon should get title to its own building and get on with the long-overdue renovation.

The landmark five-sided, five-ringed building, started in 1942 to consolidate military operations and finished just a year later, is structurally sound but in serious need of renovations including new wiring plumbing, and heating and air conditioning equipment.

The GSA now has title to the building with 6.5 million gross square feet of space and 3.7 million square feet of usable work space. It rents it to the Pentagon for almost $80 million a year, and spends about $37 million for operating the building. However, it has spent the excess collected over the years on other federal building projects.

The building's manager, D.O. Cooke, told the subcommittee that transfering the building to the Pentagon and letting it both manage the physical plant on a day-to-day basis and handle the renovation work will save both money and a layer of management.

GSA official Richard Austin told the panel the Pentagon should handle the renovation because of security concerns and added that trying to finance the renovation out of GSA funds would take money away from other federal office construction projects.

The renovation plan calls for moving engineering functions out of the basement to an annex built adjacent to the building, and using the basement space to house workers as wedges of the building are renovated. The project is expected to take 11 years, with the renovation taking eight years of that.

The 48-year-old building's needs include:

-The electrical, heating, ventilating and air-conditioning and plumbing systems must be replaced and brought up to modern standards. The electrical capacity must be expanded and communications and computer cabling must be upgraded.

-Many exterior windows will not close and leak air and water.

-Hazardous asbestos exists throughout the building in ceilings and heating and air-conditioning equipment.

-The four original coal boilers are inoperable and the Pentagon spends $1 million a year to rent three oil-fired boilers. It also rents, for $1.2 million a year, seven 1,000-ton air-conditioning units.

-30- 2744

#90129u2088 05/09/1990 ~United Press International

PARIS (MAY 9) UPI - Vice President Dan Quayle said Wednesday after a three-day tour of Western Europe there is a strong possibility the United States and the Soviet Union will cooperate in space exploration.

"United States and Soviet cooperation in space is certainly a possibility," Quayle said following a meeting at the headquarters of the European Space Agency in Paris. "The Soviets have a certain interest in space, as we do. They have good capability, especially in access to space."

"They have the Mir Space Station. We do not have a space station, and, therefore, there are mutual interests and mutual benefits for both nations in having cooperation," he added.

Following his meeting with European Space Agency Director General Reimer Luest, the vice president, who is chairman of the National Space Council, said the United States remains committed to building a space station that will be the largest international effort ever undertaken in space exploration.

"I can assure you that the United States will push forward on Space Station Freedom. We have no desire to back out," Quayle said in response to reports the program may be scaled back. "We are committed to Space Station Freedom. It will be deployed and the European Space Agency will make a major contribution to it."

The visit to the European Space Agency was Quayle's final stop before returning to Washington following a three-day visit to Rome, London and Paris to commemorate the 100th anniversary of the birth of former President Dwight Eisenhower.

Quayle met earlier with French President Francois Mitterrand and said afterward that the Bush administration thought a recent French-West German declaration urging Lithuania to suspend the effects of its declaration of independence was a positive step towards resolving the crisis.

"We feel that what President Mitterrand and (German) Chancellor (Helmut) Kohl did the other day with regard to Lithuania was helpful," Quayle said

as he emerged from the 45-minute meeting with Mitterrand at the Elysee Palace.

"It was a positive contribution to a very delicate situation. We continue to not recognize the incorporation of Lithuania into the Soviet Union. We support the self-determination of the people of Lithuania and we hope and anticipate that this matter will be resolved without violence," he added.

Speaking before an audience of World War II veterans and other guests, including Eisenhower's granddaughter, Susan Eisenhower, Quayle said the former president and Allied commander-in-chief had foreseen the changes that have shaken Europe since last November.

"Eisenhower forecast that the Europe that existed in his time must inevitably change, change to reflect the fundamental principles which these heroes fought for and which the people of France and the United States have shared for 200 years," Quayle said.

#90129u2099 05/09/1990 ~United Press International

(MAY 9) UPI - Nine sailors remain hospitalized in Virginia following yesterday's ship fire that killed one sailor and left 18 others injured. Investigators are trying to determine the cause of the blaze, which broke out aboard the U-S-S Conyngham as it conducted routine manuevers off the North Carolina coast. Officials are looking at equipment, procedures and the circumstances that led to the fire.

A Sunni Moslem militia leader is calling for the release of two Swiss Red Cross workers abducted seven months ago in Lebanon. The militia leader urged the captors of the two to separate their case from other Western

hostages, saying the Red Cross workers were doing humanitarian work when abducted. NO one claimed credit for abducting the pair last October near a refugee camp.

WASHINGTON (MAY 9) UPI - As the resort season approaches, few coastal states can assure vacationers that their beaches are safe from harmful pollution, a House panel was told Wednesday.

Lawmakers from New Jersey, where stringent testing of recreational waters is in force, asked a panel of the Merchant Marine and Fisheries Committee to approve legislation that would require other coastal states to follow suit.

''We need a new uniform federal criteria for protecting public health at recreational beaches,'' Sen. Frank Lautenberg, D-N.J., told the

subcommittee on oceanography. ''People have the right to be able to wade or swim in the surf without the fear of becoming ill.''

Sen. Bill Bradley, D-N.J., said his state tests its recreational waters for disease-causing pollution weekly and must close beaches when dangerous levels are detected.

''Some states don't test coastal waters well enough or frequently enough to ensure that their visitors and residents are protected from disease,'' Bradley said.

The legislation backed by Bradley, Lautenberg and other New Jersey lawmakers would set federal guidelines for states to follow in monitoring recreational waters for both bacterial pollution and floating debris and set standards for closing beaches that fail regular testing.

New Jersey's stringent regulations resulted from wide publicity a few years ago about medical waste, garbage and other pollution along the Mid-Atlantic coast.

#90129u2120 05/09/1990 ~United Press International

ATHENS, GREECE (MAY 9) UPI - The Albanian Parliament has voted to lift religious and foreign travel restrictions on citizens in the last European country ruled by a Stalinist-style communist regime, an Albanian Embassy source said Wednesday.

The package of reforms, coming months after democratic change began in other East European states, apparently was a response to U.S. demands that Albania comply with the Helsinki convention on human rights if it wished to resume diplomatic ties with Washington, reports reaching Athens said.

The package, passed Tuesday, gives every Albanian citizen the right to a passport for travel abroad, and the right to hold religious beliefs without interference from the state. It lifts a ban on religious expression.

The legislation also eases restrictions on foreign investments, but Albania is not "turning away from the socialist system," according to a report quoting the Albanian Telegraphic Agency, the official news agency in Tirana.

One of Europe's poorest, most underdeveloped and most isolated countries, Albania - bounded by Yugoslavia to the north and east, Greece to the south and the Adriatic Sea to the west - emerged from World War II as a communist nation allied with Moscow.

The nation of three million broke with the Soviets in 1961 over Nikita Khrushchev's destalinization program. Relations with China ended in 1978 over Beijing's decision to establish ties with the United States.

Last month Albania said it was ready to resume diplomatic relations with the United States and the Soviet Union, but Washington responded that the first move would have to come from Tirana. The two countries have not had diplomatic ties since World War II, when the Communists seized power after ousting Fascist invaders from Italy.

Until now, Albania had stood aloof from the reforms sweeping the rest of Eastern Europe. Travelers returning from Albania have said statues of Joseph Stalin - the Soviet dictator long discredited in most of the rest of the communist world - still dot the country.

Foreign journalists are not permitted into the country to work, but some were allowed to visit recently as tourists and taken to several cities, including Tirana.

The Albanian news agency report said Prime Minister Antil Charchani announced the desire of his country to participate in European security negotiations. The United States has opposed Albanian participation unless Tirana agrees to accept the multinational Helsinki accord on human rights.

Under the reforms, Albanians fleeing the country no longer will be considered to be committing treason, but illegal border crossings would be considered a misdemeanor punishable by three months of special training.

The legislation also calls for the death penalty to be dropped for 23 out of 34 offenses and bans the execution of women. Every citizen will have the right to legal protection and legal defense during a trial, and the cases of those now held in prison for offenses against the state will be reconsidered.

The legislation calls for the separation of state from religious affairs, making it legal for citizens to worship as they wish. It had been a criminal offense to make the Christian sign of the cross in public or to carry a religious symbol.

Foreign investments, which were banned until now, will be permitted, but Albania will not seek credits from abroad or sign agreements that compromise Albania's independence and sovereignty, ATA said.

The report of the reform came as two Albanian nationals were flown to Athens via Rome after asking for political asylum in Greece. The two refugees were the sixth and seventh to seek political asylum in Greece in about a month.

Greece recalled its ambassador from Tirana last week after Albanian secret police agents entered the Greek Embassy compound and forcibly removed an Albanian citizen who cried out that he wanted political asylum in Greece. Greece protested the entry of the agents into the embassy compound, the second such incident in about a month.

PHOENIX (MAY 9) UPI - More than two dozen search warrants have been served in 15 cities across the nation in a probe of computer hackers responsible for an ''astronomical'' white-collar crime wave, federal and Arizona authorities announced Wednesday.

No arrests were made for computer crimes, but three people were taken into custody on unrelated charges, such as weapons violations, said Stephen M. McNamee, U.S. attorney for Arizona.

While officials confirmed that agents from the U.S. Secret Service and the Arizona attorney general's office served 28 search warrants in the last two days, McNamee said it was impossible to determine how many people may have been involved.

Garry M. Jenkins, assistant director of the Secret Service in Washington, told a news conference 42 computer systems were seized along with

thousands of computer disks that will have to be analyzed for possible criminal wrongdoing.

Jenkins said similar cases are being investigated in other parts of the nation.

Possible crimes discovered in the 18-month joint investigation included credit card fraud, theft of long distance telephone and data communications services and improper entry into computer systems operated by government agencies, private corporations, telephone companies, financial insititutions, credit bureaus and hospitals.

''We are experiencing a crime wave in the computer area that is just astronomical,'' said Gail Thackeray, an assistant Arizona attorney general who headed the state's part of the investigation.

''We can't keep up. Part of it is that computers have gotten cheap and kids of younger and younger ages have access to computers that when I was in college filled a room,'' she said.

Thackeray said the speed of computers can lead to ''colossal losses'' as the hackers quickly trade information.

''This is not a victimless crime,'' Thackeray said. ''We are all victims.''

McNamee called computer hacking the ''white-collar crime of the 1990s.'' He said anyone convicted of computer crimes could face prison sentences of up to 10 years along with a substantial fine.

Thackeray said suspects included both adults and young people and warned that parents have to be aware of what their children are capable of doing with their computers.

''The parents have no idea what danger they can expose their children to if they do not supervise them,'' Thackeray said.

Warrants were served in: San Francisco; Los Angeles; San Diego; Phoenix; Tucson, Ariz.; Plano, Texas; Miami; Saginaw, Mich.; Chicago; Detroit; Cincinnati; Richmond, Va.; Newark, N.J.; Pittsburgh; and New York City.

McNamee said the investigation was centered in Phoenix because of expertise involving computer crimes within Corbin's office.

Tom Holtzen, an assistant U.S. attorney, said the suspects who are being investigated may have exchanged information about such things as stolen credit card numbers through computer ''bulletin boards.''

#90129u2141 05/09/1990 ~United Press International
WASHINGTON (MAY 9) UPI - After 14 years of litigation, the State Department agreed Wednesday to settle a discrimination suit by giving female professional employees special job consideration to make up for past bias.

Under the terms of the settlement announced Wednesday, the department will give about 100 women Foreign Service professionals special consideration in bidding for higher ranks and choice positions as political officers.

In 1976, Alison Palmer, then a career diplomat and now an Episcopal priest in Massachusetts, brought suit against the department, charging pervasive sex discrimination in promotions, assignments and awards for outstanding work. About 600 women were included in the class action suit.

The State Department denied the allegation, but in 1987 a federal court ruled there had been discrimination against women in some assignments, and particularly in the practice of reserving prestigious political jobs for men.

The women, the court found out, were more frequently shunted off to less interesting jobs in the administrative and consular fields.

State Department spokeswoman Margaret Tutwiler, a non-career political appointee, said, ''We view settlement of this suit as a positive development which allows us to get on with the work of placing qualified people in good jobs and encouraging upward mobility for women in the department.''

The department's management ''is committed to building a Foreign Service which is truly representative of the United States,'' she said.

LOS ANGELES (MAY 9) UPI - A former McMartin Pre-School student testified Wednesday that Raymond Buckey sexually molested her, took nude photographs of her and threatened to kill her parents if she told them of the abuse.

But under cross-examination by defense lawyers, the girl said she cannot remember the former teacher ever having sexually abused her with a foreign object, as alleged by the prosecution.

The girl, testifying in Buckey's retrial, frequently replied ''I can't remember'' when pressed by defense lawyer Danny Davis and the prosecutor, Deputy District Attorney Pam Ferrero, for details of the alleged molestations.

Prosecutors contend that Buckey, 31, molested the blond-haired girl, who is now 11, sometime between September 1981 and November 1983, when she was between the ages of 3 and 5.

Buckey's lawyers have long argued that the alleged victims were manipulated by interviewers at the Children's Institute International into falsely leveling the molestation allegations.

While under questioning from Ferrero, the girl pointed to Buckey in the courtroom and testified that he molested her while she sat in his lap at

the now-closed Virginia McMartin Pre-School in Manhattan Beach.

''I was sitting on Ray's lap. He was touching me with his hand in a spot I didn't like, in the vagina and in the bottom,'' she testified. But she said she could not remember how many times Buckey touched her.

On another occasion, she said, ''I think he placed his penis on my vagina.''

She said she could not remember how it felt being touched by Buckey, if she asked him to stop or if she thought it was wrong.

Under cross-examination by Davis, the girl was asked whether Buckey had ever inserted anything in her vagina or anus.

''Not that I can remember,'' she replied.

Davis, in remarks outside court, asserted that the girl's response to his question had just acquitted Buckey of the two molestation counts concerning her. Those counts, Davis pointed out, allege that Buckey used a foreign object to sexually abuse the girl.

''She denied outright the stated allegations,'' he said. ''So we have disproved the allegations. Prosecutors have failed in their case legally, factually, even before I finish cross-examination.''

During questioning by Ferrero, the girl testified that she played the ''Naked Movie Star'' game at the school, in which ''you take off clothing and you pose and Ray takes a picture of you.''

She said she could not remember actually posing nude, but maintained that she remembered singing a song along with the game, the words of which were ''What you see is what you are, you're a naked movie star.'' She said Buckey taught her the words to the song.

The girl testified that she didn't remember Buckey playing the game with the children, but does remember him taking the photographs.

''He told me not to tell my parents of the sex abuse or he'd kill them,'' she testified.

The girl said she also saw Buckey kill a turtle with a knife and remembers him telling her that ''if you tell your parents, this is what will happen to your parents.''

Buckey, the sole defendant remaining in the notorious case, is being retried on eight charges stemming from the alleged molestations of three students at the preschool from 1979 until 1983.

Buckey and his mother, Peggy McMartin Buckey, 62, were acquitted Jan. 18 at the first trial of 52 other molestation counts.

That trial, which involved the alleged molestations of 11 children, lasted nearly three years and cost taxpayers $13 million, becoming the longest, costliest criminal trial in U.S. history. The second trial, which is vastly smaller in scope, is expected to last about nine months.

#90129u2155 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - The Treasury Department, on the second day of its quarterly refunding marathon, auctioned $10 billion in ten-year bills Wednesday at an average yield of 8.88 percent in brisk bidding.

The yield was the highest since 9.18 percent May 10, 1989, and an increase over the last refunding Feb. 7, when the ten-year notes yielded 8.59 percent. The total amount of bids received was $30 billion.

Samuel Kahan, chief financial economist at Fuji Securities Inc. in Chicago said the bidding was the most competitive in more than three years, and that bids from individual investors increased 50 percent. "The interest in the auction was very good," Kahan said.

The United States appeared on its way to raising a total of $30.5 billion in the three-day refunding, which winds up Thursday, to pay for the bailout of the savings industry, settle securities reaching maturity and raise new cash.

"The ten-year was given a pretty good reception," said William Sullivan, an analyst at Dean Witter Reynolds Inc. in New York. "The market did sell off a little bit earlier in the day and that did help the bidding results. "It does look like we've reached a level that has attracted decent interest," Sullivan added.

The securities sold at an average price of $99.967, with 100 equal to the face value and a single point representing $10 on each $1,000 investment, the government said. The interest rate on the notes, sold in minimum denominations of $1,000 and maturing May 15, 2000, is 8 7/8 percent.

The government-backed securities in the refunding are sold primarily to large domestic and foreign institutions, such as banks, pension funds and mutual funds as well as individuals.

On Tuesday, the United States kicked off the refunding with the auction of nearly $10.6 billion in three-year bills, which were sold in minimum denominations of $5,000, at an average yield of 8.74 percent - the highest

since 9.12 percent May 9, 1989.

On Thursday, the Treasury Department will auction 30-year bonds that mature May 15, 2020. The 30-year securities sell in minimum denominations of $1,000.

In addition to the refunding, the government plans to raise another $10 billion for the remainder of the April-to-June quarter through regular auctions of 13- , 26- and 52-week bills, a 2-year note in May and a five-year note in June. Cash management bills may also be sold in the interim.

KINGWOOD, TEXAS (MAY 9) UPI - President Bush plans to participate in the Doug Sanders Celebrity Classic golf tournament next week, said tournament host and Senior PGA Tour professional Doug Sanders.

Bush is scheduled to play May 19 at the Deerwood Club, site of the PGA Senior Tour event, with his son, George Jr., and PGA Commissioner Deane Beaman.

''This is the most exciting thing to happen to the tournament since it was sanctioned as a PGA Senior Tour event in 1988,'' Sanders said.

The tournament begins Monday with practice rounds and continues through May 20.

Bush's drive off the first tee will make the first time a president has participated in a Senior Tour event while in office, Sanders said.

''We are planning to tee it up around noon, so fans will want to come to Kingwood's Deerwood Club plenty early to find a good spot in the gallery '' Sanders said.

Among the players scheduled to play in the event are Lee Trevino, Gary Player and Chi Chi Rodriguez. Other celebrities expected to participate in the pro-am portion include Randy Quaid, Charley Pride, Roy Clark, John Elway, Mike Ditka, Darrell Royal and astronauts Neil Armstrong and Alan Shepherd.

#90129u2171 05/09/1990 ~United Press International
TORONTO (MAY 9) UPI - Molson Companies Ltd. Wednesday reported year-end earnings of $100.2 million or $2.76 a share, up 35 percent from $74.1 million or $2.25 a share in the year earlier.

Revenues declined slightly to $2.17 billion from $2.21 billion in 1989.

Molson said earnings in its brewing, specialty, and sport and entertainment groups increased with the brewing segment jumping 34 percent to $110 million.

Molson has an equal partnership interest in Molson Breweries with Elders IXL Ltd. of Australia.

The company did not provide a segment-by-segment breakdown or any information about U.S. sales of its beer products.

Molson's retail merchandising and chemical specialty subsidiaries include Beaver Lumber and Diversey Corp..

Beaver Lumber faces dificult economic conditions across Canada and Diversey's results were affected by continued uncertainty and weakness in the foreign currency markets.

#90129u2185 05/09/1990 ~United Press International
GREENBELT, MD (MAY 9) UPI - The Hubble Space Telescope should be able to snap its historic first picture of the heavens next week now that engineers determined that a mathematics error had made the observatory slightly askew, officials said Wednesday.

If all goes well with correcting the error and focusing one of its cameras the telescope should be able to photograph a star cluster in the Milky Way between May 16 and May 18, officials said.

NASA had considered taking the long-awaited picture Wednesday after two of three guidance sensors on the telescope failed to locate and lock onto stars during testing earlier in the week. That ability will be critical once the telescope begins its 15-year mission of exploring the universe.

Officials thought taking a picture with the telescope's wide field planetary camera could help orient the $1.5 billion, 12-ton observatory.

But engineers determined that the reason the sensors had failed to find bright enough stars was a faulty command sent to the telescope, pointing the observatory about a half of a degree in the wrong direction, said Jean Olivier, telescope deputy project manager.

The faulty command stemmed from a math error made while updating star charts dating back to 1954, said Olivier.

''It was an error, probably an error in sign (plus or minus) that caused this problem. In hindsight we look at it and say, 'How can we have done that?' Even though it might have been something staring us in the face, it was not obvious to many of us working on this problem. We made a mistake. What else can I say?'' he said.

After correcting the commands from the Space Telescope Science Institute in Baltimore, engineers at the Goddard Space Flight Center in Greenbelt and Marshall Space Flight Center in Huntsville, Ala., will resume testing the guidance sensors.

Once that is complete, the engineers will begin the first of two 36-hour processes of carefully focusing the wide field planetary camera. If the first process is enough, the picture could be taken as early as Wednesday.

If a second set is necessary, the picture may be delayed until Friday, said Douglas Broome, telescope program manager.

The picture will be the first since the crew of the space shuttle Discovery placed the telescope into orbit 381 miles above Earth on April 25.

During a news conference at the Johnson Space Center in Houston, the Discovery's crew urged patience.

''It's not your garden variety satellite, and people are being very careful to make sure everything gets done correctly so that we don't have to backtrack and redo anything,'' said Bruce McCandless. ''The stars have been there for 14 or 15 billion years; another two or three days won't change very much.''

The subject of the picture, which is intended as a test and not to produce any new discoveries, will be a 3 billion-year-old star cluster known as NGC 3532, about 1,500 light years from Earth in the constellation Carina.

NASA had first hoped to take the picture last week, but a series of problems in the initial stages of turning on the $1.5 billion telescope put what will be an eight-month process behind schedule.

Technicians have resolved most of the problems but were studying an unusual movement in the telescope that occurs whenever it goes into or out of sunlight.

The telescope is expected to help astronomers gain fundamental new understanding about how the universe was formed, the age of the cosmos, how galaxies are structured and perhaps the ultimate fate of the universe.

Equipped with five highly advanced instruments and placed above Earth's obscuring atmosphere, the telescope will enable astronomers to study planets, stars and galaxies in greater detail than ever before.

NEW YORK (MAY 9) UPI - The dollar took a pounding Wednesday in New York trading and fell to a 25-month low against the Swiss franc and the West German mark as traders followed through on the bearish trend launched last week.

After months of moving in narrow price ranges against the European units, the dollar was sharply undercut by the perception that U.S. economic weakness bars the Federal Reserve from hiking interest rates to defend the currency.

Equally important, participants have decided that the deutsche mark will hold its value after German monetary union takes place July 2 and that German interest rates will tick upwards to counter inflationary pressures.

Switzerland's economy is expected to benefit greatly from the economic union of East Germany and West Germany, analysts said. Relatively attractive Swiss interest rates already are pulling global capital into its markets.

"The Swiss (franc) led the charge," said foreign exchange manager Larry Ryan of Creditanstalt Bankverein. "The mark wasn't far behind." He added, "This market has been looking for something to hang onto for months now, so when they do get a break everybody's going to jump on it."

In late New York trading, the dollar changed hands at 1.6350 West German marks, off more than two pfennigs from 1.6570 marks Tuesday, and fetched 156.50 Japanese yen, off from 157.50.

Analyst Marc Chandler of MMS International in Chicago said anticipated future demand for Swiss francs to redeem a Eurobond issue boosted the unit while the Swiss central bank's tight monetary policy also helped. Most of all, though, "the Swiss are going to benefit from (German) monetary union without having to pay the inflationary costs," he said.

With the dollar at mark and Swiss franc levels not seen since March 1988, he said, sentiment is "so bearish" the U.S. currency could be headed towards its all-time low of 155.10 marks, set at the end of 1987.

Other dollar rates: 1.4015 Swiss francs, off from 1.4310; 5.5050 French francs, down from 5.5670; and 1,202 Italian lire, off from 1,215.50. The British pound firmed to $1.6785 from $1.6710.

On European exchanges, the dollar plunged against the major currencies, led by the deutsche mark and Swiss Franc, as traders pursued the new trend.

In Frankfurt, the dollar retreated to 1.6380 marks, against Tuesday's close of 1.6575, and fell in Zurich to 1.4075 Swiss francs against 1.4355.

Zurich and Geneva traders said the dollar has dropped 10 percent against the Swiss franc since January. High Swiss interest rates and Asian buying interest have helped support Switzerland's unit.

In London, the pound rose to $1.6790 from $1.6710, supported by market views that upcoming retail inflation figures won't be as bad as feared.

The U.S. unit fell back in Paris, Milan and Brussels to, respectively, 5.5370 French francs against 5.5770, 1,208.60 Italian lire against 1,215, and 34.0350 Belgian francs compared with 34.1850.

Earlier, the dollar fell sharply against the yen in Tokyo on statements by European monetary officials backing the Japanese unit. The dollar closed at 157.03 yen against 158.05 yen at Tuesday's close.

Republic National Bank in New York closed cash gold at $371.75 an ounce, up from $370.50 Tuesday. The New York Commodity Exchange settled spot gold at $371.90 an ounce, up from $370. Gold was unchanged in Zurich at $370.50 an ounce. London gold rose to $370.75 an ounce from $369.50.

Republic closed cash silver at $5.045 an ounce, up from $5.02. Comex spot silver ended at $5.028 an ounce, up from $4.989. Zurich silver was unchanged at $5.07 an ounce. Silver held steady in London at $5.01 an ounce.

WARSAW, POLAND (MAY 9) UPI - Thousands of students boycotted classes and held rallies across Poland Wednesday to protest a government bill that would force many of them to pay for their studies.

The student strike began in Warsaw and the port city of Gdansk Tuesday but spread to six universities in four cities Wednesday, Polish television said. On other campuses, student attended classes but protest rallies were held.

Education is now free in Poland. The bill would require students who fail examinations and need to repeat academic years to pay for the additional class time.

The protesters also want more influence in running the universities and demand that the post-graduation military training requirement be cut from 12 to six months.

A spokesman for the Independent Students Union, which called for the protests, told Polish television that the strike may end this week depending on the outcome of talks scheduled for Thursday between student

representatives and Minister of Education Henryk Samsonowicz.

Samsonowicz, in a television appearance, said students would be consulted before action is taken on the bill. ''It looks like we have reached an agreement with students that the bill will again be discussed next week with the academic community,'' he said.

WASHINGTON (MAY 9) UPI - The Senate Ethics Committee voted Wednesday to expand its investigation into allegations that Sen. David Durenberger, R-Minn., received reimbursements from the Senate for use of a Minneapolis condominium.

In a written statement, the committee said it voted to ''conduct an investigation concerning Sen. Durenberger's participation in certain transactions involving the condominium ... and his claims for and acceptance of Senate reimbursement for using that condominium for certain days during the period from August 1983 through mid-November 1989.''

The statement also said the committee would investigate whether Durenberger violated ethics rules relating to the handling of his qualified blind trust, ''including those provisions relating to communications regarding the trust and its assets.''

A blind trust consists of personal funds and investments an individual has agreed not to control, often to avoid the appearance of conflict of interest.

Prior to Wednesday, the committee had been conducting a preliminary inquiry - the first stage of Senate ethics proceedings - into Durenberger's actions involving the condominium.

While the decision to move the proceedings to the investigation level does not mean any violations have occurred, the committee said its action was based upon information obtained during the preliminary inquiry revealing ''substantial credible evidence'' that Durenberger may have broken ethics rules.

Durenberger had no immediate comment.

The Ethics Committee's announcement was the second in less than a week involving Durenberger's case.

Last Thursday, the committee said it would hold public trial-like hearings for two weeks in June to investigate five other allegations against Durenberger.

One of the allegations involves the use of limousines by Durenberger for personal travel in Massachusetts.

The other four allegations surround Durenberger's contract with Minneapolis-based Piranha Press Inc., which published the senator's two books on health issues and defense and foreign policy; his failure to disclose reimbursements and travel expenses in connection with Piranha Press appearances; the transfer of funds to Durenberger's campaign committee through Piranha Press; and the use of Senate space for Piranha Press appearances that generated income for Durenberger.

In 1985 and 1986, Piranha Press received more than $20,000 from several groups for speeches given by Durenberger. In turn, the publisher paid Durenberger $100,000 in quarterly installments during the two-year period as a stipend for promoting his books.

Senators could receive a maximum of $22,000 for speaking fees in 1985 and $30,000 in 1986.

Durenberger was first elected to the Senate in 1978. He has said he expects to be exonerated by his collegues and has no intention of resigning.

If next month's hearings fail to conclude in Durenberger's favor, the case can be turned over to a Republican Party conference for final action, he can be censured, or expelled from the Senate.

Durenberger is the first senator to face a full ethics investigation since 1982 when Sen. Harrison Williams, D-N.J., was investigated for his involvement in the Abscam scandal. Williams resigned shortly before his imminent expulsion.

#90129u2259 05/09/1990 ~United Press International
(MAY 9) UPI - There apparently will be ''NO pre-conditions'' in bi-partisan budget talks agreed upon today by President Bush and Congress. Bush and congressional leaders met in the Oval Office and firmed up plans to throw the deficit problem to a bi-partisan budget group next week. Higher taxes apparently will be considered, along with other options.

A tricky repair job aboard the shuttle Columbia is expected to delay its launch at Cape Canaveral, Florida, to at least about May 30th. Source say NASA engineers have recommended that a cooling system valve aboard the spacecraft be replaced. Columbia was tentatively scheduled to blast off with its seven-member crew on May 17th.

The long-awaited first picture of the heavens from the Hubble Space Telescope has been delayed again. A NASA official says a problem with the telescope's guidance system will delay snapping the first picture until late next week, at the earliest.

Another possible problem for Mikhail Gorbachev. Hungary's parliament agreed today to consider suspending the country's membership in the Warsaw Pact. And opposition leaders are urging the government to negotiate a permament break with the Soviet-led alliance.

A preliminary meeting got under way in Geneva, Switzerland, today to map plans for an international conference on ozone to be held in London in June. That session will discuss steps to combat elements that reduce the earth's ozone layer, which filters cancer-causing and climate warming solar radiation.

#90129u2261 05/09/1990 ~United Press International
WAUKEGAN, IL (MAY 9) UPI - Tests conducted at Ross Laboratories concluded that a can of baby formula was tainted with sulfuric acid after it left the Columbus, Ohio, plant, a Ross official testifed Wednesday in the murder trial of a father accused of force-feeding the lethal poison to his infant son.

Ricky Irby Sr., 29, will face the death penalty if he is convicted of murdering his son, Quinten, who spent 27 months in a hospital and finally died of his injuries at age 2, prosecutors said.

Prosecutors contend the unemployed auto worker forced the acid down his baby's throat, then filed a product liability suit in an effort to get a financial settlement from Abbott Laboratories of North Chicago, the parent firm of Ross Laboratories.

A doctor earlier in the week testified that a baby would have instinctively recoiled from the lethal fluid and said judging from the extensive burns to his mouth, esophogus and insides, the baby had been force-fed.

During testimony last week, Ross spokeswoman Jane Wynn said Irby notified the company that one of their cans of formula was contaminated shortly after the baby was hospitalized on May 31, 1984.

Wynn said Ross tested cans of formula from the same batch purchased by Irby and found no contamination. It is company policy to recall cans from each batch for possible testing when a contamination complaint is received she said.

A quality assurance expert at Ross also testified Wednesday that the company has tight security and it would be virtually impossible for someone to sneak in and contaminate one of their products.

''We regard ourselves as a high-security area,'' George Bare told the court. ''The filling and supervision areas are always under constant surveillance.''

The baby's mother, Shelia Smith, 27, pleaded guilty to murder in exchange for a prison term and is expected to testify against Irby. Prosecutors have said she would probably be sentenced to 65 years.

Irby has said he was fishing the night prosecutors allege the couple planning the poisioning, and says Smith harmed the baby without his knowledge, then implicated him.

#90129u2284 05/09/1990 ~United Press International

NEW YORK (MAY 9) UPI - Stocks closed narrowly mixed Wednesday in moderate trading with the Dow industrials a notch lower, coming up just short in a late bid for an eighth straight gain.

Optimism about Thursday's bond auction and computerized program buying almost wiped out late losses, but they could not push the blue-chip indicator to a close on the plus side. The broad market, however, managed to finish higher.

The Dow Jones industrial average, which rose 11.94 Tuesday, lost 0.68 to close at 2732.88. Its previous down day was April 27, when it tumbled 31 points.

Broader market gauges closed higher. The New York Stock Exchange composite index rose 0.38 to 187.49 and Standard & Poor's 500-stock index rose 0.85

to 342.86. The price of an average share rose seven cents.

Advances led declines 758-726 among the 1,979 issues crossing the NYSE tape. Big Board volume totaled 152,220,000 shares, versus 144,230,000 shares traded Tuesday.

The Treasury Department, on the second day of its quarterly refunding, auctioned $10 billion in ten-year bills Wednesday at an average yield of 8.88 percent.

Speculation that the auction had not garnered strong demand sent stocks to double-digit losses in the afternoon. When the results were announced, the yield was the highest since 9.18 percent on May 10, 1989, and represented an increase over the last refunding Feb. 7, when ten-year notes yielded 8.59 percent.

It was within expectations, meaning that yields did not have to rise more sharply than expected to lure investors. But analysts said that what really sparked the late rebound was optimism that demand Thursday for 30-year bonds would be strong as well.

They also said a late bout of computerized program buying, used to profit on price differences between stocks and stock-index futures, helped to just about erase losses in the Dow.

"The programs late in the day caused the market to rally," said Jim Andrews, first vice president in charge of institutional trading at Janney Montgomery Scott Inc. in Philadelphia. "They hit the floor at about 25 minutes to four."

Andrews also said there was some late buying sparked by anticipation of strong interest in Thursday's auction of 30-year bonds. Optimism about the bond sale caused Treasury bonds to trim their losses of as much as a point to 14/32 in late trading. Stocks rebounded along with Treasuries.

The sale of $10 billion in 30-year bonds Thursday will conclude the $30.5 billion refunding, which started Tuesday. The money will be used to pay for the bailout of the savings industry, settle securities reaching maturity and raise new cash.

On the trading floor, Bristol-Myers Squibb was the most active issue, up 1/2 to 58 1/2. General Electric followed, up 3/8 to 66 3/4. Philip Morris was third, unchanged at 43 3/4.

SmithKline Beecham was also active, up one to 37 3/4, after reporting first-quarter results in line with expectations.

Among the blue chips, AT&T rose 1/8 to 40 5/8, IBM rose 1/2 to 111 1/4,

Woolworth lost 7/8 to 60 3/4 after reporting earnings at the low end of analysts' expectations, Westinghouse tumbled 1 1/2 to 74, and USX lost 5/8 to 32 7/8.

Elsewhere, Sotheby's sank 3 1/8 to 16 1/2 after holding a Tuesday night contemporary art auction during which many works reportedly did not sell, leaving proceeds far below expectations.

Sherwin Williams surged two to 38 1/8. The company said it was unaware of any reason for the stock's "current activity."

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 183,604,850 shares, compared with 172,948,500 shares traded in the previous session.

Prices closed higher in active trading on the American Stock Exchange. The Amex Market Value index rose 0.95 to close at 348.53. The price of an average share gained four cents. Advances led declines 282-250 among the 810 issues traded. Composite volume totaled 16,392,775 shares, compared with 15,442,000 traded Tuesday. B.A.T. Industries led the Amex issues, down 1/16 to 11 1/2.

The National Association of Securities Dealers composite index closed off 0.50 to 431.34.

-30- 4436

#90129u2287 05/09/1990 ~United Press International

CHAMPAIGN, IL (MAY 9) UPI - University of Illinois coach Lou Henson confirmed Wednesday that starting forward Marcus Liberty plans to declare hardship and enter the NBA draft in June.

''I'm sure Marcus is doing what he feels is best for himself and his family,'' Henson said. ''I'm confident that he can play pro ball; I hope he goes high in the draft.''

Henson said he does not condone players quitting school to enter the pros, but he understood that in Libery's case, there were ''extenuating circumstances.''

One day earlier, Illinois assistant coach Jimmy Collins said Liberty told him money and family pressures were forcing him to forego his senior year.

''We had a long conversation and he expressed to me that he would probably go into the NBA draft,'' Collins said. ''His grandfather passed away about a month and half ago.

''His grandfather and mother were the only ones working in a home of about

eight or nine. He mentioned the fact that he's having some difficulties himself. All those things played an important part in his decision,'' Collins said.

The 6'8 Chicago native would have been the only returning full-time starter as well as the only member of the 1988-89 Final Four team still playing for Henson.

Liberty averaged 17.8 points and 7.1 rebounds last season and has a two-year career average of 12.6 points.

''I've really enjoyed coaching Marcus,'' Henson said. ''He's been an integral part of our team and I'm sure he would have had an outstanding senior season here.''

Liberty, who sat out his freshman year due to Proposition 48, becomes the second Illinois starter in two years to enter the NBA draft early. Nick Anderson left after his junior year and became the first selection of the expansion Orlando Magic.

Liberty has been unavailable for comment.

-30- 2009

#90129u2310 05/09/1990 ~United Press International

CAMBRIDGE, MA (MAY 9) UPI - In a hall bearing the inscription ''show them the way they must walk,'' the Rev. Jesse Jackson told more than 300 Harvard Law students Wednesday that the character of the university is ''on trial'' in a dispute over hiring more minority faculty.

Students at the Ivy League university have staged sit-ins and protests over the number of tenured women, blacks, and other minorities at the law school. The issue attracted national publicity last month when Derrick Bell, the first black tenured Harvard Law professor, said he would take an unpaid leave of absence until the school appointed a tenured black woman to its faculty.

''To say there is no African-American woman in America qualified to be tenured on this faculty is both an error and a gross insult to our intelligence,'' Jackson said at a news conference and rally Wednesday at Austin Hall on the law school campus.

''In some sense, the character of Harvard is on trial. It's a tremendous challenge for this university to be a leader morally, as well as academically.

''Harvard, at the top of the hill of academia, cannot cast shadows, it must cast light,'' said Jackson, who painted the dispute in the

''context'' of a nationwide ''retreat in racial justice and sexual equality.''

Carved atop Austin Hall is the inscription: ''And though shall teach them ordinances and laws and shall show them the way wherein they must walk and the work that they must do.''

Bell, who met with the civil rights leader, said Jackson was ''assisting the nation's most prestigious law faculty to recognize what most of the school's student body has long known; that lawyers who must face the legal and social problems of the 21st century need and deserve more than a faculty that is modeled on what was deemed the ideal 50 years ago.''

Earlier, Jackson held an impromptu 25-minute meeting with law school Dean Robert Clark, who had rejected a student proposal that Jackson mediate the dispute, saying the school's appointments standards ''are not properly subject to third-party negotiations.''

''We had a very cordial visit with a good exchange of views,'' said Clark. ''I tried to convey a sense of the efforts we are making to achieve greater diversity, as well as a sense of the principal mission of the law school as an academic institution.''

''It appears that the dean is perfectly satisfied with the current process '' said Jackson. ''He is concerned, but without the sense of urgency. This is an emergency.''

Jackson also said faculty hiring was not just an internal matter and said, ''Injustice anywhere is a threat to justice everywhere.''

Five of Harvard Law School's 60 full professors are women and three are minorities, all black men, according to administration figures.

Associate Dean Louis Kaplow last month said the law school's appointments committee has devoted a ''substantial, disproportionate amount of its efforts to the hiring of women and minorities.''

The standards for hiring focus on whether an individual is ''the leading available'' academic in the field in the country and whether ''a candidate meets an independent standard of extreme excellence,'' Kaplow said.

Four sitting Supreme Court justices are Harvard Law graduates.

NEW YORK (MAY 9) UPI - Average yields for money market mutual funds were down or unchanged in the latest reporting week, while rates at competing savings and loan institutions were mixed, organizations that track the funds and institutions said Wednesday.

The Donoghue Organization, of Holliston, Mass., said average seven-day simple yields were at 7.66 percent, down from 7.67 percent in the previous week, and 30-day simple yields were unchanged at 7.68 percent. The average maturity of fund portfolios was unchanged at 44 days.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money market deposit accounts, 6.06 percent, unchanged; Super-Now accounts, 4.99 percent, down from 5.0; six-month certificates of deposit, 7.80, up from 7.78; one-year CDs, 7.92 percent, up from 7.87; 2 1/2-year CDs, 7.94 percent, up from 7.90; and five-year CDs, 7.97 percent, up from 7.94.

The average rate for a one-year adjustable-rate mortgage was 8.67 percent, up from 8.66.

Average rates on 15- and 30-year fixed-rate mortgages moved down in the latest week, to 10.24 percent and 10.41 percent, respectively. Corresponding rates were 10.25 percent and 10.45 percent a week earlier.

The average rate for a four-year automobile loan was 12.24 percent, unchanged.

WASHINGTON (MAY 9) UPI - Ignoring the Bush administration's repeated attempts to eliminate subsidies for Amtrak, the House voted Wednesday to reauthorize federal support for the passenger rail system.

Supporters said the bill, passed on a 322-93 vote, will enable Amtrak to buy new cars and other equipment that will attract more passengers and increase revenues.

In their annual budgets, both the Reagan and Bush administrations have proposed that the federal subsidy for Amtrak be phased out, but Congress has continued to vote funds for the rail service.

Both the House and Senate passed their versions of the authorization bill last year. Negotiators for the two chambers worked out a compromise bill that was approved by the House Wednesday and sent to the Senate.

The bill authorizes $684 million in 1991 and $712 million in 1992.

Rep. Tom Luken, D-Ohio, who managed the bill, said the funds ''will allow Amtrak to replace and upgrade its current fleet of passenger cars,'' many of which were purchased from freight railroads when Amtrak was created in 1971.

The bill was opposed by Rep. Robert Walker, R-Pa., who termed the subsidies ''massive'' and said they primarily benefit upper income passengers who use the trains.

The administration has threatened a veto because of the funding level and because of a provision that would give the Interstate Commerce Commission authority to review proposed acquisitions of major freight railroads by companies not involved in the rail business. The administration has previously proposed elmination of the ICC.

Rep. John Dingell, D-Mich., chairman of the House Energy and Commerce Committee, said that because it does not have adequate equipment, Amtrak has had to turn away passengers and lose revenue, but with continued funding will be able to upgrade its system and carry more passengers. ''This is an investment bill,'' he said.

#90129u2373 05/09/1990 ~United Press International

LOS ANGELES (MAY 9) UPI - Faced with increasingly higher disposal costs and stricter environmental regulations, a growing number of Southern California businesses are secretly shipping their toxic waste to Mexico, it was reported Wednesday.

Although there are few hard statistics to chronicle the illicit trafficking, law enforcement investigators on both sides of the border are concerned about the upswing in the amount of disguised toxic waste being smuggled across the border and illegally dumped in Mexico, the Los Angeles Times said.

''To some of the people who are involved, Mexico is one big trash can and it doesn't really matter what goes down there,'' Deputy District Attorney William Carter said. ''It's not realistic to think what we send down there won't come back in foods, water pollution, air pollution or pottery we buy from Mexico.''

The district attorney's office is currently investigating six cases of illegal toxics trafficking to Mexico. Charges in one case may be filed this week, the newspaper said.

Cesar Catalan of the Secretariat of Urban Development and Ecology, Mexico's version of the federal Enviornmental Protection Agency, agreed that more drums of materials that have contained hazardous waste from the United States are turning up in Mexico. ''We are noticing this problem with increasing frequency,'' he said.

In one of the few cases now under investigation, contaminated drums were sold in a working-class Mexican neighborhood for water storage.

In another case, investigators traced drums of cyanide solution from a North Hollywood metal-plating business that had been listed as new products on the shipment manifest prepared by the trucker. They found its destination was a Mexicali wheat field.

Carter said reports of illegal waste shipments to Mexico come into his office about twice a week, indicating a ''steady stream'' of such shipments. However, authorities concede there are few hard statistics on the problem - in large part because of spotty enforcement.

The likelihood of shippers or haulers being apprehended is remote. Authorities say typically U.S. customs inspectors focus on shipments headed north from Mexico. Southbound traffic gets little attention on the U.S. side and there are reports of bribery among Mexican border authorities.

Investigators predict the problem of toxics exporting to Mexico and other poor nations where cheap and clandestine disposal is being carried out,

will worsen as costs of disposing of the waste properly in the United States increase.

On Tuesday the EPA announced a new rule, expected to make legal dumping even more costly. It requires more kinds of waste that pose a threat to humans, or the environment, to be treated before dumping in landfills is allowed.

To dispose of hazardous waste legally in this country, a generator must have the waste transported, treated and disposed of by a licensed firm.

A drum of toxics that would have cost $140 to dispose of six years ago, now costs $300, according to waste management companies.

NEW YORK (MAY 9) UPI - Major creditors owed hundreds of millions of dollars by Drexel Burnham Lambert Trading Corp. Wednesday asked a bankruptcy court to approve a liquidation of the commodities trading firm.

The involuntary petition is designed to force the trading company to fight for the $645 million it is owed by its parent, Drexel Burnham Lambert Group Inc., which filed for bankruptcy protection in February, said Barry J. Dichter, an attorney for one of the creditors.

Since the Feb. 13 filing, Drexel has controlled its subsidiary and, ironically, could control how hard the trading company presses its claim, he said.

''That was unacceptable to the creditors,'' Dichter said. ''You had a situation in which the party that owed you the money also decides how much they were going to pay. It was like asking the fox to watch the chicken coop.''

Drexel said it would not challenge the involuntary Chapter 7 petition, but will seek to convert the case to a Chapter 11 proceeding so it can retain possession of its assets and business.

The commodities trading company, based in Ft. Lee, N.J., has been winding down operations since Drexel, unable to pay more than $100 million in loans, filed for protection from its creditors.

The trading company's estimated liabilities total approximately $505 million, Drexel said.

Its major asset is the $645 million claim against Drexel, resulting from loans and advances the trading company made to its parent, Dichter said.

Filing the petition were the National Bank of Yugoslavia, Banco de Portugal, Ultramar Energy Ltd. and Nissho Iwai Corp, a Japanese trading company.

Nisshi Iwai is owed about $180 million, Dichter said. The Yugoslavian bank is owed about $70 million, while the Portugese bank, which leased gold to Drexel, is owed between $95 million and $120 million, depending upon prices in the gold market.

Drexel essentially assumed control of its subsidiary when the trading company's top executives left in the wake of the bankruptcy filing, Dichter said.

Money owed to the trading company is one of the largest claims against Drexel, and the subsidiary's creditors will seek a seat on the parent company's creditors committee, Dichter said.

''We have every right to take charge of that claim to make sure it is paid '' he said. ''The way things were going, we did not.''

The move should have little impact on commodities markets because Drexel's trading has been basically flat since the bankruptcy filing, Dichter said.

#90129u2385 05/09/1990 ~United Press International

SAN FRANCISCO (MAY 9) UPI - In a blow against one of biotechnology's flagship products, federal regulators said Wednesday they would require stronger warning labels on human growth hormones because of possible links to leukemia.

The Food and Drug Administration said it decided to act after researchers found new cases of leukemia in children who had taken growth hormones. There was, however, no proof that growth hormones caused the leukemia, the FDA said.

An administration official said regulators would require the two U.S. companies that make human growth hormones - Genentech Inc. of South San Francisco, Calif., and Eli Lilly and Co. of Indianapolis - to use stronger wording on their labels to warn of potential leukemia risks.

The wording of the new labels has not yet been determined, FDA consumer safety officer John Short said.

Both companies already mention the danger of leukemia on their labels. Genentech's label reads in part: ''If there is any risk to an individual patient, it is minimal.''

Neither Genentech nor Eli Lilly said they had not received word from the FDA about the label changes.

''We still feel human growth hormone is a safe drug, relatively,'' Genentech spokeswoman Susan Rogers said.

Genetically engineered human growth hormone, first approved by the U.S. government in 1985, is used to stimulate growth in hormone-deficient children by stimulating cells to replicate and grow.

At a Bethesda, Md., conference in May 1988, scientists from Japan, the United States, Canada, Europe and Australia reported that they had found a twofold increase in cases of leukemia among people treated with growth hormones than in the rest of the population, according to the Lawson Wilkins Pediatric Endocrine Society, a society of U.S. pediatric specialists.

The risk remained small, however, with only one case in 21,000 growth-hormone patients, compared to one case in 42,000 for the general population, the society said.

A securities analyst said he doubted stronger warning labels would have any affect on sales of the hormone, which last year generated a third of Genentech's $383.2 million in revenue.

''This has been around the medical community for quite a while, so I suspect the physicians who are using this stuff are aware of it,'' said Jeffrey Casdin, who tracks biotechnology companies for Oppenheimer & Co. ''I don't think labels will affect them.''

But activist Jeremy Rifkin, whose Foundation on Economic Trends had petitioned for the labeling changes, said the FDA decision was a ''major blow'' to the biotechnology industry.

''This is the first major genetically engineered pharmaceutical, and now we find there are problems,'' Rifkin said.

Rifkin's group is also attempting to ban the use of BST, a genetically engineered dairy hormone that boosts milk production by up to 25 percent.

#90129u2451 05/09/1990 ~United Press International

LAKE BUENA VISTA, Fla. (MAY 10) UPI - Eastman Kodak Co. refused Wednesday to allow shareholders at its annual meeting to vote on a resolution by two dissident stockholders to create a high-level in-house environmental committee.

One of the shareholders, Michael Zucker, field director of the Amalgamated Clothing and Textile Workers Union, said Kodak had a ''very poor'' environmental record over the past five years and said it should be policed by a board-level environmental committee.

He and Ed Durkin, with the United Brotherhood of Carpenters and Joiners, presented their case at the company's annual meeting, but President Kay Whitmore said their resolution could not be put to a vote because not all stockholders had been notified in advance of their proposal.

Last month, Kodak pleaded guilty to violating New York's environmental laws and agreed to pay a $2 million fine, the largest in the state's history.

The Rochester, N.Y., company pleaded guilty to two misdemeanors - improperly handling 49,000 pounds of silver-contaminated soil and failing to promptly report a 5,100-gallon spill of methylene chloride.

''You have eliminated the democratic process by saying only you can notice proposals,'' said Durkin.

Kodak currently has a management-level environmental committee, but not a board-level one.

''A management committee is good, but it doesn't provide the scrutiny we want. It doesn't give us the confidence that environmental policies won't be diminished because of financial or business concerns,'' Durkin said.

At the meeting, Kodak circulated a pamphlet saying one of its goals was ''to operate our plants and facilities in a manner that protects the environment and the health and safety of our employees and the public.''

''We're just putting those principles into place. We've had corporate policies about these things for many years,'' said Hays Bell, Kodak's vice president of corporate relations.

Whitmore, in prepared remarks, said, ''Throughout the company, the message is clear: We must all be environmentalists.''

Zucker and Durkin's unions are Kodak shareholders but do not represent Kodak employees.

#90129u2479 05/09/1990 ~United Press International

(MAY 9) UPI - Oil prices skyrocketed Wednesday amid indications that Saudi Arabia intends soon to begin a promised cutback of its crude oil

deliveries, a move that would reduce the world oil glut.

Spot shortages on the U.S. Gulf Coast of cleaner gasoline to meet regional government air pollution standards as well as buy orders that were triggered as crude prices rose through technical resistance levels also contributed to the surge.

The benchmark West Texas Intermediate crude for June delivery shot up 71 cents to $18.99 a barrel on the New York Mercantile Exchange after breaking through technical resistance levels at $18.60 and $18.80 a barrel.

Trading was a heavy 91,921 contracts.

On the U.S. Gulf Coast cash market, WTI jumped 75 cents to $18.95 a barrel.

Prompt delivery unleaded gasoline on the U.S. Gulf Coast zoomed 6.8 cents to 73 cents a gallon as a result of spot shortages of lower vapor-pressure gasoline, needed to lessen air pollution in higher-population areas.

On the New York Harbor cash market, prompt delivery unleaded gasoline was up 2 cents to 65.75 cents a gallon.

Unleaded gasoline for June delivery climbed 1.49 cents on the Merc to 63.97 cents a gallon.

On the European spot market, Britain's widely traded North Sea Brent gained 68 cents to $17.38 a barrel.

The United Arab Emirates' Dubai Light - the key OPEC crude from the Middle East shipped mainly to the Far East - shot up 65 cents to $15.15 a barrel.

Nauman Barakat, first vice president of Shearson Lehman Hutton's International Energy Desk in New York, said he had confirmed that Saudi Arabia had asked the Saudi Arab-American Oil Co. for ways to implement a cutback in deliveries.

There was no announcement by the Saudi Aramco consortium, which is made up of Chevron Corp., Exxon Corp., Mobil Corp. and Texaco Inc.

Two of the consortium's members, however, confirmed to United Press International that the Saudis had asked them for ideas to implement a cutback in May crude deliveries.

The request provided the first firm indication the Saudis would actually put into effect a 430,000 barrel-a-day reduction as its share of a cutback of 1.5 million barrels a day the 13-nation Organization of Petroleum Exporting Countries agreed to make last week in Geneva.

Prices nevertheless fell last week in a market that was skeptical because of OPEC's failure to follow through on cutback promises made in the past.

Tom Bentz, director of trading at United Energy Inc. in New York, said the market also was driven up by the pressure of the tight gasoline market in the U.S. Gulf region.

To a degree, crude ''was following the products,'' he said.

Bob Jonke of New York's Cargill Investor Services said, ''Once we took out (the) $18.60 and $18.80 (technical resistance levels), fresh buying came in.''

Three oil companies - Sun Co., of Radnor, Pa.; Marathon Oil Co., the Findlay, Ohio, unit of USX Corp.; and Houston's Conoco Inc. subsidiary of Du Pont - all raised the posted price they will pay for crude at the wellhead by 75 cents a barrel to $17.75 a barrel for WTI.

June delivery heating oil remained unchanged at 51.34 cents a gallon on the Merc.

#90129u2491 05/09/1990 ~United Press International

KANANASKIS VILLAGE, CANADA (MAY 9) UPI - Several NATO defense ministers called Wednesday for the unilateral withdrawal of nuclear artillery from Europe and the United States left open the possibility that it would agree.

In addition, West German Defense Minister Gerhard Stoltenberg urged NATO to seek the abolition of all land-based nuclear weapons from Europe in future arms control talks with the Soviets, rather than seeking simply a lower number.

These statements at the opening session of NATO's Nuclear Planning Group meeting seemed to go beyond President Bush's announcement last week that the United States was canceling plans to modernize the Lance short-range nuclear missile and nuclear artillery in Europen and it was willing to enter short-range arms control talks following the signing of a conventional arms control treaty.

A senior U.S. official said the Dutch and ''a number of'' other delegations called for the unilateral withdrawal of nuclear artillery, which has a range of about 8 miles, from Europe rather than waiting for negotiations with the Soviets.

The Dutch said negotiations with the Soviets could be held later on Lance, which has a range of about 80 miles, and their nuclear short-range missiles.

''A number of ministers ... made the kinds of comments the Dutch made,'' said the U.S. official who spoke on condition he not be identified. He refused to give the exact number or even a ballpark figure.

But he also left open the possibility that the United States, with NATO backing, might agree to pull the artillery out before talks are held with the Soviets.

''If you are going to make some (nuclear) reductions, are you going to do it in an arms control (talks) context or not? That is still under examination,'' the senior U.S. official said. ''We don't have a firm view on it.''

There are an estimated 3,400 NATO nuclear warheads in Europe - 400 for Lance, 1,500 for artillery and 1,500 bombs. Most of the Lance and artillery weapons are in West Germany and the Netherlands.

''We should abandon the artillery and we can do that unilaterally, and we should negotiate the short-range missiles,'' said Adrian Jacobovits, the Netherlands ambassador to NATO.

''There's a general feeling (among NATO ministers) that nuclear artillery should go,'' Jacobovits told reporters in a briefing on the closed NATO meeting.

Referring to the democratic reforms in Eastern Europe and the withdrawal of Soviet forces, Jacobovits said, ''If the enemy goes away and the artillery is short-range, well?''

West German spokesman Cmdr. Stefan Lang expressed the same view and said his government feels all remaining short-range missiles should be negotiated away, not simply reduced in numbers.

''Our aim ... is to get rid of land-based systems as they exist right now '' Lang said. ''It could be that we could reduce nuclear artillery unilaterally, but there is no decision yet.''

The U.S. official said ''some people'' called in the meeting for NATO to seek the complete abolition of ground-launched nuclear weapons.

''That's one of the things we have to look at in the (NATO review) study '' the U.S. official said.

He said members were ''pretty enthusiastic'' about Bush's initiative, and that there was broad consensus that NATO strategy needs to include both conventional and nuclear forces.

He declined to agree or disagree with the Dutch view that there was a general agreement on unilaterally pulling nuclear artillery out of Europe.

Defense Secretary Dick Cheney briefed the defense ministers on Bush's decision to cancel new short-range, ground-based nuclear weapons for Europe and to seek a sweeping review that could reshape the Western alliance.

NATO's Nuclear Planning Group, which includes 14 defense ministers of the 16-nation alliance (France and Iceland do not participate militarily), opened a two-day meeting in the former 1988 Winter Olympics site nestled in the towering, snow-capped Rocky Mountains some 50 miles west of Calgary.

NATO Secretary-General Manfred Woerner said he would ask the defense ministers to figure out how to conduct the review of NATO strategy, particularly its military and nuclear future.

The review, which will also define goals for short-range nuclear negotiations with the Soviets, will get under way at the NATO summit of heads of state in London in July.

DALLAS (MAY 10) UPI - Texas investor T. Boone Pickens said Wednesday his

Boone Co. will file a complaint with the Japan Fair Trade Commission against Toyota Motors, alleging Toyota forced Japan's four major national newspapers not to print advertisements paid by the company.

Pickens has been waging a campaign against Japan's investment and trade barriers, using his investment in Koito Manufacturing Co. to draw attention to his complaints. Boone Co. with a 26 percent stake in Koito, is the largest shareholder in the Japanese auto parts supplier.

Toyota is Koito's second-largest shareholder. Pickens has claimed Toyota has prevented him from winning representation on Koito's board of directors.

Pickens said as part of his effort to assert ownership rights of Koito, he contracted to place advertisments in Japan's Asahi, Yomuri, Mainichi and Nihon Keizai newspapers.

He said the ads focused on the cartel-like systems known as keiretsus and their disadvantages to consumers and shareholders. He said his company made down payments for the four ads for publication this week.

''Our ads were accepted, but we have now been told that there won't be any space available for several more weeks because Toyota's advertising firm, Dentsu, is buying up all available space,'' Pickens said.

''The message is clear that Toyota doesn't want the Japanese public motivated to complain about how the big business cartels or keiretsus force higher prices on consumers.''

He said one Japanese businessman already has complained before the House Judiciary Committee in the United States, urging Congress to help Japan break up the keiretsus. Pickens said the businessman testified from behind a screen to protect his identity.

Pickens said he will continue to press his case for board representation on Koito and for greater disclosure of how Toyota's cartel controls Koito. The next Koito annual meeting is on June 28 in Tokyo.

#90129u2625 05/09/1990 ~United Press International

LOS ANGELES (MAY 10) UPI - The fast-growing marketing business for the hit television series ''The Simpsons'' received a major boost Wednesday as toy industry giant Mattel announced an exclusive toy licensing agreement for the characters in the show.

The pact, signed with the licensing and merchandising unit of Twentieth Century Fox, calls for a product line that will include Simpsons action

figures, vehicles, play sets, dolls, preschool products and child-size accessories. The toys will be available in the fall and the other items next spring.

Mattel did not disclose how much it is paying Fox for the worldwide licensing rights or the length of the agreement.

''The Simpsons'' has been one of the keys for the success of the Fox Network, often finishing in the top 15 of weekly ratings since it debuted late last year. It is also the first prime time weekly cartoon series since ''The Flintstones'' and ''The Jetsons'' appeared in the early 1960s.

The off-beat bulging-eyed characters, particularly 10-year-old Bart, have begun appearing on a flood of products, such as clothing and coffee mugs. Fox already has sold merchandising rights to 65 individual licensees for more than 200 separate products, ranging from book covers to bicycles.

Robert Sansone, president of Mattel USA Group said the decision to pursue the license was based on the series' broad appeal to consumers, the potential collectability of the product line and the expected longevity of the series.

''We believe 'The Simpsons' have real staying power and we're excited to have them as part of the Mattel Toys product line,'' Sansone said.

#90129u2631 05/09/1990 ~United Press International

WASHINGTON (MAY 9) UPI - The Justice Department moved Wednesday to prevent suspected spy Felix Bloch and his lawyers from learning details about undercover surveillance of the former diplomat.

Bloch, a career foreign service officer, is suspected of having improper contacts with the Soviets while he was deputy chief of mission of the U.S. Embassy in Vienna.

Bloch has never been formally accused of spying, although he was hounded for months by teams of FBI agents - and journalists - after the spying suspicions became public in early 1989.

Federal law enforcement officials have said privately that the investigation of Bloch was so bungled that it is highly unlikely he will ever face spying charges.

Last June, Bloch was suspended from his State Department job as head of the office dealing with relations between the United States and the European Community.

He was fired in March 1990 and has appealed. The legal dispute involves his firing - not the government's suspicion that Bloch engaged in spying.

Bloch has been seeking tape recordings, photographs and legal documentation from the surveillance that led to the firing. An appeal hearing had been scheduled for May 7, but was postponed.

The government wants to keep secret details of its surveillance, arguing that revealing the information would expose intelligence ''sources and methods.''

Bloch's lawyers have security clearances. But the Justice Department argued Wednesday that his attorneys would face a conflict of interest if they see the material about the surveillance, because Bloch has not viewed it.

''Furthermore, because the attorneys would have security obligations to the United States .. they then would have a conflict of interest ... because they could not divulge that information to their client,'' the government said.

The goverment also argued it could not ''monitor the situation'' to ensure that the lawyers did not show Bloch information that could harm ''national security.''

The government is seeking to prove that the FBI legally engaged in ''certain electronic surveillance for the purpose of obtaining foreign intelligence information.''

Many of the documents in the battle over Bloch's firing are sealed from public view. Much of the legal battle involves whether or not certain documents and legal briefs should become public.

The Justice Department often tries to seal information from public view. Ironically, government lawyers argued in a separate motion Wednesday that one of Bloch's motions should not be filed under seal. The government cited a number of First Amendment cases involving freedom of the press.

Bloch's lawyers argue that their brief contains sensitive information, but the Justice Department said it does not reveal any ''national security'' secrets.

WASHINGTON (MAY 9) UPI - The House, facing stiff opposition from business and a veto threat from President Bush, debated legislation Wednesday that would require employers to offer workers unpaid family and medical leave.

The Family and Medical Leave Act has gained some Republican support in the House, but Bush, the U.S. Chamber of Commerce and other business associations oppose the measure because it would force certain companies to provide the leave. The opponents contend businesses should have flexibility in deciding what benefits to offer employees.

The House planned to spend Wednesday on debating the bill and vote Thursday.

''This bill provides the minimum standard for the protection of American workers so they would never be forced to decide between their family or their work,'' said Rep. Louise Slaughter, D-N.Y.. She added that the United States is one of the few industrialized nations not to require such benefits.

''What this does,'' said Rep. Patricia Schroeder, D-Colo., ''is allow an American employee the right to penalize himself by going off the payroll and try to take care of a family member because that is what their conscience is telling them.''

But Rep. James Quillen, R-Tenn., said the bill is bad for business.

''Just because the bill has a popular-sounding title, we should not blindly accept legislation that will hurt business,'' Quillen said. ''There is a trend away from providing single-benefit programs and a move toward cafetaria style benefits ... that offer a range of choices from which each employee can select a benefit that meets his or her needs.''

The authors of a bill that emerged from the House Education and Labor Committee have agreed to accept a compromise version offered by Reps. Bart Gordon, D-Tenn., and Curt Weldon, R-Pa.

Under that plan, companies with more than 50 employees would have to offer up to 12 weeks of unpaid leave in one year for employees to care for a newborn, adopted child or seriously ill child, parent or spouse. While on leave, workers would receive job protection and health benefits.

Employees of the House also would be able to take up to 12 weeks of leave under the compromise bill, while other federal workers could take up to 18 weeks in two years for family leave and 26 weeks in one year for medical leave.

Sponsors say the bill would affect 5 percent of all employers and 44 percent of all employees.

In saying Tuesday that Bush would veto the bill, White House press secretary Marlin Fitzwater said companies should be able to offer

voluntarily whatever benefits they want, including family and medical leave. Business interests contend a required leave benefit could exclude other benefits offered to workers.

Rep. Marge Roukema, R-N.J., one of the original co-sponsors, said many workers are losing their jobs because leave is being denied for medical emergencies and adoptions.

''This is what working families need. It's an economic necessity,'' Roukema said, adding that ''Washington-based lobbyists'' are opposing the bill, not companies in the ''real-world.''

#90129u2662 05/09/1990 ~United Press International

HOUSTON (MAY 9) UPI - A new government offshore oil drilling program being worked on will focus on less-controversial waters in the Gulf of Mexico because of the nation's changing attitude on the environment, a U.S. official said Wednesday.

Barry Williamson, director of the Interior Department's Mineral Management Service, said the Bush administration has started a two-year planning process covering the next five years of leasing to oil companies in the outer continental shelf more than three miles off the nation's coast.

Responding to pressure from environmentalists, Congress has denied money to carry out such drilling in areas of the East Coast and California.

''I think the next five years will offer a sufficient amount of acreage. Most of those drilling resources are in the Gulf of Mexico,'' Williamson told the Offshore Technology Conference.

''The lease sales will be less frequent, will be more defined. The reason is,the game has changed in the last two years. The game has changed because the public perception has changed about oil and what it's doing. We need to be in tune to the American people in this administration,'' Williamson said.

Williamson said his office is gathering information on the new leasing program from all interested parties, including environmentalists and oil and gas companies.

While federal officials must move carefully concerning drilling in waters off California and in Alaska's National Wildlife Refuge, the administration definitely will provide maximum access to Gulf of Mexico, he said.

''That's a major national resource and a national asset.''

But the official said, ''I think the most exciting areas from an exploration standpoint is Alaska's Chukchi Sea. It is very important for the nation that we make some discoveries there. It could be another Gulf of Mexico.''

Williamson defended offshore drilling, saying it provided less threat of an oil spill than foreign oil tankers.

''Every barrel you don't produce on the outer continental shelf is a barrel you have bring in by tanker,'' Williamson said. ''A viable option to that, and a safer option, is offshore.''

#90129u2669 05/09/1990 ~United Press International

(MAY 9) UPI - President Bush and Congress agree on budget talks... Lithuania is running out of oil... riots break out across South Korea... and floods continue in Arkansas. Those stories and more, next from U-P-I.

All options, including higher taxes, apparently will be considered in budget negotiations agreed upon today by President Bush and congressional leaders.

Bush met at the White House with the top four leaders of the House and Senate, and they firmed up plans to throw the deficit problem to a special bi-partisan budget group.

The group will be made up of congressional and administration budget experts. It is to hold its first meeting on Tuesday at the White House, with Bush presiding.

In the words of White House spokesman Marlin Fitzwater- ''Every idea that anybody wants to bring up will be talked about and considered.''

That apparently means tax hikes would be considered, as well as Social Security and defense cuts.

The move comes at a time of mounting concern about the budget deficit and the state of the economy. The opening of the talks to all options marks an apparent backing away from the president's campaign pledge of ''NO new taxes.''

In Hungary, a resolution to suspend membership in the Warsaw Pact drew loud applause today in parliament, indicating broad support for the measure.

The parliament agreed to consider the resolution at its next session. If

approved, it would make Hungary the first East Bloc nation to suspend Warsaw Pact membership since last year's wave of anti-communist reforms in Europe.

The move was proposed by an opposition leader, and the opposition wants the government to go further... calling for negotiations on a permanent break with the Soviet-led alliance.

However, Prime Minister-designate Jozsef Antall has said his government intends to honor all previous commitments to foreign nations, including its Warsaw Pact obligations.

The last time Hungary withdrew from the Warsaw Pact was on November 1st, 1956. Three days later, Soviet tanks invaded.

#90129u2711 05/09/1990 ~United Press International

(MAY 9) UPI - Tens of thousands of students and other dissidents staged violent protests throughout South Korea today.

The protesters torched police cars and firebombed a U-S Information Service building in the capital city of Seoul. Streets in Seoul turned into battlefields as more than 10-thousand demonstrators critical of the government clashed with riot police.

Opponents of the regime say the protests result from failure by the government to institute promised reforms. They say the protesters also are angry over what they consider declining economic and social conditions.

In Washington, a State Department spokesman said windows in the Information Service building were broken and a blaze touched off by a firebomb burned the first floor of the structure.

There is NO immediate estimate of the damage. Across the street from the building, two police vehicles were set afire.

Defense Secretary Cheney briefed NATO defense ministers today on recent American moves to further ease East-West tensions in Europe.

Cheney explained why President Bush last week decided to cancel new short-range, ground-based nuclear weapons for Europe. Bush also called for a sweeping review that could re-shape the Western Alliance.

The two-day meeting of 14 defense ministers at a ski resort near Calgary, Canada, also is expected to include talks on eventual removal of short-range, ground-based nuclear missiles in Europe. This would involve negotiations with the Soviet Union on their withdrawal of similar weaponry

in Eastern Europe.

NATO Secretary General Manfred Woerner said he will discuss with the ministers steps leading to a review of the Alliance's future military and political role.

Cheney said that such discussions probably would NOT be concluded until some time after this year.

-30- 1991

#90129u2766 05/09/1990 ~United Press International

(MAY 9) UPI - Lithuania's Prime Minister Kazimiera Prunskiene met today with Britain's Prime Minister Thatcher as part of her effort to win Western support for Lithuania's independence bid.

Prunskiene held a news conference in London after the meeting and repeated that Lithuania wants a compromise in its dispute with Moscow. She says the Baltic republic is willing to freeze and re-negotiate all laws approved since its March 11th declaration of independence.

But she emphasized that ''independence is NOT up for discussion.''

A spokesman for Thatcher said Prunskiene and Thatcher agreed during their talks today that Lithuania's push for independence should NOT jeopardize Moscow's relations with the West.

Prunskiene's London visit is the second stop on a four-nation tour. She met with President Bush earlier, and later this week she's to meet with the French president and the West German chancellor.

South African President Frederik de Klerk received a warm welcome from French officials as he kicked off a nine-nation trip in Paris today.

De Klerk will meet tomorrow with French President Mitterand to discuss recent moves to ease racial tensions in South Africa. De Klerk is expected to stress that progress made so far toward ending apartheid warrants an end to international sanctions against his country.

De Klerk's meeting with Mitterand marks the highest-level get-together between leaders of the two nations since the South African Republic was proclaimed in 1961. The French president has always been a fierce opponent of apartheid.

De Klerk's European trip comes as a follow-up to talks held with the African National Congress in South Africa last week. Progress was reported in discussions aimed at further talks on racial changes.

-30- 1951
#90129u2794 05/09/1990 ~United Press International
(MAY 9) UPI - Pope John Paul continued a busy pace today on the fourth day of his week-long visit to Mexico.

The pontiff met privately in Mexico City with representatives of the Jewish community and with leaders of other Christian churches.

Last night, the pope called on world governments to respect international accords on refugees.

He told envoys from foreign nations stationed in Mexico that they could benefit in the future from the solidarity shown today on the refugee situation.

After his meetings today, John Paul flew to Durango, 460 miles north of Mexico City. There, he is to meet prison inmates, address local officials and ordain priests at an open-air mass.

About 100 homes are flooded in Pine Bluff, Arkansas, as floodwaters in the rain-swollen Arkansas River sweep downstream. The number of flooded homes is expected to increase to 150 when the river hits its crest, but officials say the flooding may be less than anticipated.

The Arkansas is expected to crest about half-a-foot lower than earlier estimates and that could mean less damage.

The Arkansas River crested upstream at Little Rock, at nearly five feet above flood stage.

State officials say 543 homes around the state suffered water damage from the rampaging, storm-fed Arkansas and the Red River.

There have been NO flood-related deaths in Arkansas, but nearly 200 head of cattle were swept to their deaths north of Little Rock.

State officials also warn that snakes and spiders have been forced to higher ground by the floods. Eight snake bites were reported in Jefferson County.

#90129u2940 05/09/1990 ~United Press International
(MAY 10) UPI - DIGEST:

Basketball

San Antonio Spurs center David Robinson, NBA Rookie of the Year, Wednesday was honored for having the most impact on his team's success by virtue of a mathematical formula to determine all-around contributions. Robinson, named winner of the 1990 Schick Award, ranked 10th in the league in scoring and second in rebounding, averaging 24.3 points a game and 12.0 rebounds.

Boxing

Mark Breland will defend his WBA welterweight title against Aaron ''Superman'' Davis July 8, promoters announced. Breland is 27-1-1 with 20 knockouts and Davis is 28-0 with 17 knockouts. ABC will televise the bout between the New Yorkers. ... Former junior welterweight champion Aaron Pryor, declared legally blind in his left eye by one state commission, has received permission to fight Wednesday night in Wisconsin. The state Department of Licensing and Regulation granted permission for Pryor to fight welterweight Darrell Jones at the Masonic Temple even though Pryor, 34, has cataracts in one eye and has not fought in 32 months. ... East German Henry Maske, the 1988 Olympic middleweight champion and reigning world amateur light heavyweight champion, launched his pro boxing career with a first-round knockout over Mexican Teo Arvizu at the Wembley Grand Hall in London.

College

Two seniors, middle distance runner Siobhan Gallagher of Providence College and soccer star Patrick O'Kelly of Seton Hall, both natives of Ireland, were named Big East Conference Scholar-Athletes of the Year.

Football

Art Schlichter, the former Ohio State and Indianapolis Colts quarterback suspended in 1983 for wagering on pro football and baseball games, will play for the the Detroit Drive of the Arena Football League next season. ... The Washington Redskins waived defensive back Barry Wilburn, who led the NFL in interceptions in 1987 but was supsended last season for substance abuse. The Redskins also granted medical clearance to running back Kelvin Bryant to return from a neck injury that cost him the 1989 season. ... Atlanta guard John Scully, a nine-year veteran who sat out all of last season as a free agent, signed with the Falcons for the 1990 season. Scully, a 6-foot-6, 270-pounder out of Notre Dame, started 77 of 102 NFL games for Atlanta after being drafted in the fourth round in 1981. ... Buffalo Bills officials said 1990 season ticket sales may decline, mainly due to a price increase. Bills officials said this year's season ticket renewal rate is about 95 percent of the 45,865 season tickets sold in 1989. Last year, the Bills renewed nearly 100 percent of the 40,117 season tickets sold in 1988.

Golf

President Bush plans to participate in the Doug Sanders Senior Celebrity Classic golf tournament next week at Kingwood, Texas. Bush is scheduled to play May 19 at the Deerwood Club, site of the PGA Senior Tour event, with his son, George Jr., and PGA Commissioner Deane Beaman.

Road Racing

Canadian Al Howie ran 185 miles after two days to lead the Sri Chinmoy seven-day race in New York. Suprabha Szhecter of Washington is second with 175 miles.

Soccer

Bernard Tapie, president of the French club Olympique de Marseille, told city officials to come up with a plan for a bigger stadium for his club by June 30 or he will consider leaving his post and sell a number of players to recoup his investment of $18 million. Tapie has been seeking a 60,000-seat stadium or expansion of the current Veldodrome stadium, which holds no more than 45,000.

Swimming

Edsard Schlingemann, 23, a member of the Dutch national team that competed at the Los Angeles Olympics in 1984, was killed when his car hit a tree in Vaessen, the Netherlands. Schlingemann won nine career national titles.

Tennis

Jennifer Capriati will play in the $350,000 Pilkington Championships at Eastbourne, England June 18-24. Among those competing with the 14-year-old American in the pre-Wimbledon tournament are Martina Navratilova, Helena Sukova, Rafaella Reggi and Hana Mandlikova. ... Arizona, Indiana, San Diego and South Carolina advanced to the second round of the ninth annual NCAA Women's Tennis Championships at the University of Florida's Scott Linder Stadium in Gainesville. The top 12 seeds, including four-time defending champion Stanford, all had first-round byes. Arizona will play Stanford in the second round of the 20-team field.

Volleyball

The NAIA women's volleyball championship will be held Nov. 15-17 at the University Brigham Young-Hawaii's 5,000-seat Cannon Activities Center.

#90129u2996 05/09/1990 ~United Press International

(MAY 9) UPI - The fate of an emergency spending bill that includes aid for Nicaragua and Panama is now in the hands of House and Senate negotiators. They are trying to hammer out a compromise that will be acceptable to both houses, and to the president.

Part of the problem lies in amendments that were added to the bill. One would allow the District of Columbia to use local tax money for abortions. President Bush has said he will veto the spending bill unless the abortion provision is removed.

NASA engineers have recommended replacement of a valve aboard the Columbia shuttle at Cape Canaveral, Florida. They say the tricky task probably will delay launch of the shuttle and its seven-member crew to around May 30th.

North Carolina Democrat Michael Easley says he will demand a June run-off because of the closeness of his race with former Charlotte Mayor Harvey Gantt in yesterday's Senate primary. They seek to oppose Republican Senator Jesse Helms in November.

Rival Christian factions exchanged rocket and cannon fire in another flare-up in east Beirut today. The fierce shelling set houses and cars ablaze and killed at least six people. Another 20 people were reported wounded.

A hurricane packing winds ranging to 125 miles an hour hit India's southeastern coast today. Officials say at least six people died in weather-related incidents. 30-thousand people were evacuated from low-lying areas.

LANDOVER, MD (MAY 9) UPI - Cam Neely scored twice Wednesday night to help the Boston Bruins advance to the Stanley Cup finals for the second time in three years, downing the Washington Capitals 3-2 to complete a four-game sweep in the Wales Conference finals.

Neely scored on the power play at 18:42 of the first period for a 2-0

Boston lead, then scored his 12th goal of the playoffs at 2:08 of the third period off an acrobatic pass from Brian Propp for a 3-1 lead.

Boston provided excellent protection for goalie Andy Moog, as Washington set a club record for fewest shots on goal in a playoff game with just 14. The previous mark was 16 on April 14, 1985 against the New York Islanders.

Boston, which posted the NHL's best regular season record and won the Adams Division, recorded the first Wales Conference finals sweep since the 1982 New York Islanders blanked the Quebec Nordiques en route to winning the Stanley Cup.

The Bruins, who lost in the 1988 finals to the Edmonton Oilers, face the winner of the Campbell Conference finals between Edmonton and the Chicago Blackhawks. That series is tied 2-2 with Game 5 scheduled for Thursday night in Edmonton. Boston is seeking its sixth Stanley Cup title and first since 1972.

The Adams Division winner has beaten the Patrick Division champion in the Wales Conference finals three straight years and four of the past five. The series marked the first time Boston has swept a playoff series since ousting the Pittsburgh Penguins in four games in the first round in 1979. Washington, playing in its first conference finals, suffered a playoff sweep for the first time in its history.

The Bruins jumped to a 1-0 lead just 53 seconds into the game. Washington goalie Mike Liut made a stick save on a shot by Bob Carpenter from the left circle, but the puck bounced off John Carter's knee pad and into the net. Carpenter set up the play by stealing a pass from Rod Langway.

Neely's first goal came off a pass from Greg Hawgood. Neely took the pass from behind the net, eluded Washington's Tim Bergland and scored on a wrist shot from the slot to Liut's stick side.

Nick Kypreos scored his first career playoff goal on a backhander from the slot off a pass from Steve Leach at 15:32 of the second period to draw Washington within 2-1.

Neely's second goal put the Bruins up 3-1. Propp, down on one knee and guarded by Steve Maltais, fired a backhand centering pass from the left corner to Neely, who delivered a backhander past Liut.

Washington's Dale Hunter took a pass from behind the net by John Druce and stuffed the puck between Moog's leg pads to pull Washington within 3-2 at 10:27 of the third period.

Boston left wing Bob Beers sustained a broken right leg after being hit by Bergland at 3:35 of the second period and will miss the rest of the

playoffs, according to a team spokeswoman. Beers was carried off the ice on a stretcher after being hit, then taken by ambulance to Sibley Hospital in Washington for treatment for a fractured femur (major bone of the upper leg) just above the knee.

#90129u3573 05/09/1990 ~United Press International

(MAY 9) UPI - NASA says work to replace a faulty cooling system valve will push back next week's planned launch of the shuttle Columbia by ''two to three weeks.'' Engineers earlier today recommended the valve be replaced at the launch pad, a complex job NEVER before attempted with a shuttle in the vertical position. The goal of Columbia's Spacelab astronomy mission is to study X-ray and ultraviolet radiation from deep space.

Congress and the president have agreed to open bipartisan budget talks next week, amid mounting concern about the deficit and the state of the economy. The talks are set to begin next Tuesday at the White House, with President Bush leading the negotiations between the congressional and administration teams. All options apparently are to be considered, including higher taxes.

Eight Democratic senators criticized President Bush today for fighting an international aid plan to maintain the ozone layer. The aid is intended to help Third World countries phase out use of ozone-eating chloro-fluorocarbons. Bush opposes a plan that industrialized nations provide 100-Million dollars to countries such as India and China to use substitutes for the C-F-Cs. The senators in Washington say Third World countries caN'T afford the change on their own.

Federal and Arizona prosecutors today sounded the alarm about what they called an ''astronomical'' wave of computer crime. Authorities in Phoenix say computer hackers are getting younger, and parents must know what their kids can do with their computers. That warning comes following the serving of 28 search warrants looking for hackers across the nation. Investigators say NO arrests were made for computer crimes, but seized disks will be analyzed.

#90129u3889 05/09/1990 ~United Press International

(MAY 9) UPI - The Central American aid package that President Bush wanted weeks ago has been delayed even longer. House and Senate negotiators met today to hammer out a compromise on the bill that includes the aid, but House members say they need more time to understand the 180 Senate amendments. Leaders will meet Monday to discuss when full-scale talks can resume. The spending bill includes emergency aid for Panama and Nicaragua.

Newsday has suspended columnist Jimmy Breslin for calling a New York City radio show to discuss the racial slurs he uttered about a Korean-American reporter. Breslin was suspended without pay for two weeks. The New York newspaper's editor, Donald Forst, says Breslin's radio conversation yesterday shows insensitivity to the matter. Breslin reportedly questioned on air whether he should attend his nephew's upcoming wedding with a Korean.

The Census Bureau says baby boomers are increasing their dominance of the voting population. The 25-tothird since 1980, to a projected 44 percent of the voting age population by the national midterm elections in November. During the past decade, the 65-and-over group also grew significantly, to 17 percent of the voting age population. But the 45-to-64 age group will drop to about 25 percent in 1990.

President Bush is going to play golf in Texas with his son next week, but it woN'T be just another trip around the the links. Bush plans to play in the Doug Sanders Celebrity Classic golf tournament. The president is

scheduled to play May 19th at the Deerwood Club in Kingwood... the site of the P-G-A Senior Tour event. His playing partners will be his son, George Junior, and P-G-A Commissioner Deane Beaman. Tournament host Doug Sanders says it's the first time a president has played in a Senior Tour event while in office.

(MAY 9) UPI - President Bush and Congress agree to budget summit... Water rationing for San Francisco... Columbia shuttle mission postponed... and more rain in flood-ravaged Arkansas. U-P-I has it all, next:

Bipartisan talks on the budget are to begin next week as the president and Congress search for a way to cut the soaring federal deficit.

A team of 17 congressional negotiators is to begin talks Tuesday at the White House with an administration team led by budget director Richard Darman and Treasury Secretary Nicholas Brady.

The bipartisan sessions were agreed upon today by President Bush and top congressional leaders during a meeting at the White House. There are NO pre-conditions or deadlines, and that apparently means all options will be considered, including higher taxes.

Senate Republican leader Robert Dole is urging his fellow Republicans to keep an open mind about the sessions, but some are ignoring him. 19 G-O-P senators sent the president a letter urging him to stick with his campaign pledge of NO new taxes. They also urged him to make a capital gains tax cut the ''top priority'' in the talks.

San Francisco residents today were ordered to cut their water consumption by 25 percent.

The Bay City's Public Utilities Commission imposed mandatory water rationing and raised rates nine percent. The commission president said four years of drought has left the area with ''a real emergency.''

The rationing prohibits hosing down sidewalks and requires shutting off of all decorative fountains. Restaurants may serve water only to customers who request it.

The rate hike will increase the average monthly water bill by about six dollars.

30 Bay Area agencies who purchase water from San Francisco will also be cut back 25 percent from 1987 levels. Rationing was imposed briefly last year.

The water department general manager compared the Bay Area to a person whose bank account keeps dwindling yet who keeps writing checks every day.

#90129u4071 05/09/1990 ~United Press International

(MAY 9) UPI - Like a car with a leaky radiator, the shuttle Columbia will be on blocks for two or three weeks because of a tricky cooling system valve.

NASA today said next week's planned shuttle launch will be pushed back because of ''tedious'' repair work at the launch pad in Cape Canaveral, Florida.

The delay was announced at the conclusion of a two-day flight readiness review. Liftoff on the 36th shuttle flight had been scheduled for next Thursday.

One NASA official called the valve system ''absolutely critical to the safety of the crew and overall mission success.''

NO date will be set for the shuttle's return until engineers get a better idea of how long it will take to replace the faulty valve.

The valve is vital to the operation of a Freon cooling system needed to carry away heat generated by electrical and mechanical systems.

The first pictures from the Hubble Space Telescope were also delayed today.

Engineers determined that a math error in a radio command caused the orbiting telescope to point one-half degree in the wrong direction when trying to track stars.

If all goes well with correcting the error, the telescope should be able to photograph a star cluster in the Milky Way between May 16th and May 18th.

NATO ministers today greeted an American plan to halt modernization of nuclear weapons in Europe by saying it is NOT enough.

A senior U-S official says the Dutch and several other delegations called for the unilateral withdrawal of nuclear artillery from Europe.

The proposals came at the opening session of NATO's Nuclear Planning Group meeting in Kananaskis Village, Canada, the 1988 Winter Olympics site near Calgary.

The Netherlands ambassador to NATO asked what the purpose of short-range artillery is if the Soviets withdraw from Eastern Europe.

A senior U-S official left open the possibility that the United States might agree to remove the artillery.

In addition, West Germany's defense minister urged NATO to get rid of all land-based nuclear weapons in Europe in future arms control talks with the Soviets.

In Washington, a study today called for a major change in Pentagon planningaway from full-scale war in Europe to a rising threat of conflict in the Third World.

Two House committees participated in the study by 22 experts at the NON-profit independent Center for Strategic and International Studies.

#90129u4081 05/09/1990 ~United Press International

(MAY 9) UPI - Naval investigators today searched the destroyer U-S-S Conyngham in Norfolk, Virginia, to determine what caused yesterday'sblaze that killed one officer and injured 18 sailors.

Naval Investigative Service agents also interviewed crew members. The fire erupted in one of the Conyngham's four boilers as it was being lit early yesterday, about 80 miles off North Carolina.

The investigation will focus on equipment, procedures and events leading up to the fire.

Atlantic Fleet spokesman Captain Paul Hanley said the ship was preparing for an inspection when the fire occurred. He did NOT know of any prior mechanical problems.

The crippled 400-foot guided missile destroyer was towed into Norfolk this morning. About 200 family and friends greeted the ship in what Navy officials called an emotional reunion.

One sailor told his mother the flames became so hot that they caused metal decks to bubble and firefighting masks to melt.

Computer hacker crimes have escalated into what officials call an ''astronomical'' crime wave. And federal and Arizona authorities are taking steps to try to deal with the problem.

Agents from the U-S Secret Service and the Arizona attorney general's office have served 28 search warrants in the past two days. The warrants

in 15 cities across the nation resulted in NO arrests for computer crimes. But 42 computer systems were seized, along with thousands of computer disks.

The warrants stem from an 18-month probe that UNcovered a long list of possible crimes, including credit card fraud, theft of long-distance telephone services, and improper entry into computer systems.

Gail Thackeray of the Arizona attorney general's office says the ''crime wave in the computer area'' has become ''just astronomical.''

Police in San Jose, California, say the investigation focused on a computer bulletin board in Phoenix.

#90129u4115 05/09/1990 ~United Press International

(MAY 9) UPI - The rain-swollen Arkansas River is starting to drop, but flooding continues in Little Rock and Pine Bluff.

The surging river crested yesterday in Little Rock at nearly five feet above flood stage, and it crested this morning downstream at Pine Bluff. Officials predict the river will fall below flood stage in Pine Bluff tomorrow, and in Little Rock by Saturday.

The state Office of Emergency Services says nearly 300 homes are flooded in Pine Bluff, the hardest hit area along the Arkansas River.

More than 700 homes across the state have suffered water damage from the rampaging, storm-fed Arkansas and Red rivers. The Red River is expected to crest sometime before midnight at Index, and at Fulton late tomorrow.

It's a different story in northern Lower Michigan, where officials are hoping for rain to help douse wildfires that burned about 10-thousand acres of forest land and destroyed 75 homes. The fires were declared contained today, but officials say they're ''on their knees'' hoping for rain.

A Victory Day parade today in Moscow's Red Square marked the 45th anniversary of the Soviet victory over Nazi Germany in World War Two.

It was the first such parade in Red Square in five years, and some Western diplomats who were watching said it might be the last.

Also marking the anniversary was the ringing of the giant Ivan the Great bells for the first time since World War Two ended. It was on May 8th, 1945, that victorious Soviet troops placed a hammer-and-sickle banner on top of the Reichstag- the German parliament- in Berlin, as the

announcement was made that the war had ended.

The military parade featured the tiny T-34 tanks of World War Two, alongside the Soviet Union's newest battle tank, the T-80.

It was a grand ceremony for the Soviet military, who have been asked to make enormous cost cuts and troop pullbacks under perestroika.

#90129u4226 05/09/1990 ~United Press International

(MAY 9) UPI - President Bush and congressional negotiators will open budget talks next week that'll consider all options- including higher taxes- to cut the federal deficit. But 19 Republican senators sent Bush a letter today, urging him to stick with his pledge of NO new taxes.

On Capitol Hill, House-Senate negotiations on a supplemental spending bill containing emergency aid for Panama and Nicaragua broke down today. The development further delays the assistance President Bush wanted weeks ago.

A four-year drought that's dried up water reserves in California forced officials in San Francisco today to impose mandatory water rationing and order residents to cut water consumption by 25 percent. In addition, water rates will be increased by about nine percent.

Authorities in the Little Rock, Arkansas, area say the Arkansas River is receding recede. The worst of the flooding moved downstream to Pine Bluff, where the river crested today at 48 feet... one foot above flood stage.

Several NATO defense ministers are calling for the unilateral withdrawal of nuclear artillery from Europe. A senior U-S official at the Nuclear Planning Group meeting that began today in Kananaskis Village, Canada, left open the possibility the United States would agree.

French Prime Minister Rocard survived a NO-confidence vote in the National Assembly today when the Communist Party decided against voting with conservatives to topple the Socialist government. The conservatives were angry at the granting of amnesty to Socialist politicians accused of corruption.

#90129u4233 05/09/1990 ~United Press International

(MAY 9) UPI - In South Korea, dozens of people were arrested and a number injured today in nationwide protests by students and dissidents against the new ruling party. Demonstrators threw firebombs at the U-S Information Service building in Seoul. NO injuries were reported and the fire was doused in 90 minutes.

Thousands of students boycotted classes and held rallies across Poland today to protest a government bill that would force many of them to pay for their studies. Education is now free in Poland.

Colombian newspaper says an attempt by two Colombians to buy ''Stinger'' missiles in Florida is linked to a larger terrorist plan by cocaine traffickers. That plan reportedly included a failed plot to shoot down President Bush's plane last February during the anti-drug summit in Colombia.

Authorities in Miami say the U-S Coast Guard confiscated more than four tons of marijuana from an American boat just off the Mexican coast today. Two men were arrested. It's the largest pot seizure by the agency this year.

News reports from Guatemala say police seized a truck loaded with nearly 14-hundred pounds of Colombian cocaine about 25 miles northeast of the capital last night. The coke has a street value of about 36-Million dollars. 11 suspects... including an American... were arrested.

Officials at the Henry Doorly Zoo in Omaha, Nebraska, hail the long-awaited birth of the world's first test-tube tiger cubs. The twin cubs were delivered by Caesarian section April 27th. A third cub died shortly after birth.

In Syracuse, New York, officials at Burnet Park Zoo say an Asian elephant who underwent a rare Caesarian section April 23rd appears to be recovering slowly. The operation was needed to remove a dead calf after five days of labor.

#90129u4382 05/09/1990 ~United Press International
(MAY 9) UPI - A survey released today shows the freeing of hostages Robert Pohill and Frank Reed attracted more public interest than any story this year. The monthly survey showed that 46 percent of Americans polled said they ''very closely'' followed the release of the two hostages in the Middle East. The survey also found this was the first time this year Americans did NOT rate Eastern Europe as the most important news story of the month.

In Mexico, Pope John Paul today urged businessmen to pay fair wages and create more employment opportunities. The pope chided those he said present capitalism as ''the only road'' for the world to follow. On the fourth day of a week-long visit to Mexico, the Pope met privately with members of other Christian churches and Mexico's Jewish community. The Jewish leaders urged the pontiff to fight for the rights of Soviet Jews.

In Alaska, environmental officials came out the winners today as the state legislature passed tough new oil-spill legislation. The five bills include a measure cracking down on reckless tanker captains, and legislation requiring better spill planning, prevention and cleanup. Oil industry lobbyists fought the bills to the end. The nation's worst oil spill occurred more than a year ago off the Alaskan coast.

Director George Lucas won a round today when a judge in Los Angeles barred the lead singer of the 2 Live Crew rap group from using the name Luke Skyywalker. The judge issued a temporary restraining order forbidding use of the name pending the outcome of a 200-Million-dollar trademark infringement suit brought by Lucas. The rap group is known for its sexually explicit lyrics, and the judge ruled that use of the name could damage the image of the ''Star Wars'' films created by Lucas.

#90130b0006 05/10/1990 ~Business Wire

NEW YORK (MAY 10) BUSINESS WIRE - Cummins Engine Co. Inc. (''Cummins'') and Industrial Equity (Pacific) Limited (''IEP'') jointly announced Thursday that they have entered into a settlement agreement pursuant to which they have agreed to the dismissal of all pending litigation between them.

Bruce Hancox, chairman of the board of directors of IEP's parent company, Brierly Investments Limited, and a director of IEP said, ''This agreement merely confirms what we have said all along in our Schedule 13D filings. We bought our shares of Cummins as an investment and never intended to take any of the actions we have now contractually agreed not to take--that being to make an acquisition proposal for Cummins, to make a tender offer for shares or to solicit proxies to elect one or more directors. This agreement permits us to pursue a harmonious relationship with Cummins and gives us the ability to give meaningful and constructive input to the Company, which we think will benefit all concerned.''

Henry Schacht, chairman and chief executive officer of Cummins, said, ''We welcome IEP's assurances set forth in the agreement. With this behind us, Cummins looks forward to the continued pursuit of its long-term strategic plan and to demonstrating the earning power of the company.'' Under the settlement agreement, IEP has agreed that for a period of 10 years it will not, among other things, seek representation on Cummins' board of directors or acquire additional shares of Cummins stock. Cummins has agreed that it will meet with IEP on a periodic basis in order to discuss Cummins' business and operations. The settlement agreement is subject to the U.S. District Court for the Southern District of Indiana entering an order approving the agreement.

#90130b0012 05/10/1990 ~Business Wire

INDIANAPOLIS (MAY 10) BUSINESS WIRE - For the second quarter of its fiscal 1990, ended March 31, 1990, Anacomp Inc. recorded net income of $5,512,000, or 13 cents per share (9 cents before extraordinary credit), on revenues of $161,499,000.

That compares to net income of $4,957,000, or 12 cents per share (7 cents before extraordinary credit), in the second quarter of fiscal 1989, on revenues of $163,299,000.

For the six months ended March 31, 1990, Anacomp recorded net income of $10,138,000, or 24 cents per share (15 cents before extraordinary credit), on revenues of $308,682,000. That compares to net income of $4,449,000, or 9 cents per share (16 cents before extraordinary credit and loss from discontinued operations), on revenues of $318,403,000 in the prior year.

Louis P. Ferrero, Anacomp chairman and chief executive officer, said, ''These results demonstrate again the continued strength of our core micrographics businesses. In both services and equipment, gross profit margins were up compared to the same quarter last year, and income before taxes and extraordinary credit improved on the same quarter to quarter basis by 23 percent. We expect to see significant growth continue throughout the year and the decade, as micrographics expands its place as the medium of choice for a wide variety of information management applications.

''Shortly after the close of this successful quarter, Anacomp introduced a major new product, a COM recorder called the XFP 2000. The XFP 2000 is a technological breakthrough and incorporates into COM technology the ability to produce, on microfilm, graphic output identical to that created by laser printers for applications such as statements, invoices, and insurance policies.

''The XFP 2000 has already generated several million dollars worth of orders. In fact, we believe this has been the most successful product introduction in the history of the information and image management industry. Its success is just one example of the continuing viability

and versatility of micrographics.''

Anacomp is an information management company with leading market positions in micrographics services, systems and supplies. Anacomp's customers include banks and other financial institutions, large government and industrial users, and a variety of other businesses around the world.

Anacomp common stock is listed on the New York and Midwest stock exchanges.

MENLO PARK, CA (MAY 10) BUSINESS WIRE - Software programs that harness the power of computer systems to handle environmental concerns for business, such as hazardous materials handling and earthquake emergency response, are now being offered by Gaia Systems, a new firm with headquarters in Menlo Park.

Gaia Systems is currently marketing two software programs, Hazmat Business Plan Administrator and Hazmat Reporter, which help reduce risk in communities with hazardous materials. The programs interface with CAMEO II, the National Oceanic and Atmospheric Administration's (NOAA) Computer Aided Management of Emergency Operations.

Hazmat Business Plan Administrator is used by administering agencies, like fire departments and county planning offices, to meet state and federal hazardous materials management regulations with a minimum of paperwork.

The program provides a database for the organization and storage of hazardous materials located in the community, including maps to identify storage facilities, complete chemical inventories for each facility, emergency response preparedness plans for each facility and other required information.

The Hazmat Reporter is the companion program to Hazmat Business Plan Administrator. Hazmat Reporter contains forms and information required by state and federal agencies for hazardous material reporting, simplifying and automating reporting requirements.

Businesses can use Hazmat Reporter to create their hazardous materials business plan in accordance with the specific requirements of the administering agency, or to simplify the management of their own hazardous materials inventory.

The software uses a simple, point-and-click or fill-in-the-blank approach to organizing the type of materials stored, what the materials are likely to do under emergency conditions, and where they are stored.

If the administering agency is using Hazmat Business Plan Administrator, businesses can submit a diskette containing preformatted information which is automatically uploaded to the agency's master data base.

This transfer of data eliminates paperwork on the part of agencies and businesses, improving communication and keeping critical information current.

All Gaia Systems software is now available on Apple Macintosh computers. The software is ''Hypercard'' based, making it operable even by computer novices, via Apple's intuitive, icon (symbol)-based approach to data entry and access. For more information, contact Gaia Systems, 3000 Alpine Road, Menlo Park, CA 94028, 415/854-8288, fax 415/854-8297.

SAN FRANCISCO, CA (MAY 10) BUSINESS WIRE - Steven E. Hill Thursday joins Sutro & Co. Inc.'s Research Department as leisure time analyst.

His coverage will include motion picture companies, video distributors, amusement parks, theatre chains, and casino operators.

Jack Lulkart, Sutro & Co. president, stated: ''We've wanted to expand into the entertainment-leisure area for some time and this is a natural match, Steven's expertise in this expanding investment area broadens the scope of our research universe and complements our existing Western-regional focus.''

Hill, 37, was founder and president of ZELE USA, a national beverage company. At ZELE, he was responsible for product creation and development, strategic planning, and marketing. He has served as a beverage and leisure time analyst for Davis Skaggs, a division of Shearson Lehman, and as the San Francisco branch manager for Charles Schwab & Co.

Hill obtained a bachelor of arts degree in english/journalism from the University of California at Berkeley. He resides in San Francisco.

Sutro & Co. Inc., founded in 1858, is the longest-established investment firm in the West and a wholly owned subisidiary of John Hancock Freedom Securities. The firm is engaged in securities brokerage and investment banking as well as a full range of financial services focused on individuals and institutional investment firms nationwide. The company's retail branch system includes 12 offices throughout California and one office in Arizona.

DETROIT (MAY 10) BUSINESS WIRE - Companies that will continue to be successfully competitive in the coming decade will be those that globalize their operations, said Masahiro Uchida, president of Mazda Motor Manufacturing (USA) Corp. (MMUC).

''Globalization is still key to competitiveness,'' he said. ''It allows companies to blend the best from all cultures to build a stronger world economy.

''Commitment to the global market is not a new direction for Mazda. We have been in the U.S. market for 20 years, and the single largest financial commitment in Mazda's history is here in the United States -- the plant in Flat Rock.'' MMUC represents a $550 million investment by Mazda and is a prime example of Mazda's thrust toward globalization.

Commenting on the past three years of plant operation in the United States Uchida said, ''We have come a long way since we first started building cars at Flat Rock. Our progress has been very good and the plant is functioning quite well. Like all new businesses, we have had to learn many things and the people who work for us also have had to learn. This has been a very worthwhile experience and we believe we will all benefit from what we have learned in the future.''

Mazda not only builds cars in the United States but also designs them here localizing their styling and features. Mazda's U.S. research and development center, in Irvine, Calif., was instrumental in the design of both the popular Mazda MX-5 Miata and the Mazda MPV. Mazda has also invested in other research and development facilities in Ann Arbor and in Flat Rock, Mich.

Mazda is taking similar steps towards strengthening its presence in Europe where we have dedicated our new R & D center in Frankfurt, West Germany, he said.

''The European market, with its strength, the coming unification, and the opening of Eastern Europe, is most interesting right now.'' Uchida added, ''That's why we believe a constant push toward global operations is not only healthy, it is inevitable.''

CLEVELAND (MAY 10) BUSINESS WIRE - National City Corporation today announced that William C. Lucas has been appointed vice president, with responsibility in loan recovery administration. Mr. Lucas, 45, also serves as vice president and manager of the Special Loans Department at BancOhio National Bank, a member bank of National City. He plans to remain in Columbus, Ohio.

Mr. Lucas has been with BancOhio his entire business career, focusing nearly 20 years in the Bank's Credit Division. A native of Columbus, Mr. Lucas earned a bachelor of science degree in Business Administration from Ohio State University. He is first vice president of Columbus Northern Lions Club; an active member of the Charity Newsies organization; treasurer of the Glen Echo United Presbyterian Church; and a volunteer for the Central Ohio Radio Reading Service. Mr. Lucas and his wife, Barbara, have one son.

Profile of National City Corporation

National City Corporation is a $23 billion bank holding company headquartered in Cleveland, Ohio. The Corporation's principal banking units are National City Bank, Cleveland; BancOhio National Bank, Columbus; and First National Bank of Louisville.

Other member banks include National City Bank, Akron; First National Bank, Dayton; Gem Savings Association, Dayton; CommerceNational Bank, Lexington; and Ohio Citizens Bank, Toledo. National City also has 11 community banks serving cities and towns throughout Ohio, Kentucky and southern Indiana.

National City's subsidiaries and divisions offer a wide range of other financial services such as credit card, retail payment and airline ticket processing, trust and investment management, leasing, merchant and mortgage banking, venture capital, small business and community investment and credit life insurance. These units include Franklinton Financial Services, National Processing Company, First Kentucky Trust Company, National City Trust Company, NCC Merchant Banking, National City Mortgage Company, W. Lyman Case & Company, National City Community Development

Corporation, and National City Life Insurance Company.

National City's common stock is traded on the New York Stock Exchange under the symbol ''NCC.''

#90130b0103 05/10/1990 ~Business Wire

SANTA CLARA, CA (MAY 10) BUSINESS WIRE - Applied Materials Inc. Thursday announced that Motorola's Semiconductor Products Sector (SPS) has placed an order for an unspecified number of the new Endura 5500 PVD systems.

The Endura 5500 PVD, Applied Materials' first product offering in the physical vapor deposition (PVD) market, was introduced April 23.

''Motorola's decision to buy the Endura 5500s is based not only on the advanced technology the system represents, but also on our long-term relationship with Applied Materials,'' said Hector Ruiz, Ph.D., senior vice president and director of technology at Motorola's SPS.

''Compatibility with Applied Materials' Precision 5000 CVD and Etch systems contributed to our decision to buy the Endura 5500s. The new PVD system uses the same standard chamber interface and control systems as the Precision 5000s, which will give us a great deal of production flexibility as well as offer the potential for integrating additional processes within the system.

''Our experience with the Applied Materials Precision 5000 systems can be easily applied and expanded to the new Endura 5500 PVD system,'' Dr. Ruiz said.

The Endura 5500 PVD features Applied Materials' new Masterfab system architecture, which is designed to integrate different wafer fab processes with widely varying pressure requirements.

It is a single-wafer, multichamber PVD system, with dual-load locks and a staged vacuum design to isolate those process chambers using much lower vacuum environments from the 10-9 torr base pressure used in the ultra-high vacuum (UHV) PVD process.

Applied Materials Inc. is a global growth company based in Santa Clara, and is the leading independent supplier of wafer fabrication systems to

the worldwide semiconductor industry. It is a market leader in chemical vapor deposition (CVD), dry plasma etching and silicon deposition. It is also a leading manufacturer of ion implantation and physical vapor deposition (PVD) systems.

With headquarters in Phoenix, Motorola's Semiconductor Products Sector is the largest U.S.-based producer of integrated circuits and discrete devices for the worldwide merchant market.

GREENVILLE, SC (MAY 10) BUSINESS WIRE - Delta Woodside Industries Inc. (NYSE: DLW) announced Thursday the signing of a definitive agreement to purchase the operations and certain assets of the shirt knitting division of Durham Hosiery Mills Inc.

Durham's shirt knitting division manufactures T-shirts and fleece garments for sale to screen printers and retailers. For the fiscal year ended in December 1989, the division had sales of approximately $48 million, operated plants in LaFayette, Ga., and Maynardville, Rutledge, Soddy Daisy and Tellico Plains, Tenn. and employed approximately 1,200 people.

The purchase is expected to be completed in early June 1990. After the purchase, the Durham plants will operate as part of Delta Woodside's Duck Head Apparel division.

Delta Woodside Industries Inc. manufactures and sells a wide variety of textile fabrics and apparel, and also is engaged in the retail distribution of office supplies and equipment. The company, which has approximately 8,000 employees, operates 31 plants and seven retail distribution centers in four states and Costa Rica.

IRVINE, CA (MAY 10) BUSINESS WIRE - At the annual meeting of shareholders held in Irvine May 9, Russell E. Leatherby, president and chief executive operating officer of UniCARE Financial Corp. (ASE:UFN), said he ''anticipates continued revenue growth and a relatively stable business environment for UniCARE through the

balance of the fiscal year.''

Leatherby noted that in spite of a higher federal income tax provision reflecting 1986 tax law changes: ''We believe the company's

performance should continue to be favorable in 1990.

''Our focus towards targeting selected California employers, combined with our highly regarded level of service, has attracted a strong flow of premium and has also resulted

in record levels of net cash flow provided by operations.''

Leatherby said that net cash provided by operations for the first quarter increased to $7,575,000 compared with the $4,581,000 for the same period last year.

Ralph W. Leatherby, chairman and chief executive officer of UniCARE, said that, ''In addition to strong operating earnings, the company has continued to maintain a high quality investment portfolio comprised of investment grade securities.''

Elected at the shareholders meeting to serve on the board of directors for the ensuing year were: Ralph Leatherby, chairman and chief executive officer; Richard V. Nunes, president and chief operating officer of

UniCARE Insurance, new to the board; William C. Baker; Robert L. Cooper; Leslie N. Duryea II; Ellison L. Hazard; Frank C. Hess; Richard M. Carter and Joann Leatherby.

UniCARE Financial, through its principal subsidiary, UniCARE Insurance Co. is an underwriter of workers' compensation insurance in California.

OLATHE, KN (MAY 10) BUSINESS WIRE - Osborn Laboratories announced Thursday that Thomas R. Strubbe has been elected president and chief executive officer effective June 1.

Strubbe, president of Washington National Corp., will replace James Osborn who was elected chairman of the board of Osborn Laboratories.

A 25-year veteran of the insurance industry, Strubbe will assume responsibilities for the daily operations of the facility. Osborn Laboratories is one of only three major laboratories in the country to provide testing services for the life insurance industry to assess the insurability of applicants.

Founded in 1988 by Osborn and Los Angeles-based Transamerica Life Cos., Osborn Laboratories has annualized revenues of $20 million, which is twice 1989 revenues. The firm has doubled its number of clients during the last year and now serves 138 companies in the United States and Canada.

''Tom Strubbe's extensive knowledge of the life and health insurance industry will enable us to continue the rapid growth we have experienced since our inception,'' said James Osborn.

Transamerica Life Cos.'s Chairman David R. Carpenter, adds: ''Tom has repeatedly demonstrated his expectional planning and organizational skills throughout his career with Washington National and The Lincoln National Life Insurance Co. Under his direction, we are confident that Osborn Laboratories will become the premier insurance testing laboratory in the world.''

Strubbe, a graduate of the Indiana University School of Business and the Tulane University School of Law, serves on several committees of the American Council of Life Insurance. He is a member of the Illinois and

Indiana State Bar Association.

As chairman, James Osborn will focus on research, as well as development and implementation of new technology. He was instrumental in introducing Dried Blood Spot (DBS) testing in late 1988. This proprietary technology utilizes a finger stick to collect blood samples on a special filter paper which presents a cost-effective and reliable alternative for underwriting purposes.

Other investors in Osborn Laboratories include: Allstate Life Insurance Co. and State Farm Life Insurance Co.

SEATTLE (MAY 10) BUSINESS WIRE - The Security Pacific Gallery in Seattle -- Security Pacific's vital new extension of the corporation's long -established art exhibition program -- will open in early November 1990.

The gallery, located at Second Ave. and Seneca St., is being designed by architect Richard F. Dallam, AIA, a principal of the NBBJ Group. Northwest artists Ginny Ruffner, John T. Young and Jack Mackie will collaborate with Dallam on special design features of the gallery.

The exhibition space will mount a full schedule of original exhibitions, shaped by Tressa Miller, first vice president and director of cultural affairs, Security Pacific Corp., and an exhibitions curator to be announced later.

The exhibition program will open initially with one contemporary group exhibition in 1990, and launch a full schedule of five to six thematically oriented shows in 1991. The exhibitions will represent artists of local, regional, national and international stature, and include all media such as painting, photography, sculpture, video, mixed media and works on paper.

Another component of the new gallery will be an area set aside to feature the works of two individual artists each year.

The Security Pacific Gallery in Seattle dramatically expands Security Pacific's fine arts exhibitions program and reinforces Security Pacific's commitment to the arts -- a significant contribution throughout the West. Other Security Pacific galleries include: the corporation's flagship gallery, Gallery at the Plaza, located in Los Angeles at Security Pacific's world headquarters; Security Pacific Gallery, Costa Mesa; the ''Galleria'' at Security Pacific Bank Arizona, Phoenix; and Security

Pacific Gallery, San Francisco, scheduled to open in the fall of 1990.

The Seattle gallery will be open Monday through Saturday, 11 a.m. to 5 p.m. Admission will be free.

Security Pacific's gallery program is one of an overall corporate art program, which includes the Security Pacific Collection, consisting of more than 12,000 works of art, housed in Security Pacific locations worldwide. Included in the collection are more than 1,000 works maintained by Security Pacific Bancorporation Northwest.

Security Pacific Bancorporation Northwest is a Seattle-based, multi-bank holding company with assets of $10.2 billion and subsidiaries operating in Washington, Oregon, Alaska and Canada. The Bancorporation is an affiliate of Security Pacific Corp., the nation's fifth-largest banking company.

MONETT, MO (MAY 10) BUSINESS WIRE - Jack Henry & Associates Inc. Thursday released information concerning the Unisys counterclaim filed against the company in connection with JHA's 1989 lawsuit against Unisys Corp. with respect to the former software development and marketing agreement between the companies.

JHA's original suit was filed June 29, 1989, for judgement against Unisys Corp. in the amount of $13.5 million.

The counterclaim was filed on May 1, 1990, in the Circuit Court of Taney County, Mo., (the jurisdiction to which the original lawsuit has been transferred). The counts include alleged breach of contract, fraud, negligent misrepresentation, and tortious interference.

Damages sought include actual damages in a specified amount of $26 million plus additional unspecified ''fair and reasonable'' damages, punitive damages totaling $52 million, and damages of $536,250, plus interest and late charges for a lease agreement.

Management has not had the opportunity to fully analyze the counterclaim but strongly objects to Unisys' allegations and intends to vigorously defend against these claims in addition to aggressively pursuing its own claims against Unisys.

Jack Henry & Associates develops, markets, installs, and supports integrated data processing software systems for banks and financial

institutions.

DALLAS (MAY 10) BUSINESS WIRE - The board of directors of Atmos Energy Corp. (NYSE: ATO) has elected Carl W. Weller treasurer of the natural gas distribution company.

He replaces Charles M. Schoenfeldt who, in anticipation of his retirement, has been named assistant to the executive vice president and chief financial officer, James F. Purser.

Weller joined Western Kentucky Gas Co., now a division of Atmos, in 1964. He was vice president of finance for Western Kentucky Gas prior to its acquisition by Atmos in 1987. He joined the corporate staff in 1988 as director of finance, and was named director of taxation in 1989.

''Carl Weller brings a wealth of financial and industry experience to this position,'' said Charles Vaughan, Atmos chairman. ''He is a quality person as well, and we expect Carl to continue to make a strong contribution to Atmos.''

Weller is a native of Louisville, Ky. and is a graduate of the University of Louisville with a degree in business and accounting. Throughout his career he has been involved in civic and industry organizations. He has served on the Accounting Section Steering Committee of the Southern Gas Association and he is a past president of the Kentucky Gas Association.

Atmos Energy Corp. provides natural gas service to more than 527,000 customers in Texas, Louisiana, and Kentucky through its operating companies - Energas Co., Trans Louisiana Gas Co. and Western Kentucky Gas Co.

SACRAMENTO, CA (MAY 10) BUSINESS WIRE - System Integrators Inc. (SII), a leader in the design and integration of electronic publishing systems for the newspaper industry, Thursday announced a multimillion dollar contract to provide an electronic news publishing system to The Toronto Star.

Once installed, the system will be Canada's most powerful and advanced editorial publishing computer.

SII will provide The Star with a powerful, fault-tolerant publishing environment using SII's Tandem-based Editorial System/55, as well as SII Coyote publishing terminals and SII-provided personal computers.

SII will provide The Star with a powerful, fault-tolerant publishing environment using SII's Tandem-based Editorial System/55, as well as SII Coyote publishing terminals and SII-provided personal computers.

According to Alden L. Edwards, SII president and chief executive officer, ''SII approached The Star with a proven publishing system, the integration expertise needed to assemble a smooth-running system very quickly and a commitment to service.''

''The system is really what we, in editorial, are all about,'' said Star Editor John Honderich. ''In order for us to produce the best possible product, we must have the most efficient, effective process available. With the SII system, the staff can more fully concentrate their efforts on what they do best -- write and edit.''

The SII installation is expected to be complete within seven months. SII will install 203 of its popular Coyote publishing terminals at The Star. It will also place an additional 44 Coyote publishing terminals at The Star's remote bureaus, linking them to The Star's Tandem-based SII Editorial System/55.

In addition, SII will also integrate its Coyote editorial functionality with The Star's existing base of 201 personal computers.

Headquartered in Sacramento, System Integrators Inc. designs, manufactures markets and services publishing systems for editorial, advertising, pagination and imaging applications for the news publishing industry worldwide.

OAKLAND, CA (MAY 10) BUSINESS WIRE - Equitec Financial Group Inc. (NYSE: EFG), reported a net loss of $5.4 million or $1.10 per share on revenues of $8.4 million for the quarter ended March 31, 1990, compared with a net loss of $1.2 million or $.25 per share on revenues of $10.5 million for the same period in 1989.

The net loss for the first quarter of 1990 included a $2.6 million provision for uncollectible receivables from a partnership and a $1.1 million provision for disposition of the company's savings bank (a discontinued operation).

According to Richard L. Saalfeld, Equitec's chairman and chief executive officer: ''While progress is being made in Equitec's turnaround, the company's cash flow is limited and it is facing significant cash obligations for 1990. Management continues to believe that a restructured Equitec is viable and with its advisors is investigating alternative methods of restructuring to provide improved cash flow and to better position Equitec's primary business for eventual profitability.''

Saalfeld added, ''The underlying core businesses continued to perform well in the first quarter.''

Equitec's primary business is asset management, principally money management and real estate portfolio and property management. Assets under management were $3.6 billion at March 31, 1990.

#90130b0260 05/10/1990 ~Business Wire
HOUSTON (MAY 13) BUSINESS WIRE - The Coastal Corp.'s board chairman, Oscar S. Wyatt Jr., told stockholders at the company's annual meeting Thursday in Houston that the energy industry is in the early stages of a cyclical turnaround.

''Energy markets of the 1990s will be driven by availability of supply, not by the surpluses of the past decade,'' he said. ''Companies like Coastal that are well prepared and well positioned in the industry will prosper.

''Throughout the world, there is a much greater awareness of the environment,'' Wyatt said. ''We decided long ago that the company's future will be determined by our ability to supply the public with environmentally acceptable fuels.

''Fuel such as natural gas, cleaner refined products and low-sulfur coal will be in greater demand, and Coastal is in a position to supply each of them.''

Wyatt pointed out that this is the third straight annual meeting at which he has reported record financial results for the prior year and the first quarter of the current year.

James R. Paul, president and chief executive officer of Coastal, said: ''These financial results are one measure of how well Coastal is doing in meeting its objective of increasing the value of stockholders' investment.

''Another measure,'' he said, ''is the market price of Coastal common stock which has increased by 44 percent since the beginning of 1989.''

Paul told stockholders the company's investment in capital expansion for 1989 and 1990 will exceed $1 billion and will increase future earnings substantially. The capital outlays are primarily committed to investment opportunities that will enable Coastal to more fully benefit from the nation's increasing demand for clean burning fuels.

He said the company is in the midst of a major expansion of its natural gas pipelines and has started development on over 500 gas drilling locations identified over past years. He also cited recent additions of nearly 150 million tons of recoverable low-sulfur coal reserves and acquisition of a refinery in Aruba that will yield products meeting U.S. environmental standards.

''However satisfying our progress has been, real long-term success is a marathon, not a sprint,'' Paul said. ''The impact of our billion-dollar

capital spending program should provide further earnings increases for years to come.''

Paul said Coastal is recognized as one of the nation's leading energy suppliers. ''Coastal is very well positioned operationally and financially to benefit from the energy opportunities of the 1990s,'' he said.

In his concluding remarks to the meeting, Wyatt said the company has seen cycles of shortage and surplus come and go. ''Now, as the industry heads into another cycle, we see opportunities to extend our growth record. Never in our 35-year history has Coastal been in a better position to look ahead to the future.''

The Coastal Corp. is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

ANAHEIM, CA (MAY 10) BUSINESS WIRE - Speedy International-Asia Inc. has signed a 50-year agreement with two Japanese corporate giants, Canon Sales Inc. and Maruzen Co. Ltd., to expand American Speedy Printing Centers to Japan, according to William Culp, president and chief operating officer.

While other quick-print franchisers' attempts to enter the Japanese market have proven unsuccessful, the considerable international business experience of the Speedy International-Asia management team has resulted in ''a scenario more in line with Asian business dealings,'' says Culp.

''Together with our Japanese business partners, we have devised a method of synergistically interacting with the existing small printing companies in Japan,'' states Culp.

Speedy International-Asia opened its Tokyo headquarters in March 1990 and will begin opening its first of five pilot centers there in September. The company's pilot centers will combine highly sophisticated information processing equipment developed in Japan with the equally sophisticated quick-print industry developed in the United States.

American Speedy Printing Centers (ASPC) is the fastest-growing quick-print franchiser in the United States, outpacing the combined growth of all six of its major competitors in 1989, according to the January 1990 issue of Entrepreneur Magazine. ASPC began franchising in 1977, and currently has

732 franchise locations operating in the United States, Canada and Great Britain.

The parent company of Anaheim-based Speedy International-Asia, Kaiser International Inc., holds master franchise rights for American Speedy Printing Centers in California, Hawaii and Nevada, as well as the company's planned expansion to eight other Pacific Rim countries. Speedy International-Asia is currently involved in similar negotiations in South Korea, Taiwan and Hong Kong, and is negotiating for the rights to expand the franchise to Europe.

#90130b0292 05/10/1990 ~Business Wire

HOUSTON (MAY 10) BUSINESS WIRE - Service Corporation International (SCI) (NYSE:SRV) announced Thursday the execution of a definitive agreement for the sale of its insurance company, Family Service Life Insurance Co.

The agreement calls for SCI to sell the company to Liberty National Life Insurance Co., a wholly owned subsidiary of Torchmark Corp., for $165,100,000 less dividends received by SCI in 1990. SCI expects the closing to occur upon attainment of the necessary regulatory and governmental approvals.

In announcing the sale of Family Service Life Insurance Co. today, SCI's chairman, R. L. Waltrip, noted that the sale gives effect to the previously announced decision of SCI's board of directors last November to discontinue the company's prearranged funeral funding operations.

This decision was made by the board as part of the company's strategy to focus on its three core businesses: funeral homes, cemeteries and Provident Services Inc., a wholly owned subsidiary of SCI that provides financing to independent funeral homes and cemeteries.

Waltrip emphasized that SCI anticipates a continuing relationship with Torchmark Corp. under which Torchmark companies will provide insurance policies for the funding of prearranged funeral contracts at SCI's funeral homes.

SCI is the largest funeral home and cemetary company in North America. The company owns 549 funeral homes and 126 cemetaries in the United States and Canada. At Mar. 31, 1990, the company's assets exceeded $1.6 billion. Torchmark Corp. is a financial services and insurance holding company headquartered in Birmingham, Ala.

Merrill Lynch Capital Markets acted as financial advisor to SCI.

#90130b0298 05/10/1990 ~Business Wire

SEATTLE (MAY 10) BUSINESS WIRE - Olympic Savings Bank (NASDAQ:OSBW) reported Thursday that increased retail banking fees and higher loan servicing income helped the bank cut in half its 1990 first quarter loss, compared to a year ago.

For the quarter ended March 31, Olympic Savings reported a loss of $426,000, or $.32 per share, compared to a loss of $888,000, or $.67 per share, in the first quarter of 1989.

''We are near the completion of Olympic's two-year program to expand its retail branch network into 18 Safeway stores around Puget Sound. We believe Olympic's $3.3 million investment in supermarket branches has positioned Olympic Savings to take advantage of the consumer's desire for convenience and service that we believe will emerge as an increasingly important factor in the future of retail banking,'' said John W. Fuller, chairman.

Olympic said it will open one additional supermarket in-store branch this fall, completing its expansion program. Olympic Savings will then have 27 retail branch offices in Western Washington, of which 18 will be providing full service banking to its customers seven days a week.

Net interest income, after provisions for loan losses, totaled $481,000 in the first quarter compared to $506,000 in the like quarter a year ago. Deposits increased 20% to $201 million while loans increased 16% to $184

million compared to a year ago.

The Savings Bank's non-interest income in 1990's first quarter was $1,513,000 up from $449,000 in the first quarter of 1989. The increase was attributable to a $183,000 increase in loan servicing fees as the bank's portfolio of loans serviced for other investors increased to $558 million from $220 million a year ago, retail banking fees that increased to $211,000 in 1990's first quarter from $59,000 in the first quarter a year ago, and a $548,000 gain from the sale of loan servicing rights. Olympic also posted gains on the sale of securities, investments, and real estate owned (REO) during the quarter.

Fuller cited increased compensation, occupancy, data processing, and advertising expenses related to operating its expanding branch network as the principal reason non-interest expense increased by $380,0000 to $2.6 million in the first quarter of 1990 compared to $2.2 million in the like quarter a year ago.

Olympics' core deposits increased 51.9% to $177.9 million at March 31, 1990, compared to $117.1 million one year ago. Total assets at March 31, 1990, were $242.6 million compared to $210.6 million one year earlier. Shareholder equity at the end of the first quarter was $4.8 million and book value was $3.63 per share compared to $6.1 million and $4.56 respectively at March 31, 1989.

Headquartered in Seattle, Olympic Savings Bank presently has 17 in-store branches and 9 free-standing branches located primarily in the Puget Sound area of Western Washington. Olympic's capital restoration plan was approved by the Office of Thrift Supervision in April.

MILPITAS, CA (MAY 10) BUSINESS WIRE - System Industries Inc. (ASE:SYI) Thursday announced the second consecutive profitable quarter as part of the restructuring and turn-around of the company which began approximately one year ago.

The company reported revenues of $23,357,000 for the third quarter of fiscal 1990 ended April 21, an 8.6 percent decrease compared to the $25,549,000 posted in the second quarter of fiscal 1990. A net profit of $201,000, or 4 cents per share, primary and fully diluted, was recorded in the third quarter, compared to a net profit in the second quarter of $276,000, or 5 cents per share, primary and fully diluted.

Compared to the third quarter of fiscal 1989, revenues declined from $25,202,000 to $23,357,000 in the third quarter of fiscal year 1990.

However, the company posted net income of $201,000, or 4 cents per share, primary and fully diluted, in the third quarter of fiscal 1990, a

substantial improvement over the net loss of $25.9 million, or $4.96 per share, primary and fully diluted, including a loss from discontinued operations of $11.1 million, or $2.12 per share primary and fully diluted, and a charge of $12.0 million related to the company's restructuring, recorded in the third quarter of fiscal 1989.

Total revenues for the first nine months of fiscal 1990, ended April 21, were reported at $72,764,000 compared to $78,216,000 for the first nine months of fiscal 1989.

The company reported a net loss for the first nine months of fiscal 1990 of $228,000, or 4 cents per share, primary and fully diluted, compared to a net loss of $31,132,000, or $6.02 per share, primary and fully diluted, for the comparable period of fiscal 1989.

These drives provide 557 megabytes and 1.1 gigabytes of storage capacity respectively and are the lowest cost data storage subsystems the company has ever offered. Also in the last quarter, the company introduced the SI817 C-Series which provides 1.748 gigabytes of formatted capacity in an 8-inch package.

Founded in 1968, System Industries provides innovative data storage subsystems integrated with comprehensive supporting services for the DEC operating environment. System Industries' corporate headquarters are located in Milpitas.

SANTA CLARA, CA (MAY 10) BUSINESS WIRE - Rational Thursday announced it has elected Allison R. Schleicher, IBM Corp.'s assistant general manager, Finance and Planning, Technology Products Line of Business, to its board of directors.

In January, Rational and IBM jointly announced that IBM has acquired an equity interest in Rational.

In his current position at IBM in Somers, N.Y., Schleicher is responsible for managing the planning and measurement activities of IBM's

semiconductor and packaging technologies.

An employee of IBM since 1967, he has held a variety of financial management positions, including corporate director of Finance and Planning, director of Financial Services, vice president of IBM Credit Corp., and director of Financial Analysis for the corporate controller's staff.

Schleicher received a bachelor's of science degree in mechanical engineering from Purdue University and attended the MBA program at Lehigh University before joining IBM.

Along with Devlin and Schleicher, other members of Rational's board include Larry E. Druffel, director of the Software Engineering Institute at Carnegie Mellon University, Richard F. Hartung, vice president of Information Services at Lockheed Missiles and Space Company Inc., Paul D. Levy, co-founder and president of Rational, and Arthur Rock, principal of Arthur Rock & Co.

Rational offers software engineering products and services for the development of Ada software systems. The Rational Environment is a comprehensive integrated environment which is being successfully used in the development of major Ada programs. In February, Rational and IBM announced the integration of the Rational Environment with IBM's new RISC System/6000 and the AIX Ada/6000 environment.

Rational's customers are among the largest defense, aerospace and commercial companies in the United States, Europe and the Asia-Pacific region. The company has headquarters in Santa Clara, and has sales and support operations throughout the United States, Europe and the Asia-Pacific region.

SACRAMENTO, CA (MAY 10) BUSINESS WIRE - Unify Corp., a leader in Unix application development tools, Thursday announced it will host a comprehensive conference on Open Systems specifically aimed at database application developers.

The Open Systems Application Development Conference will be held Sept. 9 through Sept. 12, at the San Jose Convention Center.

The conference will feature experts from Unify, AT&T, IBM, Sun Microsystems, Apple, Oracle, Informix, SCO, Sybase and many other leading Unix Open Systems companies.

Specifically, the program for the Open Systems Application Development Conference features technical sessions, issue briefing, technology tutorials and exhibits.

Unify is sponsoring this conference in large part because the company is recognized as a leader in open systems solutions by some of the nation's largest users.

In specific, Unify's ACCELL/SQL application development system is the industry's only 4GL development toolset to support all leading Unix database engines, including: Informix, ORACLE, SCO Integra and Sybase. Moreover, ACCELL/SQL is the only 4GL development package to provide native support for many popular end-user interfaces, including Microsoft Windows, and new graphical user interfaces such as Open Look and Motif.

For more information on the Open Systems Application Development Conference, contact Unify's special Conference Hot-Line by dialing 1-800/24-UNIFY. Non-U.S. callers should call 1-415/637-2330 or fax 1-415/550-8556 to register only.

Unify Corp. is a leading manufacturer of Unix-based application development software tools. Based in Sacramento, Unify employs 260 people in 19 offices across the United States, Europe and Japan.

In 1988, Unify's ACCELL/SQL was chosen by the U.S. Air Force as the foundation software technology for its $1 billion worldwide conversion project -- the Standard Multi-User Small Computer Requirements Contract (formerly AFCAC-251) awarded to AT&T.

EL MONTE, CA (MAY 9) BUSINESS WIRE - Marshall Industries (NYSE:MI) was recently awarded multiple accolades from Computer Products Inc. maker of power supplies for electronics applications.

Computer Products named Marshall fastest growing distributor for 1989 with the Outstanding Performance Award and as their overall 1989 Top Distributor winner with the Computer Products Award of Excellence.

Marshall received the Outstanding Performance Award for the greatest

increase in sales, posting a gain of $1.6 million over their 1988 performance and besting the nearest competitor by the same amount. The Award of Excellence for Top Distributor was awarded on the basis of total product shipped.

Kim Bickmeier, corporate product manager at Marshall for Computer Products attributed their success to long-range planning combined with an emphasis on present customer needs. ''Our success in 1989 was due to our commitment to stocking what our customers need and from servicing our customers at the local division level.

''At Marshall, we have a commitment to supply our customers with the stock they need and look forward to continued growth in 1990 with the Computer Products line,'' she added.

Marshall Industries, listed on the New York Stock Exchange, supplies and services the electronics industry through a network of industrial electronic distribution centers located throughout the United States and Canada. Marshall's products include electronic components; integrated circuits; connectors; memory and computer products; electronic production supplies and hand tools and electronic assembly equipment.

SAN FRANCISCO (MAY 10) BUSINESS WIRE - As recounted in the press recently, California Energy Co.'s (ASE:CE)(PSE:CE) principal joint venture partner served the company with a demand for arbitration arising out of disagreements over its capacity as operator, the operating budgets and the allocation to the joint venture, of which the company is a 50 percent owner, of certain expenses incurred by the company.

''California Energy Co. categorically denies these assertions and is vigorously defending its position,'' said Charles T. Condy, chairman and chief executive officer. ''Moreover, the company's petition for a stay in the arbitration proceeding was granted May 8th by the New York State Supreme Court.

''The order was made upon evidence that its partner had failed to meet certain conditions prerequisite to filing the arbitration demand. A proceeding to discuss whether the stay should be maintained or vacated has been scheduled,'' added Condy.

California Energy Co. regards the assertions contained in the demand to be completely without merit. Additionally, all of the issues raised in the

demand for arbitration with respect to cost reimbursement and operating budgets through 1989, have been the subject of lengthy review and discussion with the joint venture partner.

The company has consistently acted in good faith throughout all such deliberations. In fact, it is the company's understanding that in mid-1989, and subsequently, there were agreements on these matters with its partner.

In each case the partner rescinded its previous approval based on demands that the company file amended tax returns for one of the Coso Joint Ventures, thereby increasing the partner's, and decreasing the company's, share of the joint venturers' tax benefits.

The company will abide by the rules of confidentiality that govern arbitration proceedings. As such, it will make no further statements on the matter unless or until a material event takes place.

California Energy Company Inc. is the managing partner, project manager and field operator of the $625 million, 240 megawatt Coso Geothermal Joint Venture located in Inyo County, Calif., and has served in these capacities since the project's inception. The company has also served as plant operator for the facility since August 1988.

California Energy is the leading independent developer of geothermal resources in the United States. In addition, the company is a wholesaler of electricity in Southern California, and controls more than 470,000 acres of geothermal prospect land in Northern California, Oregon and Washington.

For the year ended Dec. 31, 1989, the company earned $10.3 million on revenues of $47.9 million.

JOPPA, MD (MAY 10) BUSINESS WIRE - Merry-Go-Round Enterprises Inc. (NYSE: MGR), Thursday announced that sales for the four week period ending May 5, increased approximately 61 percent to $40.3 million from $25 million in the corresponding period in April 1989. Same store sales for April 1990 increased 54 percent.

Sales for the thirteen week period ending May 5, increased approximately 63 percent to $120.5 million from $73.9 million in the corresponding thirteen week period a year ago. Same store sales for the thirteen week period increased approximately 42 percent.

Michael D. Sullivan, president and chief executive officer, commented, ''We are very pleased with our sales performance for the first quarter of fiscal 1991, especially when compared with our same store sales increase of 27 percent a year ago.'' Merry-Go-Round Enterprises Inc., is a leading retail specialty clothing chain selling contemporary fashions for young men and women in over 600 retail stores in 37 states.

#90130b0633 05/10/1990 ~Business Wire

NEW YORK (MAY 10) BUSINESS WIRE - Viacom Inc. (AMEX: VIA) reported increased revenues and increased segment earnings from operations for the first quarter of 1990 versus the same period last year in an announcement Thursday by Sumner M. Redstone, Chairman of the Board, and Frank J. Biondi, Jr., President and Chief Executive Officer. The Company also announced that its banks have increased Viacom's line of credit by $200 million to $1.7 billion.

- Revenues increase 15 percent in the first quarter reflecting

strong performances by each operating segment.
- Segment earnings from operations increase 28 percent over the first quarter of 1989.
- MTV Networks expands domestically and internationally through the launch of HA! The TV Comedy Network and the acquisition of an additional equity interest in MTV Europe.
- Entertainment reported strong results of operations driven by increased production and syndication revenues.
- Banks increase Viacom's credit line from $1.5 to $1.7 billion.

For the first quarter of 1990, revenues were $393.2 million versus $341.1 million in the first quarter of 1989, and segment earnings from operations were $65.9 million versus $51.6 million for the first quarter of 1989. Excluding the result of operations of entities which have been acquired or divested by Viacom since January 1, 1989, revenues increased 18 percent and segment earnings increased 35 percent over the first quarter of 1989 (see Business Segment Information).

Consolidated earnings from operations of $57.4 million for the first quarter of 1990 increased 111 percent over consolidated earnings from operations of $27.2 million for the first quarter of 1989, driven by the strong performances of the operating segments and by a decrease in the expense associated with the long-term deferred incentive compensation plan.

Showtime Networks Inc. reported a loss from operations of $2.4 million, which compares favorably to a loss from operations of $10.3 million for the first quarter of the prior year. Showtime revenues increased 9 percent over revenues for the first quarter of 1989 primarily due to customer growth. Showtime Networks Inc. served approximately 10,332,000 customers at March 31, 1990, an increase of approximately 332,000 customers over customers at March 31, 1989.

Viacom International Inc. is a diversified communications and entertainment company with headquarters in New York City. Viacom Inc., the holding company parent of Viacom International Inc., is an approximately 84 percent owned subsidiary of National Amusements, Inc., a closely-held corporation which owns and operates approximately 625 movie screens in 14 states and England.

BLUE BELL, PA (MAY 10) BUSINESS WIRE - U.S. Bioscience Inc. (AMEX:UBS) Thursday reported revenues of $256,307 and a net loss of $1,680,641, or 11 cents per share, for its first quarter ended March 31.

The 1990 results compare to a loss of $1,196,854, or 12 cents per share, on revenues of $41,306 for the like period of the prior year.

According to Philip S. Schein, M.D., president and chief executive officer the first quarter 1990 results of operations were consistent with management's expectations and reflect the company's expanded research and product development programs.

U.S. Bioscience is a development-stage pharmaceutical company focused on drugs and therapies to increase the survival rate and productivity of cancer patients. The company has seven drugs in development, including two in Phase III clinical trials, the final stage of development, and has submitted its first new drug application (NDA) to the U.S. Food and Drug Administration.

In February 1990, U.S. Bioscience completed a public offering of 4.6 million shares of its common stock (4,025,000 shares were sold by the company and 575,000 shares were sold by two selling shareholders). The company realized net proceeds of approximately $33 million, of which approximately $3.3 million was used to reduce long-term debt.

DALLAS (MAY 10) BUSINESS WIRE - Hallwood Energy Partners L.P. (AMEX:HEP) announced Thursday that it has completed its previously announced Merger and Exchange Offer, pursuant to which it has acquired Energy Development Partners Ltd., and the assets of Hutton/Apache 1982 Energy Income Fund Ltd. and Hutton/Apache Energy Income Fund II and interests that were tendered in 16 other oil and gas limited partnerships.

Hallwood Energy Partners has also completed a one-for-20 reverse split of its Units. Hallwood Energy Partners now has a total of 8,541,906 outstanding publicly traded Units. The reverse split will be effective and the new Units will begin trading on the American Stock Exchange on a when-issued basis on Thursday, May 10.

Information regarding the delivery of certificates representing the reverse split and newly issued Units will be sent to all partners within one week.

After completing the transaction, Hallwood Energy Partners has, at Dec. 31 1989 on a pro forma basis, total assets of approximately $240 million, subject to long-term debt of approximately $60 million, and proved oil and gas reserves of approximately 9.8 million barrels of oil and 142 bcf of gas, including indirect interests.

In addition, Hallwood Energy Partners is continuing to serve as general partner and to operate its remaining affiliated partnerships, including Quinoco Consolidated Partners L.P., which have total assets at Dec. 31, 1989, of $136 million, of which approximately $50 million is included in Hallwood Energy Partners' $240 million total assets.

Hallwood Energy Partners also announced that it or its affiliates may repurchase its outstanding Units in the open market or in private transactions. The purchases have been authorized because Hallwood Energy Partners believes that, depending on the market price of the Units, the purchases represent prudent investments by Hallwood Energy Partners and its affiliates.

Hallwood Energy Partners' principal objectives are to continue to pay stable quarterly cash distributions and to expand its reserve base through additional acquisitions and drilling.

#90130b0663 05/10/1990 ~Business Wire

MIAMI (MAY 10) BUSINESS WIRE - General Development Corp. (NYSE:GDV) Thursday announced that it presently expects to report a substantial 1989 fourth quarter net loss, which is likely to exceed $80 million.

A spokesman for the company stated that the loss will result from the booking of substantial adjustments in the 1989 year-end financial statements relating to the company's recent suspensions of major lines of business and its recent legal difficulties and bankruptcy filing.

The spokesman emphasized that the estimated 1989 fourth quarter results were preliminary and that the reported loss could go higher. The company is not able to determine when it will be in a position to release its audited 1989 year-end financial statements or reports. The company has now deferred its annual meeting until Sept. 28.

In an update on its bankruptcy proceedings, the company Thursday also reported that it has been in discussions with its existing debtor-in-possession (DIP) lenders and a number of other persons regarding the possible extension or refinancing of the company's current $10.5 million (DIP) loan, which was approved by the Bankruptcy Court on April 16 and is scheduled to mature June 1.

To date, the company has received substantial proposals for new financing from several of such other parties, each of whom has also proposed to assist in a restructuring and recapitalization of the company with a view to developing a plan of reorganization acceptable to the company's creditors and the Bankruptcy Court.

The company spokesman noted that a key element in such discussions and the company's ability to reorganize was the time within which the company could formulate a ''homesite exchange plan'' providing for the delivery of a fully developed homesite to each purchaser completing his payments.

Pending the implementation of such a plan, the company has experienced a significant decline in the collection of its homesite contracts receivable.

The spokesman repeated the company's previously stated position that the development of such a plan was a matter of the greatest importance, and stated that management was making every effort to have such a plan completed, approved and offered to the company's customers in the shortest possible time.

MINNEAPOLIS (MAY 10) BUSINESS WIRE - Dayton Hudson Corporation today reported that its net retail sales for the four weeks ended May 5, 1990 increased 11.7 percent to $947 million from $847 million a year ago.

Comparable-store sales were up 5.5 percent from the same period a year ago.

Kenneth A. Macke, chairman and chief executive officer, said the Corporation was pleased with the sales increases for the month at each of its operating companies. ''We are very satisfied with the mature store increases in all our companies. We continue to be on track for solid performance for the quarter and the year.

''Given the Easter shift this year, it's also meaningful to look at the results for March and April combined,'' Macke said. ''Total sales for the two-month period were up 13.5 percent and comparable-store sales were up 7.0 percent.''

Macke said that inventories in all companies are ''in great shape for the beginning of second quarter.''

April sales by business segment for the four weeks were as follows:

o Target's total sales rose 15 percent while comparable-store sales were up 6 percent.

o Mervyn's total sales increased 7 percent and comparable-store sales increased 6 percent.

o Dayton Hudson Department Store Company's total and comparable-store sales were up 5 percent.

Sales for the 13 weeks ended May 5, 1990 were $2.95 billion, up 13.4 percent from $2.60 billion in the same period a year ago. Comparable-store sales for the 13 week period were up 6.8 percent compared to the same period last year.

As of May 5, 1990, Dayton Hudson operated 665 stores in 33 states.

CAMBRIDGE, MA (MAY 10) BUSINESS WIRE - Interleaf Inc. announced Thursday that Interleaf and Hewlett-Packard Co. will offer Interleaf electronic publishing software free of charge for a trial period with every Hewlett-Packard and Apollo workstation sold in Europe.

New and current HP and Apollo customers may use Interleaf software at no charge for three months. During that period, they may elect to purchase the software at a promotional price of approximately $1,000 U.S. -- 42 percent off the usual price in Europe.

Interleaf runs on HP 9000, model 340, 345, 360, 370 and 375 workstations, and Apollo DN 2500, DN 3000, DN 3500, DN 4000 and DN 4500 workstations.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. It has 94,000 employees and had revenues of $11.9 billion in its 1989 fiscal year.

Included in the Interleaf family of compatible products are software packages for creating text and graphics, for gathering data and putting it into professional form automatically, for managing the flow of information and documents, and for distributing documents on paper or electronically.

Interleaf's multi-lingual software automatically hyphenates and spell checks in 13 languages, and supports European paper sizes, keyboard layouts, and character sets. Founded in 1981, Interleaf began shipping publishing software in 1984. Interleaf has sales offices, subsidiaries and distributors worldwide and more than 35,000 licensed users.

#90130b0670 05/10/1990 ~Business Wire
COCONUT GROVE, FL (BUSINESS WIRE)-- WATSCO, Inc. 1/8ASE: WSOA 3/8 Thursday announced that its wholly-owned subsidiary, Dunhill Personnel System, Inc. based in Long Island, New York, signed a letter of intent to acquire Dunhill of Hawaii, a franchise office of the Company.

Dunhill of Hawaii, a leading provider of both temporary personnel and

permanent placement services in Hawaii, operated profitably on revenues of approximately $3,400,000 in 1989.

Under the terms of the agreement, Dunhill Personnel System will acquire 100 percent of the stock of Dunhill of Hawaii in exchange for WATSCO Class A Common Stock. The agreement also provides for the payment of additional WATSCO stock based on the earnings of Dunhill of Hawaii from 1990 to 1992. The agreement is subject to certain conditions, including the signing of a definitive agreement. The closing is expected to take place by August 1 1990.

Albert Nahmad, President of WATSCO, noted, ''With temporary personnel a $14 billion-a-year industry and approximately 95 percent of all American companies utilizing temporary help, Dunhill Personnel Systems, one of the largest and most prestigious firms in the industry, plays an integral role in WATSCO's overall strategy for growth. In the two years since we acquired Dunhill, we have substantially increased its profits through improved management and enhanced marketing programs. The acquisition of the Hawaii franchise will add to this profit growth.''

D.A. Coape-Arnold, Chairman of the Board of Dunhill Personnel, stated, ''We believe the Pacific Basin presents an excellent area of opportunity. Hawaii is an energetic and growing state with a distribution and service-oriented economy in large part insulated from the cyclical downturns prevalent in a manufacturing environment. Additionally, over the past 15 years, the owners of Dunhill of Hawaii have established a dominant position in the market and will remain at the helm for the next several years.

Dunhill Personnel Systems, Inc. has been in the employment services business for over 35 years. Headquartered in Long Island, New York, Dunhill operates throughout the United States and Canada in the permanent and temporary employment services industry through a highly regarded network of 260 franchised and 18 company-owned offices. The combined revenues of the two segments exceed $95,000,000.

Watsco also participates in the air conditioning and heating industry through various manufacturing and distribution subsidiaries. The Company's Class A and Class B Common Stock and Convertible Debentures are traded on the American Stock Exchange under the symbols WSOA, WSOB and WSOC.A, respectively.

IRVINE, CA (MAY 10) BUSINESS WIRE - AST Research Inc. Thursday announced its first direct sale of personal computers to the Soviet Union through a ComputerLand franchise.

The personal-computer purchase involves 100 desktop systems based on Intel's 286 and 386 microprocessors. These systems include AST's Bravo/286 Premium/286 and Premium/386C models. The systems have been purchased by Gosplan, the state central planning agency, for applications such as economic forecasting and financial planning.

Opened in March, the ComputerLand franchise is the first retail chain store to sell Western personal-computer technology to the Soviets. In the past, AST has relied on distributors in Europe to sell AST's products to the Soviet Union and East Bloc countries. AST intends to continue using these distributors in addition to expanding its presence in the Soviet Union through more direct retail sales.

"This first direct sale through ComputerLand assists AST's strategic expansion into the Soviet marketplace," said Safi Qureshey, AST president and chief executive officer. "The purchase is particularly exciting for AST because the personal computers will assist the Soviets in the restructuring of their economy. "PCs are the most cost-effective means of automating government and business operations."

AST has been marketing and distributing its personal-computer systems in the Soviet Union for more than two years. In addition to ComputerLand, AST displays its personal computers in product demonstration centers located throughout the Soviet Union. These centers are designed to assist in the marketing and sales of American technology in the Soviet marketplace and to develop counter-trade opportunities.

In March, Qureshey attended Comtek '90, the first personal computer trade show ever held in the Soviet Union. AST joined more than 70 other U.S., European, and Asian companies in displaying the latest in computer technology. While in the Soviet Union, Qureshey met with various Soviet government and business leaders to discuss manufacturing and distribution joint-venture opportunities.

AST's marketing and sales effort in the Soviet Union is part of the company's overall program to build on its global presence in the PC marketplace. In April, AST unveiled the first dual-compatible personal computer for the Japanese marketplace. The AST Dual SX/16 can run software designed for the Japanese NEC 9801 standard as well as the thousands of MS-DOS programs available for industry standard architecture

(ISA)-compatible computers.

#90130b0678 05/10/1990 ~Business Wire

NEW YORK (MAY 10) BUSINESS WIRE - Overseas Shipholding Group, Inc. (OSG) Thursday reported that net income for the quarter ended March 31, 1990, was $13,135,000, or $.38 per share, compared to $13,067,000, or $.36 per share, for the first quarter of 1989. Gains from the disposal of vessels were $.01 for the 1989 period.

In the first quarter, the Company took delivery of a new 121,000 deadweight ton (dwt) dry bulk carrier, which immediately began a one-year charter. A sistership to this vessel is scheduled for delivery in the second half of 1990.

OSG also announced that it has contracted to sell one 93,000 dwt tanker for delivery in the second quarter, which will result in a substantial gain.

The Company is one of the world's largest bulk shipping companies, with an operating fleet of 68 vessels, aggregating 6.4 million dwt.

OVERSEAS SHIPHOLDING GROUP, INC. (NYSE)
Financial Highlights
Three Months Ended
March 31

	1990	1989
SChipping Revenues	$99,398,000	$73,741,000

#90130b0692 05/10/1990 ~Business Wire

BENTONVILLE, AR (MAY 10) BUSINESS WIRE - Wal-Mart Stores Inc. (NYSE/PSE:WMT), Thursday reported sales of $6,768,195,000 for the three months ended April 30, 1990, an increase of 26 percent over sales of $5,373,260,000 for the same period a year earlier.

Net income increased 28 percent to $253,443,000 for the three months from net income of $198,289,000 for the first quarter of last year. Net income per share increased to 45 cents in this year's quarter from 35 cents per share in the 1989 quarter.

The costing of inventories under the LIFO method reduced net income $12,600,000, or 2 cents per share, for the quarter this year, compared with $12,600,000, or 2 cents per share, for the same quarter last year.

At April 30, the company had 1,420 Wal-Mart stores (includes four Supercenters), 128 Sam's Wholesale clubs and four Hypermart USA units, compared with 1,279 Wal-Mart stores (includes one Supercenter), 106 Sam's, 14 dot Discount Drug stores and three Hypermart USA units at the same time last year.

Commenting on the company's performance, President and Chief Executive Officer David Glass said: ''We are pleased to report a first quarter sales and earnings result in excess of plan. A genuine dedication to 'exceed our customers expectations' by our associates combined with good expense control have provided us this excellent start.

''We recognize the numerous forecasts of a more difficult economic environment, but we believe we are well positioned to achieve our aggressive sales and earnings plan for the balance of the year.''

Wal-Mart operates stores in a 29 state area and its securities are listed on the New York and Pacific stock exchanges.

NEW YORK (MAY 10) BUSINESS WIRE - The president of Allegheny Power System Inc., (APS) told stockholders at their annual meeting Thursday there is ''little need for drastic new controls and virtually no benefits to offset economic dislocations and sacrifices'' that would result from proposed Clean Air legislation to reduce stack gas from coal-fired electric generating stations.

Klaus Bergman, citing the 10-year, $500 million, Congressionally mandated National Acid Precipitation Assessment Program (NAPAP) study said we are learning that the acid deposition problem is more emotional than real and present proposals to deal with it are unjustifiable and probably unnecessary.

He referred to statements by Dr. James Mahoney, director of the study, that indicated the only measurable benefit would be the neutralization of 26 acidified lakes in the northeast over 20 years if the proposed reductions in sulfur dioxide emissions were achieved.

This equals more than $50 million a year for each lake, according to Bergman, by using the Environmental Protection Agency's cost estimates of $4 billion a year for acid deposition reduction provisions.

If bills now in Congress become law, the president said, the most efficient means of compliance for APS will require investments of about $2 billion over the next 10 years for flue gas desulfurization equipment at two power stations and low nitrogen oxide burners at various stations.

The additional investment will require rate increases of varying annual amounts over the next 20 years, according to Bergman, with a maximum in any one year of 15 to 20 percent in addition to rate increases that may be required for other reasons.

He advocated sharing the cost of the proposed acid rain legislation nationwide rather than imposing it entirely on 13 industrial states that produce only about half of the emissions.

Management's slate of directors was elected by the stockholders. They also approved the appointment of Price Waterhouse as independent auditors for 1990.

The principal operating subsidiaries of Allegheny Power System are Monongahela Power Co., The Potomac Edison Co., and West Penn Power Co.

They serve about 1.3 million customers in a service area of 29,100 square miles in portions of Pennsylvania, West Virginia, Maryland, Virginia and Ohio.

MENTOR, OH (MAY 10) BUSINESS WIRE - RB&W Corp. (AMEX:RBW) Thursday announced a plant restructuring to increase its manufacturing capacity utilization and improve its future profitability.

Substantially all the production of its Cleveland plant will be transferred over the balance of the year to its Rock Falls, Ill. and Chicago facilities. First quarter '90 results include a $4.5 million charge to cover the cost of the plant closing. The charge is expected to significantly reduce the company's earnings for the year, which are being impacted by the soft automotive and truck markets.

John J. Lohrman, chairman and chief executive officer, said that the move was a part of the company's strategic program of continuing improvement in its manufacturing processes. The $10 million RB&W committed to capital improvements in 1989 will allow the company to reduce its overall manufacturing cost base and floor space with enhanced production and quality capabilities at lower total costs. Lohrman also stated that a substantial portion of the charge is for personnel related expenses for Cleveland plant employees.

Net sales in the first quarter '90 were $42.6 million vs. $48.5 million for last year from ongoing operations. (Total sales for last year's first quarter were $51.5 million, which included the company's Powdered Metal Products Division sold Aug. 21, 1989.) One the comparable basis, sales were down 12.2 percent. The decrease is attributable to weak automotive and truck markets, primarily affecting the company's manufacturing segment. Profits from normal operations were offset by the $4.5 million plant restructuring charge resulting in a net loss for the period of $4,472,000 or 88 cents per share as compared to first quarter '89 net income of $1,608,000 or 32 cents per share.

The company expects improved performance in the second quarter, which will continue to build in the second half.

RB&W Corp. is a leading industrial company engaged in the manufacture and distribution of cold formed parts. With more than 140 years of experience it is one of the oldest and largest companies in the metal forming industry.

ATLANTA (MAY 10) BUSINESS WIRE - Beginning May 12, both computer buffs and computer neophytes can get a hands-on look at the newest, most innovative and useful software and hardware available for personal computer users during ''Futurebytes,'' a new feature of CNN's weekly program FUTURE WATCH.

FUTURE WATCH airs Saturdays at 4:30 p.m. (ET) and again late Sunday evenings at 3:30 a.m., presenting viewers with the compelling issues and major challenges of the 21st century.

''If computers are to be an integral part of our daily lives in the 21st century, we want our CNN viewers to better understand and be better able to use that technology,'' said ''Futurebytes'' and CNN National Correspondent Tom Mintier, a self-described computer buff.

''With the color and sound effects of the television medium, we're giving viewers a chance to see what's behind the plastic wrapper before buying the software.''

''Futurebytes'' is the only such feature on network television aimed at the mainstream viewer. Each ''Futurebytes'' will survey PC software and hardware with various purposes, from educational to word processing and

telecommunications. The first feature takes a look at ''Eye Relief,'' a word processing program for people who are visually impaired or tired of the eye strain from working behind a computer.

The second ''Futurebytes,'' on May 19, features ''PC Globe'' and ''PC Nation,'' two database programs that house a wealth of information on 177 countries, including maps of each country. The program even plays the country's national anthem.

''Futurebytes'' is produced by Henry Schuster, executive producer of FUTURE WATCH. He invites both large and small software producers to send examples of their products for review.

LIVINGSTON, NJ (MAY 10) BUSINESS WIRE - An experimental "smart" calling card that offers advanced features like speed dialing, phone number storage, and office-type extension dialing is being tested with some public pay phone users at several high-traffic locations in nine states and the district of Columbia.

Several hundred customers of both BellSouth and Bell Atlantic are participating in the Bellcore-coordinated trial, which is testing a microchip -based smart card that stores up to 50 telephone numbers for one-or two-digit speed dialing purposes. Six of Bellcore's owner companies are jointly sponsoring the trial.

"Ultimately, we think smart cards will unlock an array of services, giving travelers the same conveniences at pay phones that they have at home and in the office," said Miriam L. Hernandez, manager of public access for Bellcore.

Hernandez said along with speed dialing, the cards enable test users to reach other selected numbers or office extensions by simply dialing the last four digits of the person's number from specially adapted trial pay phones.

In addition, participants in the trial will be able to select their own security codes (to unlock services), and to charge calls to one or two

existing accounts. This allows a cardholder the option of billing certain calls to either their office or home account, using a single card.

During the trial, the cards can be used with pay telephones that have been specially equipped with experimental electronic devices to read the card's microchip. Participants select services by following the prompts given on a video display at the top of pay stations used in the trial, which also continue to accept coins and magnetic strip cards. Participants also can modify some of the card's features at any pay station adapted for the trial, Hernandez said.

Bellcore, in conjunction with the operating telephone companies of BellSouth and Bell Atlantic, will gauge customer reaction to the features being tested and the processes by which the card is used, as well as how comfortable people are in using their card. Tracking of trial usage data began in April.

"We need to ensure that new services are user friendly; people don't want to go through a complicated procedure to make any kind of call at a pay phone," Hernandez said.

In BellSouth territory, the specially equipped stations have been installed in Fort Lauderdale and Miami, Atlanta, Birmingham, Ala.; Columbia, S.C.; New Orleans, and Memphis, Tenn.

In Bell Atlantic territory, the trial is underway in Washington, Philadelphia, and Newark, N.J. The trial is expected to run for six to eight months. Customers of the two companies are testing the cards at more than 200 pay phones located at 11 airports or railway stations.

CINCINNATI (MAY 10) BUSINESS WIRE - Manhattan National Corp. (NYSE:MLC) Thursday announced first quarter 1990 financial results for the Cincinnati based insurance, investment and pension services holding company.

First quarter consolidated net loss was $465,000, or 6 cents per share, compared with a loss of $234,000 or 3 cents per share, for the first quarter of 1989.

Results for the first quarter 1990 included nonrecurring charges aggregating $1,040,000 on an after tax basis comprised primarily of transition costs and tax expense connected with the sale of Manhattan National Life Insurance Co.

Total revenue for the quarter ended March 31, was $23,966,000, compared with $35,649,000 for the same period a year earlier. Insurance revenues were $9,138,000, a $4,667,000 decrease from the same period a year ago.

First quarter 1990 net investment income declined $7,113,000 from the 1989 first quarter's $19,837,000. These declines were primarily due to the Jan. 4, sale of Manhattan National Life Insurance Co. whose revenues were included on a consolidated basis in prior year results, but not in those of the current year.

Total assets of Manhattan National Corp. declined to $624,349,000 as of March 31, from $682,668,000 on Dec. 31, 1989 due to the scheduled run-off of guaranteed investment contracts and purchase of shares under a recently concluded self tender offer.

While shareholders' equity decreased $16,271,000 to $61,286,000 from Dec. 31, 1989, during the first quarter of 1990 shareholders' equity on a per share basis increased 49 cents to $9.65 per share. This unusual result follows from the company's purchase of 2,078,759 shares for $7.25 per share through a ''Dutch Auction'' self tender offer during the first quarter.

Commenting on financial results, Larry R. Pike, chairman of the board, president and CEO of Manhattan National Corp. stated, ''The sale of the company's stock life subsidiary in January, 1990 has permitted our management team to turn its complete attention to the development of a new business plan for our remaining businesses. Particular attention is being focused upon our principal subsidiary, Manhattan Life Insurance Company, and we expect to see continued improved performance in this 140 year-old, financially strong company in the coming months.''

In other action, Manhattan National Corp. shareholders re-elected Oliver Birckhead, James Breen, Gordon Hughes, James McIlhenny, Raymond Miller, Larry Pike, Arnold Price, Harry Rossi, Ashley Ward, Wilmot Wheeler and John White as directors for a term of one year.

On May 9, 1990, Daniel J. Fischer was elected to the board of directors of The Manhattan Life Insurance Co., Manhattan National Corporation's principal subsidiary.

Fischer serves as president and chief operating officer of The Manhattan Life Insurance Co.

SAN FRANCISCO (MAY 10) BUSINESS WIRE - Transamerica Corp.'s Chairman and Chief Executive Officer James R. Harvey, Thursday announced that Christopher M. McLain has been elected senior vice president and general counsel for Transamerica Corp.

McLain will join the company at its Pyramid headquarters on May 14th.

McLain is currently a partner in the San Francisco office of the national law firm of Sonnenschein Nath & Rosenthal, having joined that firm in 1989 to start its corporate practice. He was previously vice president, secretary and general counsel for Lucky Stores for nearly six years, and served on that company's General Management Committee.

While with the Sonnenschein firm, McLain continued to serve as Lucky Stores' outside general counsel. Prior to joining Lucky Stores in 1983, McLain was a partner in the Oakland, Calif., law firm of Donahue, Gallagher, Thomas & Woods.

A native of San Diego, Calif., McLain holds a B.S. in Business Administration, with a major in Accounting, from the University of California at Berkeley, and a J.D. degree from U.C. Berkeley's Boalt Hall School of Law. McLain, his wife, Barbara, and their three children, reside in Orinda, Calif.

Commenting on McLain's election, Harvey stated: ''Chris McLain will bring a strong corporate and securities law background to our senior management team as Transamerica continues its evolution in the 1990s into America's premier provider of specialized financial and insurance services.''

WORCESTER, MA (MAY 10) BUSINESS WIRE - The Interlake Corp. and Wyman-Gordon Company today announced the signing of a definitive agreement between Arwood Corp. and a subsidiary of Wyman-Gordon for the sale of Arwood's investment casting business.

Arwood Corp. is a wholly-owned subsidiary of Interlake. The transaction is subject to the satisfaction of certain conditions and is expected to be completed in the second quarter.

James S. Walsh, chairman and chief executive officer of Wyman-Gordon, said that this acquisition will substantially increase Wyman-Gordon's position in the investment casting industry. ''Arwood's capabilities are an excellent complement to those of Precision Founders Inc., a California-based investment casting firm we acquired in 1988.

''Together, they represent a major growth and profit opportunity for us over the next several years,'' he said.

Frederick C. Langenberg, Interlake's chairman and chief executive officer, said the sale is an important addition to other actions being taken as a part of Interlake's 1989 restructuring program. He also noted that the proceeds will be used to prepay bank debt and reduce future interest payments.

The agreement also provides that Wyman-Gordon will offer employment to all of Arwood's current employees. They number approximately 1,300 at five domestic locations. Wyman-Gordon and its subsidiaries currently employ approximately 3,000 in nine plants in the U.S.

Wyman-Gordon, with 1989 sales of $371 million, is a leading producer of high quality, technically-advanced forgings, high integrity investment castings and composite structures, primarily serving the transportation and defense equipment markets.

Arwood, with 1989 sales of about $89 million, investment casts precision components primarily for aerospace applications. Headquartered in Rockleigh, N.J., the company has manufacturing facilities in Groton, Conn;

Tilton and Franklin, N.H.; and Cleveland, Ohio. A small investment casting plant in Santa Fe Springs, Calif., will be closed about Sept. 1, 1990.

The Interlake Corp. is a diversified multinational company operating in two business areas -- engineered materials, including aerospace components and handling/packaging systems. Sales in 1989 were $912.9 million.

TOLEDO, OH (MAY 10) BUSINESS WIRE - AP Industries Inc. announced Thursday that it incurred a loss of approximately $47 million for the year ended Dec. 31, 1989, as compared to a loss of approximately $17 million for the year ended Dec. 31, 1988.

Of the $47 million loss in 1989, approximately $33 million is attributable to losses of Nytronics Inc. and H.H.R. Food Industries Inc., which are shown as discontinued operations.

Losses attributable solely to the sale of discontinued operations were previously estimated to be approximately $27 million on a pro forma basis as at Sept. 30, 1989, as reported in AP Industries' Prospectus and Solicitation of Consents, dated Feb. 8, 1990, contained in its Registration Statement on Form S-4.

Of the $14 million balance of 1989 loss, approximately $4.3 million is attributable to restructuring costs written off in the fourth quarter of 1989, approximately $8.4 million is attributable to losses from continuing operations for the nine months ended Sept. 30, 1989, and approximately $3.5 million is attributable to losses from continuing operations for the fourth quarter of 1989 (of which approixmately $2.8 million is attributable to interest on AP Industries' 12-3/8 percent Subordinated Debentures), offset by approximately $2.7 million of extraordinary gains in the first quarter of 1989.

For further information, contact AP Industries' information agent, The

Carger Organization Inc., 237 Park Avenue, New York, New York 10017, (212) 883-8900 (call collect) or (800) 365-5500.

LYNBROOK, NY (MAY 10) BUSINESS WIRE - Martin J. Simon, chairman and president of First Central Financial Corp. (AMEX:FCC), announced Thursday that the insurance holding company achieved another profitable quarter for the three month period ended March 31.

The company, whose wholly owned subsidiary First Central Insurance Co. writes property and casualty insurance, reported that written premiums for the first quarter of 1990 were $6,886,000 compared to $5,019,000 for the first quarter of 1989.

Earned premiums were $6,558,000 compared to $4,502,000 in the comparable 1989 period. Net income for the three month period ended March 31, was $694,156, or 12 cents per share, compared to net income of $732,000, or 12 cents per share, for the first quarter of 1989. The weighed average number of shares outstanding was 5,784,259 in the first quarter of 1990 vs. 6,037,059 in the comparable 1989 period.

While written premiums increased, acquisition and other expenses also increased, accounting for the modest change in the net income for the period ended March 31, compared to the similar period of 1989.

The increases in net premiums written and earned in the first 1990 quarter Chairman Simon said, reflect the high levels of insurance being written and the insurance company's expansion as well as the continuing high level of earned premiums retained as reinsurance ceded decreases.

''In the year 1989, our written premiums increased by approximately $5 million, and from all the indications in the initial months, a similar increase in 1990 seems evident,'' Simon said.

First Central Financial Corp.'s insurance company, which focuses on property and casualty insurance needs of small and mid-sized businesses, is rated A (Excellent) for its financial soundness and operating performance by A.M. Best & Co., a leading insurance industry rating organization.

CAMBRIDGE, MA (MAY 10) BUSINESS WIRE - American Science and Engineering Inc. announced Thursday that it has implemented a number of cost-reduction measures.

Included in these cost reductions is a reduction in work force of approximately 10 percent and a substantial salary reduction for Martin Annis, president of AS&E, and a reduction for other officers of the company. The cost reduction is in excess of $1,000,000, annually.

Separately, the company also announced that a Technology License Agreement between AS&E and Toshiba Corp. has now been signed by both parties. Under the agreement, Toshiba receives exclusive rights to manufacture, market and service AS&E's advanced Model 101 line of MICRO-DOSE Security X-ray Inspection Systems in Japan and certain other countries on the western Pacific Rim.

Under the agreement, AS&E will receive substantial payments during the first year, as well as royalties on all Model 101 Systems sold by Toshiba. The companies will cooperate in worldwide sales efforts. The agreement will become effective upon U.S. Government approval.

NEW ORLEANS (MAY 10) BUSINESS WIRE - Hibernia Corp. (NYSE:HIB) announced Thursday that Hibernia National Bank in Texas has assumed all of the approximately $26 million in deposits and obtained the right to acquire certain assets of First National Bank in De Soto, located in De Soto, Texas, 15 miles south of Dallas.

Customers of the former First National Bank in De Soto will experience no interruption in service as their accounts are automatically serviced by Hibernia, and they may continue to use their checks and make deposits in the same manner as before.

First National Bank in De Soto, with two branches located at 911 North Hampton Road and Interstate 35 at Pleasant Run Road in De Soto, was closed by the Office of the Comptroller of the Currency at 3 p.m. today and will reopen as Hibernia National Bank in Texas, Friday morning.

Hibernia first entered the Texas market in August 1989 and since that time has acquired 14 banks and savings and loans (S&Ls) in Texas. Deposits of

Hibernia National Bank in Texas total approximately $600 million. It operates 26 locations in Texas with this acquisition.

The common stock of Hibernia Corp., the parent company of Hibernia National Bank in Texas, is traded on the New York Stock Exchange under the ticker symbol HIB. At March 31, 1990, Hibernia Corp. had 27.3 million shares outstanding.

#90130d0020 05/10/1990 ~French/German News Agency

TOKYO (MAY 10) - The Tokyo Stock Exchange Thursday decided to cut brokerage commissions by an average 7.05 percent to encourage trading by individual investors and appease criticism against its high charges.

The decision, made by the exchange's membership committee and subject to formal approval by its board on Tuesday, will take effect on June 4, bourse officials said.

They said the cuts would be smaller than an average reduction of 9.1 per cent enforced in 1986 and that of 9.8 percent in 1987.

It is because the more than 20 percent decline in Tokyo share prices this year had shrunk profits of brokerage houses here, the officials said.

The exchange authority had considered the rate cuts since January to allay criticism against excessive profits earned by brokerage houses before the big plunge in share prices, the officials said.

It also hopes to appease demands at home and abroad for liberalization of brokerage commissions and maintain the current system of fixed rates, the officials said.

There are 11 brackets for commissions charged on stock transactions here.

For the smallest lot of transactions, worth one million yen (6,400 dollars) or less each, the commission will be lowered from 1.2 percent to 1.15 percent.

The commission will be cut from 0.15 percent to 0.075 percent on the largest-lot category of transactions, worth more than one billion yen (6.4 million dollars) or more each.

WEST BERLIN (MAY 10) - The West German national airline Deutsche Lufthansa has officially requested permission to obtain a 25 percent share of the East German carrier Interflug, the Federal Cartel Office disclosed here Thursday.

A spokesman said that initially, the newly-established East German Office for Competition in East Berlin is responsible for studying the merger plan.

The Cartel Office's responsibility will be to study what effects the proposed fusion would have on the competitive situation in the West German air passenger market, the spokesman said.

Interflug is now owned by the East German Trust Authority for state property and will be the eventual decision-maker on selling any part of the East German airline, the Cartel Office noted.

SEOUL (MAY 10) - Thousands of students battled a massive riot police force as demonstrators took to the streets throughout South Korea for the second consecutive night Thursday to denounce the regime of President Roh Tae-Woo as undemocratic.

In Seoul near the university, police fired tear gas into a crowd of about 2,000 students who responded with firebombs and bricks pried from the sidewalks in an hour-long clash, witnesses said.

Students and dissidents also demonstrated around Seoul's Myondong Cathedral, but a heavy contingent of riot police foiled their attempts to fan out into nearby areas.

Thousands of riot police were deployed all day throughout the capital and provincial cities as the country braced for more of the violent anti-government demonstrations which took place the previous night.

Dissidents and students had vowed to repeat Wednesday's protests, which according to official figures drew more than 80,000 people nationwide in a remarkable outpouring of protest against Mr. Roh and his ruling Democratic Liberal Party (DLP).

The demonstrations are the biggest since a wave of protests led Mr. Roh in 1987, who was then only a party leader, to call for free elections.

In Kwangju, about 1,000 students clashed with riot police at Chosun University when they were blocked from taking to the streets following a rally to mark the death of a student leader, the national Yonhap news

agency said.

Students also clashed with riot police in other cities, including Suwon, where students attacked a police station with firebombs.

In Seoul police with riot shields meanwhile guarded the area around city hall and the U.S. Information Service (USIS) building, which was set ablaze Wednesday by radical students.

The students blame the continued presence of some 43,000 U.S. troops in South Korea for the continued division of the Korean peninsula into a communist northern and and capitalist southern state.

The South Korean Foreign Ministry said in a statement that an "expression of regret" had been delivered to the U.S. government. The statement called the burning "an extremely reckless act which cannot be tolerated."

"Setting fire to a foreign mission greatly damaged the prestige of the cultured people of Korea," it added.

National Police Headquarters said they had detained 1,864 of the more than 80,000 people who took part in demonstrations and riots across the country on Wednesday, the national Yonhap news agency reported.

More than 50,000 demonstrated at 11 different places in Seoul alone, Yonhap said, adding that more than 100 people were hurt.

Home Minister Ahn Eung-Mo and Justice Minister Lee Jong-Nam, flanked by the prosecutor general and the national police chief, held a joint press conference at the government building early Thursday to declare that the government would maintain law and order.

However, the warning largely went unheeded as more than 1,000 taxi drivers demanding a wage hike staged a fierce battle with riot police in southern Seoul later on Thursday.

The prosecutor general's office ordered investigation of the National Coalition and the National Students Federation, which it accused of being behind Wednesday's demonstrations. Prosecutors were also investigating university professors suspected of inciting students to demonstrate.

#90130d0180 05/10/1990 ~French/German News Agency

LONDON (MAY 10) - Prime Minister Margaret Thatcher came under renewed criticism Thursday as a parliamentary report showed that the gap between rich and poor had widened further, in direct contradiction of government figures.

The results of a parliamentary commission published Thursday showed that between 1981 and 1985 the purchasing power of the country's poorest increased by only 2.6 percent, against a national average of 5.4 percent.

Government figures for the same period had said that the poor's buying power had soared by 8.4 percent against a national average of 4.8 percent.

Opposition Labour Party leader Neil Kinnock, in a letter to the prime minister attacking her policies as a "complete fraud", said that "for the past 10 years you have denied these facts and you have claimed that the so-called 'trickle-down' theory would protect the poorest. It clearly has not."

Labour Party member Frank Field, who heads the House of Commons Social Affairs Commission, also criticised the government for claiming "that if you concern yourself just with growth, not just crumbs but whole chunks of bread would fall off the rich man's table."

"There is no hidden hand to protect the poorest in our community unless voters and government decide to do so."

The errors in the government's statistics on the rich-poor gap sparked embarrassed reactions in the government ranks.

Secretary of State for Social Security Tony Newton said that the most vulnerable sectors of the populace were now better protected, and stressed that during 1981-85 revenue had increased in all sectors of society.

Charity organisations and the Church of England have repeatedly warned in recent months however that poverty is increasing, particularly in London, citing such relatively recent phenomena as "cardboard towns" around Waterloo Bridge and the Strand in central London where hundreds of tramps are living rough with only cardboard cartons for protection.

#90130d0190 05/10/1990 ~French/German News Agency

DUESSELDORF (MAY 10) - The telecommunications subsidiary of the West German Postal Ministry, said here Thursday it has provided East Germany a two billion mark (1.22 billion dollar) credit to help that country carry out urgently needed expansion.

Helmut Ricke, chairman of Deutsche Bundespost Telecom, said it was the largest single credit yet provided to East Germany since the opening of the East German-West German border.

He said the money is for the most urgent expansion necessary for East

Germany's telecommunications network, but was by no means sufficient to completely refurbish that country's telecom infrastructure.

The establishment of a high-performance telecommunications infrastructure was of ''major'' importance to East Germany's overall economic development, Ricke said.

MOSCOW (MAY 10) - A majority of Muscovites favor rapid introduction of a market economy, but fear this will trigger higher prices and growing social disorder, according to an opinion poll published here Thursday.

The poll, published by the Moscow News newspaper, said 58 percent of Muscovites believe a market economy should replace the present command-economy system, most of them immediately.

Soviet President Mikhail Gorbachev has called for a stage-by-stage transfer to a market economy, but Moscow is hesitating over how fast to introduce the reforms for fear of a social backclash. The government has warned however that price increases are on the way, with many expected for January.

Asked what they feared most, the 801 Muscovites interviewed between April 28 and May 2, put price increases at the top of their list (47 percent).

This was followed by increases in crime (41 percent), "chaos in society" (39 percent), a drop in living standards (20 percent), loss of social guarantees (19 percent) and unemployment (7 percent).

Fifty-three percent believed a change to a market economy would improve life for cooperatives, while 69 and 83 percent thought it would make things more difficult for ordinary workers and old-age pensioners.

Twenty-six percent thought it was "likely or very likely" they would lose their jobs as a result of economic reform, while 54 percent thought this "unlikely or highly unlikely". Twenty-nine percent thought it "impossible".

A majority favored private property in both farming and industry, but few (7 percent) felt they were up to starting their own business.

If they had the choice of where to work, 35 percent would prefer a state entreprise, 33 percent a mixed business involving foreigners, while only 13 percent would accept being employed by a private business.

BERLIN (MAY 10) - Many schools and kindergartens in major East German towns were closed for several hours Thursday as teachers, concerned about their future in a unified Germany, staged warning strikes, the ADN news agency said.

Some 2,000 teachers staged a protest outside the education ministry and the parliament building in East Berlin, complaining of the lack of a detailed government policy on education and calling for higher wages and no job cuts.

Some 2,500 teachers attended a similar protest in Frankfurt-on-Oder in the east and 500 at Neubrandenburg, ADN said.

There were also warning strikes in Rostock in the north, Magdeburg in the west and Halle in the south.

Education Minister Hans-Jochim Meyer said he was prepared to hold talks with the teachers' union from May 15.

In a separate development, agricultural workers blocked traffic at the East-West German border post at Wartha in the southwest for an hour on Thursday to express their concern over monetary and economic union, due to take effect in July.

They were particularly protesting against massive imports of West German consumer goods, saying it was preventing them selling their produce, ADN said.

The government said Thursday it was willing to hold talks with the farm workers' unions, whose position has been bolstered by the strong showing by agrarian parties in local elections at the weekend, ADN said.

The agriculture, milk products, and forestry workers union met with Secretary of State Guenther Krause on Thursday and called for government measures to save jobs and protect the domestic market.

Mr. Krause said he was in favour of imported western goods being priced

higher to make it easier for East German goods to sell.

Some 140,000 tonnes of unsold East German milk and 30 million eggs have already stockpiled, and the authorities estimate that imported goods now account for 50 per cent of food products sold in the country.

ISLAMABAD MAY 10 - A Moslem fundamentalist opposition party on Thursday declared a "holy war" on Pakistan's growing problems of obscenity, drugs and corruption.

"The society is plagued with obscenity, bribery, drug addiction and excesses by the bureaucracy and police," the Jamaat-i-Islami party said, according to a report by the official Associated Press of Pakistan.

"The people of Pakistan (are) fed up with this situation," the party said in a statement as it announced a week-long, nationwide anti-vice campaign to begin Friday.

"Jamaat-i-Islami will wage a Jehad (holy war) against these evils by adopting different ways and means to curb it," it said.

The party said peaceful protests will be organized at television stations, movie houses, video shops and publishing houses.

"Accountability committees" will be formed to deal with drug addicts and traffickers, force shopkeepers to "remove obscene posters," and handle public complaints of corruption and abuse by police and bureaucrats, it added.

The Jamaat-i-Islami, which says it is the defender of Islamic values, is one of the best organized parties in Pakistan, although it only has nine seats in the 237-seat parliament.

It is a member of the Islamic Democratic Alliance, a coalition of parties opposed to Prime Minister Benazir Bhutto's ruling Pakistan People's Party.

MOSCOW (MAY 10) - The presidents of the three Soviet Baltic republics are likely to meet in Tallinn, capital of Estonia, on Saturday, Baltic sources said on Thursday.

The three republics are Lithuania led by Vytautas Landsbergis, Latvia led by Anatolijs Gorbunovs, and Estonia led by Arnold Ruutel.

The meeting, called "on the initiative of the president of Estonia, will probably be held in Tallinn on Saturday, but it is not 100 percent certain", the secretariat of the Lithuanian president in Vilnius said.

"The final decision will be taken on Friday evening," a source at the Latvian parliament told AFP by telephone.

When Latvia voted for independence on Friday, members of the Latvian parliament insisted on the need for political co-ordination between the three republics.

#90130d0350 05/10/1990 ~French/German News Agency

BRUSSELS (MAY 10) - The European Commission has urged Greece to beef up a program to right its economy, sagging under a huge government deficit and high inflation, Commission sources said Thursday.

Experts from the European Economic Community (EEC) executive may be sent to Greece in order to advise the government on a long-term restructuring of the economy, they said.

But, they added, the Greek government has made no move toward asking for fresh credit from its EEC partners.

"The Commission has been following with great concern the development in the Greek economy," the Comissioner in charge of economic affairs, Henning Christophersen, said in a press statement after returning from a visit to Athens.

"Strong frontloaded measures with rapid implementation are needed to create confidence in the markets and to pave the way for the drachma to enter the EMS" (European monetary system), he said.

Mr. Christophersen praised the Greek government's medium-term plan "as a substantial step in the right direction" but warned that "further steps will be necessary."

The Commissioner told Prime Minister Constantin Mitsotakis during a visit to Athens on Tuesday and Wednesday that he could "lose control" of the economy unless "the necessary initiatives" are taken, a reliable Commission source said.

He suggested that the Commission provide "technical aid" in the form of expert advisors, the source added. Athens has yet to respond to the idea, the source said.

Mr. Mitsotakis made no reference to seeking any fresh EEC cash or an extension to a 1.75 billion European Currency Unit (ECU) (2.17 billion dollar) EEC loan, contracted in 1985 and repayable from next year, the Commission source said.

An International Monetary Fund (IMF) delegation is expected in Athens next week in order to complete a report on the state of the Greek economy.

In the runup to the Greek general elections in April, Commission President Jacques Delors appealed to Greece to take urgent action to redress its economy, in order not to compromise EEC economic and monetary union.

The first phase of union is scheduled to be launched on July 1. Under it, sterling, the drachma and the escudo are to join the EMS' exchange-rate mechanism, at dates left to national discretion.

Member states are also committed to launching a mutual surveillance system in economic affairs.

This exercise could be undermined if Greece goes to the IMF for a loan, as IMF officials will demand to oversee economic reforms, Commission sources said.

Greece's fragile conservative-led government inherited a public-sector deficit from the Socialist administrations of the 1980's that now amounts to 22 percent of gross national product (GNP).

Inflation between March 1989 and March 1990 was 17.8 percent, the highest in the Community. The balance of payments deficit for the first two months of this year alone totalled 1.15 billion dollars, against 2.57 billion dollars for all of 1989.

#90130d0390 05/10/1990 ~French/German News Agency

BUCHAREST (MAY 10) - The Romanian opposition appears powerless, 10 days ahead of national elections, in the face of an interim government which is calling all the shots, analysts say here.

A proposition Wednesday by the two opposition candidates that the elections for a new president be postponed has little chance of being accepted by interim president Ion Iliescu, sources close to the current government said Thursday.

They saw the opposition move as a desperate bid by the losers to change the rules of the game.

Opposition presidential candidates Radu Campeanu of the National Liberal

Party and Ion Ratiu of the National Peasants' Party said separately that they would step down, if the other candidates agreed to do the same.

Mr. Campeanu proposed that the parliament elected in the May 20 polls should elect an interim president to serve until a new constitution has been drawn up.

Mr. Iliescu, confident that he not only holds the reins of power but also commands sufficient popular support to win the presidency, is however playing for time, apparently in a bid to postpone serious discussion with the opposition until after the polls.

Anti-government protesters have occupied the University Square in Bucharest for more than two weeks, accusing the current administration of being still under the control of the ousted Communist Party and calling for the exclusion of members of the former Communist administration from the legislative and presidential elections.

The protests have since spread across the country to affect a dozen cities.

A meeting between Mr. Iliescu and the Bucharest protesters ended shortly after it began Tuesday after the interim president refused to allow the session to be filmed by reporters.

He has offered a new meeting on Saturday -- after a plenary session of the ruling National Salvation Front scheduled for Friday.

The National Alliance for the Timisoara Proclamation, which groups about 100 associations and organisations including the main political parties has said that the meeting should take place Thursday, ahead of the Front meeting.

They argue that the results of the meeting should be considered by the Front, which has said it will continue to rule the country until the elections but which has met only once in the past five weeks.

Mr. Iliescu is meanwhile out on the road campaigning for his election to the presidency, attracting tens of thousands of supporters.

"These acclamations please the president and confirm his analysis of the situation, that the people want him," one of his close advisors said.

On Thursday in Ploesti in central Romania, the waiting crowd chanted "Iliescu, we love you," and one banner proclaimed "when Iliescu appears, the sun rises."

The opposition parties however have complained of harassment by National Salvation Front supporters, and called for the elections to be delayed to

give them more time to organise.

On Saturday Mr. Campeanu was attacked by a crowd of Front supporters after an electoral meeting in Braila in eastern Romania.

#90130d0420 05/10/1990 ~French/German News Agency

NICOSIA (MAY 10) - Momentum is building toward an emergency Arab summit, which has finally been endorsed officially by Saudi Arabia and Egypt, despite bitter objections from Syria.

Both Riyadh and Cairo have notified Arab League headquarters in Tunis of their intention to take part in the gathering, urged by the Palestine Liberation Organization (PLO) to discuss Soviet Jewish emigration to Israel.

Authoritative sources in Cairo said Egypt and Saudi Arabia had agreed to Baghdad as a venue, although the official Saudi announcement made no mention of the location.

Iraq has agreed to host the summit, which would also try to work out an Arab stand on what many Arab leaders see as an anti-Iraqi campaign in the West, sparked by allegations of illegal arms smuggling to Baghdad.

While 15 of the Arab League's 22 members had earlier backed the meeting, Egypt and Saudi Arabia refrained from announcing official support as they pursued diplomatic efforts to heal a long-standing Iraqi-Syrian feud, the Arab world's most intractable and troublesome rift.

But despite a spate of high-level visits and messages this week, during which senior Egyptian and Saudi envoys travelled to both Damascus and Baghdad, Syrian President Hafez al-Assad is apparently sticking to his refusal to take part in any summit held in Baghdad.

Al-Baath, the newspaper of the ruling Syrian Baath Party, on Thursday denounced the "blackmail" it said had been used to "impose the date, place and agenda" of the summit.

The paper blasted "the arrogant Iraqi regime" for trying "to dictate facts to other Arab parties for a ceremonial demonstration that would be to the greater glory of its illusions ... rather than a serious, well-planned summit to meet the challenges before it."

Syria, loath to participate in any undertaking that would enhance the stature of Iraq, has appealed for a meeting in Tunis of Arab foreign ministers to determine the date and venue of the proposed gathering.

Governed by rival Baath factions, Syria and Iraq have for years skirmished for status in the Arab world. Baghdad finally severed ties with Damascus in 1980 after Syria signalled its support for Iran in the Gulf war.

#90130d0470 05/10/1990 ~French/German News Agency

TOKYO (MAY 10) - North Korean President Kim Il-Sung held talks in Pyongyang on Thursday with Yasser Arafat, the visiting Palestine Liberation Organization (PLO) leader.

The talks proceeded in a "sincere and friendly atmosphere", the Korean Central News Agency (KCNA) said without elaborating.

Egyptian President Mohamed Hosni Mubarak was also due to visit North Korea "soon" at Mr. Kim's invitation, the official news agency said in a separate dispatch monitored here.

In Cairo, officials said Mr. Mubarak will visit Pyongyang on Sunday on his way from China to the Soviet Union.

It was Mr. Arafat's fourth visit to North Korea, which is seeking a greater say in the non-aligned movement while guarding against the reforms sweeping the East European communist bloc. He was last here in June.

North Korea set up formal relations with PLO in 1966 and appointed an ambassador in March to the state of Palestine, which the PLO declared in November 1988.

On his way to Pyongyang, Mr. Arafat made a brief stop Wednesday at Dhaka for talks with Bangladesh President Hussain Mohammad Ershad.

Bangladesh radio said the two leaders discussed developments in the Middle East and the Arab world, including the settlement of Soviet Jews in Israeli-occupied territories, which Dhaka has said will hinder the Middle East peace process.

The North Korean Workers Party newspaper, Rodong Sinmun, welcomed Mr. Arafat's visit in a commentary carried by KCNA and monitored here Thursday.

It said the visit marked "a major landmark in upgrading to a new, higher stage the friendly and cooperative relations between the two peoples ... cemented on the common front against imperialism."

#90130d0480 05/10/1990 ~French/German News Agency

BANGKOK (MAY 10) - Three American prisoners will be deported to the

United States for the remainder of their term after serving several years in prison here on drug-related charges, Department of Corrections officials said Thursday.

The three were the first U.S. inmates to be repatriated under a prisoner exchange agreement signed in October 1982.

The three were identified as Bradford Bufkin, 39, sentenced to 28 years six months and 28 days with at least five years served, Steve Moscoe, 38, sentenced to 34 years 10 months and Mark Wagner, 29, sentenced to 37 years and four months with over four years served, the officials said.

Mr. Wagner and Mr. Moscoe were arrested in 1985 when they were found in possession of one kilogram (2.2 pounds) of heroin with intention to sell in Chonburi province, some 90 kilometers (54 miles) east of here.

Mr. Bufkin was arrested in Bangkok in October 1984 and charged with tresspassing and possessing heroin, according to Immigration officials.

The United States is one of the eight countries that have a prisoner exchange agreement with Thailand. The others are Britain, Canada, France, Italy, Portugal, Spain and Sweden.

Under the agreements, foreign prisoners who have been jailed here for some time are allowed to seek a tranfer to serve the rest of their terms in their home countries.

The three American inmates will leave for the United States Saturday.

#90130d0500 05/10/1990 ~French/German News Agency

NEW DELHI (MAY 10) - A total of 2,708 people have died in the bloody campaign for a Sikh homeland in the Punjab since 1989, India Home Minister Mufti Mohammad Sayeed informed parliament Thursday.

He said Sikh militants killed 1,168 people in the troubled northern state in the whole of last year and blamed the separatists for murdering 585 people in the first four months of 1990.

Six hundred and ninety nine suspected Sikh militants were killed and another 2,466 arrested during 1989 while 256 militants died and another 478 were arrested the last four months, Mr. Sayeed said.

The minister did not say whether all the Sikh militants had been killed by Indian security forces or if some of them had died in feuds that frequently erupt among rival factions in Punjab.

A total of 1,234 people died in 1988 in the Sikh battle for a homeland called Khalistan, or land of the pure, which flared in 1983.

#90130d0660 05/10/1990 ~French/German News Agency

HAMBURG (MAY 10) - The Elbe, Germany's most polluted river, stands to gain new importance as a transportation link after German unification.

Experts in northern Germany are already euphorically talking about an ''East-West Rhine'' river on which huge volumes of freight will be transported. But for such potential to be realised, major investments will be necessary.

Hamburg Lord Mayor Henning Voscherau for a long time has been preaching a ''policy for the Elbe'' in which close trade relations with the East German regions of Saxony and Thuringen, as well as with Czechoslovakia, would be pursued.

But the river is anything but a high-performance transportation route. In 1988, for example, around two million tons of freight were shipped on the Elbe between Germany and the East Bloc nations.

By comparison, in the same year 223 million tons of goods were shipped just within West Germany alone on other rivers that year, of which the Rhine River accounted for neary 200 million tons.

There are several reasons for the Elbe River's small share of freight transport, according to West German business official Hartmut Schoeberl.

The director of the Lueneburg-Wolfsburg Chamber of Commerce in northern Germany cites the East Bloc nations' transport policies aimed at earning hard currency, a ban in East Germany on night-time shipping which makes freight transport slower and more costly, and inadequate river port facilities.

For these reasons, bulk goods make up most of the freight transported on the Elbe - farm produce, construction materials, fertilizers, ores, and steel products.

Finally, the Elbe suffers from a natural handicap - it is not deep enough. In high summer, the river in places becomes only 1.2 to 1.4 metres deep - whereas the standard European riverboat, fully laden, has a draught of 2.5 metres.

In the dry summer of 1989, the Elbe receded to its shallowest levels since 1976 - and freight turnover at the Hamburg port for river shipping promptly plunged by 12 per cent.

Benefiting from low-water conditions has been a parallel canal finished in 1976 which runs through northern Germany and shows constant freight shipments of 4.2 to 4.4 million tons annually.

Nonetheless, Hamburg shipping experts see major potential for increasing shipping tonnage on the Elbe River. Helmut Kern, president of the Hamburg Harbour Association of Companies, sees a potential for 20 million tons annually.

A factor in favour of promoting river shipping, which already accounts for one-fourth of freight transport inside West Germany, is its environmental compatibility.

A further special factor could be East Germany's changing energy needs, says Juergen Nupnau, director of the Hamburg branch of the German River Shipping Association.

''East Germany's energy supply for example can no longer be built up based on brown coal,'' Nupnau says. If East Germany switches over to hard coal, which West Germany produces, then the closest route would be via the Hamburg harbour and the Elbe River, he contends.

But the infrastructure on the Elbe River is still inadequate for such developments, businessmen caution.

A lifting of the ban on night shipping, a deepening of the riverbed, and removing the narrow passages beneath bridges are all measures which would immediately improve freight shipment capacities on the Elbe, Hamburg Economics Senator Wilhelm Rahlfs says.

Over the medium-term, he says, modern terminals are the main necessity, since more and more goods are shipped by container.

But this is all a scenario for the future. At the moment, in the department on river shipping in the Transportation Ministry in Bonn, officials are revamping their policy thinking to take the new conditions in East-West German transportation into consideration.

Hamburg's Business Authority has also commissioned a study to examine the economic importance for the transportation industry of a modern Elbe River shipping infrastructure.

#90130d0910 05/10/1990 ~French/German News Agency

BRUSSELS (MAY 10) - Plans to set up a development bank for eastern Europe cleared a major hurdle Thursday, as an EEC agency announced a solution to

U.S. reservations to using the European Currency Unit (ECU) as reference currency.

The United States, which will be the bank's largest single shareholder with a 10 percent stake, was concerned about paying its contribution in ECUs because of fears of losses through currency fluctuation.

Eurostat, the statistics agency of the European Economic Community (EEC), said on Thursday that the ECU would be the currency in which the European Bank for Reconstruction and Development (EBRD) will carry out its business.

Capital can also be paid in dollars, at the rate of 1.17 dollars per ECU, or in yen, at 170 yen per ECU, the agency said.

The figures are based on the average rates of the ECU against the two currencies over six months, from September 30, 1989, to March 31, 1990, and are good for five years.

The ECU was quoted at market closure Wednesday at 1.2451 dollars and 194.862 yen.

Participants in the EBRD had agreed in principle to a compromise formula in Paris last month. The United States also won agreement for limiting lending to the Soviet Union, which will have a six-per-cent share in the capital.

The EBRD gathers 42 shareholders, including the EEC's executive Commission and its European Investment Bank (EIB). The Community member states will have a majority share in the new agency, whose statutes are expected to be signed on May 30.

The ECU is the theoretical basket gathering the currencies of the EEC member states. It is increasingly popular on bond markets, where investors like its strength and stability.

The EBRD will be capitalised at 10 billion ECUs (12.4 billion dollars). The U.S. stake will be one billion ECUs (1.24 billion dollars).

#90130d1190 05/10/1990 ~French/German News Agency

CANNES, France (MAY 10) - "Dreams" is what Akira Kurosawa has called his latest film, which officially opens the Cannes film festival on Thursday, but nightmares might have been a more apt title.

Soldiers killed in action come back to haunt their commander, Mount Fuji turns red when an atomic power plant explodes and monstrous dandelions flourish in a nuclear-devastated landscape peopled by demons with horns.

It is arguably the 80-year-old Japanese master's most personal work, a radical departure from the grand-scale costume dramas and Shakespeare adaptations of the likes of "Kagemusha" and "Ran."

It also hammers out a strong anti-nuclear and environmental message.

But facing reporters after the press screening, Kagemusha said he did not think he had been more militant or outspoken than in his earlier films.

"These are the natural feelings of someone who lives in these modern times."

While he was resting after shooting "Ran" five years ago, when he said he had not run out of things to say, he read some thoughts on dreams by

Dostoievsky.

"They are that dreams are profound thoughts from the depths of the heart, which come out quite naturally during sleep."

This view appealed to him so much that he began writing down dreams, from early childhood. In a few days he had 11, which he showed to "people who know me well. They were all excited and said you must make a film."

The outcome was eight 'dream' sequences. Three had to be dropped, two because they required special effects beyond current technical knowhow and the third because it involved too many actors.

His producers -- one of them his son Hisao -- said it would haved bankrupted the enterprise.

As it is, big money was needed, which Kurosawa finds hard to raise in Japan. Warner Bros, which has the U.S. distribution rights, put up the finance.

For the opening two dreams, "Sunshine in the Rain" and "The Peach Orchard" Kurosawa had constructed an exact replica of his childhood home at Koishikawa.

These provide the film's most poetic images. A five-year-old Kurosawa (played by Toshikho Nakano) is sent out to find the foxes living under the rainbow to apologise for spying on a foxes' wedding procession. The tiny boy disappears across a flower-filled meadow with an arc spanning the sky.

In the second sequence, giant Japanese dolls representing the spirit of the peach orchard which the boy's family has cut down, perform a dance to remind him of the beauty of peach trees in blossom. The sky fills with petals, like a snow storm.

Later dreams become increasingly sinister and surreal. In "Mount Fuji in Red" an adult Kurosawa (Akira Terao) watches the panicking hordes -- played by 2,000 extras -- try in vain to flee the spectacular atomic explosions, convincingly orchestrated courtesy of the help of the George Lucas Industrial Light and Magic Company.

Kurosawa's message is clear. Through lack of respect for nature, the stupidity of war and carelessness with things we do not know how to handle -- like nuclear power -- we are turning the earth into a "junkyard of poisonous waste".

Amid all the gloom and doom, audiences will be grateful for some light relief -- in the casting of the director Martin Scorcese as Vincent Van Gogh, with a strong American accent. Kurosawa so admired his work when he

himself was an aspiring painter he dreamt that he actually met him.

On his own achievements, however, he is irrevocably modest. When he was honoured in March with an Academy Award for his lifetime achievement, he said he felt unworthy to accept it because he was only beginning to understand cinema.

Asked at Cannes to explain, he would only say that he tried to get "two or three moments of pure cinema" into every film. He felt he had succeeded with "Dreams" -- although he refused to say which moments they were.

LONDON (MAY 10) - Shareholders in BAT Industries will receive one Wiggins Teape Appleton share for each BAT share when the tobacco and insurance conglomerate introduces the paper maker onto the stock market next month, it was announced here Thursday.

The ceding of Wiggins Teape, whose potential stock market capitalization is estimated at 1.2 billion pounds (two billion dollars), is part of a restructuring program begun in September to fight off a hostile 13 billion dollar takeover bid by the Hoylake consortium.

The consortium, headed by financier Sir James Goldsmith, has since abandoned the effort.

A total of 494 million Wiggins Teape shares are to go into circulation on June 1. BAT is estimating 1990 dividend at 8.35 pence per share.

Wiggins Teape is Britain's leading paper maker, with a turnover of 1.5 billion pounds (2.5 billion dollars) and operating profit of 201 million (335 million dollars) last year.

GENEVA (MAY 10) - The annual assembly of the World Health Organisation decided Thursday to put off indefinitely the membership of the Palestine Liberation Organisation by endorsing a compromise resolution hammered out in 48 hours of intensive negotiations.

The draft prepared by around 30 countries headed by France and Egypt dropped a phrase fiercely opposed by the United States, which has threatened to stop its 30 percent funding of the WHO budget if the PLO's status is upgraded from that of observer to full membership.

The offending language reiterated a clause from last year's text,

expressing the hope that the Palestinian people would be fully represented in the WHO by their legitimate representatives.

The new text simply left out the actual quotation, stating instead that the WHO reaffirmed that part of the previous resolution.

The assembly further instructed WHO chief Hiroshi Nakajima of Japan to report back "at the appropriate time" on the PLO's membership application, which was first lodged last year. That means he could defer the question indefinitely.

The second part of the resolution called for special technical assistance to improve health conditions for Palestinians in occupied territories, which Dr. Nakajima recently branded as "catastrophic".

The compromise motion was endorsed by applause, which the session chairman said amounted to unanimous approval. But Israel's delegate demurred, saying the assembly had voted on a political matter which it was not for the WHO to handle.

Libya thanked the European Economic Community on behalf of the Arab League for finding a compromise, and Palestinian representative Fathi Arafat, brother of PLO leader Yasser Arafat, said the text showed respect for the Palestinian people.

U.S. official John Bolton supported it too, saying the U.S. delegation had worked at the compromise "in good faith".

Khartoum (MAY 10) - Sudanese military leader General Omer Beshir Thursday appealed to the Soviet Union to reconsider its decision to allow Soviet Jews to migrate to Israel.

The Sudanese leader described the migration as an act of aggression against Arab and Islamic countries.

''We call upon the Soviet Union to reconsider its decision on the issue in order to retain its position in the region,'' General Beshir was quoted by the official Sudan News Agency (Suna) as saying.

The Sudanese leader, who was addressing an international Islamic conference in Khartoum, called upon the Islamic world to mobilise its economic and other potential resources with ''unwavering will and determination'' to face the ''Jewish threat'' in the region.

LONDON (MAY 10) - Wives of former members of the legendary Beatles rock group have organized a humanitarian relief project for Romania and on Thursday saw the first truckload of aid leave here for the strife-torn country.

The first aid shipment from the Romanian Angel Appeal, a charity set up by Olivia Harrison, Barbara Bach, Linda McCartney and Yoko Ono, left London's Wembley stadium in a convoy of 10 vehicles loaded with clothing, washing machines and other household items.

The shipment was to be delivered to three orphanages in Romania at Baicoi, Brasov and Cimpina.

Accompanying the convoy were some 30 volunteers including builders, plumbers, electricians and nurses who will give their time for repairs to homes and buildings and for distributing food and toys to the orphans.

SAARBRUECKEN, WEST GERMANY (MAY 10) - Two fighter aircraft very nearly hit a small Dan Air plane over West Germany on Thursday, with disaster narrowly averted by its pilot, airport authorities said here.

Dan Air Hawker Siddeley pilot Robert Dearling dropped his turbo-prop plane some 100 metres (300 feet) when he saw the unidentified warplanes. A passenger and an airline hostess were hurt and both were taken to hospital here.

Civil aviation sources in Frankfurt said it was still unclear whether the fighter aircraft, believed to be F-15s or F-18s, were from a U.S. or a Canadian base.

It was also too early to say who was responsible for the near miss, which occurred over the U.S. Ramstein base, where two Italian planes collided at an "open day" show in August 1988 and 70 people were killed.

The Dan Air plane was on its way from West Berlin to Saarbruecken.

#90130d1440 05/10/1990 ~French/German News Agency
COLOGNE (MAY 10) - West German Research Minister Heinz Riesenhuber signed an accord here Thursday with the European Space Agency making Cologne the centre for Esa's astronauts training program.

The training centre is to prepare around 40 astronauts for space missions by the end of the 1990s for Esa's ''Columbus'' space station and ''Hermes'' space glider programs, officials said.

The site for the centre is the German Aerospace Research Facility (Dlr) based in the Cologne suburb of Porz.

Astronaut training is scheduled to begin in 1993, using a variety of flight simulators and a ten-metre deep water tank to simulate zero-gravity work conditions.

Officials said the training center would cost some 27 million marks (16.4 million dollars).

TEHERAN (MAY 10) - Iran and Kuwait have decided to start their first shipping link across the northern Gulf from early June, a shipping official announced here Thursday.

The firm Val-Fajr-8 will provide a service for 150 passengers between the Iranian port of Bushehr and Kuwait port, the Iranian news agency IRNA quoted the official as saying. It will also start a link between Bushehr and Qatar.

The company will at first run a monthly service for the 12-hour crossing between Iran and Kuwait, IRNA said.

Diplomatic relations were strained during the Gulf war when Teheran accused Kuwait of siding with Baghdad. The eight-year Iran-Iraq conflict ended with a cease-fire in August 1988.

CAIRO (MAY 10) - Egypt and the International Monetary Fund (IMF) have reached a preliminary accord that could allow Cairo to reschedule a portion of its 50 billion dollar foreign debt, President Hosni Mubarak disclosed Thursday.

The president said the accord, to be formally concluded during the visit here of an IMF delegation in the next three weeks, covers measures sought by the Fund to reform the Egyptian economy.

Once it has become official, he said in a report carried by the Middle East News Agency, Egypt will go before its Western creditors in the Club of Paris to seek another rescheduling of its foreign debt.

Egypt's creditors in 1987 approved an initial rescheduling agreement.

Mr. Mubarak told Egyptian correspondents travelling with him in Oman that negotiations with the IMF on the latest accord had dragged on for a year and a half "because of Egypt's insistence that economic reforms be implemented gradually in order to spare the population an extreme burden."

The IMF had sought a reduction both in the Egyptian budget deficit and subsidies on basic commodities as well as an increase in interest rates to encourage savings.

The Fund also called for a greater liberalization of the Egyptian economy after years of active state involvement.

The government recently announced a sharp increase in prices of energy and basic commodities aimed at trimming the budget deficit.

ZURICH (MAY 10) - Prices on the Zurich stock exchange skyrocketed on Thursday over a broad front and in higher volume, primarily thanks to foreign institutional buying and lower rates (below nine percent) on the Euro-franc,
operators said.

The Swiss Performance Index jumped by 26 points to close at 1,112, while the Credit Swiss index finished at 616.4 (against 602.7 at the Wednesday close) and the Swiss Bank Corp. indicator at 637.9 against 624.2.

Bank stocks, insurances, industrials and chemical issues all generally closed markedly higher. The Swiss Bank Corp. participation certificate surged by 7.06 percent, and the bank's bearer stock by 6.57 percent. Union Bank of Switzerland bearer stock gained 5.6 percent.

Genevoise-vie insurance firm's participation certificate rocketed up 8.7 per cent, while Winterthur insurance's comparable issue improved by 6.55 percent. Zurich insurance company's participation certificate added 6.22 percent, while the company's bearer stock did almost as well with 5.35 percent.

In electricals, BBC registered stock moved up 7.7 percent, while in the chemical sector, Sandoz participation certificates tacked on 5.85 percent and registered stock 2.83.

Operators said the unusual surge Thursday might be the start of a reversal of the depressed market of the last few weeks.

PARIS (MAY 10) - The remaining three French oil workers seized by the Cabinda Enclave Liberation Front (FLEC) in northern Angola last month have been set free, the French foreign ministry said Thursday.

FLEC militants had captured the men along with 10 other Frenchmen and 10 Congolese workers on April 27 as they prospected for oil near the border between Congo and Cabinda, an Angolan enclave surrounded by Zaire and Congo.

Shortly after the attack, all but four Frenchmen and three Congolese were released, but one of the Frenchmen, Jean-Claude Soum was freed in Zaire by the group on Tuesday.

No further details on the release of the remaining three Frenchmen were immediately available.

Bonn (MAY 10) - West Germany and Vietnam signed a cultural cooperation agreement Thursday after talks which included discussion of a bilateral investments accord and chances for a settlement of the Cambodia conflict, the Bonn Foreign Ministry said.

Officials said Foreign Minister Hans-Dietrich Genscher and his Vietnamese counterpart Nguyen Co Thach signed the cultural agreement at the outset of a visit by Thach to West Germany.

During their meeting, Genscher welcomed political and economic reform measures put into effect by Vietnam and urged further moves in this direction, the officials said.

Genscher also expressed hopes for a timely Cambodia settlement which would include provisions for the free election of a national government in Phnom Penh while barring a return to power by the Khmer Rouge, they added.

Other topics covered by the two foreign ministers included a general intensification in bilateral relations and plans for an agreement encouraging and protecting West German investments in Vietnam, they said.

Ties between West Germany have been chilly for years because of Vietnam's occupation of Cambodia. While Hanoi insists the occupation has ended, Cambodian resistance groups dispute the claim.

NAIROBI (MAY 10) - West Germany is to make 1.9 billion Kenyan shillings (82.96 million dollars) available to Kenya to finance various development projects, following an agreement signed here Thursday, the official Kenya News Agency (KNA) reported.

The agreement was concluded here by Kenyan treasury permanent secretary Charles Mbindyo and West German economic cooperation director for Africa Hubert Linhart after several days of negotiations, INA said.

Under the agreement, 1.1 billion shillings (48.03 million dollars) would be a grant and 800 million shillings (34.93 million dollars) a soft loan repayable over 40 years with a 10-year grace period at an interest rate of 0.75 per cent per annum.

The money will finance a wide range of projects in financial and agricultural sectors, including secondary roads, power lines, irrigation, water and sewerage, health and education, the agency added.

BRUSSELS (MAY 10) - The European Commission announced Thursday it would investigate price accords between telephone companies that reportedly add billions of dollars in charges to international calls.

The European Economic Community's executive decided to open a formal inquiry after a five-month appraisal of the agreements, a Commission spokesman said, unveiling the EEC's biggest-ever competition probe.

The Commissioner for competition policy, Sir Leon Brittan, warned: "We have to ensure that consumers benefit from an international telephone charging system which allows genuine competition between the telecommunications operators."

"This is essential for European business and also for individuals," he said.

Commission investigators, a Commission source said, will focus on agreements between members of the International Telegraph and Telephone Consultative Committee (CCITT), a Geneva-based group that includes AT and T of the United States, British Telecom, West Germany's Bundespost and KDD of Japan.

The CCITT members have bilateral arrangements, called the accounting rate system, that balance out payments in international calls.

ISLAMABAD (MAY 10) - Canada cannot provide Pakistan with nuclear technology because Islamabad has not signed the non-proliferation treaty (NPT), a Canadian government minister said here Thursday.

But it was providing Islamabad with security-related information to operate the Karachi Nuclear Power Plant (KANUPP) which started operating in the early seventies with Canadian assistance, Monique Landry, Canada's minister for external relations and international development, said.

"Our position is well known," Ms. Landry told a news conference here at the end of a four-day visit to Pakistan, which is seeking technical and financial assistance to build nuclear power plants.

Ms. Landry, who met Pakistani Prime Minister Benazir Bhutto here Thursday,

said that Canada pledged 12 million Canadian dollars (10.2 million U.S.) to help Pakistan execute its "National Power Plan," which covers the country's power generation requirements for the next 25 years.

A memorandum of understanding to that effect was signed here Thursday.

Canada also increased its assistance from 38 million Canadian dollars (33 million U.S.) last year to 45 million dollars (39 million U.S.) this year, Ms. Landry said.

On Kashmir, she said her country was "concerned" by the deteriorating situation between India and Pakistan, and restraint by both sides and

negotiations.

#90130d2020 05/10/1990 ~French/German News Agency
Khartoum (MAY 10) - Ten rebels and one government soldier were killed when Sudanese government troops repulsed an attack by the rebels in Melut town,

Upper Nile region, in the south of the country, the official Radio Omdurman said Thursday.

It said only four government soldiers were injured in the rebel assault ''backed by tanks and armoured vehicles.''

The communique, issued by the Sudanese military command, said government forces captured eleven Kalashnikov rifles, a rocket propelled grenade and eight anti-personnel mines.

These were the first clashes between the two sides in three months. Observers attributed the renewed fighting to the failure of peace talks between the ten-month-old military government of General Omer Beshir and the rebels of the Sudan People's Liberation Army (Spla).

The Spla, led by Colonel John Garang, has been fighting since 1983 to change the system in the Sudan.

#90130d2090 05/10/1990 ~French/German News Agency
JAMMU, India (MAY 10) - The Jammu and Kashmir state government has begun a massive evacuation of villages on the border with Pakistan as a part of new steps to check a Moslem secessionist campaign over Kashmir, officials said Thursday.

Some 500 residents had been shifted from the Jammu region's border village of Kirni at the launch of a massive evacuation involving thousands of people, the officials said.

They said the evacuation, decided at a high-level meeting of civilian and defence officials, was designed to check any intrusions from Pakistan, which has been accused by India of aiding the bloody Moslem militancy.

Some 4,000 Pakistan-trained militants were waiting in Pakistan-controlled Kashmir to cross over a military line of control to the Poonch and Rajouri areas held by India, the officials said.

Pakistan has denied it is training and abetting the militants.

Meanwhile Indian security forces shot dead two Moslem militants in Kashmir Thursday, and two civilians were found slain, police said.

In a related development, state authorities fired seven more employees for links with the militants, taking the total sacked to 59 in the last two months.

In other incidents Thursday, militants shot and wounded a Sikh shopkeeper and two other civilians, while troopers opened fire to break up a stone-pelting crowd of Moslems in Srinagar, injuring one person, police said.

In the town of of Bhaderwah, a curfew break was scrapped after militants bombed a Hindu temple.

India and Pakistan have fought two of their three wars over Kashmir, claimed by both, since the independence of the subcontinent from British rule in 1947.

#90130d2500 05/10/1990 ~French/German News Agency
JERUSALEM (MAY 10) - Israeli troops shot dead one Palestinian and wounded 28 others Thursday when they opened fire at demonstrators on the occupied Gaza Strip, Arab sources said.

Fayez Mohammad Hamed, 24, was shot in the back during a clash in Beit Hanoun village, the sources said. His family buried the body immediately to prevent a possible autopsy by the army.

The funeral turned into a nationalist demonstration at which 25 Palestinians were shot and wounded, they said.

Troops also shot and wounded another three Palestinians in unrest elsewhere on the Gaza Strip.

Mr. Hamad, whose death was confirmed by the army, was the 671st Palestinian killed by Israeli gunfire since the December 1987 outbreak of the uprising in the occupied territories, according to a tally kept by Agence France-Presse from Palestinian sources.

The army said a curfew had been clamped on Beit Hanoun.

Meanwhile several dozen pacifist and extreme leftwing students of the Israeli movement Campus demonstrated Thursday at Bir Zeit on the West Bank to demand the reopening of the Bir Zeit university, closed for the last two and a half years.

They marched to the campus in the company of Bir Zeit students who brandished Palestinian flags, witnesses said.

#90130d2610 05/10/1990 ~French/German News Agency
PARIS (MAY 10) - The French political establishment, led by President Francois Mitterrand, expressed outrage after ghouls profaned a Jewish cemetery at Carpentras, southern France, on Thursday, digging up and abusing a corpse.

In a telegram to the Jewish community in Carpentras, Mr. Mitterrand said "this attack is particularly abject. Whoever the perpetrators may be, whatever precautions they take to keep dark their cowardly acts against the dead, they must be caught and punished."

Expressing his "horror", the head of state called on the French people to "reassert their self-control".

Interior Minister Pierre Joxe flew to the town, north of Marseilles, after

police there reported that 34 tombs in the Jewish cemetery had been smashed.

The corpse of an 81-year-old man who died last month had been dragged from its coffin and impaled on an umbrella, police said.

The Grand Rabbi of France, Joseph Sitruk, said the attack was "one of extreme gravity, which must not be taken lightly."

In a statement to Agence France-Presse, the rabbi said the attack had not "profaned the body of a Jew so much as assaulted Man's image of himself." He added: "a civilisation which cannot enforce respect for the dead ends up by destroying the living."

Urging the people as well as their political leaders to make "a unanimous reaction," Mr. Sitruk said "we are witnessing a disturbing slide towards the destruction of the human image."

A member of the cemetery staff said that two women who came to pay respect to their loved ones early Thursday found that "headstones had been pushed over or shattered by sledgehammers, coffins dragged from their graves, and everything was upside down."

Mr. Joxe, speaking at Carpentras synagogue, the oldest in France, described the attack as a "barbaric profanation."

The interior minister said he hoped there would be "solemn and outraged condemnation" from "all who believe in respect for the human person."

Police said that no slogans were found daubed around the cemetery and that the only signs which might identify the vandals were four sets of footprints in the newly trodden earth.

Prime Minister Michel Rocard expressed his "horror and indignation", while the extreme right-wing National Front issued a statement denouncing "in the most vigorous terms the horror and ignominy of this barbarous behaviour."

-30- 2599

#90130d2630 05/10/1990 ~French/German News Agency

PARIS (MAY 10) - French auto group PSA (Peugeot and Citroen) had a 7.9 percent rise in consolidated turnover for the first quarter over the same quarter last year, to 44.14 billion francs (about 7.85 billion dollars), the group announced on Thursday.

The Citroen branch turnover rose by 12.9 percent, to 16.84 billion francs, and Peugeot by 3.9 percent, to 25.42 bilion francs. The latter low figure

was due to the flooding of the Sochaux factory in February, which caused a loss of 12,000 cars, the announcement said.

On the French market, group turnover was up by 12 percent for the first quarter, to 20.52 billion francs, while the increase was 4.5 percent on export markets, to 23.62 billion francs.

#90130d2840 05/10/1990 ~French/German News Agency

WASHINGTON (MAY 10) - The United States welcomed the announcement Thursday that China had released 211 pro-democracy activists but called on Beijing to reveal the number and identities of remaining political detainees.

"We welcome this announcement," said State Department spokeswoman Margaret Tutwiler.

She added that Washington was pleased Beijing had provided the names of six of the released activists, but said, "We believe that the interest of all parties would be best served by a full public accounting of the number and identity of those detained as well as those released."

The State Department has estimated that 10,000 to 15,000 people were detained throughout China after Beijing crushed a burgeoning pro-democracy movement last June.

Miss Tutwiler said most of the detainees were believed to have been released but that U.S. officials had no firm information on this.

Chinese officials said Thursday that 431 persons remained under investigation by public security organs, but did not make clear if all of them were imprisoned.

When pressed for an accounting of the number of Chinese detained in the political crackdown, Miss Tutwiler said the lack of U.S. consular offices around China made it impossible to gather reliable information.

She also stressed that Washington was more concerned with protecting the human rights of those detained than with counting them.

"That has been the thrust of the United States' conversations" with Beijing,
she said.

Diplomats in Beijing linked the announced prisoner release with efforts by the hardline Marxist leadership to improve its image in the West, ahead of the first anniversary of the June 4 political crackdown.

Many observers said the clemency measure also appeared aimed at restoring faith in China among Western countries and especially the United States, which must decide by next month whether to let China retain its most-favored-nation (MFN) trading status.

Miss Tutwiler said no decision had yet been made concerning China's MFN status.

#90130d3070 05/10/1990 ~French/German News Agency

PARIS (MAY 10) - President Frederik de Klerk said Thursday that South Africa's foreign relations had improved "dramatically" in the light of reforms there, after briefing French leaders at the outset of a nine-nation European tour.

At a press conference here, De Klerk said he got "a most friendly" reception from President Francois Mitterrand and Prime Minister Michel Rocard and was "impressed by the warmth" of the separate meetings.

He added that it was time to think afresh about anti-apartheid sanctions, but did not play up the issue.

"The mere fact that I met them both constitutes, to my mind, a recognition of the completely changed situation in South Africa," De Klerk said.

He said that the Separate Amenities Act, a mainstay of racist legislation, would be repealed within "six weeks".

De Klerk, who in February unbanned the African National Congress and freed its historic leader Nelson Mandela after 27 years in jail, last week led a government team in the first formal talks with the ANC since it was founded in 1912.

He said he had had informal talks with French Foreign Trade Minister Jean-Marie Rauch and met "a number of industrialists".

He was invited to lunch by Alsthom, which has worked on a South African nuclear power plant, and informed sources said Societe Generale bank and the CGE electricity company were also represented.

"I didn't come with my hat in my hand," De Klerk said, adding that he had informed French leaders of last week's discussions between his government and the ANC "which resulted agreement on the removal of stumbling blocks in the way of negotiations".

Stressing the "importance of a stable, developing South Africa with a

vibrant economy", he said he had agreed with French officials on the "need for South Africa to play a constructive role in the economies of our neighboring countries".

There was an "in-depth" exchange on sanctions, De Klerk said, but added that "the essence of the problem of sanctions is that it isn't a problem for the South African government per se.

"Sanctions ... have a negative effect on the capability of South Africa to address the tremendous social problems, in poverty, in education".

South Africa needed foreign capital to attain a five-per-cent economic growth rate "in order to meet the growing demand for the creation of new jobs" and "imaginative development programs".

Informed sources said Mitterrand had told De Klerk, during more than an hour of talks, that the issue of anti-apartheid sanctions against South Africa would be raised at the European Economic Community summit in Dublin on June 25 and 26.

De Klerk also indicated that he had understood that France would be ready to "re-evaluate" sanctions within an EEC framework, but added: "In some instances, sanctions are crumbling" because of the "momentum of the situation".

On enfranchising the black majority, De Klerk "reiterated" that all "South Africans should have a vote of equal weight. How exactly this will be brought into practice will have to be the result of negotiations with regard to the new constitution."

He pledged: "Within six weeks, during this parliamentary session, the Separate Amenities Act" - racially segregating public facilities - "will be repealed."

The Group Areas Act, designating residence zones, and the Land Act were under review and "legislation might be brought before parliament" from January 1991.

On the three-year-old state of emergency, De Klerk effectively put the ball in the black nationalist camp, indicating that he could not consider retaining the emergency in strife-torn Natal Province only.

The South African leader is also to visit Greece, Portugal, Brussels, Britain, West Germany, Switzerland, Spain and Italy.

KARACHI (MAY 10) - A Chinese airliner carrying the former Turkish president Kenan Evren landed here late Thursday due to a "technical fault " the official Associated Press of Pakistan (APP) reported.

Mr. Evren, who led a nine-member delegation to China, was returning to Istanbul when the airliner was "forced to land here due to technical fault " APP said.

After more than four hours here, Mr. Evren and delegation were due to return back home via Islamabad, it said.

COLOMBO (MAY 10) AFP - A crack military unit has shot dead the ringleader of an armed gang that robbed a group of Western tourists in north-central Sri Lanka on May 4, and also recovered part of the loot, police said Thursday.

A senior regional police official said Herath Prematilleke, the gang leader,

was killed Wednesday in a confrontation between Special Task Force (STF) commandos and suspected Sinhalese rebels in a jungle hideout in Sigiriya.

Another member of the armed group also died in the fighting, he said. The rest of the robbers, who are believed to belong to the Sinhalese extremist Janatha Vimukti Peramuna (JVP or Peoples Liberation Front) fled into the jungle.

Police added that part of the loot from the May 4 tourist hotel robbery had been found in the robbers' den along with several other items previously reported stolen by foreigners.

The robbers made off with over a million rupees (25,000 dollars) worth of cash and goods during the midnight raid on the Sigiriya Village Hotel some 160 kilometers (100 miles) from here.

The shooting of the ringleader came hours after Colombo announced it was providing army protection for tourist hotels in north-central regions of the Indian Ocean island to prevent future bandit attacks.

Tourism was once a major foreign exchange earner for Sri Lanka before the island was hit by ethnic strife in 1983.

Tourist arrivals have been showing a marked increase this year and tourist industry officials, worried about bad publicity, have urged the government to take strong measures to prevent robberies.

TOKYO (MAY 10) - NEC Corp., a leading Japanese electronics maker, said on Thursday it would start mass production of 4-megabit dynamic random access memory chips (4MDRAM's) in the United States from April.

NEC said its American subsidiary, NEC Electronics Inc. set up in March 1981 in California, plans to produce two million 4MDRAM's monthly in April-September next year and to double its monthly production to four million units by the middle of 1992.

NEC has decided to invest about 400 million dollars to begin mass production of 4MDRAM's first in the United States, where there are many large-lot chip users.

#90130d8360 05/10/1990 ~French/German News Agency
TAIPEI (MAY 10) - Premier Lee Huan and his Cabinet resigned en masse Thursday to allow President Lee Teng-hui to name controversial defense minister General Hau Pei-tsun to head the government later this month.

Premier Lee, Vice Premier Shih Chi-yang, and 17 other top officials from eight ministries and two commissions submitted their joint resignation following a Cabinet meeting.

The 73-year-old premier, who has enjoyed a high popularity rating since taking office on June 1, is to be named presidential adviser by President Lee, who is to be inaugurated May 20 for a full-six year term following re-election.

Lee Huan expressed appreciation to the Cabinet members for their support in his 11 months of premiership and asked them to extend the same support to his successor, whom he described as "honest, democratic and knowledgeable " according to government spokesman Shaw Yu-ming who was at the Cabinet meeting.

The president's surprise choice of the four-star general as the new premier has triggered street protests by opposition members and student activists who charged the move would lead to military intervention in the government.

Gen. Hau, 71, has reiterated his commitment to carry out democracy since the planned nomination became public a week ago and said a priority of his new task is to restore social order "so that people can live here at peace."

He has also said equal emphasis would be put on both political and administrative reforms, to restore the function, authority and credibility of the government.

It has been reported that outgoing economic minister Chen Li-an, son of respected former vice-president Chen Cheng, is to succeed Gen. Hau to head the defense ministry.

Other appointments to the next Cabinet are yet to be finalized by Gen. Hau, who is scheduled to take office June 1 following endorsement of the parliament.

During his premiership, Lee Huan, former powerful secretary general of the ruling Kuomintang (KMT), eased hostility with Beijing by allowing expanded civilian contacts and trading activities with the Chinese mainland.

He had also launched a crackdown on rampant underground economic activities involving illegal investment houses and futures companies.

But his tenure also saw escalating social disorder caused by worsening crimes and anti-government activities over political and environmental issues.

Threats of kidnappings and more violent crimes involving smuggled weapons have prompted a growing number of local businessmen to move their homes abroad and shift their operations overseas, seriously jeopardizing Taiwan's economic development.

A total of 69 people were executed last year for heinous crimes as compared with an average of 10 people annually in previous years.

NEW YORK (MAY 10) - Japan's Daiwa Bank has agreed to help New York state's small export firms with leveraged loans, authorities said here.

In announcing the plan Wednesday, Stephen Berger, executive director for the Port Authority of New York and New Jersey, praised Daiwa Bank for what he called an "innovative approach to stimulating exports."

He said the plan was also "a significant step in the effort to reduce this country's 100-billion-dollar trade deficit, of which almost 50 percent is with Japan."

Under the program, New York state's Job Development Authority (JDA), which lends money to small- and mid-sized New York-based exporters, is to deposit 250,000 dollars in a Daiwa Bank interest-earning cash collateral account

that leverages - or boosts - the deposit at a ratio of four to one.

The scheme would provide an additional one million dollars to the JDA, which had been running out of money for exporters who were ineligible for regular bank loans.

The new funds would be administered by the Port Authority's XPORT, a publicly owned international trading firm, and would be available to exporters with annual sales of 10 million dollars or less and employing fewer than 100 people.

Singapore (MAY 10) - A singapore-registered airline has linked with a large European carrier to aid its take-off as the republic's third scheduled air carrier after Singapore Airlines and Tradewinds, officials said Thursday.

The carrier, Region Air, has signed a two-year agreement with Air Europe in which Air Europe will, among other things, help the Singapore carrier start its operations, obtain expertise and secure traffic rights.

Air Europe, which has a fleet of 40 aircraft, is now planning its scale of operations and a feasibility study of the new pact.

''Both airlines are at the tail-end of a joint study and have so far found that a smaller-scale intra-Asean operation and a bigger-scale schedule covering more distant destinations such as Taiwan, Japan an d South Korea, are viable,'' an official said.

Asean, the Association of Southeast Asian Nations, groups Thailand, Malaysia, Singapore, Indonesia, the Philippines and Brunei.

#90130d8450 05/10/1990 ~French/German News Agency

LUDWIGSHAFEN, West Germany (MAY 10) - West German chemical group BASF said Thursday its profit and sales fell in the first quarter of this year, due to the strength of the Deutsche mark.

Consolidated pre-tax profit was down 6.6 percent on the same period last year at 845 million Deutsche marks (506 million dollars), while worldwide sales were down 0.7 percent at 11.88 billion Deutsche marks (7.1 billion dollars).

The Deutsche mark's strength against the dollar, the yen and the pound sterling had seen group sales fall in the United States, Japan and Britain

as it had pushed up the price of BASF products compared with those of its competitors, the group said in a statement.

BASF said it had also had problems with its Brazilian subsidiary in the first quarter, with "a significant drop in both sales and profit."

But it said it did not expect overall sales in volume terms to fall in the coming months.

#90130d8610 05/10/1990 ~French/German News Agency

FRANKFURT, West Germany (MAY 10) - West German stock exchanges have invited senior officials from eastern European countries to come and see how the system works, as part of efforts to help eastern European states planning to open up their own bourses.

Some 70 officials from nine Eastern bloc countries are to visit the Frankfurt exchange Monday and Tuesday on an all-expenses-paid trip for a seminar introducing them to the stock exchange system.

It is the first time a western stock exchange has taken such an initiative to demonstrate to Eastern countries the mechanisms and functioning of a stock exchange and how it functions in a free market economy.

Only two Eastern bloc countries are currently anywhere near opening their own stock market: Yugoslavia, which opened its first exchange at the end of last year and Hungary, where an exchange is due to open on June 21.

The West German bourse has already provided regular consultation to the Hungarians on the opening of the Budapest market.

But many other countries, including the Soviet Union, have expressed an interest in opening up a stock market.

The 70 participants at next week's Frankfurt seminar include 21 representatives from Eastern European finance ministries, and 17 from central banks.

East Germany, Czechoslovakia, Yugoslavia and Hungary are sending the largest contingents.

"We have been amazed by the amount of interest. At the beginning, we thought we would have only about 30 particiants," said Ruediger von Rosen, director of the working group of the West German stock exchanges, which initiated the project.

CANBERRA (MAY 10) - Australia will press to ease restrictions on high technology exports to Eastern Europe, Foreign Minister Gareth Evans told parliament Thursday.

Mr. Evans said the restrictions placed by the Western watchdog Coordinating Committee for Multilateral Export Control (COCOM) hampered world trade.

Australia will back the plan of U.S. President George Bush to relax trade restrictions for Eastern Europe when the governing council of COCOM meets next month, Mr. Evans said.

He said most Western nations backed Mr. Bush's call.

MADRID (MAY 10) - Almost all Madrid branches of private banks were closed Thursday as employees began a three-day strike in support of an 8.6 per cent pay claim, union sources said.

Some 95 percent of private bank branches in the Spanish capital closed their doors, a union spokesman said, although a few were kept open under police protection.

The management is offering a 7.6 percent pay increase, union sources said.

The two unions involved are also asking for a 30-hour reduction in working time per year.

The pay negotiations cover some 150,000 workers in private banks, which account for some six percent of the Spanish banking sector.

#90130d9020 05/10/1990 ~French/German News Agency
CAPE TOWN (MAY 10) - The general uneasy climate in South Africa could dampen economic growth this year, the Bureau for Economic Research (BER) of the University of Stellenbosch reported Thursday.

While further sanctions look likely to be kept at bay, large-scale foreign loans are unlikely to become available, but it may become easier to roll over existing debts, said the report, a forecast on the South African macro-economy.

Authorities will stick to a market-orientated economic policy, with short-term interest rates likely to remain at current high levels

throughout 1990 and 1991.

Wages and salaries are anticipated to increase rapidly and gross domestic product growth will be 0.8 percent during 1990, recovering to around 2.5 per- cent in 1991, the report said.

Unemployment will increase during this forecast period and the economy is generally expected to contract up to mid-1991, the BER report warned.

More optimistically, it predicted that the agricultural sector would continue to improve its performance and the level of gold and foreign reserves should improve during the current year.

Inflation is expected to run at 14.2 percent for 1990 and at 11.9 percent next year.

The BER said that its forecast was based on the premise that political change would continue at a pace that would keep sanctions at bay and avoid a major negative influence on the domestic economy.

#90130d9270 05/10/1990 ~French/German News Agency

HONG KONG (MAY 10) - International media baron Rupert Murdoch is considering applying for a listing on the local bourse for his South China Morning Post, a leading English-language daily here, the Post said Thursday.

Mr. Murdoch's Australia-based News Corp. Ltd., which owns the Post, was considering having the listing "effected by an offer for sale of a proportion of issued capital," the Post said in a statement.

It said the offer would be made through its financial advisers, Standard Chartered Asia Ltd.

"A further announcement will be made when a final decision has been reached."

Financial sources said the Post logged a profit of about 400 million Hong Kong dollars (51 million U.S.) last year and put the paper's market value at four billion dollars (513 million U.S.)

The sources said News Corp. planned to let the paper go public "in the next few months."

Australian-born Mr. Murdoch, a U.S. citizen, took over the Post in December 1986 from the daily's then owners, including U.S. publishing giant Dow Jones and Co. Inc, the HongKong and Shanghai Banking Corp. and top local

tycoon Li Ka-shing, for about 2.3 billion dollars (295 million U.S.)

The Post was listed on the Hong Kong Stock Exchange before the takeover.

In Australia, market analysts said that News Corp. could reap about 300 million U.S. dollars if it offered up to 50 percent ownership to the public.

Nestor Hinzack, a director of Burdett Buckeridge and Young Ltd. said the decision was part of News Corp.'s ongoing debt cutting process.

"The market is actually looking for debt level reductions," he said, adding that News Corp. was viewed as having a "high level of debt."

News Corp. shares fell five cents in Sydney Thursday to 10.15 Australian dollars.

The stock has been sold off recently ahead of an expected poor quarterly profit result to be announced next week.

PERTH, Australia (MAY 10) - The Federal Court in Perth on Thursday froze British publisher Robert Maxwell's 14.9 percent stake in Alan Bond's newspaper arm, The Bell Group Ltd.

Judge Malcom Lee said he issued the order "to preserve the status quo" before Bell managing director David Aspinall went on trial on July 1 to determine whether he broke the law by buying Bell shares before selling them on to Mr. Maxwell.

The court's ruling will prevent Mr. Maxwell selling any of his newly-acquired shares.

Australia's corporate enforcer, the National Companies and Securities Commission (NCSC), sought the injunction after earlier court action failed to prevent Mr. Maxwell receiving the shares from Mr. Aspinall.

The NCSC had alleged that Mr. Aspinall had contravened the companies code when he bought a 16.6 percent Bell stake on April 27.

The Western Australian State Government Insurance Commission (SGIC) had dumped its 19.6 percent Bell stake on the market, forcing down the price to as low as 0.5 Australian cents.

Mr. Aspinall sold 48.59 million shares to Mr. Maxwell in an off-market deal struck on April 29.

MANILA (MAY 10) - The Asian Development Bank (ADB) and International Finance Corp. (IFC) are considering providing equity and loans for a 370 million-dollar Philippine petrochemical project, officials said Thursday.

The Luzon Petrochemical Project, a Filipino-Taiwanese venture, will require 203 million dollars in loans and 167 million dollars in equity, the department of trade and industry (DTI) said.

The DTI issued a statement affirming full government support for the project, which has been mired in controversy.

Taiwan's USI-Far East group would provide 70 percent of the equity, the ADB and IFC 10 percent each, with Filipino investors holding the rest, DTI spokesmen said. Filipino equity is envisioned to rise to 30 percent.

The DTI said Britain's Commonwealth Development Corp. is being asked to provide an unspecified portion of the loan financing.

ADB spokesman Truman Becker confirmed the bank had been approached to provide a 30 million-dollar loan with a 16.7 million dollar equity participation, but said the project was still under study and that the ADB had not yet made any commitment.

A spokesman for the IFC said they were looking at a possible loan to the project, but added that their board had not yet approved it.

The petrochemical plant, to be located in Batangas province south of Manila, will produce basic materials for the plastics industry. The DTI said it would save the country 1.4 billion dollars in plastics imports over 10 years and create 13,000 jobs.

Critics charge that the Taiwan investors are not bringing in enough of their own money and are relying largely on loans from official and multilateral sources.

The state-run Philippine National Bank, the country's largest commercial bank, has pulled out of the project.

#90130d9570 05/10/1990 ~French/German News Agency
BRUSSELS (MAY 10) - Swedish automaker Volvo on Thursday dismissed as rumours reports that it planned to link up with Mitsubishi of Japan to build a joint factory in Ghent, Belgium.

All auto makers were in contact with others, including Japanese producers, Volvo's European director Lars Eriksson said in Brussels, but Volvo and Mitsubishi had no project for an association or cooperation accord.

As for the reports that Volvo and Mitsubishi planned a joint factory in Ghent, Mr. Eriksson dismissed them as "rumours on which the Swedish group does not wish to comment."

But he confirmed that Volvo planned to increase production at its existing Ghent factory, which currently turns out 95,000 vehicles a year, to 125,000 over two years.

Any agreement reached by Volvo would have to be approved by Renault, with which it has formed an alliance, Volvo group president Christer Zetterberg said. He was in Brussels to mark the 25th anniversary of Volvo in Belgium.

#90130d9820 05/10/1990 ~French/German News Agency

Warsaw (MAY 10) - Poland's economy put in a mixed performance in the first four months of 1990, with industrial output dropping, but inflation also greatly reduced, press reports here Thursday said, citing the Office of Statistics.

Industrial production was down by 27.6 percent in the first four months of 1990, according to the figures. In April alone, production was 30.9 percent below April 1989 levels.

Inflation in April was running at 152 percent, a major improvement from the 900 percent rate recorded at the end of last year, the figures show.

At the same time, Poland's foreign trade balance produced a record surplus for a four-month period amid a strong rise in exports and lower imports.

The office said that in trade with the West, Poland achieved a 1.2 billion dollar surplus in the first four months, along with a 1.4 billion ruble surplus in trade with other East Bloc countries.

In April, Polish exports to the West were 38.7 percent above April 1989 levels, while those to other East Bloc nations were 26.6 percent higher.

Government economic policy adviser Waldemar Kuczynski said that Warsaw did not plan any relaxation of its austerity policy. He said industry was still undergoing the adaptation to a market economy, and the government remained concerned about the possibility of a recurrence of record inflation.

-30- 1555
#90130d9830 05/10/1990 ~French/German News Agency
SINGAPORE (MAY 10) - A new quota system regulating car ownership in Singapore has sparked a booming black-market trade in the republic, car owners and motor vehicle traders said Thursday.

They said certificates permitting the purchase of new vehicles awarded to successful bidders at a recent auction are now being resold at up to 1,000 U.S. dollars above the original price.

One motor trader said a certificate allowing the purchase of a goods vehicle for which a successful bidder paid about 50 U.S. cents was now fetching 1,000 U.S. dollars.

Certificates for luxury cars are now being sold at between 2,500 and 3,000 U.S. dollars against their original auction price of 264 U.S. dollars and those for small passenger cars are fetching around 2,250 U.S. dollars against an auction price of 1,511 dollars.

The government had set a fixed number of certificates for each category, adding up to a total of 14,000. Keenest bidding was for the smaller cars most sought after by the average Singaporean.

The government introduced the quota system for vehicle ownership to restrict a heavy increase in vehicles in the republic.

Auctions of certificates allowing the purchase of cars, goods vehicles ad motor cycles are held quarterly, and since May 1 owners of new vehicles must produce such a certificate before they can register it.

In addition to the certificate, the would-be car owner has to pay import duety of about 150 percent of the value of the vehicle, a registration fee and road tax.

#90130d9860 05/10/1990 ~French/German News Agency
PARIS (MAY 9) - The French economy continued to grow in 1989 with gross domestic product advancing by 3.7 percent, but the rate of investment eased, the official INSEE statistical institute reported on Thursday.

All sectors of the economy grew, but manufacturing industry achieved growth of only 4.8 percent after a record 5.4 percent in 1988.

The driving forces of the economy were capital goods which grew by 6.4 percent after 4.9 percent, and consumer goods which rose by four percent after 3.6 percent.

Intermediary goods rose by 3.5 percent after 7.3 percent, while services rose by 5.3 percent.

Investment continued to be the most dynamic component of domestic demand, rising by six percent in volume terms after 8.5 percent, but the rate of investment by companies eased to 6.9 percent after 10.6 percent.

Investment by households held up at three percent in volume, with strong demand for cars and for household goods.

The food sector grew by 19.9 percent in volume and tourism registered a 56 percent increase in the bicentennial year of the French Revolution.

Consequently the balance of trade in goods and services showed a surplus of 17.1 billion francs.

But overall performance concerning energy and manufactured goods was down on the 1988 figures, and the balance of payments worsened by 10.6 billion francs (about 1.9 billion dollars).

This was due to a reduction of agricultural subsidies from the European Economic Community (EEC) and to higher interest rates.

Overall national requirements for finance were slightly lower at 12.9 billion francs (about 2.3 billion dollars) compared with 15.5 billion francs in 1988.

More tax was paid to the state because of an increase in personal incomes and increased economic activity which compensated for a reduction of sales tax.

Spending by the state was kept under control although the cost of financing the national debt rose by 11.7 percent.

#90130d9880 05/10/1990 ~French/German News Agency
MONROVIA (MAY 10) - The Liberian government denied reports that rebels fighting to overthrow the government of President Samuel Doe were close to Roberts International Airport near here.

An official statement late Wednesday accused the BBC of waging "psychological warfare" on the West African state by reporting "misleading" information about the four-month insurgency and said the British Broadcasting Corporation was confusing Liberians and the world.

A BBC report Wednesday said that rebels have reached Owensgroves, some 70 kilometers (45 miles) from Monrovia, or just 16 kilometers (10 miles) from

the international airport.

Hundreds of British, U.S. and other Western expatriates have used the airport to flee the country in recent weeks.

The BBC report contained an interview with a British national who was captured by rebels in the mining area of Yekepa, northeastern Nimba County.

The statement said government forces were in full control of Grand Bassa County which includes Owensgroves, and assured all international airlines that the airport was open and that there was no rebel threat in the area.

The statement described the report as a "new barrage of propaganda being waged by agents of the rebels in further promotion of their campaign to destabilize the government of Liberia."

Residents of Grand Bassa County and travellers to the county should disregard the report and go about their normal business, the statement concluded.

Meanwhile, the rebels released four Westerners - a Belgian, two Americans and a West German - on Tuesday near the Ivory Coast border as President Samuel Doe extended a two-week ultimatum for the rebels to surrender.

The insurgents are being led by former senior civil servant Charles Taylor who fled the country in 1984 after authorities charged him with embezzlement.

#90130d9890 05/10/1990 ~French/German News Agency

TOKYO (MAY 10) - Victor Co. of Japan Ltd. (JVC) said Thursday that films produced by its Los Angeles-based partnership Largo Entertainment would be distributed by Hollywood film studio Twentieth Century Fox Inc.

"Largo expects to announce shortly the first productions which fall under the Fox agreement," the Japanese electronics firm said in a statement.

Under the non-exclusive distribution agreement, Fox gains worldwide rights for theatres, home video and television in all countries except Japan where disribition will be handled by JVC itself, the company said.

Largo, formed as a partnership with Hollywood producer and former Fox president Lawrence Gordon in August last year, will wholly cover the costs of negatives, prints and advertising expenditure, it added.

A spokeswoman for JVC, whose first international production "Mystery Train" won an award at last year's Cannes International Film Festival, said the

company had so far invested some 100 million dollars in the partnership.

Mr. Gordon oversaw the production of such films as "Cocoon", "Aliens" and "The Fly" while he was president of Fox. Since going independent in 1986, he has produced four films including "Die Hard".

LONDON (MAY 10) - The trend for coffee prices in the coming months is slightly bearish, London traders E.D. and F. Man said in their latest report.

Demand traditionally falls at this time of year, as roasters have probably already covered their short-term needs and consumer stocks are fairly high, particularly in the United States.

As for supply, a recent lowering of Brazilian domestic prices is likely to lead to an increase in that country's exports, although there is still uncertainty about how much the world's leading producer wants to put on to the market.

These factors should counterbalance, at least temporarily, the fact that most producers of mild superior quality coffee have already sold most of their harvest, and a long-term trend to increased consumption, Man said.

In the absence of major unexpected developments, coffee prices are likely to remain at their present levels or fall slightly, the report added.

The pressure on prices is likely to be stronger in London than in New York, because of the greater availability of robustas.

West African producer regions have benefitted from recent heavy rainfall after a dry spell in March and early April, while social unrest in Ivory Coast could cease to be a factor given that the austerity measures which sparked the trouble have been abandoned.

Coffee prices are currently around 669 pounds a ton on the London futures market, after reaching 757 pounds a ton in mid-March, their highest level in six months, due to a shortage of Mexican coffee and disruption of West African deliveries.

MOSCOW (MAY 10) - All quantitative restrictions on trade between the European Economic Community and the Soviet Union are expected to be lifted by the end of 1995, European Commissioner for external relations and trade

policy Frans Andriessen said here Thursday.

Mr. Andriessen, who had earlier held talks with Soviet Foreign Minister Eduard Shevardnadze, told a press conference that recent trade agreements signed between the EEC and Moscow would mean "closer bilateral cooperation".

A two-day meeting of the mixed Soviet-EEC commission, set up last month to promote sectoral trade accords, began its discussions here Thursday under the chairmanship of Soviet deputy Foreign Minister Ernest Obminsky and EEC director for external affairs Horst Krenzler.

Mr. Andriessen said his own talks with Mr. Shevardnadze had touched on assistance in matters of professional training, joint ventures, private investment and cooperation in the field of nuclear energy.

The two also discussed the future of Europe, with Mr. Andriessen stressing that EEC integration was compatible with European integration.

#90130d9960 05/10/1990 ~French/German News Agency

MANILA (MAY 10) - President Corazon Aquino Thursday ordered shorter business hours for cinemas and grocery stores to ease an acute power shortage.

She also said the country's clocks are to be moved forward by an hour from May 21 to August 31 under a Daylight Saving Time (DST) scheme announced a week ago.

Mrs. Aquino said in a national emergency memorandum that supermarkets in shopping malls and department stores must open "not earlier than 10 a.m. and close not later than 8 p.m." on weekdays.

Cinemas were to open "not earlier than 12 noon, while the last full show should be run not later than 9 p.m." on weekdays.

Mrs. Aquino said lights in all public and private offices must be turned off during the one-hour lunch break "and not later than one hour after closing time",

while air conditioning units were to be turned off during the lunch break and "30 minutes before closing time."

But she said an earlier order to crack down on use of neon advertising beyond the 6-9 p.m. period would be modified to exclude hospitals and clinics,

morgues, houses, apartment buildings, and places used for sports activities.

Manila and surrounding provinces, where about 70 per cent of Philippine industries are situated, started experiencing regular power cuts late last year due to damage wrought by typhoons on power plants, a current drought, and ongoing repairs of other plants.

Prior to Mrs. Aquino's order to implement DST, the government had forced large firms to practice four-day workweeks to ease the strain on power supply,
which has raised fears of an economic slowdown this year.

Mrs. Aquino said Thursday that total systems loss by the Manila Electric Co., which distributes electricity to the capital and surrounding provinces,

now stood at 15 per cent, six per cent of which was due to pilferage and nine per cent to technical causes.

"As there are existing penal laws against theft of electricity, the first and immediate step is to enforce them vigorously," she added.

#90130d9970 05/10/1990 ~French/German News Agency
NEW DELHI (MAY 10) - The Indian government reaffirmed Thursday that it would not negotiate under duress with the United States on being singled out as an unfair trade partner.

Federal Commerce Minister Arun Nehru told parliement that India would not enter bilateral negotiations, either "secret or open," on the issue with the United States under threat of retaliation.

India is not going to be "intimidated or policed by anybody on the question of the country's sovereignty or economic independence," Mr. Nehru told the upper house.

"We are in agreement that the appropriate response was to refuse to negotiate under the threat of retaliation," the minister said in a hard-hitting speech to applause from MP's.

His latest statement came a week after he had declared in the lower house that New Delhi was against any talks with Washington under economic duress.

U.S. President George Bush last month named India as the only country to be kept on a list of trade partners with the most offensive barriers to U.S. trade.

Japan and Brazil, who were clubbed together with India a year ago, were taken off the list mandated by the Super 301 provision of an omnibus trade bill passed in 1988.

The provision calls for negotiations with and then economic sanctions against countries that do not measure up to U.S. standards of free trade practices. India was named for a ban on operations of foreign insurance firms and controls on overseas investment.

"Since the U.S. government has not actually imposed any measure affecting India's exports, the matter is not ripe for taking recourse to the dispute settlement machinery of General Agreement on Tarriffs and Trade (GATT)," the minister said.

India holds that the U.S. action goes against GATT, which does not include investment and services and covers trade in goods only.

Mr. Nehru said that India would, however, continue to build pressure of international opinion against what he described as "the manifestly unfair course of action by the U.S."

"India would be also conveying its concerns bilaterally to other important trading partners," the minister said.

"We have a deep commitment to the multilateral process and we shall continue to strive for success of the multilateral trade negotiations aimed at the growth of all countries and development of developing countries. We expect that the U.S. will display a similar commitment," Mr. Nehru said.

He said it was unfair to say that India was engaging in restrictive trade practices vis-a-vis the United States.

The United States accounted for 20.6 per cent of India's foreign collaborations and had a total investment of 365 million dollars.

MADRID (MAY 10) EFE - Fortune was not on Spaniard Tomas Guerrero's side when, after planning a bank robbery for months, he arrived gun-in-hand to

find that a fiend with similar intentions had got there minutes before him and drained the bank of every peseta.

Police reported that Guerrero, 34, was arrested Wednesday by guards at a Banesto bank branch on the outskirts of Madrid which he had unsuccessfully tried to hold up just after it had been cleaned up by a more fortunate thief.

They said Guerrero had strolled into the bank with a sawn-off shotgun and demanded one of the cashiers to hand over the money.

To his astonishment, the bank employee apologized that she could not give him a single peseta as they had just been robbed.

Puzzled, Guerrero put his gun back in his bag and was leaving the building when guards detained him.

He later denied he had tried to hold up the bank, claiming he had seen the robber flee and throw away a bag and, suspecting there had been a robbery, had intended to return the bag to the bank not knowing there was a gun in it.

ALICANTE, SPAIN (MAY 10) EFE - Spanish police have arrested a 17-year-old Dutch student and charged him with attempting to smuggle 5 kg of high-grade heroin into the country.

A routine customs check turned up the drug when the suspect disembarked at the airport in the southeastern resort city of Alicante Wednesday from a flight originating in Amsterdam.

The cache of high-quality "brown sugar" heroin was discovered rolled up in a pair of trousers which the suspect was carrying in his hand luggage.

The youth, who was not identified by police, told an examining magistrate that he had no knowledge of the drugs or how it got into his belongings.

#90130e0015 05/10/1990 ~Latin America New Agency

Montevideo (MAY 10) EFE - Uruguayan President Luis Alberto Lacalle announced Thursday his country has opened talks with the International Monetary Fund paving the way for negotiations on rescheduling its foreign debt, one of Latin America's highest in per capita terms.

The talks are aimed at obtaining +a bill of good heath for the country's

finances+ to put on the bargaining table when Uruguay renegotiates its dlrs 6.33 billion debt with foreign creditor banks, Lacalle told reporters.

For a country with only 3 million inhabitants a debt of that size amounts to a heavy burden, and servicing it drains away roughly a third of the earnings from the country's booming export sector.

The Uruguayan president declined to reveal further details of the proposals to be presented to creditors but said they would involve requests for fresh low-interest funding and a reduction in the rates being paid on current loans.

Financial analysts have indicated that the Uruguayan government will seek to buy back its debt for dlrs 1.7 billion on the secondary market.

Although Lacalle said he was +moderately optimistic+ because Uruguay has always been prompt in meeting its obligations, analysts have pointed out that paradoxically, the country's good behavior would work to its disadvantage.

Creditor banks would have little incentive to recognize that Uruguay is a problem case, since it has never fallen in arrears or declared a unilateral moratorium as other Latin American countries have done, the analysts say.

#90130e0016 05/10/1990 ~Latin America New Agency

SANTIAGO (MAY 10) EFE - A Chilean Army prosecutor has ordered the arrest of more than 50 former secret police agents of ex-dictator Gen. Augusto Pinochet who are implicated in the killing of seven suspected leftist guerrillas, legal authorities reported.

Lawyer Nelson Caucoto Wednesday said military prosecutor Sergio Cea had issued the detention orders after the former National Information Center (CNI) agents had repeatedly ignored requests that they appear before a tribunal investigating the murders.

The seven suspected rebels, members of the Manuel Rodriguez Patriotic Front (FPMR), were killed June 10, 1987, in what police described as a shootout.

But rights groups claim the seven were deliberately killed by the agents and deny there had been any confrontation.

Five other suspected FPMR members were killed in separate incidents the same night.

Caucoto has also called for an investigation into the burning last year of the house where the slaying of the seven occurred, which he claims destroyed vital evidence that the victims were shot at point blank range while lying on the floor.

The CNI, was abolished by Pinochet on February 22, 17 days before he handed over office to civilian President Patricio Aylwin, ending a near 17-year-long military dictatorship.

Most of its agents were believed to have been incorporated into the Army's intelligence unit DINE, which is controlled by Pinochet in his capacity as Armed Forces chief.

Caucoto said Cea had informed Defense Minister Patrico Rojas of the matter in the hope the minister would intervene and ensure that the former CNI agents were brought forward.

Before handing over power to Aylwin, Pinochet repeatedly warned that he would not tolerate any repercussions against his men for alleged human rights abuses during his rule.

The FPMR, formed in 1983, carried out numerous guerrilla attacks during the military dictatorship, most notably the 1986 assassination attempt on Pinochet, in which five of the general's bodyguards were killed.

It has vowed to continue its attacks despite the return to democracy.

#90130e0025 05/10/1990 ~Latin America New Agency

LA PAZ (MAY 10) EFE - Police fired teargas and birdshot at striking miners when they blocked the main avenue through the Bolivian capital Thursday.

The miners responded by hurling firecrackers at the police as they choked the centre of La Paz in a move aimed at reviving the country's flagging general strike.

The miners had been arriving in La Paz for several days to protest in support of the general strike called April 26 by the Bolivian Workers' Federation (COB) for better wages and working conditions.

The strike call, which is only affecting state-run mines and some Bolivian universities, was renewed Wednesday night by the COB, which decided to block roads in the interior and demonstrate in La Paz.

COB is seeking a wage rise of 18.9 per cent for public employees that would serve as a basis for negotiations with the private sector, easier

credit for peasant farmers, and a general development plan.

A week ago, teachers returned to work after being offered a 17 per cent wage rise, a move described by COB leader Daniel Santalla as a "betrayal".

Government officials claimed at the time that only 5 per cent of workers had heeded the strike call.

LONDON (MAY 10) XINHUA - FORMER BRITISH CABINET MINISTER MICHAEL HESELTINE, FAVORITE TO SECCEED PRIME MINISTER MARGARET THATCHER AS CONSERVATIVE LEADER, TODAY DENIED THAT HE IS A CHALLENGER FOR THE RULING PARTY'S LEADERSHIP.

HESELTINE SAID HE MADE THE FRESH CALL FOR REFORM OF A NEW POLL TAX MERELY AS A CONSERVATIVE BACKBENCHER AND DENIED THAT THIS MEANT HE WAS WAGING AN UNDECLARED LEADERSHIP CAMPAIGN.

HE WAS RESPONDING TO QUESTIONS ABOUT AN ARTICLE IN TODAY'STIMES NEWSPAPER IN WHICH HE WARNED THAT URGENT REFORMS TO THE UNPOPULAR COMMUNITY CHARGE, OR POLL TAX, ARE VITAL FOR THE GOVERNMENT TO BE SURE OF WINNING THE NEXT GENERAL ELECTION.

"THERE IS NO TIME TO BE LOST. THERE WILL BE NO SECOND CHANCE," HE SAID IN THE ARTICLE.

HE SAID VOTERS BELIEVED THE TAX WAS "EITHER TOO HIGH, UNFAIR OR BOTH" AND IT CREATED A LINGERING SENSE OF INJUSTICE WHICH THEY WANTED REMEDIED.

THE POLL TAX, WIDELY REGARDED AS UNJUST BECAUSE IT LEVIES AN EQUAL CHARGE ON RICH AND POOR ALIKE, HAS SPARKED PROTESTS AROUND THE COUNTRY AND THE WORST RIOTS IN LONDON THIS CENTURY.

IN A RADIO INTERVIEW, HESELTINE DENIED THE ARTICLE WOULD BE SEEN AS A PERSONAL MANIFESTO AND SAID THE TIMING OF ITS PUBLICATION WAS LINKED TO HIS APPEARANCE ON BBC'S "QUESTION TIME" PROGRAM.

HESELTINE SAID HE WOULD CONTINUE TO WORK FOR A CONSERVATIVE VICTORY AT THE NEXT GENERAL ELECTION.

HESELTINE, A FORMER DEFENSE SECRETARY WHO WALKED OUT OF THATCHER'S CABINET IN 1986 IN A DISPUTE OVER BRITAIN'S ONLY HELICOPTER MAKER, IS A LONG-TIME POLL TAX OPPONENT AND HAS MAINTAINED A HIGH PROFILE DURING GROWING OPPOSITION TO THE TAX, GIVING DOZENS OF SPEECHES AND PRESS INTERVIEWS.

BUT HE HAS CONSISTENTLY SAID THERE IS NO VACANCY AT 10 DOWNING STEET AND

THAT HE WILL NOT STAND AGAINST THATCHER.

A RECENT POLL SHOWED HESELTINE HAD MORE THAN DOUBLE THE SUPPORT OF ALL OTHER POSSIBLE CONSERVATIVE CONTENDERS IF THATCHER DID STAND DOWN.

BAGHDAD (MAY 10) XINHUA - IRAQI PRESIDENT SADDAM HUSSEIN TODAY HELD TALKS WITH VISITING CHINESE LEADER WAN LI ON BILATERAL RELATIONS AND INTERNATIONAL AND REGIONAL ISSUES.

DURING THEIR TALKS, WAN LI, CHAIRMAN OF THE STANDING COMMITTEE OF THE CHINESE NATIONAL PEOPLE'S CONGRESS, TOLD HUSSEIN THAT CHINA AND IRAQ HAVE FORGED A PROFOUND FRIENDSHIP IN FIGHTING AGAINST EXTERNAL INTERFERENCE AND DEVELOPING THEIR NATIONAL ECONOMY AND CULTURE.

"THE SINO-IRAQI FRIENDSHIP IS NOT ONLY IN THE INTEREST OF THE TWO PEOPLES, BUT ALSO CONDUCIVE TO PEACE AND STABILITY IN THE WORLD," HE ADDED.

HUSSEIN SAID THAT GREAT CHANGES HAVE TAKEN PLACE IN INTERNATIONAL RELATIONS. THE EXCHANGE OF VISITS BY LEADERS OF THIRD WORLD COUNTRIES CAN POSITIVELY AFFECT THEIR BILATERAL RELATIONS, AND ALSO THE WORLD SITUATION, HE SAID.

WAN LI INVITED HUSSEIN TO VISIT CHINA AT HIS CONVENIENCE, AND HUSSEIN ACCEPTED THE INVITATION WITH PLEASURE.

WAN LI, WHO ARRIVED HERE LAST NIGHT TO START HIS FOUR-DAY VISIT TO THE COUNTRY, LAID A WREATH AT THE UNKNOWN SOLDIERS'S TOMB EARLIER THIS MORNING.

NEW DELHI (MAY 10) XINHUA - VISITING SPECIAL ENVOY OF THE EMIR OF KUWAIT MOHAMMAD SULAIMAN SAYEED ALI TODAY HELD TALKS HERE WITH INDIAN PRIME MINISTER V.P. SINGH AND EXTERNAL AFFAIRS MINISTER I.K. GUJRAL.

AFTER HIS HALF-HOUR MEETING WITH GUJRAL, ALI TOLD REPORTERS THAT HE HAD COME HERE HOPING TO FIND AN ATMOSPHERE OF COOPERATION AND UNDERSTANDING TO SOLVE SOME "HOT" ISSUES IN THE AREA.

HOWEVER, HE SAID, KUWAIT HAD NOT PROPOSED MEDIATION BETWEEN INDIA AND PAKISTAN TO DEFUSE THE TENSION BETWEEN THE TWO COUNTRIES OVER THE KASHMIR ISSUE.

ALI LATER CALLED ON V.P. SINGH AND HANDED OVER A MESSAGE FROM THE EMIR. THE KUWAITI ENVOY TOLD REPORTERS THAT THE LETTER FROM THE EMIR DEALT WITH

BILATERAL RELATIONS AND PROPOSALS FOR SOLVING THE "HOT" ISSUES IN THE AREA.

HE SAID HE HAD HANDED OVER A SIMILAR MESSAGE FROM THE EMIR TO PAKISTAN PRIME MINISTER MS BENAZIR BHUTTO RECENTLY.

THE KUWAITI ENVOY FLEW IN HERE ON WEDNESDAY (MAY 9) NIGHT FROM ISLAMABAD ON A THREE-DAY VISIT TO INDIA.

ALI DESCRIBED HIS MEETING (WITH PAKISTAN LEADERS) IN ISLAMABAD AS "POSITIVE."

MANILA (MAY 10) XINHUA - THE PHILIPPINE AIRFORCE (PAF) WEDNESDAY INTERCEPTED TWO JETLINERS COMING FROM JAPAN WHICH ENTERED OR TRIED TO ENTER PHILIPPINE AIRSPACE WITHOUT DIPLOMATIC CLEARANCE, THE OFFICIAL PHILIPPINE NEWS AGENCY REPORTED TODAY.

AIR FORCE CHIEF, MAJOR GEN. GERARDO PROTACIO, SAID THE FIRST INCIDENT OCCURED AT 8:30 A.M. WEDNESDAY WHEN A JAPAN AIR SYSTEM DC-10 JETLINER TRIED TO ENTER PHILIPPINE SKIES WITH NO PRIOR CLEARANCE.

THE PAF PHILIPPINE AIR DEFENSE IDENTIFICATON ZONE (PADIZ) RADIOED THE PILOT TO DIVERT ITS FLIGHT. HOWEVER, THE PLANE TURNED BACK WITHOUT REPLY AFTER BEING CHALLENGED, PROTACIO SAID.

AT 7:30 P.M. OF THE SAME DAY, A NORTHWEST 747 JUMBO JET WITH 45 PASSENGERS AND 13 CREW MEMBERS ON A CHARTERED FLIGHT TO SINGAPORE WAS SPOTTED BY PADIZ.

PADIZ RADIOED THE PLANE'S PILOT TO RE-ROUTE ITS FLIGHT. BUT THE 747 PILOT, CAPTAIN JERRY FLACK, REPLIED THAT HIS PLANE'S FUEL WAS NOT ENOUGH FOR A RE-ROUTE. HE ASKED FOR PERMISSION TO LAND AT THE MANILA INTERNATIONAL AIRPORT (MIA).

THE REQUEST WAS GRANTED AND THE PASSENGERS DISEMBARKED FROM THE AIRPORT WHILE THE PLANE'S PILOT SOUGHT CLEARANCE TO FLY OVER PHILIPPINE AIRSPACE.

COL. RODOLFO ASSISTANCE, PAF SPOKESMAN, SAID CLEARANCE WAS GRANTED AT 1:00 P.M. TODAY, BUT THE PLANE TOOK OFF FOR JAPAN WITHOUT THE PASSENGERS.

KATHMANDU (MAY 10) XINHUA - THE CURFEW WHICH HAS BEEN IN FORCE IN KATHMANDU, CAPITAL OF NEPAL, SINCE APRIL 23 WAS LIFTED TODAY.

THIS WAS ANNOUNCED BY GOVERNMENT CHIEF SPOKESMAN R.S. BISTA AT THE WEEKLY PRESS BRIEFING THIS AFTERNOON.

HE SAID, "THE CURFEW HAS BEEN LIFTED AS THE LAW AND ORDER SITUATION AND LIFE IN KATHMANDU HAVE RETURNED TO NORMAL."

ON APRIL 23, THE NEPALESE AUTHORITIES CLAMPED CURFEW IN KATHMANDU IN A BID TO PREVENT ANTI-SOCIAL TERRORIST ACTIVITIES AGAINST GOVERNMENTAL AND CIVILIAN BUILDINGS.

ON THAT DAY, VIOLENCE TOOK PLACE IN KATHMANDU, RESULTING IN DOZENS OF CASUALTIES.

THE SPOKESMAN ADDED THAT CURFEW WILL REMAIN IN FORCE IN THE URBAN AREAS OF LALITPUR, ANOTHER TOWN IN THE KATHMANDU VALLEY, FROM 10:00 HOURS TONIGHT TO 04:00 HOURS TOMORROW MORNING. IN LALITPUR, THE CURFEW HAS BEEN IMPOSED SINCE APRIL 25.

BEIRUT (MAY 10) XINHUA - A SPOKESMAN OF THE LEBANESE GOVERNMENT TODAY DENIED REPORTS THAT THE COUNTRY WOULD NOT ATTEND THE PROPOSED ARAB SUMMIT IF IT WAS HELD IN BAGHDAD OF IRAQ.

THE SPOKESMAN MADE THE REMARKS IN RESPONSE TO A REUTER REPORT WHICH QUOTED LEBANESE PRESIDENT ELIAS HRAWI AS SAYING DURING HIS VISIT TO SYRIA WEDNESDAY THAT HE WOULD NOT ATTEND THE SUMMIT IF IT WAS HELD IN BAGHDAD, ACCORDING TO RADIO "VOICE OF THE PEOPLE."

THE IDEA OF CONVENING AN ARAB SUMMIT WAS ORIGINALLY PROPOSED BY PALESTINIAN PRESIDENT YASSER ARAFAT TO COPE WITH THE GROWING SOVIET JEWISH IMMIGRATION TO ISRAEL.

THE SPOKESMAN INDICATED THAT THE LEBANESE GOVERNMENT HAD MADE SOME REQUESTS CONCEMING THE SUMMIT, NAMELY, DISCUSSION OF THE PALESTINE ISSUE IN CONNECTION WITH THE SOVIET JEWISH EMIGRATION TO THE OCCUPIED TERRITORIES AND THE LEBANESE CRISIS AND A CONSENSUS AMONG ALL ARAB HEADS OF STATE BEFORE THE SUMMIT.

PRESIDENT HRAWI AND PREMIER SALIM HOSS PAID A ONE-DAY SURPRISE VISIT TO DAMASCUS WEDNESDAY TO DISCUSS WITH SYRIAN LEADERS A SECURITY PLAN FOR WEST BEIRUT, THE PROPOSED ARAB SUMMIT AND THE SOVIET JEWISH EMIGRATION TO THE OCCUPIED TERRITORIES.

SO FAR, 18 ARAB COUNTRIES HAVE ANNOUNCED THEIR AGREEMENT TO THE CONVOCATION OF THE ARAB SUMMIT THAT WAS SAID TO BE HELD IN BAGHDAD AT THE END OF THIS MONTH.

MONROVIA (MAY 10) XINHUA - RESIDENTS IN THE LIBERIAN CAPITAL OF MONROVIA HAVE SUFFERED THE SHORTAGE OF PETROL IN THE PAST FEW DAYS AND GASOLINE IS BEING RATIONED IN THE CITY, THE LOCAL PRESS REPORTED TODAY. MANY GASOLINE DEALERS SAID THAT THERE HAD NOT BEEN FREQUENT SUPPLY OF GASOLINE THUS CREATING THE SHORTAGE.

MANAGING DIRECTOR OF THE LIBERIA PETROLEUM REFINING COMPANY PERRY ZULU SAID THAT THE COMMODITY IS BEING RATIONED AS A RESULT OF THE LACK OF FOREIGN EXCHANGE TO PROCURE IT.

HE SAID THAT FOUR MILLION U.S. DOLLARS ARE NEEDED MONTHLY FOR THE PURCHASE OF PETROLEUM PRODUCTS IN MONROVIA BUT THE GOVERNMENT GIVES ONLY ONE MILLION EVERY MONTH TO THE CORPORATION.

HE INDICATED THAT 2,000 BARRELS OF GASOLINE ARE NEEDED A DAY TO MEET THE DEMAND AND THE CORPORATION IS SUPPLYING LESS THAN THE REQUIRED BARRELS. HOWEVER, HE SAID THAT THE CORPORATION HAS MADE AVAIABLE MORE THAN 3,000 BARRELS OF GASOLINE TO HELP EASE THE SITUATION.

BOGOTA (MAY 10) XINHUA - COLOMBIA PLANS TO BEGIN BUILDING COAL BRIQUET-MAKING PLANTS TO MAKE THE COMBUSTIBLE MINERAL TRANSPORTABLE TO HIGHLY DEFORESTED AREAS WHERE WOOD IS NORMALLY USED FOR DOMESTIC CONSUMPTION, THE GOVERNMENT ANNOUNCED WEDNESDAY.

THE PROJECT, WHICH AIMS TO CUT DOWN ON DEFORESTATION, ENTAILS PRODUCING COAL BRIQUETS FROM BITUMINOUS COAL DERIVED FROM DEPOSITS DISCOVERED NEAR COFFEE GROWING REGIONS TO REPLACE WOOD USED FOR COOKING AND DRYING GRAINS.

COLOMBIA'S MINISTRY OF MINES AND ENERGY SAID THE PROJECT IS ALSO DESIGNED TO OPEN UP A NATIONAL MARKET FOR THE MINERAL, WHICH IS IN AMPLE SUPPLY HERE, IN ADDITION TO COMBATING DEFORESTATION.

ACCORDING TO A PRESIDENTIAL PRESS RELEASE, A COOPERATION ACCORD SIGNED IN BEIJING IN 1987 BETWEEN THE PEOPLE'S REPUBLIC OF CHINA AND COLOMBIA LAID THE GROUNDWORK FOR THE PROJECT, WHICH CONSISTS OF FIRST BUILDING A PILOT PLANT WITH A CAPACITY OF 10,000 TONS A YEAR AND A LONGEVITY OF 20 YEARS, TO PRODUCE THE APPROXIMATELY ONE KILO, CYLINDRICAL BRIQUETS. ONCE THE PLANT'S USE, OPERATION AND ECONOMIC AND SOCIAL PROFITABILITY ARE PROVEN, THE NUMBER OF PLANTS MAY BE INCREASED IN ACCORDANCE WITH THE DEMAND.

THE MINISTRY SAID IT HAS HELD TALKS WITH CHINA'S NATIONAL COAL IMPORT AND

EXPORT CORP. REGARDING THE PURCHASE OF SUCH A PLANT AND THE ACCOMPANYING TECHNOLOGY.

CARACAS (MAY 10) XINHUA - U.N. SECRETARY-GENERAL JAVIER PEREZ DE CUELLAR WEDNESDAY SAID THE FOREIGN DEBT CONTINUED TO BE THE GREATEST OBSTACLE TO LATIN AMERICA AND THE CARIBBEAN'S PARTICIPATION IN THE FAST CHANGING WORLD ECONOMY.

IN A MESSAGE SENT TO A ECLA MINISTERIAL-LEVEL CONFERENCE, PEREZ DE CUELLAR SAID THE FAILURE TO FIND A RAPID AND EFFECTIVE SOLUTION TO LATIN AMERICA'S CRIPPLING FOREIGN DEBT THREATENED TO TURN THE REGION'S PARTICIPATION IN THE SO-CALLED GLOBALIZATION OF THE WORLD ECONOMY INTO ONE OF INVOLUNTARY ABSORPTION AS OPPOSED TO NEGOTIATED INTEGRATION.

PEREZ DE CUELLAR SAID IT WAS ESSENTIAL TO ORGANIZE THE POSITIVE ELEMENTS OF EACH COUNTRY, AS WELL AS OF THE REGION AS A WHOLE, TO RESTRUCTURE THEIR ECONOMIES.

THIS WOULD NECESSARILY REQUIRE THE ENERGETIC PROMOTION OF THE INTEGRATION OF THE REGIONAL ECONOMIES, WHICH WOULD NOT ONLY LIGHTEN THE BURDEN OF THE FOREIGN DEBT, BUT ALSO BUY THE TIME AND GENERATE THE RESOURCES NECESSARY

FOR THE TASK AND FOR CONSOLIDATING DEMOCRACY IN THE AREA, HE SAID.

IT IS THE RESPONSIBILITY OF THE INTERNATIONAL COMMUNITY, HE STRESSED, TO DECISIVELY SUPPORT THE EFFORTS OF DEVELOPING COUNTRIES TO SOLVE THEIR GRAVE ECONOMIC AND SOCIAL PROBLEMS BY FOSTERING A FAVORABLE INTERNATIONAL ECONOMIC CLIMATE.

FACED WITH THE GREAT CHALLENGES OF A NEW DECADE, HE SAID, LATIN AMERICA AND THE CARIBBEAN MUST STRENGTHEN THEIR INTEGRATION WITH AN EYE TOWARDS DEVELOPING THEIR ECONOMIES AND BOOSTING THEIR NEGOTIATING POWER ON THE WORLD STAGE.

IN HIS MESSAGE, PEREZ DE CUELLAR SAID HE WAS CONVINCED THAT LATIN AMERICA AND THE CARIBBEAN, WITH THEIR UNTAPPED POTENTIAL AND HUMAN RESOURCES, WILL EMERGE VICTORIOUS FROM THIS DIFFICULT PERIOD.

#90130h0137 05/10/1990 ~Chinese News Agency

HARARE (MAY 10) XINHUA - THE AFRICAN NATIONAL CONGRESS (ANC) AND THE PAN AFRICANIST CONGRESS OF AZANIA (PAC) HAVE CONDEMNED SPAIN FOR ITS DECISION TO LIFT SANCTIONS AGAINST SOUTH AFRICA.

A SPANISH FOREIGN MINISTRY SPOKESWOMAN ANNOUNCED ON TUESDAY THAT HER COUNTRY IS LIFTING THE BAN ON FREIGHT FLIGHTS TO SOUTH AFRICA, ADDING THAT THERE ARE POSSIBILITIES OF LIFTING THE COUNTRY'S BAN ON VISITS TO SOUTH AFRICA BY SPANISH SPORTSMEN AND ENTERTAINERS.

SHE SAID THE SPANISH GOVERNMENT DECIDED TO PARTIALLY LIFT ITS SANCTIONS ON PRETORIA BECAUSE THE SOUTH AFRICAN GOVERNMENT AND THE ANC HAVE MADE PROGRESS IN RECENT TALKS AND PRESIDENT F.W. DE KLERK IS GOING TO VISIT SPAIN.

ANC CHIEF REPRESENTATIVE IN ZIMBABWE MAX MLONYENI WEDNESDAY DESCRIBED SPAIN'S DECISION AS "HYPOCRITICAL".

"SOUTH AFRICA HAS DONE NOTHING MATERIALLY SO FAR TO BE REWARDED FOR. WE ARE STILL AT A PHASE WHEN APARTHEID IS STILL 100 PERCENT INTACT," HE SAID.

DE KLERK'S CURRENT VISIT TO EUROPEAN COUNTRIES HAS NOTHING TO DO WITH ENDING APARTHEID BUT IS SIMPLY AN ATTEMPT BY DE KLERK TO BREAK OUT OF THE INTERNATIONAL ISOLATION OF SOUTH AFRICA, SAID MR. MLONYENI.

HE SAID IT IS INTERNATIONAL PRESSURES, TOGETHER WITH THE EFFORTS OF PEOPLE OF SOUTH AFRICA, THAT HAVE BROUGHT THE REGIME TO THE POINT WHERE THERE IS NO ALTERNATIVE BUT TO ABOLISH APARTHEID.

PAC CHIEF REPRESENTATIVE IN ZIMBABWE THOBILE GOLA ON THE SAME DAY ACCUSED

SPAIN OF UNDERMINING THE ASPIRATIONS OF THE BLACK MAJORITY BY MAKING THE DECISION.

"THE WHOLE INTERNATIONAL COMMUNITY HAS TAKEN A POSITION THAT SANCTIONS AND OTHER FORMS OF ISOLATION SHOULD BE MAINTAINED AS THE NEGOTIATIONS HAVE NOT EVEN STARTED, BUT SPAIN IS ALREADY CREATING A DANGEROUS PRECEDENT WHICH WILL BE FULLY EXPLOITED BY THOSE COUNTRIES WHO HAVE RESISTED SANCTIONS," SAID THE PAC OFFICIAL. HOWEVER, SPANISH AMBASSADOR TO ZIMBABWE JOSE PAZ TODAY DEFENDED HIS COUNTRY'S DECISION TO RESUME CARGO FLIGHTS TO SOUTH AFRICA SUSPENDED THREE YEARS AGO, SAYING THAT THE FLIGHTS ARE NOT INCLUDED IN THE EUROPEAN ECONOMIC COMMUNITY SANCTIONS PACKAGE.

#90130k0093 05/10/1990 ~Japanese News Agency

TOKYO (MAY 10) KYODO - PRIME MINISTER TOSHIKI KAIFU TOLD JAPAN SOCIALIST PARTY SECRETARY GENERAL TSURUO YAMAGUCHI ON THURSDAY THAT JAPAN WILL

IMPLEMENT AN 810 BILLION YEN THIRD LOAN PACKAGE TO CHINA AS PROMISED.

KAIFU MADE THE REMARK AT A MEETING WITH YAMAGUCHI, WHO IS DUE TO VISIT CHINA FOR EIGHT DAYS FROM MAY 18 AS HEAD OF A PARTY DELEGATION, JSP OFFICIALS SAID.

KAIFU WAS QUOTED AS SAYING THE JAPANESE GOVERNMENT IS RESPONSIBLE FOR HELPING TO ESTABLISH AN ENVIRONMENT IN WHICH THE LOAN COULD BE IMPLEMENTED TO EVERYONE'S SATISFACTION.

YAMAGUCHI CALLED ON KAIFU AT THE PRIME MINISTER'S OFFICIAL RESIDENCE AND URGED THE GOVERNMENT TO LIFT A FREEZE ON THE LOAN PACKAGE.

THE PRIME MINISTER TOLD THE JSP LEADER THAT THERE IS NO PROBLEM IN TELLING THE CHINESE THAT JAPAN WILL CERTAINLY HONOR ITS PROMISE. KAIFU, HOWEVER, POINTED TO DIFFICULTIES IN RESUMING AID IMMEDIATELY, NOTING THE TOUGH INTERNATIONAL SENTIMENT AGAINST CHINA PARTICULARLY IN THE U.S. CONGRESS, JSP OFFICIALS SAID.

JAPAN PROMISED TO EXTEND THE YEN LOAN PACKAGE FOR 1990-95 IN AUGUST 1988 WHEN THEN PRIME MINISTER NOBORU TAKESHITA VISITED CHINA.

BUT JAPAN HAS FROZEN IMPLEMENTATION OF THE LOAN SINCE THE MILITARY CRACKDOWN ON THE PRO-DEMOCRACY DEMONSTRATORS IN BEIJING ON JUNE 4 LAST YEAR.

CHINESE AMBASSADOR TO JAPAN YANG ZHENG, WITH WHOM YAMAGUCHI MET WEDNESDAY, ASKED THE MAIN OPPOSITION PARTY TO URGE THE JAPANESE GOVERNMENT TO RESUME ECONOMIC ASSISTANCE TO CHINA.

YAMAGUCHI AND HIS DELEGATION WILL MEET SONG PING, ONE OF THE SIX STANDING COMMITTEE MEMBERS OF THE COMMUNIST PARTY POLITURO ON MAY 18. HE WILL MEET COMMUNIST PARTY GENERAL SECRETARY JIANG ZEMIN PROBABLY THE FOLLOWING DAY, JSP OFFICIALS SAID.

THE DELEGATION WILL BE THE FIRST SENT BY JAPAN'S MAIN OPPOSITION PARTY TO CHINA AFTER IT FROZE TIES WITH CHINA IN PROTEST AGAINST THE MILITARY CRACKDOWN.

TOKYO (MAY 10) KYODO - NIPPON TELEGRAPH AND TELEPHONE CORP. (NTT) WILL STRENGTHEN ITS TOP MANAGEMENT IN ORDER TO OVERCOME THE PENDING PROBLEM OF ITS POSSIBLE BREAKUP, INDUSTRY SOURCES SAID THURSDAY.

THE SOURCES SAID VICE PRESIDENT HITOSHI KOJIMA WILL BE PROMOTED TO PRESIDENT TO SUCCEED HARUO YAMAGUCHI, WHO WILL BE MADE CHAIRMAN.

THE NTT CHAIRMANSHIP HAS BEEN VACANT SINCE FORMER CHAIRMAN HISASHI SHINTO RESIGNED IN LATE 1988 AFTER HIS INVOLVEMENT IN THE RECRUIT INFLUENCE-PEDDLING SCANDAL CAME TO LIGHT.

THE PERSONNEL CHANGES, ALSO INCLUDING THE APPOINTMENT TO VICE PRESIDENT OF SHIGEO SAWADA, FORMER VICE MINISTER FOR POSTS AND TELECOMMUNICATIONS, WILL BE APPROVED AT A BOARD OF DIRECTORS' MEETING AFTER A SHAREHOLDERS' MEETING SLATED FOR LATE JUNE.

THE SOURCES SAID THE NEW MANAGEMENT TEAM IS INTENDED TO DEAL WITH THE BREAKUP ISSUE, WHICH IS EXPECTED TO RESURFACE IN DUE COURSE DESPITE A TEMPORARY FREEZE.

IN THE FACE OF FIERCE OPPOSITION FROM NTT AND THE RULING LIBERAL DEMOCRATIC PARTY (LDP), THE GOVERNMENT DECIDED IN MARCH TO SHELVE THE PROPOSED PARTITION OF NTT UNTIL 1995.

KOJIMA, 59, A GRADUATE OF HOKKAIDO UNIVERSITY, JOINED NIPPON TELEGRAPH AND TELEPHONE PUBLIC CORP., CURRENTLY NTT, IN 1953. HE HAS BEEN VICE PRESIDENT SINCE JUNE 1986.

#90130p2723 05/10/1990 ~PR Newswire

NEW YORK (MAY 10) PR NEWSWIRE - A revolutionary new process that converts standard two-dimensional films and videotapes to 3-D will be granted a U.S. Patent on May 15, paving the way for what could be the most exciting -- and most controversial -- computer imaging breakthrough since film colorization.

Co-inventor David M. Geshwind, president of Latent Image Development Corp. and the inventor of a patented, all-digital film colorization process, says "Our colorization and 2-D to 3-D conversion techniques are complimentary. While colorizing a black & white film may add realism, our new technique quite literally adds a whole new dimension."

Geshwind expects that, "Entertainment applications will probably lean toward children's programming, cartoons and videogames. There may not be a call for 'Lawrence of Arabia' in 3-D, but what about 'King Kong,' 'Snow White' or 'Teenage Mutant Ninja Turtles'?"

He adds that, "The non-entertainment potential may be even more important, 3-D displays are already available for medical, industrial, scientific, educational and military applications. Our techniques allow existing materials to be converted for these systems and for traditionally produced media to be integrated with 3-D productions."

The new process can convert film and video material for any 3-D display method including new LCD glasses just becoming available for videogames and home video -- even for holographic systems.

Describing Latent Image's technology, Geshwind says that the company's production facility will be built around high-performance workstations, containing graphic co-processor boards, transputers and high-density optical storage, and will employ sophisticated image processing with touches of artificial intelligence.

But he adds that, "A critical element of the system's intelligence will be provided by human operators, who are still the only 'programmable devices' capable of performing the kind of sophisticated and flexible pattern recognition tasks required to analyze general film and video imagery. But then, computers take over, providing the speed and precision available only from digital processors."

Latent Image will add its new 3-D conversion capabilities to the systems it is already implementing under the five-year "$20 million plus" production contract to colorize a library of black & white films and early television programs.

CONTACT: David Geshwind, president of Latent Image, 212-873-5487.

#90130p2738 05/10/1990 ~PR Newswire

LONDON (MAY 10) PR NEWSWIRE - AT&T ISTEL Limited announced that it has formed a new company called AT&T ISTEL Computer Systems Limited to market a broad line of AT&T Computer Systems products in the United Kingdom and Ireland.

The products will include client/server systems, high performance computers, StarLAN/StarGROUP(TM) System network hardware and software, and related terminals and peripherals. A client/server system links several personal computers or terminals (clients) via networking hardware and software to a more powerful computer (server), allowing the users to share information and services.

John E. Boyd, president of AT&T Computer Systems-international, is chairman of the new company. Mike Grant, formerly managing director of ISTEL Automation Limited, was named managing director.

The AT&T product line using UNIX(R) System V is targeted at customers with a need for networked computing solutions to provide integrated information systems across their operations.

To serve those customers, AT&T ISTEL Computer Systems Limited will

establish a network of direct sales organizations and value-added resellers, dealers, solutions partners, and systems integrators.

AT&T ISTEL Computer Systems Limited becomes ISTEL's second new business direction with AT&T, along with AT&T ISTEL Global Messaging Services Limited, to be formed since AT&T acquired ISTEL in October 1989. It is the third major AT&T Computer Systems' presence in Europe, including the opening last year of the Paris office and the Brussels regional headquarters.

AT&T ISTEL Limited, one of Europe's leading information technology services companies, provides computer systems and data communications services to specialized areas in commerce, industry and the public sector. Those areas include engineering, manufacturing, travel, retail, health care, automotive, distribution, and finance. The company employs over 2,000 people in the United Kingdom and the United States.

AT&T employs approximately 2,800 people in the United Kingdom in a wide variety of jobs related to telecommunications and computing. These employees' skills range from patent law to software engineering for telecommunications systems, and include integrated circuit design and disaster recovery techniques.

NEW YORK (MAY 10) PR NEWSWIRE - Quotron Systems Inc. today introduced Quotron F/X Trader, a global foreign exchange dealing system for the interbank market. The system is currently in Beta testing with 20 banks in New York and London. Commericial roll-out of the product is scheduled for later this year.

Designed with the help of foreign exchange dealers from the world's largest financial institutions, Quotron F/X Trader provides traders with the ability to manage up to six simultaneous trading conversations, all on one screen. Color-coded conversation "panels" within the screen and easily recognizable graphic symbols provide the exact status of each conversation. Traders can choose fixed-format conversations for rapid dealing, or free-form conversations for flexible messenging and inquiries. Current market rates, summaries of incoming calls and details of deals in progress can all be viewed at a glance on Quotron F/X Trader's single-screen display.

"In an industry of rapidly growing volume, increasing deal size and shrinking margins, Quotron F/X Trader's time has come," said Kenneth A.

Hines, vice president Quotron F/X Trader project. "F/X Trader is a tool designed for traders by traders. It is easy to use, offering both structured and unstructured conversation formats for trading negotiations, and it handles a greater number of simultaneous deals than any other system available today."

Quotron F/X Trader's full range of sophisticated features can be customized to fit each trader's needs. For example, incoming calls can be sorted and displayed by currency, and outgoing calls can be directed to a specific trader or to the entire trading desk at up to six banks, simultaneously. Designated information, such as a trader's frequent counterparties, currency pair being traded and typical deal amounts, can be pre-defined and automatically updated during the trading day, minimizing key entry and facilitating rapid communication.

Quotron F/X Trader also provides an electronic deal-capture feature that automatically transmits details about each transaction to the customer's existing front- and back-office systems. This eliminates re-keying errors and provides real-time updates to corporate ledgers and trader-support systems. In addition, Quotron F/X Trader prints deal tickets automatically and maintains a full electronic audit of all messages sent through the network.

A leading provider of financial information services for more than 30 years, Quotron Systems Inc. delivers real-time prices for more than 120,000 investment instruments through an international network of more than 100,000 terminals in 23 countries.

MIAMI (MAY 10) PR NEWSWIRE - Claire's Stores, Inc. (NYSE: CLE) today reported net sales for the month of April, led by same-store sales increases of 24 percent, reached a record level of $18,645,000 from $11,530,000 a year earlier, an overall increase of 62 percent. Sales for the first quarter ended May 5, 1990 increased 56 percent to $53,520,000 from $34,320,000 in the previous year, with same-store sales increasing 17 percent.

"We are pleased to report record sales for both April and the first quarter and therefore look forward to reporting record first quarter earnings," stated Rowland Schaefer, Claire's chairman and president.

Claire's Stores, Inc., the nation's premier retailer primarily specializing in one-stop shopping for popular priced women's fashion

accessories, currently owns and operates 851 stores in major enclosed malls in 47 states.

CLAIRE'S STORES, INC.

LOS ANGELES (MAY 10) PR NEWSWIRE - Carter Hawley Hale Stores Inc. (NYSE: CHH) today reported sales for the four weeks ended May 5, 1990, were $191.2 million, an increase of 2.1 percent from the $187.2 million recorded in the comparable fiscal period last year. The company also reported that sales for the 13 weeks ended May 5, 1990, were $590.9 million, an increase of .8 percent from the $586.2 million recorded in the same period last year. On a comparative store basis, sales were up 1.6 percent in April and up .3 percent for the 13 weeks.

Philip M. Hawley, chairman and chief executive officer, said, "Business turned stronger in the last part of the month and was particularly good in the junior and children's apparel categories."

Sales for the first nine months of the company's fiscal year ended May 5, 1990 were $2,234.5 million, an increase of 4.6 percent from the $2,136.8 million recorded in the comparable fiscal period last year. On a comparative store basis, sales were up 2.3 percent for the period.

Last year's comparable fiscal periods ended one week earlier due to the 53-week fiscal year in 1990. Sales in all periods reported exclude the Emporium store in downtown Oakland, which has been closed since the earthquake in the Bay Area.

Carter Hawley Hale operates 114 department stores under the names of The Broadway-Southern California, The Broadway-Southwest, Emporium, Thalhimers and Weinstocks.

COLUMBUS, OH (MAY 10) PR NEWSWIRE - Two American Electric Power (NYSE: AEP) units have received Environmental Achievement Awards for Ohio projects as part of Renew America's "Searching for Success" program.

The AEP Service Corporation's Fuel Supply Department, based in Lancaster, was honored for developing a successful wetland area. Ohio Power Company, headquartered in Canton, was honored for donating reclaimed surface-mined land for a wild animal preserve.

Renew America, a non-profit environmental education organization, will list these projects in its Environmental Success Index, a national data base for effective environmental programs.

AEP Fuel Supply created the wetland area, located near Coshocton, as part of its efforts in reclaiming the 84-acre site of a former underground mine and surface mine.

The cattails, moss and other vegetation in the wetland provide natural treatment of acidic water, as opposed to perpetual chemical treatment. This man-made wetland is designed to enhance the area's ecosystem and provide a habitat for wildlife at a time when many of the nation's wetlands are being destroyed.

Ohio Power Company donated a 9,154-acre tract to the International Center for the Preservation of Wild Animals in 1986 after the land had been mined and reclaimed by Central Ohio Coal Company, another AEP unit.

The International Center, located near Cumberland, will become North America's largest wild animal facility once it is completed. The first species of rare, endangered animals -- African plains animals such as zebras, elands and antelopes -- should arrive on the former Muskingum Mine land in September. Eventually, the center also plans to include other rare species such as cheetahs, snow leopards, rhinos, ibex and cranes.

AEP has also been widely honored for Ohio Power's ReCreation Land, another portion of the Muskingum Mine area which has been mined and reclaimed.

ReCreation Land's 30,000 acres feature areas for camping, hiking, picnicking, fishing, canoeing and hunting. There are more than 350 lakes and ponds in the area, encompassing more than 1,500 acres of water.

#90130p2753 05/10/1990 ~PR Newswire

NEW YORK (MAY 10) PR NEWSWIRE - The Prospect Group, Inc. (NASDAQ: PROSZ) today announced results for the first quarter ended March 31.

Revenues for the quarter increased to $38.3 million compared to $16.4 million for the same period in 1989. The net loss for the quarter of $1.0 million or $.04 per share improved from a $4.3 million loss or $.19 per share in 1989.

The quarter's results reflect strong performances of both Sylvan Foods Holdings, Inc., and The Forschner Group, Inc. Sylvan, which Prospect acquired in the second quarter of 1989, had revenues of $20.4 million, operating income of $2.2 million and net income of $1.1 million in the first quarter of 1990. Prospect holds a 51 percent interest in Sylvan. Forschner, in which Prospect has 59 percent ownership, had revenues of $10.2 million compared to $8.9 million in 1989, operating income of $.7 million compared to $.6 million in 1989, and net income of $.4 million compared to $.3 million in 1989.

Prospect intends to distribute its interests in both Sylvan and Forschner under the previously announced plan of complete liquidation and dissolution adopted by the board of directors on Feb. 8. The plan will be submitted to shareholders for approval at the annual meeting in late June.

The balance sheet comparison between March 31, 1990 and Dec. 31, 1989, reflects the deconsolidation of the Illinois Central Corporation, acquired by Prospect in March 1989 and which is included on the Dec. 31, 1989 balance sheet. Prospect distributed substantially all of its common stock in Illinois Central to Prospect shareholders in January 1990.

Gilbert H. Lamphere, chairman, president and chief executive officer, said: "Prospect is preparing for the distribution of assets and we want to move forward expeditiously after the shareholder meeting. The proxy will contain details of our plans and we hope to compete the bulk of the distributions in September. However, the company will retain its holdings in Recognition Equipment, Inc., and Noel Group, Inc., for the foreseeable future."

I reviewing the company's decision to liquidate, Lamphere said, "The directors and management believe that the distribution of assets is the most direct way to increase value for our shareholders and is consistent with the commitment made at the time of our public offering to create and return value to the investors."

#90130p2756 05/10/1990 ~PR Newswire

MALVERN, PA (MAY 10) PR NEWSWIRE - Vishay Intertechnology Inc. (NYSE: VSH) reported a record 49 percent increase in net earnings on a 9 percent increase in sales for the first quarter of calendar 1990, Dr. Felix Zandman, chairman and chief executive officer, announced today.

In the three months ended March 31, 1990, sales increased by 9 percent to $115,865,000 as compared with $106,010,000 in the year- earlier period. Net earnings increased by 49 percent to $6,321,000 or $.51 per share compared to $4,230,000 or $.36 per share in the previous year's quarter.

Commenting on the results for the quarter, Zandman stated: "Sales have been stronger for the first quarter than we had originally anticipated. The level of activity in the U.S. market has been strong, particularly at Dale, while the European sales have also been aided by the weaker dollar. The higher sales levels combined with the planned cost reductions which began in 1989 and continued during this quarter have resulted in a 57 percent increase in earnings before income taxes. We are confident for the future as we continue to reduce costs through synergies, consolidation and debt reduction."

Vishay Intertechnology Inc. is a leading U.S. and European producer of a wide range of electronic resistors and resistive sensors. It is also a major producer of other types of passive electronic components. The company's products are used in a broad range of industries.

#90130p2758 05/10/1990 ~PR Newswire

PLEASANTVILLE, NY (MAY 10) PR NEWSWIRE - The Reader's Digest Association, Inc. (NYSE: RDA) today reported that its net revenues for the quarter ended March 31, 1990, increased $47.1 million, or 9.5 percent, to $544.1 million from $497 million for the same period a year earlier.

Net income for the quarter was $59.3 million compared to $64.1 million for the same period in 1989. The decrease resulted primarily from a $13.1 million nonrecurring pre-tax expense for appreciation in the value of the company's equivalent stock units (ESUs). As a private company, Reader's Digest rewarded editors and senior managers with ESUs -- phantom stock -- similar to the way public companies award stock to their senior managers.

In conjunction with its February 15 initial public offering, the company exchanged 96 percent of the outstanding ESUs for a combination of cash and shares of nonvoting common stock, which will virtually eliminate the possibility of significant ESU charges against future operating profit.

Earnings per share were 50 cents for the quarter compared to 54 cents per share for the same period in 1989 on an equivalent number of average common shares outstanding. Operating profit for the quarter increased $2.4 million, or 2.7 percent, to $90.2 million from $87.8 million for the same period in 1989. Excluding the nonrecurring pre-tax ESU expense, operating profit for the latest quarter would have been about $103 million.

The decline in net income and earnings per share for the quarter also reflected a change in the company's effective income tax rate to 40.1 percent for the quarter ended March 31, 1990, compared to 32.2 percent for the same period in 1989. In 1989, the company benefited from various nonrecurring tax credits.

For the first nine months of the company's fiscal year, net revenues increased $117.3 million, or 8.3 percent, to $1.5 billion from $1.4 billion for the same period last year.

Net income for the latest nine-month period increased $14.8 million, or 10.5 percent, to $156 million from $141.2 million for the same period a year ago. Excluding the nonrecurring pre-tax ESU expense of $19.5 million for the most recent nine months, net income would have been about $168 million.

Reader's Digest is a global publisher of magazines, books and music, and one of the world's leading direct-mail marketers.

DALLAS (MAY 10) PR NEWSWIRE - Hallwood Energy Partners, L.P. (AMEX: HEP) announced today that it has completed its previously announced merger and exchange offer, pursuant to which it has acquired Energy Development Partners, Ltd., and the assets of Hutton/Apache 1982 Energy Income Fund, Ltd. and Hutton/Apache Energy Income Fund II and interests that were tendered in 16 other oil and gas limited partnerships. Hallwood Energy Partners has also completed a one-for-20 reverse split of its Units. Hallwood Energy Partners now has a total of 8,541,906 outstanding publicly traded units. The reverse split will be effective and the new units will

begin trading on the American Stock Exchange on a when-issued basis on Thursday, May 10, 1990. Information regarding the delivery of certificates representing the reverse split and newly issued units will be sent to all partners within one week.

After completing the transaction, Hallwood Energy Partners has, at Dec. 31 1989 on a pro forma basis, total assets of approximately $240 million, subject to long-term debt of approximately $60 million, and proved oil and gas reserves of approximately 9.8 million barrels of oil and 142 bcf of gas, including indirect interests.

In addition, Hallwood Energy Partners is continuing to serve as general partner and to operate its remaining affiliated partnerships, including Quinoco Consolidated Partners, L.P., which have total assets at Dec. 31, 1989, of $136 million, of which approximately $50 million is included in Hallwood Energy Partners' $240 million total assets.

Hallwood Energy Partners also announced that it or its affiliates may repurchase its outstanding units in the open market or in private transactions. The purchases have been authorized because Hallwood Energy Partners believes that, depending on the market price of the units, the purchases represent prudent investments by Hallwood Energy Partners and its affiliates.

Hallwood Energy Partners' principal objectives are to continue to pay stable quarterly cash distributions and to expand its reserve base through additional acquisitions and drilling.

CONTACT: Cathleen M. Osborn, 303-850-6321, or William L. Guzzetti, 214-528-5588, both of Hallwood Energy Partners.

#90130p2762 05/10/1990 ~PR Newswire

NEW YORK (MAY 10) PR NEWSWIRE - Nasta International, Inc. (AMEX: NAS) today announced the sale of its 49 percent interest in Olympic Mills, Inc. and Estampados Deportivos, Inc. to the 51 percent owner of those companies for $2 million in cash, $1 million in a guaranteed note, and a contingent note which provides for payment of up to $1 million based on future earnings of Olympic and Estampados.

Nasta announced today that it had filed a registration statement relating to a proposed rights offering by the company. Pursuant to the terms of the proposed rights offering, the company will issue transferable rights to its stockholders to subscribe, on a pro rata basis, for up to a total of 2,555,600 units at a subscription price of $2 per unit. Each unit will offer one share of the company's common stock, and one warrant to purchase one share of the company's common stock. The holder of each two shares of

stock will be entitled to one unit. The net proceeds will be used to repay certain bank debt and for working capital purposes.

As part of the proposed rights offering, the company will enter into agreements with several standby purchasers pursuant to which the standby purchasers will agree to purchase any and all units not subscribed for in the rights offering. The standby purchasers include certain officers and directors of the company.

The company has also announced net sales of $2,744,000 for the three months ended March 31, 1990, compared to net sales of $6,131,000 for the comparable period in 1989. Net loss for the three months in 1990 was $1,693,000, or $.33 per share, compared to net income on $154,000, or $.03 per share, for the same period in 1989.

The first-quarter 1990 results reflected the soft toy retailing climate experienced in the fourth quarter of 1989, which extended through the first quarter of 1990. The company has taken several important steps to address the situation, including reduction of overhead and curtailing certain discretionary expenditures. The company's new promotional products are expected to commence shipping in the second quarter, and management said it expects sales levels to improve and for Nasta to be profitable for the second half and the full year.

#90130p2776 05/10/1990 ~PR Newswire

WASHINGTON (MAY 10) PR NEWSWIRE - Danaher Corporation (NYSE: DHR) today announced first quarter earnings of $10,642,000 or $.46 per share for 1990. This is $.01 per share less than the first quarter 1989. Earnings

for the corresponding 1989 period were $11,412,000.

Total revenues for the first quarter were $180,554,000. This represents a 2 percent decrease relative to comparable prior year sales amounts. Total 1989 revenues, including $10,654,000 from divested businesses, were $194,974,000.

George M. Sherman, president and chief executive officer stated, "We are very pleased with our performance given generally weak market conditions. We have been focusing on cost reduction while continuing to invest in manufacturing technologies and process improvements along with education and training. These investments continue to produce favorable asset turnover rates. Our aggressive program to lower debt and related interest costs, and our share repurchase program contributed positively to our results. While we expect to face challenging economic conditions in the short term, we are confident that Danaher is being positioned to meet the global opportunities in its markets. The addition of Easco Hand Tools, Inc. to the Danaher group of companies, expected late in the second quarter, bolsters our confidence in the long term strategic outlook."

Danaher Corporation is a leading manufacturer of tools, process/ environmental controls and transportation products.

CANTON, MA (MAY 10) PR NEWSWIRE - Hills Department Stores, Inc. (NYSE: HDS) today announced a quarterly sales increase of 13.8 percent for the 13 week period ended May 5, 1990. Total sales were $452,486,000 compared to $397,479,000 for the comparable 13 weeks of fiscal 1989. Same store sales increased 8.6 percent.

Fiscal 1989 results for the quarter and month of April include grand opening sales for 33 former Gold Circle Stores reopened as Hills' Stores. In addition, a major circular promotion which ran in April of 1989 was run in March of 1990. Consequently, sales for the fiscal month of April which were $140,489,000 decreased 3.5 percent from sales of $145,581,000 for the comparable four weeks in fiscal 1989. Same store sales increased .3 percent.

Hills reported sales results for fiscal 1989 based on a 53-week year. Accordingly, the ending dates for 1990 fiscal months are one calendar week later than the corresponding 1989 fiscal month ending dates. Had the company reported results based on a 52-week year, first quarter total and same store sales results would have reflected increases of 9.2 and 5.2

percent, respectively.

The company operates 210 stores compared with 200 stores last year.

PITTSBURGH (MAY 10) PR NEWSWIRE - Equimark Corp. (NYSE: EQK) announced the completion of the sale of approximately $350 million of credit card assets from its Equibank subsidiary, Equibank (Delaware) National Association ("EDNA") to BANK ONE, LAFAYETTE, N.A., a subsidiary of BANC ONE CORP. (NYSE: ONE).

The purchase price was not disclosed. Equibank will continue to offer credit cards under an agent bank agreement with BANK ONE. The Equibank name will continue to appear on cards issued to its customers. The sale represented substantially all of EDNA's credit card receivables, but did not include approximately $113 million of non-credit card revolving credit receivables offered under the name "Credit Express(SM)", which will be retained.

Equimark Corp. is a diversified financial services institution with $3.5 billion in assets. Equimark's principal subsidiaries are Equibank, The Liberty Financial Group Inc., EquiManagement Inc., and Treasure Valley Bancorp Inc. EDNA is a wholly owned subsidiary of Equibank.

BANK ONE, LAFAYETTE, N.A., is an affiliate of BANC ONE CORP., headquartered in Columbus, Ohio. BANC ONE CORP. reported assets of $27.3 billion and common equity of $2.25 billion at year-end 1989. BANC ONE CORP. operates 52 banking organizations with 670 offices in Indiana, Kentucky, Michigan, Ohio, Wisconsin and Texas.

#90130p2789 05/10/1990 ~PR Newswire

WALTHAM, MA (MAY 10) PR NEWSWIRE - Thermo Process Systems Inc. (AMEX: TPI) today announced that its mobile soil-remediation unit (SRU) has been as the winner of the 1990 Governor's New Product Award given by the state of Florida. The award recognizes an innovative new product, machine, process, material, or service that has made an important contribution to the state's economy and to the welfare of its citizens.

The SRU employs advanced thermal technologies to clean soils that have been contaminated by petroleum products, such as gasoline, diesel and jet fuels, and heating oils, to prevent the pollution of groundwater supplies. Because all system components fit on one trailer, the unit can easily travel to affected locations, eliminating the need to transport any toxic material off site.

Ken Wood, vice president of engineering for TPS Technologies Inc., the

subsidiary that operates the soil-remediation business, said, "We are very pleased that our remediation system is being recognized for its unique engineering design and for its effectiveness in solving a widespread environmental problem."

The annual award is sponsored by the Florida Engineering Society in cooperation with the Florida Department of Commerce and the governor's office. Winning the award qualifies Thermo Process Systems for the national competition sponsored by the National Society of Professional Engineers.

Thermo Process Systems designs, manufactures, and sells advanced custom-engineered thermal processing systems for the incineration of hazardous wastes and the automated heat treating of metal parts. The company also provides services for the on-site remediation of hazardous wastes and petroleum-laden soils, in addition to a comprehensive range of metallurgical processes. Thermo Process Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

HAUPPAUGE, NY (MAY 10) PR NEWSWIRE - Graham-Field Health Products, Inc. (AMEX: GFI) today reported record revenues of $9,842,000 for the first quarter ended March 31, 1990, versus $8,108,000 a 21 percent increase over the prior year. Net earnings before extraordinary credit were $287,000 or $.04 per share as compared to $3,000 in the first quarter of 1989. Net earnings for the quarter were $573,000 or $.08 per share as compared to $535,000 or $.07 per share in the prior year. The extraordinary credit for the fiscal periods March 31, 1990 and 1989 represents a gain on the repurchase of a portion of the outstanding senior subordinated notes in the amount of $286,000 or $.04 per share and $532,000 or $.07 per share, respectively.

The weighted average number of common shares outstanding used to calculate earnings per share for March 31, 1990 and 1989 were 7,549,000 and 7,611,000 respectively.

Commenting on the significant improvement in revenues and earnings in the first quarter, Graham-Field Health Products, Inc. chairman Irwin Selinger said, "The increased revenues over the prior year were attributable in part to the acquisition of M.E. Team, Inc. on March 5, 1990, and to the recently introduced Consolidation Advantage Program which provides our customers with the lowest cost of product acquisition. This program is augmented by an experienced Graham-Field sales team possessing in-depth product knowledge and understanding of customer needs. Our customers report it is easier, simpler, and more profitable to do business with Graham-Field than with 40 or 50 additional suppliers."

Graham-Field manufactures, markets and distributes approximately 14,000 healthcare products for hospitals, physicians, and home use to approximately 12,000 home healthcare, physician and hospital supply distributors, and drug retailers and wholesalers.

PORTLAND, OR (MAY 10) PR NEWSWIRE - NERCO Inc. (NYSE: NER) announced that the company's board of directors has elected Clifford A. Morton as senior vice president and chief financial officer of NERCO. In his new position, Morton will be responsible for treasury and corporate development functions. In addition, he will be a member of NERCO's executive committee.

Morton, 54, was with Portland General Corp. from 1986 to 1989, as senior vice president/member, management committee. Most recently, Morton was the principal of C.A. Morton Co., management consultants.

Before joining Portland General, Morton was an officer of Boise Cascade Corp., where he served in various capacities.

Morton received an MBA in 1972 from Golden Gate University, and completed his undergraduate education in England.

NERCO is a leading U.S. and North American producer of coal, gas, oil, gold and silver. Approximately 82 percent of NERCO's common stock is indirectly owned by PacifiCorp (NYSE: PPW), a diversified electric utility.

DETROIT (MAY 10) PR NEWSWIRE - Renewed emphasis on people, products and profits will help ensure Ford Motor Company's (NYSE: F) continued success, despite the formidable challenges of the 1990s, Chairman Harold A. Poling told stockholders at the company's 35th annual meeting here today.

"There is no question in my mind," Poling said, "that enhancing relationships with all employees and involving them in every aspect of our business will be the key to all that we hope to achieve."

The payoff for such effort, he noted, will be "improving our quality; building superior, competitively priced products that represent good value to our customers; and controlling costs and streamlining our operations to their most efficient levels."

Poling cited the 1991 Ford Escort and Mercury Tracer as examples of Ford's "strong lineup of new cars and trucks" for the 1990s.

"We didn't just redesign them," he explained. "We redesigned the way we build them, through major advancements in technology, processes and people working together."

Major goals, Poling said, are "to shorten the product development cycle" and "to produce the highest-quality cars and trucks in the world." He pointed out that capital spending in the next five years will be "up substantially" over the record $23 billion spent in the past five years.

Engines and transmissions will be high on Ford's list of product priorities, Poling indicated. "By the mid-1990s, we will have replaced, redesigned or improved in virtually all of our existing powertrains in North America and Europe," he explained.

To enhance profitability and improve long-term value for stockholders, Poling noted that Ford is continuing its "efforts to offset the cyclicality of the automotive industry" with increased emphasis on financial services.

He said that the Financial Services Group "accounted for 17 percent of Ford's earnings" in 1989, but that the goal for the future is to increase that share "in an average business year" to 30 percent.

Poling emphasized, however, that the challenges facing Ford in the 1990s are "formidable," especially in the areas of "excess worldwide automotive capacity" and "protecting the earth and its natural resources."

HOUSTON (MAY 10) PR NEWSWIRE - American Exploration Company (AMEX: AX) and Hershey Oil Corporation (AMEX: HSO) today jointly announced the signing of an agreement for American Exploration to acquire Hershey. The terms of the agreement call for American Exploration to pay $7.00 per share in cash for up to 20 percent of Hershey's common stock and to exchange 1.6 shares of American Exploration's common stock for each remaining share of Hershey's common stock. Currently, Hershey has 6,630,764 shares outstanding. Based on American Exploration's closing price of $3-5/8 on Wednesday, May 9, the transaction has a value of $40 million.

The transaction is subject to approval by the shareholders of both companies. It is expected that the shareholders' meetings will occur in the summer.

Mark Andrews, chairman and CEO, said "The Hershey acquisition is an important strategic move for American Exploration for three reasons. First the addition of Hershey's reserves will result in a 45 percent increase in American Exploration's reported proved reserves. Second, we establish a presence in Canada where Hershey owns interests in several large, long-life producing properties. And third, Hershey's exploration team and undeveloped acreage position in Alberta and West Texas establishes a meaningful exploration opportunity that complements American Exploration's reserve acquisition capability."

American Exploration is an independent energy company engaged in the acquisition and further development of oil and gas properties and the production of oil and gas. At year-end 1989, American Exploration had total net proved reserves of 7.7 million barrels of crude oil and 110 Bcf of natural gas, or 26.1 million barrels of oil equivalent (BOE), all of which are located in the United States. American Exploration currently has 29,011,648 shares outstanding.

At year-end 1989, Hershey reported total net proved reserves of 844,000 barrels of crude oil and 65 Bcf of natural gas, or 11.6 million BOE, plus 801,000 long-tons of sulfur. Of this total, 71,900 barrels of crude oil and 63.3 Bcf of natural gas and all the sulfur are located in Alberta, Canada, and the remainder are in the United States. In addition, Hershey has approximately 40,000 net undeveloped acres in Alberta and West Texas.

PRINCETON, NJ (MAY 10) PR NEWSWIRE - Escalon(TM) Ophthalmics, Inc., a privately held company developing novel technologies for the ophthalmic drug and device markets, has completed a second round of financing. Escalon raised $1.65 million through a private equity placement, principally with private investors familiar with the company's mission and technology.

The proceeds will be used to launch in-licensed products aimed at the hospital market later this year, and to fund feasibility studies for a sustained drug release device (SDRD), for which Escalon obtained exclusive worldwide rights in early 1990. The device, developed by Dr. Sohrab Darougar of the Institute of Ophthalmology of the University of London, is designed to provide sustained delivery of chronically applied ophthalmic drugs. Its design and placement, which are covered by filed patents, are expected to overcome the drawbacks of current sustained release devices used in eye care.

Separately, Escalon has concluded an agreement with The Purdue Frederick Company, Norwalk, Conn., for the exclusive distribution in the United States of Betadine(R) 5 percent Sterile Ophthalmic Solution.

The Purdue Frederick Company, a privately held firm, has marketed providone-iodine, a broad spectrum antiseptic, under the trade name Betadine for many years. It is the most widely used hospital antiseptic in the United States. Betadine 5 percent Sterile Ophthalmic Solution was developed to meet the needs of the ophthalmic surgeon. Under the current agreement, the product will be manufactured for Purdue Frederick and Escalon will promote and market it to hospitals, surgicenters and ophthalmologists who do any form of eye surgery.

About 2 percent of all ophthalmologist visits involve surgical procedures, accounting for approximately 1.8 million eye surgeries per year in the U.S. Of those procedures, at least 1.2 million are cataract removals. The potential for post-surgical complications, such as topical infections are bacterial endophthalmitis, is significant. Over 80 percent of cataract surgeries include a subconjunctival injection of an antibiotic to prevent postsurgical infection. There is significant demand among surgeons for a safe and effective antiseptic such as Betadine 5 percent Sterile Ophthalmic Solution to prevent the growth of infectious organisms after surgery.

MELBOURNE, FL (MAY 10) PR NEWSWIRE - The Goldfield Corporation (AMEX: GV) announced today net income of $810,946 ($.03 per share) for the quarter ended March 31, 1990, compared to net income of $1,049,622 ($.04 per share) for the first quarter of 1989. Total revenue for the 1990 period was $5,202,243, compared to $4,530,287 for the 1989 period. In the first quarter of 1990, as in the comparable period in 1989, revenue contributions (excluding mining royalties) from Goldfield's two business segments, electrical construction and mining of base and precious metals, were approximately equal.

For the first quarter of 1990, Southeast Power Corporation, the company's electrical construction subsidiary had contract revenue of $2,228,061 and an operating profit of $75,418 compared to $2,203,021 and $191,343

respectively for the first quarter of 1989.

The St. Cloud mining operations revenues increased to $2,441,426 for the first quarter of 1990 from $2,281,351 in the like period in 1989. Operating profit from mining operations (including mining royalties) was $1,219,321 for the first quarter of 1990, compared to an operating profit of $1,173,460 for the like period in 1989. The improved results from mining operations were primarily attributable to concentrate ore production from St. Cloud's Midnight mine, offsetting the conclusion of the company's joint venture with Cyprus Metals Company during the first quarter of 1990, as well as revenue of $451,209 earned from the Getchell gold and Harlan coal royalties acquired during December 1989.

Goldfield is engaged in the business of mining base and precious metals and electrical construction. It also owns royalty interests in gold and coal properties.

ATLANTA (MAY 10) PR NEWSWIRE - The board of directors of Cox Enterprises today elected Paul J. Rizzo a director of the privately owned company.

Rizzo is dean of the School of Business Administration, University of North Carolina, Chapel Hill. The announcement was made by James C. Kennedy, chairman and chief executive officer of Cox Enterprises.

Commenting on the announcement, Kennedy said: "Paul has a wealth of experience to share on behalf of Cox Enterprises. He's a personable, dynamic businessman, and we all look forward to working with him on our board."

Before going to Chapel Hill, Rizzo spent 30 years with the IBM Corp. At retirement in 1987, he was IBM vice chairman of the board of directors, as well as a member of the corporate management board and management committee. As vice chairman, he was responsible for IBM's marketing and service program worldwide.

After joining IBM in 1958, Rizzo became vice president of corporate finance and planning (1970) and was elected to the board in 1972. He was senior vice president and group executive responsible for product development in IBM's computer line before being elected vice chairman of the board (1983).

Rizzo is a director of Johnson & Johnson, McGraw-Hill Inc., Morgan Stanley Ryder System Inc., and Sonoco Products.

At the University of North Carolina, he is a trustee of the Kenan Institute of Private Enterprise.

After graduating from UNC in 1950, Rizzo began his career as an auditor with Coopers and Lybrand, later joining Dan River Mills.

Cox Enterprises is one of the largest media companies in the nation and the largest operator of automobile auctions in North America. The company publishes 18 daily newspapers, several weeklies and a monthly magazine. Cox's cable television systems number 24 in 17 states. In broadcasting, the company owns and operates seven television and seven FM and five AM radio stations, as well as a national television sales representation firm. Twenty three of the company's auto auctions are in the United States, and two in Canada.

DALLAS (MAY 10) PR NEWSWIRE - American Realty Trust, Inc. (NYSE: ARB) today announced operating results for the fourth quarter and year ended Dec. 31, 1989.

American Realty reported earnings of $5.2 million, or 59 cents per share, on revenues of $22.6 million for 1989. This compares with earnings of $9.3 million, or 85 cents per share, on revenues of $26.1 million for 1988.

For the fourth quarter, American Realty recorded a loss of $2.4 million, or 37 cents per share, on revenues of $6.2 million. This compares with a loss of $428,000, or 4 cents per share, on revenues of $7.2 million in the fourth quarter of 1988.

"American Realty's cash flow from operations remained positive during the quarter. The losses the trust recorded were a result of ART's investments in related entities in which ART must record its share of losses -- equating to 59 cents per share in the fourth quarter," said a spokesperson for the trust.

American Realty Trust, Inc., based in Dallas, invests in mortgage and equity interests nationwide.

WILLIAMSBURG, VA (MAY 10) PR NEWSWIRE - Arnold B. McKinnon, Norfolk Southern Corporation's (NYSE: NSC) chairman, president and chief executive officer, told stockholders at their annual meeting here today that "revolutionary changes" in the coming decade will pose challenges for the Norfolk-based transportation company.

"Revolutionary changes are sweeping the globe," McKinnon said, "with important implications for trade and, consequently, for the traffic that rolls over our tracks and moves in our trucks.

"The competitive challenges of the '80s will only intensify in the '90s," he continued. "At the same time, there will be fewer opportunities for quantum leaps in cost containment, such as reductions in track mileage and employment that we saw in the past decade."

Nevertheless, Norfolk Southern, McKinnon said, looks forward to challenges. "We have a vision for Norfolk Southern that we're eager to turn into reality," he said. "We envision Norfolk Southern as a model corporation, whose business happens to be transportation."

In addition, McKinnon reported that, despite a greater increase in expenses than in revenues in 1989, the year was, nevertheless, Norfolk Southern's second-best in its eight-year history.

"At last year's stockholders' meeting, I cautioned that topping the record performance of 1988 would not be easy," McKinnon said. "I was right."

Norfolk Southern's net income of $606.2 million for 1989 was 4.6 percent below the 1988 record. Earnings per share were $3.48, only 1 percent below 1988, because of a share buy-back program.

McKinnon also reported Norfolk Southern's impressive operating ratio -- 77.5 percent, the best among major U.S. railroads. A railroad's operating ratio is defined as the ratio of its total operating expenses to its total operating revenues.

CONTACT: Robert C. Fort, Assistant Vice President, 804-629-2714, or J. Don Piedmont, Director, 703-981-5407, Public Relations Department, Norfolk Southern Corporation.

#90130p2842 05/10/1990 ~PR Newswire

NEW YORK (MAY 10) PR NEWSWIRE - The Gitano Group, Inc. (NYSE: GIT) today announced, for the quarter ended March 31, 1990, net income of $14,175,000 a 20.5 percent increase from $11,764,000 in the 1989 first quarter. Net sales totalled $223,890,000 for the quarter, reflecting a 41.0 percent increase from net sales of $158,756,000 recorded a year ago. Earnings per

share for the quarter were $1.02 based on 13,947,591 weighted average shares outstanding, compared with $.85 per share based on 13,920,655 shares outstanding in 1989.

Haim Dabah, president and chief operating officer of The Gitano Group said "We are gratified by the record sales and earnings results for first quarter 1990, despite a generally unsettled retail climate." Dabah noted that first quarter's record results were achieved despite the negative impact of the recent Chapter 11 filing by Ames Department Stores. "As previously announced, a one-time charge of $.10 per share was taken during the first quarter," he said.

Dabah also announced that the company is filing with the Securities and Exchange Commission a registration statement relating to a proposed offering of 1.55 million shares of its Common Stock, of which 1.35 million shares will be offered by the company and 200,000 shares will be offered by certain of the company's principal stockholders. Proceeds to the company from the sale of these shares will be used for the reduction of short- term and stockholder debt, resulting in increased working capital.

A registration statement relating to these securities is being filed with the Securities and Exchange Commission, but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release does not constitute an offer to sell or the solicitation of an offer to buy. There shall be no sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

The Gitano Group, Inc. is a marketer, designer and manufacturer of branded apparel sold under the Gitano and Gloria Vanderbilt trademarks. Diversified product lines include women's jeanswear, sportswear, swimwear and intimate apparel in junior, missy, maternity and plus sizes as well as men's and children's jeanswear and sportswear. Gitano brand products are sold primarily through mass merchants and discounters throughout the U.S. at an average unit retail price of under $20. The company's Gloria Vanderbilt product lines are sold primarily through department and specialty stores. Gitano operates 71 company- owned retail locations selling Gitano products exclusively. Headquartered in Manhattan, Gitano has 14 foreign offices and owns factories in the United States, the Caribbean basin and Central America, and manages a network of manufacturers and suppliers in over 40 countries throughout the world.

#90130p2845 05/10/1990 ~PR Newswire

DENVER (MAY 10) PR NEWSWIRE - Presidio Oil Company (AMEX: PRS) today reported higher revenues for the quarter ended March 31, 1990, which represented the first full quarter of Presidio's operation of the properties acquired from Home Petroleum in December 1989. The company said revenues for the 1990 first quarter increased 57 percent to $30,671,000, compared with $19,556,000 for the same period last year.

Presidio reported a net loss of $3,808,000 for the quarter ended March 31, 1990, compared with a net loss of $3,254,000 for the same period in 1989. After preferred stock requirements, the net loss for the current quarter was $4,131,000 or $.18 per share of Class A common stock and $.20 per share of Class B common stock. For the comparable period in 1989, the net loss attributable to common shares was $4,089,000, or $.34 per share of Class A common stock and $.37 per share of Class B common stock.

Presidio's net operating cash flow for the 1990 first quarter was $11,656,000, representing the company's net loss of $3,808,000 as adjusted for non-cash charges consisting principally of depletion, debt issuance costs and deferred taxes. In the first quarter of 1989, Presidio's comparable net operating cash flow was $5,343,000.

During the first quarter of 1990, Presidio issued 10 million shares of Class A common stock and, in a separate offering, issued $50 million of its 9 percent convertible subordinated debentures due 2015. The completion of these issues resulted in net proceeds of approximately $120 million that the company used to reduce bank debt.

On March 30, 1990, the company began an offer to exchange 1.35 shares of is Class A common stock for each share of its 9.5 percent cumulative convertible preferred stock. The offer was successfully completed on April 26, 1990, with approximately 2,177,000 shares of preferred stock being tendered, representing 96 percent of the preferred stock outstanding when the offer began. The remaining 4 percent of the company's preferred stock has been called for redemption on June 1, 1990.

Presidio Oil Company is an independent oil and gas company engaged in onshore oil and gas exploration, development and production in the continental United States, primarily in Wyoming, Texas, Louisiana, North Dakota and West Virginia and in the transportation of gas through gas gathering systems in Wyoming and West Virginia. Presidio's securities are traded on the American Stock Exchange under the symbols PRS/A and PRS/B and on the London Stock Exchange under the symbols PRSA and PRSE.

WILLIAMSBURG, VA (MAY 10) PR NEWSWIRE - Two members of Norfolk Southern Corporation's (NYSE: NSC) Board of directors retired today at the company's annual meeting of stockholders. They are W.H. Krome George, a former chairman and chief executive officer of Aluminum Company of America and Ralph F. Leach, a former chairman of the executive committee of J.P. Morgan & Co., Inc., and its wholly owned subsidiary, Morgan Guaranty Trust Company of New York.

George was elected to the board of Norfolk and Western in 1979 and continued as a director of Norfolk Southern after the 1982 consolidation with Southern Railway.

Leach began serving as a director of Southern Railway in 1969 and continued as a director of Norfolk Southern after consolidation.

George was graduated from Massachusetts Institute of Technology in 1940. He began his career as a process engineer with Container Corporation of America in Chicago that same year.

He joined Aluminum Company of America in 1942 and rose from a position of chemical engineer to chairman and chief executive officer. He also served on that company's board of directors and as a director of TRW, Inc., and Todd Shipyards Corporation.

Leach was graduated from the University of Chicago in 1938. He was associated with Harris Trust and Savings Bank in Chicago and with Valley National Bank, Phoenix, Ariz., before joining the staff of the Federal Reserve System in Washington, D.C., in 1950, where he was chief of the finance section in the division of research and statistics.

Leach joined Guaranty Trust Company of New York in 1953 as treasurer and

was vice president and treasurer when Guaranty and J.P. Morgan & Co., Inc., then a commercial bank, merged to form Morgan Guaranty Trust Company of New York. He rose through various positions and became chairman of the executive committee of both J.P. Morgan & Co., Inc. and Morgan Guaranty prior to his retirement. He also served as a director of Merrill Lynch & Co., Inc. and The Continental Corporation.

CONTACT: R.C. Fort, Assistant Vice President, Public Relations Department, 804-629-2714, or Don Piedmont, Director, Public Relations Department, 703-981-5407, both of Norfolk Southern Corporation.

#90130p2852 05/10/1990 ~PR Newswire

NEW YORK (MAY 10) PR NEWSWIRE - British Airways' (NYSE: BAB) traffic growth in April was, for the second consecutive month, in double figures for both scheduled passengers carried and revenue passenger miles, the airline announced today.

Scheduled passenger numbers increased 13.0 percent compared with the previous year and scheduled passenger miles (RPMs) increased by 12.1 percent. With a capacity increase of 10.8 percent, reflecting the introduction of the new summer timetable, passenger load factor on scheduled services was 70.4 percent, up by 0.8 pts compared with last year.

The recent strong growth in European and domestic traffic was maintained with an increase of 16.1 percent in RPMs and a passenger seat factor increase of 4.2 pts. Longhaul services also showed continued growth with an increase of 11.1 percent in RPMs.

Concorde broke its own previous speed record. BA 004 on April 14 took just two hours and 56 minutes from take-off in New York to touchdown in London.

Speedbird Courier, the trans-Atlantic next-day courier service provided by British Airways cargo, is now available across the USA thanks to a tie-up with marketing partner, United Airlines. British Airways' Chairman, Lord King, and Chief Executive, Sir Colin Marshall, received the Aerospace Laureate Award for Commercial Air Transport from "Aviation Week & Space Technology" Magazine.

#90130p2859 05/10/1990 ~PR Newswire

WOODCLIFF LAKE, NJ (MAY 9) PR NEWSWIRE - Timeplex today announced major enhancements to its market-leading LINK family, making it the most fully featured, high-performance, wide-area backbone networking system in the

industry. The enhancements, available on LINK+ systems, include: advanced bandwidth management; greater channel routing flexibility; increased T-1/E-1 capacity; new voice compression capability; expanded international compatibility; additional fractional T-1 features; and synchronized TIME/VIEW 200 Network Management System (NMS) support.

The LINK+ Family offers Advanced Bandwidth Management features which allow users to minimize the amount of bandwidth required to support their networking applications. These features include the following:

-- Voice contention lets users allocate bandwidth on an as-needed or on-demand basis to more efficiently handle peak/overflow traffic and for disaster recovery situations.

-- Bandwidth pooling allows users to pull bandwidth on an as-needed or on-demand basis, enabling users to support new applications, such as data batch transfers.

-- Priority bumping ensures that higher-priority channels have access to limited network bandwidth. This ensures that the most important traffic moves through the network first.

-- Grooming allows channel connections to be automatically re- established at preset times. This ensures peak network performance by routing traffic over optimum paths.

New selective and diverse routing features provide users with greater networking flexibility. Selective routing allows users to limit the paths over which channels are connected, based on predefined criteria. For example, this feature ensures that users' highly sensitive data is connected only over encrypted data links.

Diverse routing optimizes network availability by ensuring that critical channels are routed over two mutually exclusive paths in the network. Thus, failure of one path will not result in the loss of the critical channel, which in industries such as financial services, can result in the loss of millions of dollars per hour.

Timeplex also has improved the cost-effectiveness of its customers' networks by increasing the capacity of the LINK/2+ and miniLINK/2+ systems to seven T-1s or five E-1s and the microLINK/2+ system to four T-1s or four E-1s. Users now can terminate more traffic and support larger node sites with less equipment.

A new four-port Low Bit Rate Voice module offers 16k analog voice channel support to substantially reduce the amount of bandwidth needed on the LINK/2+, microLINK/2+, and miniLINK/2+ systems.

And, reinforcing its leadership position in the international arena, the LINK/2+, miniLINK/2+, and microLINK/2+ systems now interface directly to digital PBXs utilizing Japanese standards. In addition, organizations can now optimize their networks by using the Japanese branching service, which is a form of channelized services.

HAUPPAUGE, NY (MAY 10) PR NEWSWIRE - Robotic Vision Systems, Inc. (NASDAQ: ROBV), a leading manufacturer of machine vision-based inspection and measurement products for quality control and process guidance, announced today the receipt of orders from Allied Signal, General Motors, and McDonnell Douglas for new products introduced by the company in 1989. The value of the orders is in excess of $1 million, the company said.

Allied Signal and McDonnell Douglas both placed orders for RVSI's new HR-2000 printed circuit board solder quality control product. The inspection and control of solder geometry is critical to the electronics industry, as solder serves as the electrical and structural link between the computer chip and the circuit board. Initial buyers of the new HR-2000 include General Dynamics, IBM, Motorola, and Raytheon.

General Motors, which owns more than 19 percent of RVSI's common stock, placed an order for the company's new 3-D Surface Mapper. The 3-D Surface Mapper is a high-speed, high-definition challenger to the growing $500 million Coordinate Measurement Machine (CMM) market. Whereas conventional CMMs can obtain 3-D measurements, using touch probes, at rates of just a few data points per second, the 3-D Surface Mapper, using non-contact optical scanning, can obtain 14,400 3-D points per second. A wide range of markets are targeted for the 3-D Surface Mapper for measurement, inspection, process guidance, and reverse engineering applications.

WILMINGTON, DE (MAY 10) PR NEWSWIRE - Du Pont (NYSE: DD) today announced the winners of its fourth annual Minority Scholarship for High School Seniors Program.

The 26 recipients, selected from 200 applicants, will each receive a $16,000 scholarship covering four years and employment for two summers at Du Pont. They plan to pursue degrees in business, computer science, engineering or science.

States represented by the winners are Delaware, Florida, Kentucky, Louisiana, Maine, Maryland, Nebraska, North Carolina, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas and Virginia.

Local winners are Patrick Mesa of Wilmington and Gilbert Backers of Elkins Park, Pa.

A senior at Salesianum School, Mesa is a member of the Society of Distinguished American High School Students and a semi-finalist in the National Hispanic Merit Scholar Program. He also is listed in "Who's Who Among American High School Students." He plans to attend Princeton University.

Backers attended Northeast High School and received early admittance to the pre-engineering program at Stockton State College, N.J., as completion of the 12th grade. He is a recipient of the Stockton State College Presidential Scholarship and College Book Award. He plans to enroll at the University of Virginia.

The scholarship program has expanded significantly since its inception in 1987 when 10 were awarded. The 1990 recipients bring the number of scholarships to 64, representing more than $1 million.

Du Pont also is working to strengthen relationships between students and Du Pont businesses. "We are establishing direct communication links with students as they enter the program," said Sandra Graves, coordinator of the scholarship program. "During their four years of college, each will work with one of Du Pont's businesses, such as polymer products, medical products, agricultural products, or chemicals and specialties.

Du Pont created the program to identify, encourage and develop outstanding minority students.

#90130p2867 05/10/1990 ~PR Newswire

ENGLEWOOD, CO (MAY 10) PR NEWSWIRE - Cable London, a corporation in which U S West and Comcast are shareholders, has been awarded the franchise to provide cable and telephone service to the Islington and Hackney boroughs in London. The franchise will serve 152,000 homes and 12,000 businesses.

Cable London currently is developing the adjacent franchises for Camden and Haringey, and has applied for the Enfield franchise in North London.

Jerrold Nathan, executive director of Cable London, welcomed the award as

"a major step toward serving the North London area, which will justify the development of locally generated programming."

The award represents U S West's ninth cable franchise in the United Kingdom. Other franchises include Birmingham, Camden, Croydon, Haringey, Kingston/Richmond, Merton/Sutton, Tyneside and Windsor.

Comcast President Brian L. Roberts noted that his company "is pleased to join forces with Cable London and U S West in developing a quality cable television and telephone market."

Cable London was formed by a group of London shareholders and has the backing of U S West and Comcast Corp. (NASDAQ: CMCSA) of Philadelphia. Its British sharesholders include Rosehaugh plc, Mercury Communications, McNicholas Construction, Logica UK Ltd. and 3i plc.

U S West Cable Communications is a division of U S West Inc. (NYSE: USW), a $25 billion diversified company headquartered in Englewood. Its major subsidiary, U S West Communications, serves the communications needs of 10 million customers in 14 states of the western United States.

U S West also owns companies involved in regional, national and international markets. Its businesses include radio communications, consisting of cellular, paging and Personal Communications Networks; directory publishing and marketing services; business communications systems sales and service; communications software; and financial services.

Comcast is one of the largest cable operators in the U.S., serving more than two and one-half million basic subscribers. The company also provides cellular telephone communications and sound communications services. The Class A and Class A Special common stock are traded in the over-the-counter market and are reported in the National Market List under the NASDAQ symbols CMCSA and CMCSK, respectively.

CONTACT: Ed Mattix or Rebecca Herbst both of U S Cable Communications, 303-649-4676.

#90130p2869 05/10/1990 ~PR Newswire

LONDON (MAY 10) PR NEWSWIRE - Kidder, Peabody International Limited announced today the offering in the European market of $40 million of Cellular, Inc. (NASDAQ: CELS) 8 percent convertible subordinated debentures due 2000 priced at par. The net proceeds from the offering of debentures will be used to finance acquisitions of additional cellular telephone properties. The debentures are convertible at any time prior to maturity into shares of the company's common stock on or after the date on which definitive debentures are issued in exchange for the temporary

global debenture. The conversion price will be $14.95 per share, subject to adjustment under certain circumstances.

The debentures are redeemable at the option of the company at any time after the expiration of 30 days following the date on which the temporary global debenture is exchanged for definitive debentures, at prices declining from 106 percent, if called prior to May 18, 1991, to 100 percent on or after May 18, 1996. The debentures are not redeemable prior to May 18, 1993, unless the closing price of the common stock for a specified period is at least 200 percent of the conversion price then in effect. In the event of a change in control of the company, holders of the debentures may require the company to repurchase the debentures at par in cash or in shares of the company's common stock, plus accrued interest.

Cellular, Inc., headquartered in Englewood, Colo., is engaged in the operation, management and financing of cellular telephone systems in which its affiliates hold an ownership interest. The company is developing an integrated network of contiguous cellular systems, principally in the mountain and plains regions of the United States. The company currently holds interests in 11 metropolitan statistical area ("MSA") wireline cellular telephone licensees, each of which is operational, and the company's interest in these markets represents 394,927 pops. In addition, affiliates of the company currently hold interests in 71 rural service area ("RSA") markets. To date, commercial operations have commenced in eight of such markets and construction permits have been granted by the Federal Communications Commission to build cellular telephone systems in an additional 55 of such markets. Assuming grant of FCC construction permits for the remaining eight markets, the company's interest in these markets will represent 1,350,411 pops.

These securities were not and are not being offered in the United States of America including its territories and possessions and all areas subject to its jurisdiction or to any person who is a natural citizen or resident thereof or to any person purchasing for the account of or for resale to any such person, except to certain sophisticated U.S. institutional investors under circumstances not constituting a public offering under U.S. securities laws. This press release is for informational purposes only.

NEW YORK (MAY 10) PR NEWSWIRE - New Plan Realty Trust (NYSE: NPR), in the largest purchase transaction in its history, today announced the signing of a contract to acquire 11 shopping centers in southern Georgia. Approximately 10 percent of the purchase price is for New Plan shares, with the balance being for cash.

The centers, all within one hour's drive of each other, are clustered in six cities: Albany, Americus, Ashburn, Cordele, Dublin and Tifton. Together they comprise 800,000 square feet. The major tenants, some with multiple locations, include Belks, Piggly Wiggly, K-Mart, Winn-Dixie, J.C. Penny, Sears, Eckerd Drugs, Rite Aid and Volume Shoe.

These acquisitions mark New Plan's entry into the Georgia market and brings its holdings to 59 shopping centers in 14 states. New Plan also owns five apartment complexes and other income-producing properties.

DEARBORN, MI (MAY 10) PR NEWSWIRE - Thomas W. Elward, vice president of conversion projects for CMS Energy Corporation's independent power production subsidiary, CMS Generation Company, has been named vice chairman of the Nuclear Electric Insurance Limited (NEIL) Engineering Advisory Committee.

NEIL is a mutual insurance company, owned by the U.S. nuclear utility industry, which provides insurance coverage for the nation's nuclear power plants. The Engineering Advisory Committee provides advice and recommendations on nuclear safety issues to NEIL.

Elward, 41, was elected to a two-year term as vice chairman of the 65-member Engineering Advisory Committee. He joined CMS Generation in February 1990. Before that, since 1987 Elward was plant manager of the Big Rock Point nuclear plant near Charlevoix, owned and operated by CMS Generation's corporate affiliate Consumers Power Company.

A native of Monroe, Elward earned a master of science degree in nuclear engineering from the University of Illinois in 1972 and a bachelor of science degree in chemical engineering, summa cum laude, from the University of Detroit in 1971. Elward completed the Harvard Business School program for management development in 1983.

CMS Energy's independent power and cogeneration activities are among the largest in the U.S., with ownership interests in five operating plants totaling about 1,500 megawatts of capacity. CMS Energy's interests include a 49-percent ownership in The Oxford Energy Company, an American Stock Exchange (AMEX: OEN) company involved in developing tires-to-energy projects throughout the U.S.

CMS Energy Corporation (NYSE: CMS) is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas, interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth-largest combination utility.

#90130p2896 05/10/1990 ~PR Newswire
WASHINGTON (MAY 10) PR NEWSWIRE - The biggest winners in the 1984 breakup of the Bell System have been consumers, and current legislative proposals would reverse those benefits, an MCI Communications Corporation (NASDAQ-NMS: MCIC) official told Congress today.

Testifying before the House Subcommittee on Telecommunications, Eugene Eidenberg, MCI executive vice president, said a draft bill submitted by the committee staff would "create a mechanism that would allow the Regional Bell Operating Companies to enter the competitive markets from which they are restricted while, at the same time, continuing to operate their local exchange services on a monopoly basis.

"It is a prescription that will open the door to the same anti-competitive practices that led to the antitrust case in the first place. You shouldn't let that happen," Eidenberg told the subcommittee members.

The draft bill would create a mechanism that would allow Regional Bell Operating Companies to enter the information services and telephone equipment manufacturing businesses.

Citing gains experienced by consumers since the break-up of AT&T, Eidenberg said: "Long distance and equipment prices have fallen dramatically. Information products and services are introduced daily and innovation based on accelerated research and development spending guarantees a bright future for this growing industry.

"The U.S. telecommunications infrastructure is the best in the world. The rest of the world is racing to follow our lead in stimulating competitive markets and abandoning the vertically integrated government sanctioned monopolies of the past," said Eidenberg.

"The clear message from the national and global marketplace is that legislation is not necessary to accomplish the goals articulated by the

staff draft - especially the objective of universal access to information services," Eidenberg said.

"The regulatory safeguards proposed in the staff draft will not effectively change the incentives created when a bottleneck monopolist competes with its suppliers or with its customers. They cannot overcome what is after all a fundamental conflict of interest."

PLAINVIEW, NY (MAY 10) PR NEWSWIRE - Professional Care, Inc. (AMEX: PCE), today reported its results of operations for the second quarter and six months ended March 31, 1990.

Revenues for the second quarter ending March 31, 1990 decreased by $1,051,000 from the same period last year. For the six month period ending March 31, 1990, revenues decreased by $2,522,000 from the corresponding period of 1989.

These decreases are primarily attributed to a lower than normal patient census in hospitals. Included in revenues for the three months and six months ended March 31, 1990 is approximately $150,000 and $450,000, respectively, collected from Visiting Nurse Service of New York for accounts receivable which had previously been written off.

Net income for the second quarter decreased to $216,000 as compared to net income of $355,000 for the same period in 1989. Net income for the six month period ended March 31, 1990 decreased to $512,000 as compared to net income of $704,000 for the same period of 1989.

TROY, MI (MAY 10) PR NEWSWIRE - K mart Corporation (NYSE: KM) today reported a sales increase of 15.9 percent for April 1990 over sales during the same period of last year.

Consolidated sales for the four-week period ended May 2, 1990 amounted to $2,415,124,000 versus sales of $2,082,919,000 for the four weeks ended May 3, 1989. Sales on a comparable store basis -- those stores open at least one year -- were up 6.3 percent.

Sales for the 13 weeks ended May 2, 1990, were $7,044,152,000, up 12.6 percent from the $6,254,218,000 for the first 13 weeks of 1989. Comparable store sales for the 13-week period rose by 3.0 percent.

On a financial reporting basis, sales for the 13 weeks ended May 2, 1990, of $7,044,152,000 compared with sales of $6,068,214,000 for the 13 weeks ended April 26, 1989, an increase of 16.1 percent. Comparable store sales on a financial reporting basis were up 6.2 percent.

K mart Chairman of the Board and Chief Executive Officer Joseph E. Antonini said, "Sales were strong in April, aided by the later date for Easter in 1990 and by favorable weather conditions throughout much of the East and Midwest. Seasonal merchandise in both hardline and apparel departments sold well during the April period."

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,321 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse Clubs and The Sports Authority.

K mart Corporation's stock is listed on the New York, Pacific, Midwest and Tokyo stock exchanges. Its trading symbol is KM.

ST. LOUIS (MAY 10) PR NEWSWIRE - The May Department Stores Company (NYSE: MA) today reported preliminary sales from continuing operations were up 14.3 percent, 8.8 percent store-for-store, to $752.9 million for the four-week period ended May 5. Sales in the similar period last year were $658.8 million. April included Easter this year, whereas Easter was in

March last year.

Sales for the first quarter of fiscal 1990 were $2.19 billion, an increase of 10.7 percent from sales of $1.98 billion in the same period a year ago. Store-for-store sales increased 6.1 percent in the first quarter.

Department store sales for April were $625.1 million, up 11.8 percent or $65.9 million from last year. Sales for Volume Shoe totaled $127.8 million, an increase of 28.3 percent or $28.2 million.

During April, May opened a Lord & Taylor store at Tysons Corner in the Washington, D.C., metropolitan area and eight net new Payless ShoeSource stores.

Sales have been restated to exclude the sales of divisions which have been discontinued, as well as stores which have been closed and not replaced. Year-to-date sales, including nonreplaced closed stores, were $2.20 billion and $2.05 billion in the 1990 and 1989 periods, respectively.

As announced previously, May is planning to spin-off the Venture discount stores operation to May common shareowners later in 1990, pending certain events. Sales for Venture, which are being reported as discontinued operations, were $97.2 million for the month, a 6.7 percent increase, and were $289.2 million year-to-date, up 8.0 percent. Venture's store-for-store sales increased 3.8 percent for the month and 5.4 percent year-to-date. On a comparable calendar basis for April, Venture's sales increased 6.1 percent and store-for-store sales increased 3.3 percent.

The May Department Stores Company is one of the largest retailers in the United States, operating 295 department stores and 2,773 specialty shoe stores, and 76 Venture stores.

FORT COLLINS, CO (MAY 10) PR NEWSWIRE - Kick the Habit(TM), a highly successful new smoking withdrawal product, is being introduced to consumers by Vipont Pharmaceutical, a subsidiary of Colgate-Palmolive Co. (NYSE: CL).

The quit smoking system is based on "nicotine fading." The fading method is recognized as an effective stop-smoking technique by the U.S. Surgeon General. Kick The Habit includes a three-week supply of disposable nicotine-fading filters and psychological support aids.

The inconspicuous filters enable users to continue smoking their regular

cigarette brands at a normal rate while reducing nicotine gradually, thereby lowering withdrawal symptons when they quit.

Kick The Habit(TM) filters are designed to cut nicotine intake 25 percent the first week, 50 percent the second and 75 percent the third Experts have found that with these lower levels of nicotine at the three week point, many smokers find it much easier to quit completely.

Nationwide, the fast-growing sales of all over-the-counter and prescription stop smoking products reached $285 million last year and are expected to double by 1995, according to Marketdata Enterprises, Valley Stream, N.Y.

Recent studies by the U.S. Surgeon General's office indicate that nicotine is a powerfully addictive drug which can cause severe withdrawal symptons for many smokers who try to quit.

In clinical studies by Harry A. Lando, Ph.D., a widely known expert in substance abuse and a scientific contributor to the Surgeon General's 1988 report on smoking consequences, initially 72 percent of smokers were able to quit using the new Kick The Habit(TM) three-stage stop smoking program. After six months, 44 percent were still abstinent. The average success rate for "cold turkey," or sudden withdrawal without help, is only 18 percent, the method used by 80 percent of all smokers.

Kick The Habit(TM) is now available at 47 out of 50 of the leading drug chain stores across the United STates. Its suggested retail list price is $29.95. The product carries a full money-back guarantee, clearly stated on the package.

Vipont Pharmaceutical Inc., based in Fort Collins, is a health care company specializing in the oral hygiene field. Its anti-plaque toothpaste and oral rinse products are marketed under the Viadent(R) brand name. The company also markets the Via-jet Periodontal Irrigator and the Jordan V by Viadent line of toothbrushes. Vipont is a wholly-owned subsidiary of Colgate-Palmolive, the global consumer products company and maker of the world's best selling toothpaste.

LISLE, IL (MAY 10) PR NEWSWIRE - Van Kampen Merritt Inc. has named Frank Camelliti senior vice president in charge of corporate bond sales and trading, it was announced today by David Johnson, senior vice president, who heads the capital markets operation for the Lisle, Ill.-based investment firm. Also joining Van Kampen Merritt is Joseph R. Young III, who will serve as first vice president and manager of corporate bond sales.

The addition of Camelliti and Young is the first step in the firm's plan to aggressively expand its capabilities in taxable sales and trading, according to Johnson. The firm will concentrate primarily on second tier corporate accounts that purchase securities in block sizes in the $100,000-$500,000 range.

Prior to joining Van Kampen Merritt, Camelliti served as director and senior vice president at Prescott, Ball & Turben, and before that as partner and head corporate bond trader at Cowen & Company. Camelliti, who has nearly 20 years of experience in the corporate bond industry, will be based in Van Kampen Merritt's New York office at 71 Broadway.

Young, who will also work out of 71 Broadway, was previously vice president and head secondary private placement trader at Prescott, Ball & Turben.

At Van Kampen Merritt, Camelliti will be responsible for institutional sales and trading across the spectrum of taxable fixed- income products, including corporate bonds, mortgage-backed securities, government and government agency bonds, and private placements, according to Johnson.

"In addition, we'll be able to call upon the extensive research capabilities of McCarthy, Crisanti & Maffei (MCM) in analyzing credits and assessing trends in the marketplace," Johnson noted. MCM is a subsidiary of Van Kampen Merritt Investment Advisory Service Corp.

Van Kampen Merritt Inc. manages more than $6 billion of open-end and closed-end mutual fund assets and has sponsored over $18 billion in tax-free unit trusts. It is the nation's largest sponsor of insured tax- free unit investment trusts. A Xerox Financial Services company, Van Kampen Merritt Inc. maintains its principal offices in suburban Chicago, Philadelphia, and New York, and regional representatives in eight other major U.S. cities, as well as an overseas office in Tokyo.

LONDON, (MAY 10) PR NEWSWIRE - Merrill Lynch Capital Markets today announced the appointment of John F. Lyness as managing director, debt trading and sales in London. He will be responsible for overall trading and sales of all Euro debt-related products, both dollar and non-dollar, for Merrill Lynch International.

Prior to joining Merrill Lynch, Lyness was head of mortgage trading and finance at Morgan Stanley.

Donald A. Wright, who has been responsible for Eurobond trading, is returning to Toronto where he has been appointed president of Merrill Lynch Canada.

Kevin P. Regan, managing director, will assume responsibility for fixed income U.S. dollar Eurobond trading in addition to his current responsibilities for money market sales and trading.

#90130p2919 05/10/1990 ~PR Newswire

NEW YORK (MAY 10) PR NEWSWIRE - The president of Allegheny Power System, Inc. (APS) (NYSE: AYP) told stockholders at their annual meeting today that there is "little need for drastic new controls and virtually no benefits to offset economic dislocations and sacrifices" that would result from proposed Clean Air legislation to reduce stack gas emissions from coal-fired electric generating stations.

Klaus Bergman, citing the 10-year, $500 million, congressionally mandated National Acid Precipitation Assessment Program (NAPAP) study, said we are learning that the acid deposition problem is more emotional than real, and present proposals to deal with it are unjustifiable and probably unnecessary.

He referred to statements by Dr. James Mahoney, director of the study, that indicated that the only measurable benefit would be the neutralization of 26 acidified lakes in the Northeast over 20 years if the proposed reductions in sulfur dioxide emissions were achieved. This equals more than $50 million a year for each lake, according to Bergman, by using the Environmental Protection Agency's cost estimates of $4 billion a year for acid deposition reduction provisions. "These same lakes," he said, "could be neutralized by liming at an average cost per lake of about $25,000 a year, and the job can be done immediately."

If bills now in Congress become law, the president said, the most efficient means of compliance for APS will require investments of about $2 billion over the next ten years for flue gas desulfurization equipment at two power stations and low nitrogen oxide burners at various stations.

"This investment is roughly equivalent to about half of Allegheny Power System's present net investment in property, plant and equipment, but will not produce a single kilowatt-hour of energy," he continued.

The additional investment will require rate increases of varying annual amounts over the next 20 years, according to Bergman, with a maximum in

any one year of 15 to 20 percent in addition to rate increases that may be required for other reasons.

He advocated sharing the cost of the proposed acid rain legislation nationwide rather than imposing it entirely on 13 industrial states that produce only about half of the emissions.

"If direct cost sharing is politically impossible," he added, "then at least some alleviation of the burden through use of tax benefits is in order."

Management's slate of directors was elected by the stockholders. They also approved the appointment of Price Waterhouse as independent auditors for 1990.

#90130p2921 05/10/1990 ~PR Newswire

PHILADELPHIA (MAY 10) PR NEWSWIRE - Temple University dentists removed all of the teeth of a retarded girl who was brought to them to have a single tooth extracted, without even discussing the possibility with her mother, according to a federal civil rights suit filed today by Edmond A. Tiryak, attorney for the family.

According to the suit, the retarded girl, who has a mental capacity of a two- or three-year-old, was living in a group home in Philadelphia last July when the staff at the home discovered that she had a single broken tooth. She was taken to a local dentist who recommended that she have one tooth removed at the Temple Dental Clinic.

On Aug. 10, 1989, two Temple dentists, then removed all of her teeth during surgery. Neither the girl's mother or the group home operator learned that extraction of all her teeth was a possibility until after the surgery.

According to Tiryak, a Center City lawyer who specializes in representing handicapped people, the actions of the doctors in this case show "a callous indifference to the retarded girl's civil and human rights."

DALLAS (MAY 10) PR NEWSWIRE - Mobil is now moving out of a period of restructuring and consolidation into a new era of growth, Chairman and Chief Executive Officer Allen E. Murray told shareholders at the annual meeting here this morning.

"We have identified very large, profitable capital investment opportunities and this is where we presently intend to concentrate our effort," he said in discussing the company's strategies to improve shareholder value.

Future capital and exploration expenditures were projected to reach more than $5 billion, up from $3.4 billion in 1989, he said. "It will take time to gear up to a higher level so you may not see a big increase in 1990 -- perhaps only up to about $4 billion. Soon after that, however, Mobil's capital and exploration expenditures should go past the $5 billion a year level -- 50 percent more than we spent in 1989."

Mobil's 11.5 percent dividend increase two weeks ago, the third increase in three years, "not only gives short-term income to shareholders but also provides long-term support," Murray stated. "Further increases are clearly something we wish to do."

Mobil's financial flexibility is now among the strongest in the industry, he reported. "We have already done what we wanted to do" to improve the balance sheet, he said, and reducing debt is no longer a primary strategy.

Similarly, "the big job is done" in getting rid of assets that don't pay their way.

Of upcoming capital spending increases, the biggest will be in foreign exploration and producing. "This is a high rate of return business and one where Mobil has a growing portfolio of excellent investment opportunities," Murray said.

In established foreign areas, petroleum reserves are waiting to be brought on stream in Canada, the North Sea, Germany, Nigeria, and Indonesia, he said. Also, Mobil has increased its acreage holdings and plans aggressive exploration in the North Sea and Indonesia.

In newer areas, such as South America, Africa, and Papua New Guinea, Mobil has recently been awarded large exploration acreage. "These are places where truly large discoveries are possible," he said. "Not every exploration effort will be successful, but we have high hopes that enough will succeed to make a real difference to Mobil's long-range crude and gas position."

WASHINGTON (MAY 10) PR NEWSWIRE - The Washington Post Company (NYSE: WPO.B) said today that its board of directors has authorized the company to acquire up to 1 million shares of its Class B common stock, primarily through block purchases.

The company did not announce a ceiling price or a time limit for the purchases. There are currently approximately 10.3 million Class B shares outstanding.

At The Washington Post Company's annual meeting held here today, all 13 directors were reelected.

Katharine Graham, chairman of the board, told shareholders that although the soft advertising climate is expected to persist for the balance of the year, the company believes it will continue to accomplish its financial goal: to achieve consistent earnings per share growth that ranks with the industry leaders.

PITTSBURGH (MAY 10) PR NEWSWIRE - S. Kent Rockwell, Chairman and Chief Executive Officer of Astrotech International Corporation (AMEX: AIX) today announced that Astrotech reported net income of $95,000 on revenues of $6.1 million for the second quarter ended March 31, 1990. This compares with net income of $124,000 for the comparable quarter last year.

For the six months ended March 31, 1990, Astrotech had net income of $673,000 on revenues of $12.2 million. This compares with a net loss of $83,000 for the comparable period of last year. Astrotech acquired its oil field service operations in February 1989. Revenues for both the three and six-month periods of last year were $2.2 million.

Mr. Rockwell said that "we continue to experience growth in our subsidiary operations in both revenues and gross profits. Results for the quarter have been impacted by increases in operating expenses due to our investment in additional human resources and new facilities to insure continued growth and long-term market penetration objectives. In addition, corporate management continues to focus on other strategic acquistion opportunities."

After provision for preferred stock dividends, the net loss applicable to common shares was $224,000 or $0.09 per common share for the second quarter of fiscal 1990 compared to a net loss applicable to common shares of $213,000 or $.11 per common share for the second quarter of fiscal 1989. After a provision for preferred stock dividends, the net income applicable to common shares for the six-month period was $18,000 or $0.01 per common share compared to a net loss applicable to common shares of $760,000 or $.42 per common share for the comparable period last year.

Astrotech is principally involved in the fabrication and installation of seals in oil storage tanks and also provides environmental compliance, inspection, engineering and design services for projects that involve either modification or repair to storage tanks.

NEW YORK (MAY 10) PR NEWSWIRE - New York Stock Exchange consolidated net income in 1989 fell 39.4 percent to $6.292 million, from $10.4 million in 1988, it was announced today.

Revenues for the NYSE and its subsidiaries increased 7.9 percent to $349.3 million in 1989, from $323.6 million in 1988.

The NYSE said expenses increased 11.9 percent from 1988 levels, stemming from continued enhancement of existing technology and upgrade of the trading systems' capacity, as well as increased market surveillance and regulatory activities.

Total trading volume of 41,698,538,270 in 1989 was the second- highest in NYSE history, up 2.08 percent from 40,849,536,808 shares in 1988. The number of listed companies on the NYSE increased as well in 1989, reaching an all-time high of 1,721. In 1989, 130 companies joined the Big Board's roster.

Working capital of $108.9 million in 1989, down from $114 million in 1988, will provide for the continuing capital investment in technology and facilities required to increase the capacity and efficiency of the NYSE trading floor.

SEATTLE (MAY 10) PR NEWSWIRE - Boeing Commercial Airplane Group has named Gordon M. Bethune vice president and general manager of its Customer Services Division, effective June 1.

He succeeds Arthur F. Carbary, who is retiring after more than 40 years with Boeing.

In his new assignment, Bethune will have responsibility for all customer and product support activity, including flight and maintenance training, flight operations support, field service engineering, maintenance engineering and spares support for all Boeing commercial aircraft.

Bethune joined Boeing in December 1988, assuming the position of vice president of airline logistics support. He has held a number of senior management positions in commercial aviation, including vice president of maintenance and engineering for both Braniff and Western Airlines and, most recently, senior vice president of operations for Piedmont Airlines.

He is a graduate of Abilene Christian University in Dallas and has served as a U.S. Navy aircraft maintenance officer. He is licensed as a commercial pilot, type-rated on Boeing's 757 and 767 jetliners, and also is licensed as an airframe and power plant mechanic.

NEW YORK (MAY 10) PR NEWSWIRE - Toronto Dominion Securities (USA) Inc., New York, has received approval from the U.S. Federal Reserve to expand its securities-related activities in the U.S.

These activities include underwriting and dealing in commercial paper, certain mortgage-related securities, municipal revenue bonds, and consumer-receivable related securities, and to engage in other activities, including as agent in the private placement of all types of securities.

L. Arthur English, senior vice president of TD's U.S. operation, said the bank is "extremely pleased to receive approval to immediately expand the range of securities-related products and services we can provide our U.S. and Canadian customers."

These additional powers, he noted, represent a natural extension of the services the bank has been providing in the U.S. market. "We are particularly excited to be able to expand our commercial paper activities immediately, where we have a definite edge and proven expertise."

A. Charles Baillie, TD executive vice president, said the approval "sends a strong signal that we are in the securities business in the North American market."

The approval is for TD's wholly-owned securities subsidiary to: -- underwrite and deal in commercial paper, municipal revenue bonds, family mortgage-related securities, and consumer-receivable-related securities ("bank ineligible securities");

-- act as agent in the private placement of all types of securities including providing related advisory services;

-- provide financial advice to Canadian federal, provincial and municipal governments and their agents regarding the issuance of their securities in the U.S.;

-- provide investment advisory and brokerage services on a combined basis for institutional and retail customers ("full service brokerage");

-- provide financial and transaction advice to financial and non-financial institutions, including providing advice in connection with mergers and acquisitions, divestitures, financing transactions, capital structuring, loan syndications, interest rate swaps, interest rate caps, and similar currency and interest rate transactions, and providing valuations and fairness opinions in connection with mergers, acquisitions, and similar transactions;

-- act as broker with respect to interest rate swaps, caps and similar currency and interest rate transactions; and

-- arrange for sales of loans or other extensions of credit originated by affiliated and unaffiliated lenders, as agent.

WAYNE, NJ (MAY 10) PR NEWSWIRE - Lederle Laboratories announced today that it has licensed exclusive U.S. marketing rights to the new antihypertensive agent VERELAN(R) (once-daily verapamil formulation). VERELAN was developed by Elan Corporation PLC (AMEX: ELN).

VERELAN is a patented, improved formulation of a widely prescribed calcium antagonist, verapamil HC1. VERELAN's sophisticated, patented SODAS(TM) technology offers significant benefits over the existing verapamil products.

David R. Bethune, president of Lederle Laboratories, said, "We are pleased to announce this agreement with Elan. VERELAN represents an advance over the existing verapamil brands. VERELAN will offer physicians a unique and important new medication.

Donald E. Panoz, chairman and chief executive officer of Elan Corporation, said, "We are pleased to be working with Lederle to make VERELAN available to physicians in the U.S. We have used our SODAS technology to produce a uniform blood pressure response curve for verapamil, and we are confident that hypertensive patients in the U.S. will benefit from the advantages of this new formulation."

Elan specializes in the health care field of advanced reformulation and

drug delivery, with emphasis on improved drug absorption and utilization. Elan's headquarters and main research and development facilities are in Athlone, Ireland. The company has a U.S. facility in Gainesville, Ga.

Lederle Laboratories, a division of American Cyanamid Company (NYSE: ACY), is a research-intensive organization that manufactures and markets a broad range of products including ethical pharmaceuticals, vaccines, generics and vitamins/nutritionals.

#90130p2968 05/10/1990 ~PR Newswire

WASHINGTON (MAY 10) PR NEWSWIRE - British Aerospace Inc. today announced plans to build a $40 million, 40-acre aircraft marketing and support facility in Loudoun County, Va. near Dulles Airport.

This facility will become the company's future North American headquarters and be constructed alongside British Aerospace, Inc.'s new Customer Training Center, which was dedicated today by Virginia's Governor Douglas Wilder in the presence of Loudoun County Board of Supervisors Chairman Betty W. Tatum and British Aerospace, Inc. President Brian Thomas.

Plans call for office accommodations having a total floor area of 160,000-square feet to include executive, marketing and sales operations, technical support, finance and administrative functions, together with employee facilities. A Marketing Display Center will house product displays, conference rooms and "walk-through" aircraft mock-ups. In addition, a 95,000-square-foot Customer Support Building will form an integral part of the complex, housing a substantial spares inventory and other customer support operations, which will service North and South American airline and business jet customers; this will be ready for occupancy in July 1991.

Brian Thomas, president and CEO of British Aerospace, Inc., commenting on the announcement to build the new facility, said: "British Aerospace and its predecessor customers have been based in Northern Virginia for more than a generation. Thirty-five years ago, Vickers-Armstrong, Inc. set up an airline support operation with just 18 people for the highly successful Viscount airliner. When we start using our new facility in mid-1992, more than 600 people will be located there, rising to 800 by 1995."

Thomas added, "This commitment by British Aerospace is just the latest example of Virginia's ability to attract major corporations and our commitment to building our future in the Commonwealth. Loudoun County government officials, especially Betty W. Tatum, have been particularly helpful during the early planning of this project."

This new British Aerospace facility is being developed in conjunction with the Mark Winkler Company of Alexandria, Va.

#90130p2973 05/10/1990 ~PR Newswire

CHICAGO (MAY 10) PR NEWSWIRE - Telephone and Data Systems, Inc. (AMEX: TDS) today reported increases in customers (21.4 percent), revenues (26.5 percent), operating income (95 percent), net income available to common (315 percent) and earnings per share (260 percent) for the first quarter of 1990 compared to the first quarter of 1989.

LeRoy T. Carlson Jr., president, noted, "We are pleased with the excellent progress of our three major business units: telephone, cellular and paging. Financial results for the first quarter of 1990 reflect the continuing strong growth of our telephone operations, together with unusually low cellular and paging operating losses. Changes in cellular and paging marketing and sales programs for the remainder of 1990 are anticipated to increase market share in these businesses while decreasing operating margins."

Consolidated revenues grew 26.5 percent to $67.4 million in the first quarter of 1990 from $53.3 million in 1989. Operating income increased 95 percent to $11.2 million in 1990 compared to $5.8 million in 1989. Net income available to common grew 315 percent to $5.3 million in 1990 compared to $1.3 million in 1989. Earnings per common share rose 260 percent to $.18 in 1990 from $.05 in 1989, due to improved operating results offset somewhat by an 18.6 percent increase in the number of weighted-average common and equivalent shares.

TDS Telecom, TDS's telephone subsidiary, continued its successful acquisition program by adding Lewisport and Saluda Mountain Telephone Companies during the first quarter of 1990. With these acquisitions, TDS Telecom serves 267,900 access lines, an increase of 10.6 percent over March 1989. Telephone revenues, currently 67.7 percent of consolidated revenues, grew 17.4 percent to $45.6 million in the first quarter of 1990, compared to $38.9 million in the same period in 1989. Telephone operating income climbed 36.6 percent to $14.8 million in 1990 from $10.8 million in 1989.

United States Cellular Corp. (AMEX: USM) is TDS's 81.5 percent-owned cellular telephone subsidiary. USM operates systems in 30 Metropolitan Statistical Areas (MSAs) and two Rural Service Areas (RSAs), and operates as a reseller in one MSA and one RSA. USM increased its subscriber base in consolidated systems to 39,100 at March 31, 1990, an increase of 115

percent over March 31, 1989. Service revenues for the first quarter of 1990 increased 105 percent to $11.6 million. The increase in service revenues reflects the continued growth of USM's customer base, offset somewhat by a continuing decrease in average minutes of use and retail revenue per customer. Cellular revenues now make up 19.4 percent of consolidated TDS revenues.

TDS is a Chicago-based communications company with established local telephone operations and developing cellular telephone and radio paging operations. TDS builds value for its shareholders by providing excellent communications services in attractive, closely related segments of the telecommunications industry.

DETROIT (MAY 10) PR NEWSWIRE - U.S. automakers will assemble an estimated 138,863 cars this week, up 4.2 percent from last week's actual count of 133,262, Ward's said. Car output for same-week 1989 was 159,730 units.

Ward's reported that total estimated U.S. car output for calendar 1990 through the end of this week is 2,181,524 units, trailing year- ago's build of 2,854,732 by 23.6 percent.

All General Motors Corp's car plants were up and running except the Arlington, Texas, plant which was closed to retool for '91 Caprice output. The plant is slated to reopen in late June. GM plants in Janesville, Wis., Hamtramck, Mich., and Lansing, Mich. (Calais/Skylark) planned

weekend overtime.

Ford Motor Co.'s Wixom and Wayne, Mich., plants reported daily overtime this week. The Lorain, Ohio, Thunderbird/Cougar assembly reopened this week, following a weeklong shutdown for inventory adjustment.

Chrysler's St. Louis car plant continues to operate at only one shift. Ward's said U.S. truck production will be an estimated 90,442 units compared to last week's count of 90,294. This compares with year-ago's count of 88,046.

U.S. truck production for calendar year 1990 through the end of this week is estimated at 1,417,246 vs. year-ago's 1,679,139, said Ward's.

Ford's Twin Cities, Minn., Kansas City, Mo., Louisville, Ky., Lorain, and St. Louis plants slated daily overtime. The Louisville plant also scheduled weekend overtime.

General Motors' Moraine, Ohio, truck plant slated Saturday overtime. Chrysler's Dodge City plant in Warren, Mich., continues to operate on two nine-hour daily shifts this week.

Of this week's estimated U.S. car output, GM accounts for 43.5 percent; Ford, 25.8 percent; Chrysler, 12.1 percent; Honda of America Manufacturing Inc., 6.5 percent; Mazda Motor Manufacturing (USA) Corp., 1.8 percent; Nissan of America Manufacturing Corp., 1.1 percent; New United Motor Manufacturing Inc., 3.6 percent; Toyota Motor Manufacturing USA Inc., 3.2 percent; Diamond-Star Motors Corp., 2.1 percent, and Subaru-Isuzu Automotive Inc., 0.3 percent.

NEW ORLEANS (MAY 10) PR NEWSWIRE - W.R. Grace & Co. (NYSE: GRA) President Charles H. Erhart Jr. told shareholders at the company's annual meeting here today, "As we continue to grow our businesses, we must be ever mindful of ur commitment to the protection of the environment and the well-being of our customers and those communities in which we operate."

J. Peter Grace, chairman and chief executive, presided at the meeting. Erhart added that Grace's products and services enhance the "quality of life" by helping to meet essential human needs. By controlling the level of emissions from its plants and emphasizing philanthropic and volunteer activities that "extend beyond the bottom line," the company is demonstrating its commitment to the highest standards of corporate citizenship.

An audio visual presentation depicting Grace's commitment to the environment was premiered at the meeting and shown to shareholders. In it Mr. Grace said, "Compliance is not enough. At Grace, we want to go beyond compliance, as some of our operations have already done."

Commenting on operations, Erhart said, "Each of our four major businesses is fundamentally sound, and as we look ahead to the new decade, we will aggressively emphasize our strong niche positions, our proprietary technology, the broad diversity of our product lines, and those businesses earning the highest returns."

He pointed to results for the first quarter. Net income rose 11 percent to $33 million on sales of $1.5 billion. Highlights during the first quarter included the continuing strength of Grace's worldwide Cryovac packaging businesses, the return to profitability of the offshore drilling and oil field services operations, the completion of the acquisition of Soboca, a leading French chocolate supplier, and the continued strength of Grace's kidney dialysis business.

Erhart also pointed to increased research and development spending, which is expected to increase 10 percent over last year's $125 million level. The major direction of this spending will be on the expansion of existing product lines and the development of new proprietary technology.

In addition to electing directors, shareholders ratified the selection of independent accountants for 1990.

As part of the company's program under which nominations for director are rotated among senior officers of the company, shareholders elected Pedro F. Mata as a new director. Mata serves as president of Grace Cocoa and senior vice president of Grace.

CHICAGO (MAY 10) PR NEWSWIRE - Telephone and Data Systems, Inc. (AMEX: TDS) announced that as a result of recent and pending acquisitions, it will add approximately 229,000 cellular population equivalents. In total, TDS and United States Cellular Corp. (AMEX: USM) will own or have the right to acquire cellular interests representing more than 11.5 million pops.

TDS's 81.5 percent owned subsidiary USM will add interests in cellular systems serving Iowa rural service area (RSA) No. 7 and No. 13 and Wisconsin RSA No. 6. These additions further strengthen the company's

Midwest cluster of operations, which now includes 10 metropolitan statistical areas (MSAs) and more than 7 RSAs. Also, an additional 20 percent ownership interest was obtained in the Lawton, Okla., MSA, bringing the company's ownership to 100 percent.

TDS is a diversified Chicago-based communications service company with established local telephone operations, rapidly expanding cellular telephone operations, and developing radio paging operations. TDS seeks to build value for its shareholders by providing excellent communications services in attractive, closely related segments of the telecommunications industry.

FREEPORT, IL (MAY 10) PR NEWSWIRE - The directors of Newell Co. (NYSE: NWL) announced late yesterday the declaration of the quarterly cash dividend of 12.5 cents per share on the company's common stock. The dividend is payable June 1, 1990, to common stockholders of record May 21, 1990. This is consistent with the quarterly dividend paid in the first quarter of 1990 which indicates an annual rate of 50 cents on the common stock.

Newell manufactures and markets high-volume hardware/housewares and industrial products. Hardware/housewares products are sold principally through discount, variety, chain and hardware stores, hardware and housewares distributors and home improvement centers. Industrial products are sold directly and through distributors to volume purchasers.

WASHINGTON (MAY 10) PR NEWSWIRE - People for the Ethical Treatment of Animals (PETA) is denying any involvement in what appears to be the third case in the last four months of L'Oreal product tampering in Europe.

PETA was notified of the tampering by telephone this morning. The first case was reported in supermarkets in Sussex, England, where shards of metal were found in L'Oreal products and the second in Northern Ireland where activists warned that products had been spiked with paint stripper. The warnings resulted in the removal of L'Oreal products from store shelves.

PETA, the largest animal rights organization in this country, launched an international campaign in March against what PETA said was L'Oreal's cruel product tests on animals, urging activists in France, Italy, England, Canada, Spain, Scotland and Australia to demonstrate, leaflet and write the company.

As part of PETA's campaign, activists in France risked arrest by hanging a banner reading "L'Oreal -- Torture Animale" from the Eiffel Tower. In New Brunswick, N.J., last month, six activists were arrested when they cemented themselves into 300-pound cement blocks forming a blockade that shut down L'Oreal's New Jersey plant for one hour.

"We may go to extremes to alert the public to the ways in which L'Oreal abuses animals, but we would not risk endangering any life," said Kathy Guillermo, director of PETA's international Caring Consumer Campaign to end animal testing. The campaign is cosponsored by the International Fund for Animal Welfare.

DETROIT (MAY 10) PR NEWSWIRE - New Detroit Inc., working closely with the Center for Entrepreneurship at Eastern Michigan University, will launch year one of a proposed three-year program to build minority- based roundtables in Detroit. Funding for the project's first-year operations has been contributed through a $50,000 grant from the Hudson- Webber Foundation.

The proposed roundtables are part of the economic initiative undertaken by the Center for Entrepreneurship to strengthen the state's job base by developing the leadership skills of its CEOs. Through two types of top leadership-level programs, The Presidents' Forum and roundtables, the center provides a learning process for CEOs to structure their companies for growth through shared peer experiences and successes.

While The Presidents' Forum format is geared to CEOs and presidents of companies grossing $5 million and up annually with at least 20 employees, center roundtables focus on providing peer support to leaders of companies with upwards of $500,000 in annual sales and at least 10 employees. The center's programs link CEOs together in a practical hands-on learning atmosphere that encourages participation and feedback rather than spoon-feeding information through traditional workshops and seminars. They are based on ongoing research that the research arm of the center has conducted on a base of nearly 500 firms since 1987. As CEOs from across industry boundaries share similar management concerns, center programs

include members from the manufacturing, construction, wholesale and business services sectors.

Currently, the center operates three roundtables statewide: The Ann Arbor Roundtable, The South Central CEO Forum and The Downriver Roundtable. The center is planning to open one Detroit Roundtable this year, with an additional program projected for next year and for the following year.

The Detroit Roundtables are designed to serve as a further extension of New Detroit's minority business development partnership plan, an effort to link minority suppliers in the Detroit community.

BEVERLY HILLS, CA (MAY 10) PR NEWSWIRE - The board of directors of Hilton Hotels Corporation (NYSE: HLT) has approved a 20 percent increase in the regular quarterly cash dividend. The board voted to declare a dividend of 30 cents per share, payable on June 15, 1990, to stockholders of record on June 1, 1990. The corporation previously paid regular quarterly cash dividends at the rate of 25 cents per share. The new annual dividend rate is $1.20 per share, compared with the previous $1.00.

Barron Hilton, chairman and president, said: "The increase in the cash dividend reflects the record pace of earnings, our sound financial condition and the favorable outlook for the business."

The company reported the highest April and four month earnings in its history. Net income for the month of April was $15.5 million, equal to 32 cents per share, compared to $14.6 million, or 30 cents a share, a year ago.

Hilton pointed out that these record results were registered in a month which included Easter, traditionally a slow period for the company.

For the four months ended April 30, 1990, net income totaled $40.5 million or 84 cents per share, up from $27.7 million, or 57 cents per share, in the 1989 period.

ZEELAND, MI (MAY 10) PR NEWSWIRE - Gentex Corporation (NASDAQ-NMS: GNTX) announced today that it has commenced a civil action against Donnelly Corporation (AMEX: DON) of Holland, Mich., for infringement of U.S. Patent No. 4,917,477 issued to Gentex on April 17 for an "Automatic Rearview Mirror System for Automotive Vehicles."

According to Gentex Executive Vice President Kenneth LaGrand, "We intend to enforce this patent vigorously in order to protect the company's electrochromic mirror system." Similar patents have been applied for in Japan, the European Common Market and other foreign countries.

Gentex was the first U.S. supplier of electrochromic mirrors to the automotive industry. Electrochromic automatic mirrors are automotive rearview mirrors that automatically dim to the precise level required to eliminate annoying headlight glare from following vehicles. The company estimates that the potential world market for the electrochromic mirror system over the next five years is conservatively $1 billion. Gentex is working with a U.S. automaker to begin supplying the patented mirror system, including both inside and outside mirrors, in 1991 for the 1992 model year.

Gentex supplies electrochromic mirrors to the Big Three automakers. The company recently announced a purchase order from BMW which is estimated to result in $2 million in annual revenues over the first full year of production.

Gentex Corporation develops, manufactures and markets proprietary electro-optical products: motorized and electrochromic automatic mirrors for the automotive industry and a full line of fire-protection products for commercial applications. Shares of Gentex common stock are traded publicly in the NASDAQ National Market System under the symbol GNTX.

LOWELL, MA (MAY 10) PR NEWSWIRE - COMFED BANCORP, INC. (AMEX: CFK) announced today that the company has reached an agreement to sell $1 billion of residential loan servicing rights to BarclaysAmerican/Mortgage Corporation -- a Charlotte, N.C.-based unit of Barclays Bank PLC, London -- for an expected purchase price of approximately $28 million. The servicing rights being sold represent approximately 20 percent of COMFED's total residential portfolio. The bank does not project further sales from its servicing portfolio.

According to Jack Zoeller, president of COMFED Savings Bank: "While COMFED remains firmly committed to its residential loan servicing business, we decided to pursue the $1 billion sale because of the very attractive offer received from BarclaysAmerican/Mortgage. Our projected pre-tax gain of about $5 million will strengthen our capital position. Even further, this transaction demonstrates the substantial value of our remaining $3.8 billion portfolio. Commenting further on the agreement, Raymond C. LaGace COMFED's executive vice president of mortgage lending said: "COMFED is proud of the quality of the loan portfolio being sold to BarclaysAmerican/Mortgage, as well as the ability of our staff to execute the bank's business plan during this difficult period for New England financial institutions. We are also very pleased to have entered into

this sale transaction with a firm of the stature of BarclaysAmerican/Mortgage."

Lee Shelton, president of BarclaysAmerican/Mortgage added: "This servicing is a very attractive addition to our portfolio. The purchase of $1 billion of loan servicing from COMFED will leave BarclaysAmerican/Mortgage with a servicing portfolio of almost $11 billion ranking the company among the top mortgage loan servicers in the country."

Tim Cohane, a principal of New York-based Cohane Rafferty Securities, which participated in placement of the COMFED portfolio stated: "The transaction between COMFED and BarclaysAmerican/Mortgage progressed very smoothly due, in large part, to the fact that the loans COMFED offered for sale were of the highest quality."

COMFED BANCORP, INC. is a $1.4 billion asset holding company headquartered in Lowell, Mass. Through its principal operating divisions: COMFED Savings Bank and COMFED Mortgage Company, the bank engages in residential mortgage lending, loan servicing, and retail banking. COMFED Mortgage Company maintains a network of 15 offices in the five Northeastern states. COMFED Savings Bank operates 29 retail banking offices in Massachusetts and Connecticut. The bank's loan servicing portfolio ranks in the top 20 among thrifts nationwide.

DALLAS (MAY 10) PR NEWSWIRE - Lomas Information Systems, a subsidiary of Lomas Financial Corporation (NYSE: LFC), today announced that it has been named an IBM Business Partner -- Industry Application Specialist by International Business Machines Corporation.

Lomas Information Systems provides a full-range of mortgage automation services to Lomas Mortgage USA and more than 120 financial institutions nationwide.

IBM Business Partners are independent firms that work with IBM to provide a broad range of hardware and software systems, marketing, installation, and support to meet customers' needs. As an Industry Application Specialist, Lomas will participate in sales presentations with IBM and will have access to IBM's regional facilities for joint demonstrations. IBM, in turn, will obtain broader access to the mortgage lending industry.

The designation as an Industry Application Specialist encompasses Lomas' Loan Production and Secondary Marketing Systems, and will be expanded later this year to include its new loan servicing system. Lomas' Loan

Production System provides complete automation of the loan origination process, from prequalification to closing.

The Secondary Marketing System automates the packaging of home mortgages for the secondary mortgage market. Lomas' new mortgage loan servicing system, when operational, will offer a completely new level of automation and servicing technology for mortgage lenders.

"This prestigious designation is a powerful endorsement of Lomas' leadership position in the industry," said Matt Jacobs, chief operating officer at Lomas Information Systems. "Since IBM recently increased its focus on the mortgage lending industry, it has become a significant market for them. We are very excited that our products are a key part of their strategy," Jacobs added.

Commenting on Lomas's selection as an IBM Business Partner - Industry Application Specialist, Ed Thompson, Asset-based Solutions manager at IBM, stated, "We look forward to having a closer partnership with Lomas Information Systems. Lomas' products and expertise have established them as a leader in their field, and we look forward to exploring future growth opportunities with them."

"As a designated Industry Applications Specialist for IBM's 370 platform, which is the largest family of IBM hardware architecture, the partnership between IBM and Lomas Information Systems will be particularly beneficial in our marketing efforts," commented Floyd McGlothlin, Lomas senior vice president. "It means that we will be able to include the IBM name in our sales presentations, and IBM's solution data base will automatically list our products any time a customer makes an inquiry about host-based mortgage products."

MIAMI (MAY 10) PR NEWSWIRE - Home buyers can now get their mortgage approvals in just 72 hours, or the bank will pay a penalty, thanks to a new service from American Savings, one of Florida's largest thrifts.

The American Savings 72 Hour Mortgage will permit home buyers to get their loans approved in just three business days, according to James Adams, American Savings executive vice president for residential lending. "We guarantee it. If we don't make it, we'll deduct $100 from the loan fees " he said.

"When you have your heart set on that special dream house, the days or weeks spent waiting to hear from the lender can be agonizing," said Adams, expressing the feelings of many anxious home buyers. "Once we have all the required documentation in hand, we will speed the application through our processing and get an answer back to the customer before the end of the third business day," he explained.

This fast turnaround is available on any conventional American Savings fixed rate or adjustable rate loans up to $500,000 with a minimum 20 percent down-payment, for purchases of owner occupied single family residences or approved condominiums.

All the home buyer needs to do is deliver to American Savings all the required documentation, which includes a completed loan application, a signed purchase and sales agreement, select proof of income and financial assets, and other information, as well as a check for the application fee, by 3 p.m. "At that point we, and the customer, start to watch the clock " explained Adams. "If the customer doesn't hear from us by the end of the third business day, American Savings will deduct $100 from the documentation preparation fees when we close the loan," he said.

This, of course, does not apply if a credit check of the applicant reveals any adverse information. It is also subject to a satisfactory appraisal on the property.

American Savings, with $4.8 billion in assets, is the second largest savings and loan headquartered in Florida. The company has mortgage offices in Coral Gables, Fort Lauderdale, Delray, Orlando, Jupiter, Sarasota, North Miami, Largo and Tampa. In addition, most of the 59 American Savings branch offices in Dade, Broward, Palm Beach, Pinellas, Pasco and Hernando counties can provide mortgage applications or information.

HOLLAND, MI (MAY 10) PR NEWSWIRE - Donnelly Corporation (AMEX: DON) today brought suit against the Gentex Corporation (NASDAQ-NMS: GNTX) in the United States District Court in Grand Rapids, Mich. Donnelly is seeking judgment declaring that Donnelly's electrochromic mirrors do not infringe Gentex's United States Patent No. 4,902,108 and that the Gentex patent is invalid and unenforceable.

In December 1989, Donnelly introduced to the automobile industry an electrochromic rearview mirror which automatically darkens and lightens as needed. The Donnelly electrochromic mirror is the result of its own

research and development efforts and the subject of a number of United States and foreign patents.

After Donnelly announced the introduction of its mirror, the Gentex Corporation of Zeeland, Mich., charged that the Donnelly mirror infringed Gentex's U.S. Patent No. 4,902,108. Donnelly immediately denied that charge but Gentex has persisted in its efforts to thwart the sale of the Donnelly mirror. Donnelly brought suit and is seeking an injunction against Gentex's continued charges.

Donnelly is an international company dedicated to serving customers around the world with high-quality fabricated, molded, and coated glass products for the transportation and electronics markets. The company has been based in Holland since 1905 and today operates from 12 separate facilities in western Michigan. In addition, Donnelly has a major manufacturing facility in Naas, Ireland, a marketing liaison office in Tokyo, an Advanced Technology Center in Tucson, Ariz., and a manufacturing facility in Mount Pleasant, Tenn.

The company has a longstanding policy of respecting the proprietary rights of others and protecting the intellectual property of Donnelly. Donnelly's action against Gentex is consistent with that policy.

SAGINAW, MI (MAY 10) PR NEWSWIRE - Polar Molecular Corporation (OTC: PMCX) supports General Motors and other automakers in opposing Ethyl Corporation's move in Washington today to request a waiver to enable its manganese-based anti-knock additive to be blended in unleaded gasoline sold in the United States.

"Gasoline should not contain metallic additives," advised Joseph Colucci,

director of GM's Fuel and Lubricants department, at the April 25 Automotive/Industry forum in Dearborn, Mich., as reported in Octane Week. "Additives containing lead and manganese are known to increase combustion chamber deposits and engine hydrocarbon emissions. Lead is gone, and we don't want manganese in return. Many industry experts point out that reducing combustion chamber deposits will result in reduced octane demand and lower hydrocarbon exhaust emissions. Colucci recommended increased use of alkylates, oxygenates, and additives that reduce octane requirement increase (ORI) to avert an octane crunch.

Support from the auto industry is critical to obtaining approval for MMT. Octane Week stated that "Vehicle manufacturers are the principal determinant as to whether or not EPA will grant a waiver under such a request," said Charles Gray, director of the EPA emissions control technology division. "The whole concept of the waiver process is to ensure that EPA does not grant a waiver for a fuel or fuel additive that, when used in existing vehicles, would cause those vehicles to fail emissions standards."

"Polar Molecular Corporation's non-metallic DurAlt(R) Fuel Conditioner has been proven to reduce combustion chamber deposits and octane requirement increase," stated Mark L. Nelson, president and CEO of PMC. Harvey Klein, Shell's director of oil research and development, was quoted in the June 1 1989 Wall Street Journal as saying an additive that would keep an engine's insides clean from the outset is "sort of the Holy Grail." Tests by Elf Aquitaine, Ricardo Engineering (Great Britain), and the National Institute for Petroleum and Energy Research (U.S.) show that DurAlt FC does this now.

"DurAlt FC is already accepted by the EPA as 'substantially similar,' allowing it as a bulk treatment additive in unleaded gasoline," Nelson continued. "DurAlt FC offers reduced tailpipe emissions, reduced aromatic content in gasoline, reduced crude requirements, and inexpensive octane improvement without adding harmful metallics back into gasoline or the environment. We oppose Ethyl's attempt to continue the use of metallic additives for this purpose."

MIAMI (MAY 10) PR NEWSWIRE - Eastern Airlines today announced the appointment of Ogilvy & Mather Inc. to handle its $45 million advertising account.

Ogilvy succeeds Lintas: New York which had been the agency of record

since 1982.

Martin Shugrue, recently named to head Eastern, said the change was prompted by the airline's current opportunity to "make a new beginning" with the direction and theme of its marketing and advertising program.

He said the decision was based "entirely on the appropriateness of making a change at this point in time and is in no way intended to be critical of Lintas' work." He noted that Lintas had consistently provided quality advertising and support.

The agency transition will take place over the next 90 days, although Ogilvy will begin working on the account immediately.

NEW YORK (MAY 10) PR NEWSWIRE - Telefonica de Espana, S.A. (NYSE: TEF), one of Spain's largest companies and the world's ninth largest telecommunications company, today reported record earnings and revenues for the three months ending March 31, 1990.

Revenues increased 16.3 percent to 187,759 million pesetas, compared to 161,482 million pesetas, for the three months ending March 31, 1989.

Net income rose 0.6 percent to 14,387 million pesetas compared to 14,306 million pesetas for the same period last year.,

Under U.S. Generally Accepted Accounting Principles (GAAP), net income was $336.6 million or equal to $1.10 per ADR (American Depositary Receipts) for the three months ending March 31, 1990. This compares to $1.00 per ADR for the same period last year.

In reporting the first quarter results, the company said it anticipates that the figures will continue to improve for the remainder of the year. Rate increases averaging 7.3 percent, approved by the Spanish government effective March 21, should favorably affect earnings. The company also announced that its capital expenditure program was accelerated during the first quarter reaching 126,742 million pesetas, representing 51.4 percent more than was spent for the first quarter of 1989.

The company also reports that it has acquired through its non-consolidated wholly owned subsidiary, Telefonica International S.A.; 43.7 percent of the Chilean Telephone Company, Compania Telefonos de Chile (CTC) at a cost of $338.5 million.

CHARLOTTE, NC (MAY 10) PR NEWSWIRE - The Salem Growth Portfolio, one of The Salem Funds' family of mutual funds, has reached a significant milestone in its five-year history, surpassing the $100 million mark in assets under management.

First Union National Bank of North Carolina's Capital Management Group serves as the investment adviser to The Salem Funds. "In the competitive environment of today's mutual fund industry, we have seen the number of funds available to the public double over the past decade. Reaching $100 million in assets is significant, particularly for a bank-advised retail fund," said Richard K. Wagoner, executive vice president of the Capital Management Group, the trust arm of the bank.

The Salem Growth Portfolio posted a total return of 94.6% for the five years ended March 31, 1990, averaging an annual return of 14.25%. Its 12 month return through March 31, 1990 was 15.5%. Total return is a measure of the percentage change in net asset value plus the reinvestment of income dividends and capital gains.

"The Salem Funds provide an opportunity for investors with as little as $1000 to take advantage of the investment expertise of First Union's Capital Management Group. Our long-term investment track record is a result of time-tested and value-oriented investment philosophies," said Cathryn Hallahan, manager of the Mutual Funds Group of First Union Brokerage Services, Inc.

First Union is one of a limited number of banks nationwide to act as investment adviser to a family of mutual funds, and one of fewer still in which the funds have been made available primarily to retail investors. The Salem Funds are an integral component in First Union's strategy of making a wide range of banking and investment products available to its customers.

First Union National Bank of North Carolina is a subsidiary of First Union Corporation (NYSE: FTU). As of March 31, 1990, First Union Corporation had assets of $39.1 billion and operated 821 banking offices in North Carolina, South Carolina, Georgia, Florida and Tennessee and 278 nonbanking offices in 36 states and two foreign countries.

The funds are sponsored by Keystone Custodian Funds, Inc. and distributed by Fiduciary Investment Co., Inc., an affiliate of Keystone. Keystone

provides investment services for more than 520,000 individual and institutional investors through mutual funds, discretionary portfolio management, and other investment products.

VALLEY FORGE, PA (MAY 10) PR NEWSWIRE - UGI Corp. (NYSE: UGI) reported that the Pennsylvania Public Utility Commission today approved the recovery by UGI's Gas Utility Division of $35.7 million in pipeline take-or-pay charges over the next four years.

In a separate action, the commission also approved UGI's request to issue additional shares of common stock to permit a proposed 2-for-1 split on July 1.

The stock split is subject to shareholder approval on May 22 of an amendment to double the number of UGI's authorized common shares from 20 million to 40 million. The Pennsylvania gas and electric utility and national distributor of propane presently has about 10 million shares outstanding.

James A. Sutton, UGI's chairman and chief executive officer, said the take-or-pay order by the regulators will allow the gas utility to recover approximately 90 percent of an estimated $39.7 million in current and expected liabilities. The commission's policy permits recovery of take-or-pay charges through a surcharge on all customers if a utility agrees to absorb a reasonable portion of them.

The Gas Utility Division serves 219,000 customers in 14 central and eastern Pennsylvania counties. As reported, the utility's absorption of approximately $4 million of the charges which it determined to be unrecoverable was recorded by UGI in the fourth quarter of 1989.

Take-or-pay charges result from payments by pipeline suppliers to natural gas producers to settle past gas purchase contracts. Federal regulators have approved the pass-through of these costs by the pipelines to local utilities.

NEW ORLEANS (MAY 10) PR NEWSWIRE - Speaking to stockholders at the company's annual meeting today, H. Leighton Steward, chairman, president

and chief executive officer of The Louisiana Land and Exploration Co. (NYSE: LLX) ("LL&E"), outlined a bright future for the oil and gas industry and LL&E.

"As we begin the 1990s, we believe we are entering a period of renewed growth for the industry; a period when natural gas will play an increasingly prominent role; and a period of continued opportunities in oil, especially in the foreign arena," Steward said.

Steward observed that industry fundamentals had improved considerably and that LL&E was well-positioned to benefit from that improvement. "We have set an ambitious capital and exploration program for 1990 -- with expenditures projected to be up over 50 percent to $250 million."

Domestically, LL&E's exploration is focused on natural gas, balancing short and long term opportunities. About 40 percent of LL&E's 1990 exploration and development budget is being spent in the Gulf of Mexico where the company has already announced two discoveries.

Steward indicated that, subject to approval by the Bureau of Land Management, LL&E had recently been voted in as operator of the Madden Field in Wyoming. LL&E increased its working interest in this large gas field from 20 percent to 30 percent last year through a property exchange. With the continued growth in U.S. gas demand and the new pipelines proposed for the area, LL&E is prepared to take a leadership role in developing the full potential of this field.

Steward pointed to the foreign sector as the primary source of opportunities to increase oil reserves. "Unlike many of our competitors who are just now beginning their foreign operations, LL&E has a lengthy history of foreign exploration and production," Steward said. LL&E's foreign oil production is rising and the company is actively exploring for and developing new reserves in both traditional and new foreign areas.

Steward concluded his comments with a review of LL&E's strong first quarter earnings which totaled $13.3 million, up over 64 percent from LL&E's earnings from petroleum operations in 1989's first quarter.

"We have begun the year on a very strong note. However, with weaker oil and gas prices in the spring and summer months and our high level of exploratory activity, we don't expect this level of performance to be repeated in the current quarter," Steward noted.

"But over the longer term, we look forward to growth: growth in prices; growth in earnings and cash flow; and growth in reserves and production. It is our firm intention that all of these things will translate into growth in value for our shareholders."

CHICAGO (MAY 10) PR NEWSWIRE - Sumitomo Metal Industries, Ltd. (Sumitomo) today announced that it will establish a new plant to manufacture and market forged steel automobile crankshafts in Georgetown, Ky., approximately 20 miles north of Lexington.

The new plant will operate under the name of International Crankshaft, Inc. (ICI).

Sumitomo has an agreement to purchase an existing facility by the end of this month, and will begin construction on plant improvements in June.

The facility is located at the Georgetown Industrial Park on Lemons Mill Road in Georgetown.

Sumitomo will make extensive renovations to the existing building, including the installation of a state-of-the-art crankshaft forging line built around a 6,000 ton forging press.

When production begins in early 1992, the new plant is expected to have the capacity to produce approximately 800,000 forged steel crankshafts for passenger cars each year.

Potential customers for ICI are expected to include all U.S. and Japanese automobile companies with manufacturing facilities in North America.

Sumitomo anticipates investing approximately $40 million in the Georgetown facility. ICI will employ approximately 100 persons at the plant.

"Demand for small forged steel crankshafts in passenger automotive engines in the U.S. is expected to expand because of the increased performance demands of modern high-performance, multi-valve engines," said Yasutaka Ishimatsu, executive vice president of ICI.

"There are currently few domestic facilities with the capability to produce, in volume, the high quality small forged crankshafts required by modern engines," said Ishimatsu, "so Sumitomo has decided to manufacture small forged steel crankshafts in the U.S."

The crankshaft is the backbone of an engine. It translates the up-and-down motion of the pistons into rotary motion that is transferred to the wheels.

Ishimatsu said that the decision to establish the new facility in

Georgetown was based in part on its favorable geographic location for the transportation of raw materials as well as finished goods.

Sumitomo is one of the five largest steel making companies in Japan and also manufactures auto parts. The company has head offices in both Tokyo and Osaka, Japan. Sumitomo has annual sales approaching $8 billion and employs approximately 21,000 people worldwide.

#90130p3093 05/10/1990 ~PR Newswire

ACRE, ISRAEL (MAY 10) PR NEWSWIRE - Electrochemical Industries (Frutarom) Ltd. (AMEX: EIF) today reported results for the first quarter ended March 31, 1990. Comparative results are not available since the company was not required to report first quarter 1989 results.

Net income for the first quarter was NIS 4.2 million ($2.1 million), compared with net income of NIS 5.4 million ($2.7 million) for all of 1989. Earnings per share were NIS 0.28 ($0.14), compared with NIS 0.36 ($0.18) for all of 1989.

Consolidated sales for the first three months of 1990 amounted to approximately NIS 55 million ($27.6 million), compared with some NIS 235 million ($117.8 million) for all of last year.

Joseph Geva, chief executive officer and vice chairman of EIF said that while quantities sold in the first quarter increased, there was a drop in sales prices. He pointed out that the company's Frutarom Division, which

manufactures flavors and aromatic essences, had sales of NIS 7.4 million ($3.7 million), reflecting an increase relative to revenues of NIS 27.2 million ($13.6 million) for all of last year.

Operating profit for the first quarter, before financial expenses, amounted to approximately NIS 6.3 million ($3.2 million), compared with operating profit of NIS 20 million ($10 million for all of 1989.

The company received permission from the Israel Investment Center to increase its investment program from NIS 25.6 million ($12.8 million) to NIS 32.5 million ($16.3 million). During the first quarter of 1990, approximately NIS 3.3 million ($1.7 million) of this was invested, and as at March 31, 1990 the company was committed to purchasing another NIS 2 million ($1 million) of equipment.

The company reached an understanding with ORL Refineries Ltd. with regard to supply and price of ethylene over the next five years. While ORL shut down the ethylene plant for repairs and expansion at the beginning of May, the company has taken the necessary measures to minimize the impact on its production capacity.

Electrochemical Industries (Frutarom) Ltd. manufactures and markets chemicals, raw materials, flavors and essences for a wide variety of industrial applications. One of Israel's leading firms, it is the country's sole producer of PVC, which it markets both domestically and overseas.

CINCINNATI (MAY 10) PR NEWSWIRE - The Procter & Gamble Company (NYSE: PG) today announced the reorganization of the company's Health and Beauty Care operations into two new business units, a Health Care Sector and a Beauty Care Sector.

Effective July 1, 1990, the company's existing Beauty Care, Health and Personal Care, and Richardson-Vicks Divisions will be consolidated into two divisions - the Beauty Care Division and the Health Care Division. The new Beauty Care Division and the existing Noxell Division will comprise the Beauty Care Sector. The new Health Care Division and the existing Norwich Division will comprise the Health Care Sector.

In line with this reorganization, the personal cleansing products category will be transferred from the Bar Soap and Household Cleaning Products Division to the new Beauty Care Division, effective July 1, 1990.

Malcolm Jozoff, group vice president, will assume responsibility for the Health Care Sector and will continue to have responsibility for the Noxell Division. Jozoff will continue to report to Durk I. Jager, executive vice president, who will have overall responsibility for both sectors.

In anticipation of this restructuring, the company's board of directors elected the following executives to new positions, effective July 1, 1990.

- Todd A. Garrett, currently vice president-Asia/Pacific, was elected vice president-Beauty Care Division.
- Thomas A. Moore, currently vice president-Health and Personal Care Division, was elected vice president-Health Care Division.
- John A. Saxton, currently manager, Bar Soap and Household Cleaning Products Division, was elected vice president-Noxell Division.

In a related move, G. Gilbert Cloyd, currently associate manager, Norwich Division, will be appointed manager, Norwich Division.

Coincident with Garrett's new assignment, the company is separating its Asia/Pacific Division into two divisions to be designated the Asia/Pacific, North Division and the Asia/Pacific, South Division, effective July 1, 1990.

CONTACT: S. L. McHugh, (513) 983-4185; or T.E. Loftus, (513) 983-9789, both of The Procter & Gamble Company.

FORT WORTH, TX (MAY 10) PR NEWSWIRE - Westbridge Capital Corp. (AMEX: WBC), an accident and health insurance holding company, today reported that net income for the three months ended March 31, 1990 rose to $110,000 equal to three cents per share, on total revenues of $13,982,000. In the corresponding 1989 quarter, net income amounted to $82,000, or two cents per share, and revenues totaled $13,603,000.

Martin E. Kantor, chairman and president, noted that the company's year-to-year improvement in quarterly revenues and earnings was primarily attributable to a 67 percent increase in first-year premium income, most of which was produced by its 51 percent-owned LifeStyles agency organization formed in early 1988.

Comparative first quarter results were as follows:

WESTBRIDGE CAPITAL CORP.
(Consolidated, unaudited)
(In thousands, except per share data)

Three months ended March 31:	1990	1989

Total revenues	$13,982	$13,603
Net income	110	82
Net income per share	$.03	$.02
Wgt. avg. shares outstanding	4,243,000	4,171,000

SAN DIEGO, CA (MAY 10) PR NEWSWIRE - The Christiana Companies, Inc. (NYSE: CST) on Tuesday, May 8, announced a net income of $443,000 ($0.09 per share) for the three months ended March 31, 1990 compared to $552,000 ($0.10) for the three months ended March 31, 1989. Included in the results for the three months ended March 31, 1989 was net income of $182,000 ($0.03 per share) from discontinued operations. For the nine months ended March 31, 1990, net income was $2,153,000 ($0.41 per share) compared to net income of $993,000 ($0.18) for the nine months ended March 31, 1989. Included in the results for the nine months ended March 31, 1990 was an after tax gain of $882,000 ($0.17 per share) from the sale of 7.4 acres of land in San Diego.

Sheldon B. Lubar, chairman, said that business at Prideco, Christiana's 65 percent owned energy equipment manufacturer, continues to move ahead at record levels. He noted that Prideco is currently expanding its product

line to include the manufacture of drill pipe with production scheduled to commence in early 1991. Lubar also stated that the company's rental real estate is continuing to make steady progress.

MIDLAND, MI (MAY 10) PR NEWSWIRE - Stockholders of The Dow Chemical Company (NYSE: DOW) were told today by Frank Popoff, president and CEO,

that the company is committed to managing for long-term growth and that an integral part of this strategy is a strong, continuous investment in improving the environment.

"While 1990 will not surpass the record earnings we enjoyed in 1989," Popoff said in remarks at Dow's 93rd annual meeting in Midland, "throughout this decade sales will increase, growth will continue, and earnings will still be among the best ever for Dow. More important, we will continue to invest in our future."

Addressing the environment, Popoff said that a new management position has just been announced - vice president and corporate director of Environment, Health and Safety for Dow's global operations. David T. Buzzelli, currently president of Dow Canada, will report directly to Popoff and have an extensive organization around the world reporting to him.

Sales in 1989 were $17.6 billion, a six percent increase from the record set in 1988. Operating income, at slightly over $4 billion, was about even with that 1988 record. And net income, at $2.5 billion, was an all-time record, up four percent from the record set a year ago.

"Our bottom line is earnings per share," Popoff emphasized. Again, Dow set an all-time record of $9.20, up eight percent from 1988. This figure reflects the 3-for-2 stock split that became effective last November.

First-quarter sales in 1990 set a new record at $4.9 billion, up nearly ten percent from a year ago. Operating income was $897 million, down nearly 26 percent and net income, at $462 million, was down 38 percent from the 1989 record. Strong volume gains were offset by higher feedstock costs and lower prices in some products. These conditions are reversing in the second quarter, with volume remaining strong globally.

In responding to these economic fluctuations, Popoff said Dow's answer is to continue to move forward, focused on the long-term growth of the company. As an example, he said that Dow would spend more than $1 billion on research and development in 1990 alone.

"Another aspect of our investment deserves special attention - and that's our continuing commitment to, and investment in, the environment," Popoff told Dow's stockholders. "More than 1,100 people work full time on environmental programs, and the rest of us are active within the parameters of our jobs. All told, Dow invested more than $500 million on environmental, health and safety improvement and operations in 1989. This commitment will continue to increase in the 1990s."

DALLAS (MAY 10) PR NEWSWIRE - Charles K. Vaughn, chairman of Atmos Energy Corp. (NYSE: ATO) today announced the following management promotions for the natural gas distribution company.

David L. Bickerstaff has been named vice president of the company in addition to his responsibilities as controller.

Jack W. Eversull has been named vice president, investor relations. He was previously director, investor relations.

H. F. Harber has been named vice president, human resources. He was previously director, human resources.

"Each of these individuals has been a strong contributor to the success of Atmos Energy Corporation," said Vaughan. "These promotions recognize both their contributions and the importance we place on these areas of responsibility."

Bickerstaff joined the company in 1984 following several years with Pioneer Corp. Prior to being elected controller in 1987, he was director of rates and economics. He is a native of Amarillo, Texas and received his accounting degree from West Texas State University.

Eversull began his career with the company in 1964 and was senior vice president, operations with Trans Louisiana Gas Co. at the time of its acquisition by Atmos in 1986. His work on the corporate staff has been in the investor and governmental affairs areas and he was named director, investor relations in 1989. He is a native of Alexandria, Louisiana and holds a B.S. in business administration and accounting from Northwestern State University and an MBA from Louisiana State University.

Harber joined the company in 1983 following a career in the U.S. Navy. He has held various supervisory and management positions in the human resources department prior to being named its director in 1987. He is a native of Amarillo, Texas and has a degree in human resources management from Pepperdine University.

Atmos Energy Corp. provides natural gas service to more than 527,000 customers in Texas, Louisiana, and Kentucky through its operating companies - Energas Co., Trans Louisiana Gas Co. and Western Kentucky Gas Co.

#90130p3149 05/10/1990 ~PR Newswire

WEST PALM BEACH, FL (MAY 10) PR NEWSWIRE - Pratt & Whitney's Space Propulsion and Systems Division has completed a series of successful firings of a higher-thrust RL10 rocket engine.

The new engine, designated the RL10A-4, was run a total of 1,945 seconds and on all firings achieved rated thrust of 20,500 pounds, 25 percent more than the current RL10 model.

"The development of this engine is important to the space program since there is a need to launch heavier payloads. This program is also key to our efforts to increase our share of the space propulsion business," said Bob Wolfe, executive vice president of the newly created space division.

The liquid hydrogen/oxygen-fueled rocket engine is being developed under contract to General Dynamics' Space Systems Division to enhance the performance of the Atlas IIA and IIA/S launch vehicles. Engine qualification and initial production deliveries are scheduled for early next year. The contract includes engine development, production, delivery and launch support of RL10A-3-3A engines for the Atlas II.

The RL10A-4 provides 20,500 pounds of thrust compared to 16,500 pounds of thrust for the current RL10A-3-3A. The rocket engine features a new liquid oxygen pump and a new extendable nozzle, which significantly improves the specific impulse, a measure of the engine's efficiency.

Two RL10A-4 rocket engines will power the Centaur upper stage of the General Dynamics Atlas IIA and IIA/S. General Dynamics has ordered 74 RL10A-4s with delivery beginning in April 1991.

Since the first successful RL10-powered Centaur flight in 1963, 176 RL10s have operated in space without a single failure. The RL10 is responsible for launching numerous satellites and space probes on a variety of earth orbital and interplanetary missions. The RL10-powered Centaur is used as an upper stage with both the Atlas and Titan booster rockets.

Products for the U.S. space program are produced by Pratt & Whitney's Space and Propulsion and Systems Division, a unit of United Technologies (NYSE: UTX), which also includes Chemical Systems Division, San Jose, Calif., and USBI, with facilities in Florida, Alabama and Louisiana.

#90130p3161 05/10/1990 ~PR Newswire

OKLAHOMA CITY (MAY 10) PR NEWSWIRE - LSB Industries Inc. (AMEX: LSB) today reported operating results for the three months ended March 31, 1990.

Total revenues, including interest income and sales for the three months ended March 31, 1990 were $62,359,000 compared to $65,908,000 for the same period in 1989.

Included in total revenues were sales derived from nonfinancial services activities of $47,158,000 for the three months ended March 31, 1990, compared to $56,276,000 for the same period in 1989.

Net loss for the quarter ended March 31, 1990, was $1,786,000, after recording a $2,222,000 provision for a decline in the market value of certain marketable securities held by the company's Financial Services Business. In the comparable quarter ended March 31, 1989 the company reported net income of $1,469,000. After adjustment for dividends on outstanding preferred stocks of the company, net loss applicable to common stock was $2,307,000 or 42 cents per share for the 1990 quarter compared to net income applicable to common stock of $916,000 or 13 cents per share for the 1989 quarter.

The company's Financial Services Business' loss for the first quarter of 1990 was due to a decline in the carrying value of certain fixed rate mortgage-backed securities held as trading securities. Trading securities are subject to lower of cost or market valuation and accordingly, a provision for decline in market value of $2,222,000 was included in results of operations for the three months ended March 31, 1990. These securities have a market value of approximately $74 million.

Jack E. Golsen, chairman noted that prior to the write down of $2,222,000 mentioned above that the Financial Services Business operating results were positive.

Golsen further noted that overall the company's Industrial Businesses performed better in the 1990 first quarter than in the 1989 first quarter in terms of operating profit. The Environmental Control Business continues to improve its profitability and the Chemical Business had its best first quarter ever. However, the Industrial Products Business' sales and profits for the first quarter of 1989 included the effects of sales of $7.4 million of machinery and equipment to a foreign project. Sales to this project were completed during 1989.

WASHINGTON (MAY 10) PR NEWSWIRE - At 4 p.m. today, Robert J. Herrmann, senior deputy comptroller for bank supervision, Office of the Comptroller of the Currency, declared First National Bank of Grand Saline, Grand Saline, Texas, insolvent and appointed the Federal Deposit Insurance Corporation (FDIC) as receiver.

First National Bank of Grand Saline was chartered in 1943. As of April 2 1990, it had total assets of $28.5 million.

The bank had been a concern to the OCC since 1986. The OCC determined, as a result of examinations of the bank, that the poor lending practices of former and current management resulted in excessive problem loans. This, coupled with inadequate oversight of the bank by management and the board of directors and the depressed local economy, caused the bank's condition to sharply deteriorate.

In 1986, the OCC obtained commitments from the board of directors to undertake measures to correct the bank's problems. These efforts were unsuccessful, and losses finally exhausted the bank's capital funds, resulting in its insolvency.

The FDIC is expected to release additional information later today.

#90130p3173 05/10/1990 ~PR Newswire
HOUSTON (MAY 10) PR NEWSWIRE - Service Corporation International (SCI) (NYSE: SRV), the largest funeral service/cemetery company in North America reported today that revenues from continuing operations for the period from Jan. 1, 1990 to March 31, 1990 totalled $150.7 million, up from $131.7 million reported for the same period of 1989.

Income from continuing operations for the first quarter of 1990 was $17.8 million or $.37 per share, compared to $17.9 million or $.37 per share for the first quarter of 1989.

Discontinued operations contributed $.01 to earnings for the first quarter of 1989, or a total net income of $.38. Discontinued operations had no effect on net income for the first quarter of 1990.

Funeral revenues during the first quarter grew by $12.8 million, representing a 13.4 percent increase over those for the first quarter of 1989. The increase was due to an increase in total funeral case volume

over the same period of the preceding year. The total volume, including volume from new operations resulting from SCI acquisitions, increased 12.6 percent over that of the first quarter of 1989.

Cemetery revenues increased $3.6 million, or 10.2 percent over those of the first quarter of last year. While a part of the increase was due to revenues from parks acquired after Dec. 31, 1988, additional revenue was generated from increased preneed and at need sales and trust investment gains and earnings from existing and recently acquired parks.

The outstanding loan portfolio of Provident Services, Inc., the company's financing affiliate, which began operations in June 1988, reached $114.5 million at the end of the first quarter, compared to $27.6 million at March 31, 1989.

Commenting on the results of operations during the first quarter, R. L. Waltrip, chairman of SCI said: "We are encouraged that our restructuring is progressing as planned. Programs instituted in the first quarter of 1990 should result in improved performance in our funeral and cemetery segments."

SCI owns and operates 549 funeral homes and 126 cemeteries in the U.S. and Canada. At March 31, 1990, the company's assets were in excess of $1.6 billion.

#90130p3177 05/10/1990 ~PR Newswire

CLARKSBURG, WV (MAY 10) PR NEWSWIRE - Alamco Inc. (AMEX: AXO) announced net income of $968,000 or $0.37 per share for the first quarter of 1990 compared to net income of $628,000 or $0.24 per share for the same period last year.

Results for the first quarter of 1990 and the first quarter of 1989 included certain tax benefits which were recorded as extraordinary credits to net income. These extraordinary items totaled $305,000 or $0.11 per share and $248,000 or $0.09 per share in 1990 and 1989, respectively.

Revenues of $2,386,000 for the first three months of 1990 were down $341,000 or 12.5 percent from revenues of $2,727,000 for the first three months of 1989. The decrease in revenues resulted from lower but still higher-than-market gas prices under the company's contract reformation agreement with its principal utility customer in November 1989. The contract provided for a 27-month extension of the original contract until

March 31, 1993, a substantial cash payment to Alamco and other working interest owners, and a cash prepayment for future gas deliveries from the company's Tallmansville field.

The decline in revenues in gas and oil sales attributable to the lower gas purchase price received from the company's principal utility customer was expected and resulted in a substantial decline in income from operations from $529,000 in the first quarter of 1989 to $155,000 in the first quarter of 1990. The company's first quarter 1990 expense levels were essentially unchanged from last year.

Expenses in the first quarter of 1990 totaled $2,231,000, an increase of $33,000, or 1.5 percent from last year's expenses of $2,198,000. Increases in operating expenses and general and administrative expenses aggregating $82,000 as compared to the first quarter of 1989 were partially offset by decreases in depreciation, depletion and amortization and interest expenses.

In the first quarter of 1990, the company made debt prepayments to Pittsburgh National Bank ("PNB") totaling $2,800,000. Accordingly, non-operating income in the first quarter of 1990 includes $616,000 in reversals of capitalized interest related to the prepayments. As part of a refinancing agreement with PNB effective as of March 1, 1990, the company negotiated a discount of $900,000 which was recorded as a direct increase to paid-in-capital in the after-tax amount of $816,000.

Alamco, headquartered in Clarksburg, W.Va., is an independent producer of gas and oil in the Appalachian Basin with a major operating concentration in West Virginia gas fields.

WASHINGTON (MAY 10) PR NEWSWIRE - At 4 p.m. EDT today, Robert J. Herrmann, senior deputy comptroller for bank supervision, Office of the Comptroller of the Currency, declared Commonwealth National Bank of Dallas, Texas, insolvent and appointed the Federal Deposit Insurance Corporation (FDIC) as receiver.

Serious problems were first identified at the June 1987 examination. Liberal lending practices of former management, including a significant amount of junior lien financing on real estate projects, together with a weak economy resulted in significant criticized loans, large provisions for loan losses and poor earnings.

In March 1988, the OCC entered into a cease and desist order with the board

to correct identified problems, evaluate its management and staffing needs, and maintain adequate capital.

Despite a change in ownership and management in 1988, their efforts to address these problems have been inadequate. As real estate values have declined in response to local economic conditions, loan losses mounted and compounded the bank's loan problems.

Commonwealth National Bank was chartered Feb. 3, 1964. Loan and other losses exhausted the bank's capital, resulting in insolvency. As of April 30, 1990, the bank had total assets of approximately $46 million. The FDIC is expected to release additional information later today.

ST. PAUL, MN (MAY 10) PR NEWSWIRE - Northwest Airlines today named Bruce R. Rismiller to the newly created position of executive vice president-human resources; Richard B. Hirst, executive vice president and general counsel, and Herbert D. Ihle, senior vice president-finance and controller, a new position.

Timothy R. Thornton, who has been with Northwest two years, assumes the newly created position of executive vice president-labor relations. Northwest also promoted Robert L. Fornaro, a two-year Northwest executive, to senior vice president-market planning, and R. Terrence Rendleman, who joined Northwest in 1983, to senior vice president-technical operations.

Rismiller, previously senior vice president with Carson Pirie Scott & Company in Chicago, will be responsible for the airline's human resources activities including personnel, management development and employee training.

Hirst, previously vice president-general counsel and secretary for Continental Airlines in Houston, will be responsible for all Northwest legal activities, government affairs and properties and facilities operations.

Ihle, who has 27 years of finance experience at Pillsbury, will oversee general accounting and accounting services, payroll, financial systems development, revenue accounting, financial planning and analysis, corporate planning, internal audit and security.

Thornton will oversee all labor relations and union negotiations. Fornaro continues to be responsible for pricing, scheduling, route planning,

forecasting and competitive analysis. Rendleman continues to be responsible for the airline's maintenance and engineering activities.

"The addition of these new executives and the promotions within our current management ranks emphasize the importance we place on assembling a management team dedicated to quality service throughout our airline," said Northwest Chairman Al Checchi.

"These changes continue our commitment to enhancing the positive work environment at Northwest. A leadership responsive to our customers and our employees will ensure we reach our goal to be America's preferred airline in the '90s," said Northwest President Fred Malek.

Rismiller, 53, joined Carson's in 1984 as vice president of human resources. Prior to that, he was co-founder and chairman of Display Telecommunications Corporation in Dallas, and spent 16 years with Xerox Corporation. He attended Temple University and holds a master of science degree in guidance and counseling from Millersville University, Millersville, Penn., and a bachelor of science in history and political science from Lebanon Valley College, Annville, Pa. Currently a Chicago resident, Rismiller is married with one child.

Hirst, 46, brings seven years of major airline experience to Northwest. Earlier, he was an associate professor at the University of Puget Sound Law School in Tacoma, Wash., was assistant to the director of international and domestic aviation for the Civil Aeronautics Board, was in private practice in Vermont and served as a law clerk in U.S. District Court in Vermont. He graduated from Harvard Law School in 1972 and Harvard College in 1969. Presently a Houston resident, Hirst is married with two children.

Ihle, 49, held finance posts with Pillsbury and its parent, Grand Metropolitan, including executive vice president-finance. He earned a master's degree in accounting from the University of Minnesota in 1963 and completed a financial management program at Harvard University and the executive program at Amos Tuck Graduate School of Business. His bachelor's degree is from Concordia College, Moorhead, Minn. Ihle is married with three children and lives in the Twin Cities.

Northwest is America's fourth largest airline, serving 132 cities in 21 countries in North America, Asia and Europe.

HOUSTON (MAY 10) PR NEWSWIRE - Vista Chemical (NYSE: VC) today announced

a new family of rigid pellet compound products for injection molding, called VISTEL (TM) Rigid Vinyl Compounds. These products are commercially available to injection molders who manufacture parts for pipe fittings, exterior weatherable products or general purpose construction applications.

"With the introduction of VISTEL rigid compounds, Vista has expanded its product line to provide full service to the injection molder," noted Larry Kardos, program manager for the new product family. "In addition to Vista's rigid powder dryblends and flexible compounds, injection molders may now select a full range of rigid pellet injection molding products."

Applications for VISTEL injection molding vinyl may include such products as furniture fittings, plumbing valves, couplings and fittings, electrical appliance control boxes, swimming pool filter fittings and housings, junction boxes for telephone systems and appliance parts.

Each VISTEL formulation has been optimized for outstanding performance in specific injection molding applications. This new engineered plastic exhibits high flow characteristics, allowing molders to produce complex shapes and parts with confidence. VISTEL compounds are also inherently flame retardant, UV stable and provides excellent weather and chemical resistance. These rigid PVC pellets also display outstanding physical strength, with control of surface appearance in finished parts. VISTEL injection molding vinyl pellets are available as transparent compounds, or in a wide range of custom colors.

Kardos observed that VISTEL rigid vinyl is less expensive than most engineering-grade polymers, offering savings of up to 60 percent compared to traditional flame-retardant injection molding materials.

"The introduction of the VISTEL family of products is yet another step in Vista's strategic plan to offer an expanding range of high performance, value-added engineered polymers, blends and alloys for specialized applications," Vista Polymers Vice President Rick Flammer said.

In recent months, Vista has introduced PLENEX (TM) Thermoelastic Polymers for use in low-smoke, reduced-flame wire and cable applications, and ROTOFLEX (TM) Powder Slush Molding Compound, a flexible PVC compound powder used to manufacture automotive instrument panels. In addition, Vista recently announced it had entered into a strategic alliance with Monsanto Chemical Co. to produce new polymers, alloys and polyblends.

YOUNGSTOWN, OH (MAY 10) PR NEWSWIRE - Commercial Intertech Corp. (NASDAQ: CTEK) announced its wholly-owned affiliate Cuno, Inc. had reached a settlement with the Pall Corp. (AMEX: PLL) of Glen Cove, New York, in its claim that Pall had infringed on certain nylon membrane patents.

Pall agreed to pay Cuno $12 million for a paid up license with respect to key patents in the production of nylon membrane. The parties also agreed to exchange worldwide releases for all prior activities in connection with nylon membrane products. Litigation pending in the U.K., France and Germany by each party will be terminated.

Cuno sued Pall Corp. for infringement of their charged nylon membrane patents in September 1986. The suit was broadened in 1987 to include Cuno's basic nylon membrane patent. The trial began April 9, 1990; and the $12 million settlement was reached out of court during the trial.

Paul Powers, chairman of Commercial Intertech said, "We initiated the suit to protect what we believe are excellent products with great growth potential. It is our corporate policy to vigorously defend our patents. While the issues were complex, we believe a fair solution was achieved and that Cuno will continue its exciting progress in the field of high tech filtration."

WASHINGTON (MAY 10) PR NEWSWIRE - The U.S. Department of the Treasury today agreed to lift its temporary suspension of the Chesapeake and Potomac Telephone Company and its parent, Bell Atlantic Corporation (NYSE:

BEL), from eligibility to engage in future government contracting.

The suspension, imposed on April 3, occurred because Treasury believed C&P and Bell Atlantic had made a misrepresentation in the course of an ongoing procurement competition. Bell Atlantic has since submitted information in support of its position that it did not misrepresent any fact to Treasury.

Treasury has agreed to terminate the suspension and all related administrative action, and Bell Atlantic has agreed to reemphasize to its employees, and to the employees of its subsidiaries, the need to verify all information provided to the government, including information supplied by subcontractors.

Bell Atlantic and C&P will terminate and desist from any further litigation about this procurement, and all parties welcome the return to normal relations which they have enjoyed for 100 years.

MINNEAPOLIS (MAY 10) PR NEWSWIRE - Ted Deikel, chairman and chief executive officer of Minnetonka-based Fingerhut Companies, Inc. (NYSE: FHT) today announced the addition of four new members to the company's board of directors.

Newly elected board members are Wendell R. Anderson, partner in the law firm of Larking, Hoffman, Daly & Lindgren, Ltd., and former United States senator and Minnesota State governor; Stanley S. Hubbard, chief executive officer of Hubbard Broadcasting, Inc., and president of Conus Communications and the United States Satellite Broadcasting Company; Dudley C. Mecum, partner in the leveraged buyout firm of G.L. Ohrstrom & Co.; and Linda J. Wachner, president and chief executive officer of Warnaco, Inc., one of the nation's largest brand name apparel companies.

Prior to the Fingerhut's initial public offering, completed last month, the company's board of directors consisted of Ted Deikel, chairman and chief executive officer of Fingerhut Companies, Inc.; James Dimon, executive vice president and chief financial officer of Primerica; Robert I. Lipp, executive vice president and chairman of the Consumer Financial Services Group of Primerica; and Irwin R. Ettinger, senior vice president of Taxes and Audit of Primerica. As planned at the time of the company's public offering, Ettinger resigned from the board concurrently with the election of the four new board members.

"The specialized backgrounds of each of the four new board members provide the company with a broad perspective," said Deikel. "Individually they offer extraordinary leadership abilities, and as a team, the board members will contribute significantly to Fingerhut's growth."

Anderson's experience in governmental affairs will assist the company as its business relies on the support of government agencies as it conducts business in national and international markets. The former U.S. senator and Minnesota governor is currently serving on numerous boards, including the board of regents of the University of Minnesota.

Fingerhut Companies, Inc., headquartered in Minnetonka, Minn., in 1989 recorded annual revenues in excess of $1 billion and is one of the nation's largest direct mail merchandisers. The company's stock is listed on the New York Stock Exchange under the symbol FHT.

HOUSTON (MAY 10) PR NEWSWIRE - TEX/CON Oil & Gas Co., an independent domestic oil and gas producer and marketer, has increased its interest to approximately 80 percent in Long Island-based Direct Gas Supply Corp. (DGS), a privately held independent trader and marketer of natural gas. Terms were not disclosed.

Founded in 1984, DGS purchases natural gas from wellhead suppliers and gas-gatherers, transports the gas through existing intra-state and inter-state pipelines and local utility distribution networks, and sells it directly to more than 500 industrial, commercial, institutional and municipal end-users, primarily in the Northeast.

"Our increased stake in DGS gives TEX/CON an opportunity to participate in the direct marketing of significant volumes of natural gas to hundreds of retail customers that we would otherwise not be able to serve," said Victor T. Linck, TEX/CON vice president of gas marketing and supply.

TEX/CON operates in the onshore lower 48 states. It has interests in about 3,000 oil and gas wells and is a gas-gatherer, marketer and transporter. TEX/CON operates a total of 1,400 miles of intrastate gas-gathering pipelines in Oklahoma and Louisiana.

DGS, a New York corporation, is based in Islandia, Long Island, New York.

Customers of DGS include hospitals, food processors, schools, colleges, manufacturers, residential and commercial real estate developers and service entities.

John N. O'Brien, DGS president and chief executive officer and DGS's founder, said DGS "is able to pass along substantial savings to our end-use customers by purchasing gas for a lower average cost than distribution company suppliers."

Commenting on the transaction, O'Brien said DGS will be able to broaden its service base and provide increased operating and marketing efficiencies. Its relationship with TEX/CON provides its customers with a secure gas supply.

#90130p3232 05/10/1990 ~PR Newswire

SAN DIEGO (MAY 10) PR NEWSWIRE - Oak Industries (NYSE: OAK) today reported net income for the first quarter of 1990 of $550,000, or 1 cent per share, compared to a net loss of $511,000, or 1 cent per share in the same period of 1989. The 1990 results include non-recurring items and the results of discontinued operations, netting a $100,000 gain, compared to a net gain of $400,000 for similar items in 1989.

Operating profits were up over the same 1989 period, while corporate G&A and other expenses were unchanged. Corporate interest expense decreased approximately $900,000 because of repayment of $18,900,000 in long-term debt over the last year, and interest income was down $300,000 as a result of lower invested cash balances.

Net sales from continuing operations in 1989 were $43,512,000, up slightly from sales of $43,011,000 in 1989. The appliance controls sales were up because of volume increases, which were somewhat offset by sales declines in the switch and railway maintenance businesses.

William S. Antle III, Oak president and chief executive officer said, "I believe we have made good progress in the first quarter of 1990 and have a number of aggressive actions underway. The financial effect of these actions will begin to be realized over the next several months."

CONTACT: William S. Antle III, or William C. Weaver, 617-899-0896, both of Oak Industries Inc.

WASHINGTON (MAY 10) PR NEWSWIRE - At 7 p.m. (EDT) today, Robert J. Herrmann, Senior Deputy Comptroller for Bank Supervision, Office of the Comptroller of the Currency, declared Dominion National Bank, Denver, insolvent, and appointed the Federal Deposit Insurance Corporation (FDIC) as Receiver.

The bank has been a matter of increased concern to the OCC since 1983. The board signed an agreement with the OCC in which they committed to correcting the bank's problems, but these efforts were unsuccessful. Losses continued which eventually exhausted the bank's capital, resulting in insolvency. Poor bank management, high overhead costs, stiff competition, and the depressed local economy all contributed to the bank's failure. The bank had not been profitable since 1983.

Dominion National Bank was chartered in 1981. As of Dec. 31, 1989, it had total assets of $18 million.

The FDIC is expected to release additional information later today.

SUNNYVALE, CA (MAY 10) PR NEWSWIRE - Atari Corp. (AMEX: ATC) today reported net income of $1.5 million or $.03 per share on sales of $85.5 million for the quarter ended Mar. 31, 1990. This compares with net income of $3.3 million or $.06 per share on sales of $88.8 million for the first quarter ended Mar. 31, 1989.

The results for the quarter reflect continued revenue growth for the Atari ST and Atari PC MS-DOS compatible product line, and the new Lynx handheld color video game machine. The decline in revenue from last year is attributable to the impact of intense competition in the company's traditional 2600 and 7800 video game market in the United States.

Atari Corporation is one of the largest companies in the world manufacturing and marketing personal computers and video games for the home, office and educational marketplaces. Atari's headquarters is located at 1196 Borregas Avenue, Sunnyvale, Calif., 94088-3427.

CHICAGO (MAY 9) UPI - The Philadelphia 76ers were done in by the usual suspect Wednesday night.

Michael Jordan rallied the Bulls past a 16-point first-half deficit to defeat the 76ers 101-96 and take a 2-0 advantage in their Eastern

Conference playoff series.

''Come on, that's why he's Michael Jordan,'' Philadelphia Coach Jim Lynam said. ''If you want a turning point, that's it.''

Jordan, who was the last of his teammates to arrive at Chicago Stadium because of heavy traffic due to a rainstorm, scored 15 of his 45 points in the decisive third quarter, then scored his team's final 6 to seal the win.

''In the second half, we got the ball more inside, eliminated their big guys and really controlled the game and tempo,'' Jordan said.

The Bulls, who led all of Game 1, trailed 70-59 with 5:25 left in the third after a 3-pointer by Hersey Hawkins, who finished with a team-high 23 points. But they proceeded to outscore the 76ers 19-7 in the last five minutes to take a 78-77 lead into the final quarter.

''We just felt our defense had to step it up,'' Bulls Coach Phil Jackson said. ''I didn't anticipate getting back in the game quite so early. I thought it would take us some time to get back in it, and not try to make it up in five minutes. But this team has high energy.''

The best-of-seven series moves to The Spectrum for Games 3 and 4, starting Friday night. The 76ers were 2-0 against the Bulls there this season.

Jordan, who had 39 points in the opening game, had 15 of his team's 32 points in the quarter, while Charles Barkley was held scoreless. Jordan put the Bulls ahead for good with three free throws to end the quarter, including a technical assessed to Rick Mahorn after a hard foul on Jordan and an ensuing pushing match with rookie Stacey King.

''I could feel the intensity, the momentum of the game shift,'' Jordan said.

With Jordan on the bench, King opened the fourth quarter with a hook shot, and rookie B.J. Armstrong converted a layup to increase the lead to 82-77. Philadelphia stayed close, and a pair of Hawkins free throws with 1:20 remaining cut the deficit to 97-96.

But Jordan again took over. He connected on a scoop shot with 1:04 left to make it 99-96. Then, after Johnny Dawkins missed a short jumper, he hit a pair of free throws with 33 seconds left for a 5-point lead. After Barkley missed a jumper, the Bulls ran out the clock for the win.

''We were 16 points down there and weren't ready to lose,'' said King.

Scottie Pippen added 16 points for the Bulls. Barkley, who had 30 points and 20 rebounds in Game 1, was held to 16 points, only 2 in the second

half.

''They double-teamed the hell out of me,'' Barkley said. ''So I passed it every time.''

The 76ers took their first lead of the series when Hawkins converted a layup 3 1-2 minutes into the game. They led 30-25 after one on a sizzling 68 percent shooting. Jordan had 13 points for the Bulls, but his teammates were not nearly as effective.

Philadelphia then took command early in the second. Mahorn, held to 4 points in Game 1, hit his second basket of the night, and Hawkins and Ron Anderson each connected on a jumper to build the lead to 36-25.

Chicago, getting some spark off the bench from Craig Hodges, pulled within 5 before the 76ers strung together a 15-4 run midway through the second quarter that put them ahead by 16. Barkley accounted for 7 of those points including an uncontested 3-pointer from the top of the key, and Mike Gminski's jumper with 3:23 left in the half made the score 54-38.

The Bulls, led by Jordan's 19 points, managed to close the gap to 57-46 by intermission. Barkley had 14 points and 10 rebounds at the half.

''We were careless,'' Hawkins said. ''We didn't do the same things that had gotten us the lead early.''

BOSTON (MAY 10) UPI - Half-chewed tortilla chips can pose a ''serious'' health risk, according to a California physician who almost lost an elderly patient when her esophagus was torn by the corner of a chip.

In a letter in this week's New England Journal of Medicine, Dr. George Longstreth warned other physicians that elderly people wearing dentures and others who have trouble chewing are at risk of esophagal laceration from sharp tortilla chip edges.

''A poorly chewed tortilla chip can produce serious injury,'' Longstreth wrote.

Longstreth, a doctor at Kaiser Permanente Hospital in San Diego, reported a case in which a 63-year-old San Diego woman was hospitalized after a tortilla chip tore a 5 1/2-inch gash in her esophagus.

Soon after swallowing the chip, Irene Harnisch began experiencing severe chest pains and throwing up blood. She was hospitalized for six days and could not eat solid food for nearly two weeks, Longstreth said.

''It was a very serious incident. She lost four pints of blood. It's possible she could have died,'' Longstreth said in a telephone interview.

Longstreth said Harnisch probably had trouble chewing the chip because she wears upper dentures.

Harnisch, reached at her home in San Diego, said she was attending a picnic when the chip became lodged in her throat.

Harnsich said she has since stopped eating tortilla chips. ''I don't want them in my house. They scare me,'' she said.

BOSTON (MAY 10) UPI - The promising AIDS drug DDI apparently can combat the deadly virus without causing excessive side effects, alleviating recent fears it may be too dangerous, researchers said.

Results of two new studies suggest dideoxyinosine, or DDI, may be the second drug that effectively attacks the AIDS virus and may offer an alternative to the only currently approved AIDS drug, AZT.

On the basis of the findings, ''it is fair to say that this is one of the most promising drugs to come along since the development of AZT,'' said Dr. Robert Yarchoan of the National Cancer Institute, who was the first to report that DDI appeared to fight the AIDS virus.

But Yarchoan and other AIDS researchers warned that it is still too early to tell whether DDI will be able to extend the lives of AIDS patients, as AZT - also known as zidovudine - appears to do.

''Despite the inevitable enthusiasm that these two reports will engender '' doctors and patients should keep in mind that DDI's long-term effectiveness and its full range of toxic effects remain to be determined, Dr. Anthony Fauci of the National Institute of Allergy and Infectious Diseases said in an editorial accompanying the studies, which were published Wednesday in The New England Journal of Medicine.

Initial hopes that DDI might be a less toxic substitute for AZT, its chemical relative, seemed to dim in March when the drug's manufacturer, Bristol-Myers Squibb Co., reported that DDI-related inflammations of the pancreas had killed five of 8,000 AIDS patients who received the drug on a new ''expanded access'' plan, as well as one of 700 people enrolled in more traditional tests.

But the new studies indicate that while DDI therapy can cause pancreatic

inflammation and a nerve disorder that causes pain in the feet and hands, it is no more toxic than AZT.

Researchers said it is difficult to directly compare AZT and DDI because their side effects differ. AZT suppresses bone marrow production of white blood cells, leading to anemia and other complications in 40 percent or more of patients who receive it over an extended period. But it apparently does not affect the pancreas.

''The best way to put it is that the drugs have different toxicities, not that one is necessarily less toxic than the other,'' said Dr. Paul Skolnik director the New England Medical Center's AIDS laboratory.

In the first study, researchers at Boston University and Boston City Hospital gave DDI to 34 patients with AIDS or AIDS-related complex (ARC) for an average of 12 weeks. The drug was given in varying levels in an attempt to find the dose that was most effective without being overly toxic.

After 10 weeks, DDI given once a day had bolstered the immune systems of the patients by signicantly increasing the levels of key disease-fighting cells known as T-4 help cells.

DDI also produced a 50 percent decrease in antigens - markers of the level of AIDS virus in the bloodstream - in about three-quarters of patients on whom such tests could be performed.

In one patient, the drug led to a condition called neuropathy, which produces a painful burning sensation in the feet. In two others, DDI caused pancreas inflammation. But DDI did not lead to the suppression of white blood cells or anemia often associated with AZT.

In the second study, University of Rochester researchers gave DDI twice a day to 37 patients for about 17 weeks. They said the drug had the same general effect as it did in the Boston patients, improving the immune response and suppressing the virus.

Five patients developed pancreas inflammation, but their symptoms cleared up within three weeks after DDI was halted. Eight people developed neuropathy (pain in the fingers and toes), which disappeared in all but one after the drug was stopped.

Yarchoan said it will probably be at least a year before the next phase of DDI testing, which is looking at long-term effectiveness, is completed and even longer before it could receive government approval.

#90130u0190 05/10/1990 ~United Press International
(MAY 10) UPI - Beginning next Tuesday at the White House, President Bush and a bipartisan team of lawmakers will discuss ways to cut the federal budget deficit. Worries about the economy helped push both sides Wednesday into agreeing to the talks. All options, including higher taxes, will be considered. Senate Republican leader Bob Dole is flexibile. But 19 G-O-P senators sent a letter to the president, urging him to stick with his pledge of NO new taxes.

Reform is finally coming to Albania... the last European country ruled by a Stalinist-style communist regime. A source at the Albanian Embassy in Athens said Wednesday the Albanian parliament has voted to lift religious and foreign travel restrictions on its citizens. The source says the reforms apparently are a response to U-S demands that Albania comply with the Helsinki convention on human rights if it wishs to resume diplomatic ties with Washington.

The Senate Ethics Committee voted Wednesday to expand its investigation into allegations that Minnesota Republican David Durenberger received reimbursements from the Senate for use of a Minneapolis condominium. In a statement, the panel also said it would investigate whether Durenberger violated ethics rules relating to the handling of his qualified blind trust.

The Minnesota lawmaker already faces other ethics charges. Last Thursday, the committee said it would hold hearings in June to investigate five other allegations... including Durenberger's reported use of limousines for personal travel in Massachusetts.

95 anti-abortion protesters were freed Wednesday after being jailed in Burlington, Vermont, for 78 days on contempt-of-court charges. The protesters were ordered held after refusing to identify themselves following their arrests. Their release came after an agreement was reached with the state in which the protesters pleaded guilty to trespassing and were sentenced to time served.

(MAY 10) UPI - The dual juries in the Bensonhurst racial slaying trial resume deliberations Thursday in the case that has exposed deep racial divisions in New York City. Demonstrators gathered outside the state Supreme Court building in Brooklyn Wednesday to demand a guilty verdict. One jury is mulling the fate of the accused killer of 16-year-old Yusef Hawkins. The second is considering the fate of the accused ringleader of the white mob.

A jury in Austin, Texas, convicted an Ohio man of second-degree felony

criminal mischief Wednesday night in the poisoning of the historic Treaty Oak. 46-year-old Paul Cullen could face up to life in prison because of previous burglary convictions. He was accused of pouring a powerful herbicide around the base of the 300- to 400-year-old tree once called the most perfect live oak specimen in North America. The attack left most of the tree dead, but part of the giant oak is still alive and experts hope it will survive.

PALM SPRINGS, Calif. (MAY 10) UPI - Actor Charles Farrell, who played opposite Janet Gaynor when she won the first Academy Award as best actress and who later starred in the TV sitcom ''My Little Margie,'' died during the weekend, friends said Wednesday. He was 89.

Farrell, a former mayor of Palm Springs and founder of the Palm Springs Racquet Club, died Sunday at his home. He was buried Wednesday at Welwood Murray Pioneer Cemetery beside his wife, actress Virginia Valli. Farrell had asked that no formal announcement be made of his death.

Farrell and Gaynor starred in a series of romantic pictures, including the 1927 silent classics ''Seventh Heaven'' and ''Sunrise,'' for which she won the Academy of Motion Picture Arts and Sciences' first best-actress award. Early Academy Awards were often given for cumulative work.

At the height of their seven years of popularity, Gaynor and Farrell were known as ''America's favorite lovebirds.''

His other films included ''Sandy,'' ''Street Angel,'' ''Tess of the Storm Country,'' ''Moonlight Sonata,'' and ''Just Around the Corner.''

In addition to ''My Little Margie,'' in which Farrell starred as Gale Storm's father in a series that ran from 1952-55, he also starred in ''The Charles Farrell Show'' and narrated such documentaries as ''El Salvador - Another Viet Nam,'' and ''In a New Light.''

Farrell was born in Onset Bay, Mass., and broke into show business in a theater his father ''Pop'' Farrell owned in Boston. He made his screen debut in 1923 as an extra.

He was a lieutenant commander in the Navy during World War II, serving aboard an aircraft carrier and operating the officer's club at the Alameda Naval Air Station in California.

Farrell and his wife founded the Racquet Club, which made them a fortune and was credited with helping make Palm Springs a haven for movie stars.

''They helped create the glamorous place that Palm Springs is today,'' said Mrs. William Powell, wife of the late actor.

He served seven years as mayor in the 1950s.

Earle Strebe, a former city councilman, said Farrell was an ''outstanding leader in the community who had a lightness of manner and at the same time was a very dedicated business and civic leader who did an outstanding job as mayor of Palm Springs.''

WASHINGTON (MAY 10) UPI - A group of Republican Senators opposed a call for new taxes to reduce the soaring budget deficit and said lawmakers can place the proposal on President Bush's table, but like broccoli, ''he's not going to eat it.''

Nineteen Republican senators signed a letter to Bush urging him to stick with his 1988 campaign pledge of no new taxes. Instead, the lawmakers want Bush to push harder for a cut in the capital gains tax.

''We unequivocally oppose new taxes and believe the most important item on the table should be a cut in taxes on capital gains,'' the letter said. It was authored by Sen. Connie Mack, R-Fla., and signed by 18 other conservatives.

''The president feels about taxes the way he feels about brocolli - you can put it on the table in front of him but he's not going to eat it,'' Rep. Jon Kyl, R-Ariz., said on the House floor. ''If somebody is going to propose new taxes, it's got to be somebody other than George Bush.''

Spurred by economic jitters, Bush and Congress agreed Wednesday to begin bipartisan budget talks next week that will consider all options, including higher taxes, to cut the deficit.

During an hour-long Oval Office meeting, Bush and the top four congressional leaders firmed up plans to throw the deficit problem to a special bipartisan negotiating group that will meet with no conditions or deadlines.

The talks are set to begin Tuesday at the White House with Bush leading the negotiations. The talks will then move to Capitol Hill, where House Democratic leader Richard Gephardt of Missouri is expected to preside.

Congress will have 17 negotiators at the summit - four appointed by each leader and House Speaker Thomas Foley, D-Wash., getting an extra appointment.

Most congressional participants were named Wednesday with party leaders on the House and Senate tax, spending and budget committees selected. Bush budget director Richard Darman and Treasury Secretary Nicholas Brady were to lead the administration's negotiating team.

''They are going to sit down and consider everything,'' White House press secretary Marlin Fitzwater told reporters. ''Every idea that anybody wants to bring up will be talked about and considered.''

Senate Democratic leader George Mitchell of Maine said Bush's invitation was accepted ''without preconditions of any kind.''

''We may not succeed,'' Senate Republican leader Bob Dole of Kansas said. ''It's like putting Humpty Dumpty back together again. It's not impossible but it's almost. We'll need public support.''

Congressional leaders expect several politically sensitive areas, such as Social Security, to be thrown into the mix along with deeper defense and domestic program cuts.

Hoping for rapid progress and a multi-year plan, all sides acknowledged the agreement was driven by mounting concern about the economy and signs the savings and loan industry bailout will far exceed earlier cost estimates of $150 billion, pushing up the deficit.

Fitzwater said up to $100 billion in additional savings - way above the $36 billion in spending cuts and revenue increases originally thought necessary - may be needed to meet the fiscal 1991 deficit limit of $64 billion.

''The question is: Can the American people count on their elected leadership to deal with the deficit problem?'' he asked. ''And what the president said today is, 'We want to sit down and negotiate. We want to deal with this problem. We want good-faith efforts by all parties.'''

Dole urged Republicans - some of whom have vowed to oppose any tax hike negotiators may recommend - to be more flexible.

''Let's not lock ourselves in,'' Dole said. ''Let's give the president a chance, if you're a Republican, and, if you're a Democrat, give the Democratic leadership a chance.''

Darman, in a Cable News Network interview, said ''an excessive tax increase or the wrong kind of tax measures could adversely affect economic growth'' and Bush would oppose them.

''We would be very adverse to anything that would threaten continuing economic growth,'' Darman said before apologizing for negotiating through the media, which summit participants had promised to avoid.

On behalf of Democrats, Foley promised ''we're not going to attempt to politicize (the talks) on either side or utilize the discussions as an opportunity to renew old political battles.''

Fitzwater insisted the lack of ''preconditions'' did not necessarily mean higher taxes would be in the final package. He said it underscored the commitment by all sides to have talks ''void of the normal political posturing, politics and perceptions.''

(MAY 10) UPI - South Korean authorities say they detained nearly 19-hundred people in the worst anti-government rioting in two years. A national police spokesman says most will be freed, but those identified as ''radicals'' will be charged and prosecuted. Students and other dissidents burned public offices and attacked police during Wednesday's nationwide protests against the new ruling party.

In a move apparently meant to show an improving human rights record, China Thursday announced the release of 211 people jailed since last year's crackdown on the democracy movement. The official news agency also said 431 others are still being investigated and some are being prosecuted. The latter total marks the first time Chinese authorities have given a specific number of suspects being investigated. Western diplomats have estimated between 10-thousand and 30-thousand people were arrested nationwide after the army fired on pro-democracy protesters last June.

Actor Charles Farrell, who played Gale Storm's father in the ''My Little Margie'' television comedy series in the 1950's is dead. Friends say Farrell died during the weekend in Palm Springs, California, where he once was mayor. He was 89. Farrell starred in a series of romantic movies with actress Janet Gaynor, including ''Seventh Heaven'' and ''Sunrise,'' the pictures that won Gaynor the very first best-actress Oscar in 1928.

#90130u0408 05/10/1990 ~United Press International

CAPE CANAVERAL, FL (MAY 10) UPI - Rocket engineers Thursday fine-tuned plans to remove a faulty cooling system valve from the shuttle Columbia in a tricky repair job that will delay the ship's blastoff on a Spacelab astronomy mission for two to three weeks.

William Lenoir, associate administrator for space flight, announced the launch delay Wednesday after wrapping up a two-day flight readiness review to assess the status of Columbia's flight processing. Liftoff on the 36th shuttle flight had been scheduled for next Thursday.

''We are obviously disappointed that we are not ready to fly,'' Lenoir said in a statement. ''However, this particular system is absolutely critical to the safety of the crew and overall mission success, so we have decided to change the component.''

Launch director Robert Sieck said the schedule called for engineers to begin the repair job Thursday. But before the valve can be removed from under the floor of the shuttle's payload bay, engineers must first drain toxic Freon 21 from pipes leading to and from the faulty component.

Then, with a rotating ''clean room'' butted up against Columbia's open payload bay, engineers plan to gain access by working from platforms extended into the cargo hold. Safety netting will be set up below the work area to prevent tools or other debris from falling on the shuttle's $150 million telescope payload.

An official launch date will not be set until after managers get a better idea of how long it will take to replace the valve, which is vital to the

operation of a Freon cooling system, one of two needed to carry away heat generated by the spaceplane's electrical and mechanical systems.

''The decision to go and make this right was not a tough decision because we want 100 percent performance in our cooling system before we fly, and right now, this system would be marginal at best,'' Sieck said.

A preliminary repair schedule showed Columbia would not be ready for blastoff until at least May 30, two weeks later than planned. Sieck refused to speculate on when the work might be finished, saying ''it rates right up there with one of the most challenging'' tasks ever attempted at the launch pad.

''I think it's going to take two to three weeks,'' he said. ''This is straightforward work but it is tedious, it has a high degree of difficulty.''

Engineers have never attempted such a repair job inside the shuttle's 60-foot payload bay with the spaceplane in the vertical launch position.

Columbia and its seven-member crew had been scheduled to take off on the 36th shuttle mission at 12:45 a.m. next Thursday to study X-ray and ultraviolet radiation from deep space that is blocked by Earth's atmosphere.

Commander Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 43, Robert Parker, 53, Jeffrey Hoffman, 45, and civilian astronomers Ronald Parise, 38, and Samuel Durrance, 46, plan to spend 10 days in orbit before gliding to a touchdown at Edwards Air Force Base, Calif.

But during routine tests over the weekend, engineers noticed a sudden drop in the flow of Freon through one of Columbia's two coolant systems.

The twin Freon coolant loops are critical for carrying away heat produced by the shuttle's payload, electronic gear and crew cabin. Flight rules require an emergency re-entry and landing if one of the two loops fails to operate properly in orbit.

Playing it safe, NASA managers ordered the valve's replacement.

The suspect valve is under the floor of the shuttle's payload bay in the forward quarter of the cargo hold. With the shuttle on the launch pad pointing skyward, the floor of the payload bay is vertical, with the ship's four-telescope cargo located about halfway up.

The valve, then, is located below the skin of the cargo bay ''above'' the telescope payload, and replacing it at the launch pad with the shuttle in a vertical position represents an especially challenging task.

#90130u0435 05/10/1990 ~United Press International

PHOENIX (MAY 10) UPI - Thousands of computer disks were seized from ''hackers'' who authorities said are responsible for an ''astronomical'' white-collar crime wave involving alleged credit card fraud and improper entry into government computer systems.

Federal and Arizona authorities announced Wednesday they had served more than two dozen search warrants and seized thousands of software disks and 42 computer systems in a nationwide investigation. There were no arrests for computer crimes, but three people were taken into custody on unrelated charges, such as weapons violations, said Stephen M. McNamee, U.S. attorney for Arizona.

Officials confirmed that agents from the U.S. Secret Service and the Arizona attorney general's office served 28 search warrants in the last two days in more than a dozen cities. But McNamee said it was impossible

to determine how many people may have been involved.

Garry M. Jenkins, assistant director of the Secret Service in Washington, told a news conference that the computer disks will have to be analyzed for possible criminal wrongoing.

Tom Holtzen, an assistant U.S. attorney, said the people under investigation ''are linked in one way or another,'' and may have exchanged information about such things as stolen credit card numbers through computer ''bulletin boards.''

Possible crimes discovered in the 18-month joint investigation included credit-card fraud, theft of long distance telephone and data communications services and improper entry into computer systems operated by government agencies, private corporations, telephone companies, financial insititutions, credit bureaus and hospitals.

''We are experiencing a crime wave in the computer area that is just astronomical,'' said Gail Thackeray, an assistant Arizona attorney general who headed the state's part of the investigation.

''We can't keep up. Part of it is that computers have gotten cheap and kids of younger and younger ages have access to computers,'' she said.

Thackeray said the speed of computers can lead to ''colossal losses'' as the hackers quickly trade information.

''This is not a victimless crime,'' Thackeray said. ''We are all victims.''

McNamee called computer hacking the ''white-collar crime of the 1990s.'' He said anyone convicted of computer crimes could face prison sentences of up to 10 years along with a substantial fine.

State Attorney General Bob Corbin said the public needs to take the matter of computer crimes seriously.

''This is not a game,'' Corbin said. ''Most of you have been taking this as a game by hackers.''

Corbin said one victim alone suffered a $1.7 million loss to the hackers, but the officials said it was difficult to add up the total losses.

Thackeray said suspects included both adults and youths and warned that parents have to be aware of what their children are capable of doing with their computers.

''The parents have no idea what danger they can expose their children to if they do not supervise them in using that,'' Thackeray said.

The warrants were served in San Francisco; Los Angeles; San Diego; San Jose, Calif.; Phoenix, Ariz.; Tucson, Ariz.; Plano, Texas; Miami; Saginaw, Mich.; Chicago, Detroit, Cincinnati; Richmond, Va.; Newark, N.J.; Pittsburgh and New York City.

McNamee said the investigation was centered in Phoenix because the Attorney General's Office has special expertise involving computer crimes.

Leo Cunningham, a spokesman for the U.S. Attorney's office, confirmed that a search warrant in connection with the hacker's probe was carried out Tuesday in San Jose. There were no arrests, he said, and the affidavit supporting the court order for the search warrant has been sealed by a federal judge.

Sgt. Richard Saito of the San Jose Police Department said the 6 a.m. Tuesday search involved the residence of a recent Pioneer High School graduate. Agents sought computer equipment allegedly used to ''deal in pirate software and electronic fraud,'' Saito said.

The national probe centered on a computer bulletin board based in Phoenix, he said.

(MAY 10) UPI - The rain came down at an opportune time for Chicago but much too soon for Atlanta.

The downpour started in the Cubs' fourth Wednesday, but umpires did not halt play until after the Braves' fifth, and didn't call the game until 1 1/2 hours later, giving Chicago a 4-0 victory over Atlanta.

''We weren't able to get to our part of the game,'' said Braves Manager Russ Nixon, whose team had rallied in the late innings the last two days. ''All of our runs were scored from the fifth inning on here.''

The Cubs' Les Lancaster, 2-1, had made 76 relief appearances dating back to June 4, 1988 before starting Wednesday. The Chicago bullpen, which has been thinned by the loss of struggling Jose Nunez and injured Rick Sutcliffe, was weakened even more by the Cubs using nine pitchers in the previous two games, which they split with Atlanta.

''If something happened to Lancaster in the second inning, I didn't know what I would do,'' Chicago Manager Don Zimmer said.

Lancaster gave up four hits, struck out two and walked none in a hectic five innings.

''When the rain started coming (in the Cubs' fourth), my job was to get out there (in the Braves' fifth) and work quick,'' Lancaster said.

Pete Smith, 2-2, took the loss, allowing homers to Ryne Sandberg and Domingo Ramos, who each drove in a run in the third. Named National League player of the week last week, Sandberg now has 18 hits in his last 39 at-bats for a .462 average.

Ramos's blast was his first this season and seventh of his career.

In other National League games, San Francisco beat New York 4-2, Pittsburgh pounded Cincinnati 6-2, Montreal defeated Los Angeles 5-3, St. Louis blasted San Diego 11-5, and Philadelphia destroyed Houston 10-1.

In the American League it was: Detroit 2, Milwaukee 1; Oakland 2, New York 1; Toronto 4, Chicago 3; Cleveland 7, Minnesota 3; Texas 9, Kansas City 3; Boston 4, Seattle 1; and Baltimore 9, California 1.

-- AROUND THE NL --

Giants 4, Mets 2

At New York, Kevin Bass belted a three-run first-inning homer and Bob Knepper combined with two relievers on a seven-hitter, helping San Francisco snap the Mets' four-game winning streak. Knepper, 1-1, scattered six hits over 5 2-3 innings in his first start. Bob Ojeda, 0-1, gave up four runs and five hits, walking one and striking out two over five innings.

Pirates 6, Reds 2

At Pittsburgh, John Smiley and Bill Landrum combined to stop Cincinnati and the Pirates collected 14 hits off four Reds pitchers. Smiley evened his record at 3-3 with six plus innings of work, allowing two runs and seven hits with five strikeouts. Jack Armstrong, 5-1, allowed four runs and nine hits in five plus innings as the Reds lost for the first time in six games.

Expos 5, Dodgers 3

At Montreal, Andres Galarraga drove in two runs to help Kevin Gross win his fourth straight and extend the Expos' winning streak to four. Gross, 4-1, gave up three runs, five hits, no walks and had four strikeouts in 8 1-3 innings. Galarraga's two-run single capped a four-run third inning against Fernando Valenzuela, 2-3.

Cardinals 11, Padres 5

At St. Louis, Vince Coleman had three hits and drove in two runs in a seven-run fifth inning, helping the Cardinals end a five-game losing streak. Rick Horton, 1-1, pitched 3 2-3 innings in relief of starter John Tudor for his first victory since Sept. 24, 1988. Andy Benes, 2-3, allowed eight hits and six earned runs in five innings, blowing a 5-0 Padres lead.

Phillies 10, Astros 1

At Houston, Pat Combs fired a five-hitter, singled twice to drive in a run and scored once leading the Phillies. Combs, 2-2, allowed five singles, struck out five and walked three. He allowed only two Houston runners to reach third base. Mike Scott, 1-3, allowed eight runs - four earned - on nine hits in 4 2-3 innings. He walked two and struck out two.

NEW YORK (MAY 10) UPI - An outbreak of measles has hit three hospitals in the city, including one Brooklyn facility where at least six young doctors three workers and 20 patients have fallen ill, officials said Thursday.

A spokeswoman for Lutheran Medical Center in Park Slope in Brooklyn said the hospital was expected Thursday to continue a major immunization program, targeting ''anyone born after 1956 who may have been in contact with any of the affected staff.''

As of early Thursday, 500 employees had been immunized at the complex, said Teresita Macari, the spokeswoman.

Besides the six doctors - all of them interns or residents at the facility - two other doctors are ''suspected'' of having the measles, Macari said.

Macari said the first reported case at the hospital was in late March.

''All cases have been reported to the New York City Department of Health, and the hospital is in the process of immunizing staff,'' she said.

The health department announced Wednesday that two other hospitals have reported cases of the measles as well, the spokeswoman said. The names of the facilities were not released.

''We'll continue our immunization program until we get all of the people who need them,'' Macari said.

MEXICO CITY (MAY 10) UPI - Pope John Paul II urged businessmen from Latin America, a region suffering from increased unemployment and declining living standards, to improve conditions for their employees by creating jobs and paying fair wages.

In his speech to Mexican businessmen in Durango, 300 miles northwest of Mexico City, John Paul II said Wednesday that Latin American businessmen have an important role to play, ''since the profound existing social differences are in everyone's sight and constitute a giant challenge to those with ... responsibility in the socio-economic field.''

On Thursday, the fifth day of his weeklong visit, the pope was scheduled to hold a religious service for miners at Los Campos Deportivos de Industrial Minero in northwestern town of Chihuahua, 750 miles northwest of Mexico City.

Later, he was to travel to northern industrial town of Monterrey to celebrate open-air mass on the banks of the river Santa Caterina where Hurricane Gilbert killed about 125 people in September 1988.

In Durango, the pope called on Mexican businessmen to pay fair wages and create more employment opportunities.

In the specific case of Mexico, he said, ''Beside great riches and similiar lifestyles, sometimes superior to those in more prosperous countries, you find large majorities without even the most basic resources.

''It is always the weakest ones who suffer the worst consequences,'' the pope said. ''And how can we not say that the misery of the weakest cries out to the highest?''

John Paul II offered a list of responsibilities he said businessmen have to their employees, to society and to the environment. He acknowledged the role of the foreign debt in Mexico's current economic problems, but also called for ''sacrifices on the part of everyone.''

Since the onset of the debt crisis in 1982, Latin American countries have plunged into a deep economic crisis that has increased poverty and misery among the population. The region's total foreign debt is about $420 billion.

Analysts have termed the 1980s the ''lost decade'' because of the region's failure to keep economic expansion ahead of population growth.

Highly indebted Latin American nations, allocating scarce national resources and export earnings to service debt, have been unable to generate new capital for economic growth.

The pope also addressed prison inmates in Durango Wednesday, answering a request from relatives who he said had collected more than 2,000 signatures. He was welcomed to the prison by a man who was jailed for killing his wife four years ago.

''The worst of prisons would be a closed and hardened heart and the worst of evils despair ... because God never loses hope in his creatures,'' the pope told them.

He was presented by one inmate's daughter with a cage containing two doves which the pope released in a symbolic gesture.

#90130u0510 05/10/1990 ~United Press International

SEATTLE (MAY 10) UPI - The aerospace industry's largest supplier of nuts and bolts has been charged with falsifying and omitting tests on critical aircraft parts used by manufacturers worldwide, and one of two company managers charged was set to file a plea agreement in federal court Thursday.

VSI Corp. of Culver City, Calif., and two of its managers were charged Wedneday in U.S. District Court in Seattle with conspiracy to defraud the government, according to a report in the Seattle Post-Intelligencer.

Federal prosecutors filed a one-count criminal ''information,'' charging the company's Voi-Shan division of falsifying tests and supplying fake documentation in order to cut costs.

An ''information'' filing is entered when the named defendants have agreed to waive grand-jury indictment and plead guilty to the specified charge. The defendants are scheduled to appear before a federal judge Thursday.

Prosecutors said the company's employees openly certified the quality of some shipments with the stamp of a fictitious ''Inspector 11.''

The government alleged that VSI, its quality assurance manager, James E. Ryan, and the supervisor of its metallurgy lab, Aram Marderian, sent fabricated reports through the mail and made false statements as part of its conspiracy.

Ryan and Marderian each face up to five years in prison and $250,000 in fines. The corporation faces an undetermined fine.

Marderian declined comment Wednesday. Ryan and company representatives could not be reached.

Marderian's attorney, David Bukey of Seattle, told the Seattle

Post-Intelligencer a plea agreement would be filed in court Thursday. He declined to discuss details of the agreement, including whether his client has agreed to provide information on other company officials.

The falsely certified aircraft parts have not been linked to any crashes of commercial or military aircraft. But federal officials say the fraudulent testing can destroy the government's program for certifying the safety of aircraft.

The government accused VSI of fraudulent testing procedures from at least 1975 through 1989. It said tests for such things as stress durability and brittleness were often omitted on the high-tech fasteners when machines were broken or there were not enough people to do the testing.

''The integrity of these products is often essential to the safe operation of the aircraft on which they are installed,'' prosecutors said in papers filed Wednesday.

The case was initiated by an employee inside the company, who U.S. Attorney Mike McKay said would be entitled to a financial award under the federal whistle-blower law. The reward would be a percentage of any civil settlement, McKay said.

The Boeing Co. and the U.S. government were listed as major buyers of Voi-Shan products. Other customers included McDonnell Douglas, Airbus, Lockheed, General Electric and Pratt & Whitney.

Almost half of VSI's products are sold directly to the government or to defense contractors.

In a statement released Wednesday Boeing confirmed that there were ''irregularities'' in VSI's quality control system, but said it continues to do business with the Fairchild Industries subsidiary because the problems have been corrected.

Fairchild's 1987 annual report said Voi-Shan fasteners were ''installed on almost every military and commercial aircraft.''

Boeing said Voi-Shan fasteners were widely used throughout its operations, but did not ''compromise the integrity'' of its products.

A team of Boeing quality assurance visited Voi-Shan facilities, tested all lots traceable to ''Inspector 11'' on hand in Seattle and at its other plants and retested a statistical sampling of Voi-Shan products manufactured over 15 years.

''As a result of these actions, Boeing confirmed that the Voi-Shan fasteners met Boeing specifications and requirements,'' the company said.

Prosecutors said in court documents that some VSI customers routinely conducted their own stress tests on Voi-Shan fasteners.

But the Defense Department and most other customers placed ''complete faith and trust in Voi-Shan's...representations that it correctly manufactured, tested, and inspected the delivered aerospace fasteners,'' prosecutors said.

The charges are the second to be generated by a federal task force in Seattle called Northwest Defense Contracting, or NORDECON, that is looking into fraud in the aerospace parts industry.

In the first case, Bruce J. Rice, the president of a Long Island, N.Y., aerospace parts distributor, Rice Aircraft, pleaded guilty to selling falsely certified fasteners and paying kickbacks to Boeing employees and others to obtain favorable prices on surplus parts.

#90130u0537 05/10/1990 ~United Press International

KATMANDU, Nepal (MAY 10) UPI - Climbers with three expeditions reached the world's highest peak Thursday, among them the son of the man who first stood atop Mount Everest, the Ministry of Tourism said.

Also, strong winds Thursday foiled a Nepalese army helicopter's attempt to rescue two Japanese whose balloon crash-landed Wednesday in Tibet while trying to make the first hot-air balloon trip over Everest, the ministry said.

The first joint climb of Mount Everest by U.S., Soviet and Chinese mountaineers Thursday broke the record for the number of climbers from the same expedition to scale the world's highest peak.

Although one turned back, six climbers made it to the 29,028-foot summit, bringing to 20 the number of climbers from the expedition to conquer the mountain, including the first Soviet female climber to do so.

The news was relayed from base camp at 17,500 feet by expedition leader James Whittaker, via satellite telephone links with United Press International in Beijing and with his wife, Dianne Roberts, in Seattle.

''We're stunned,'' Whittaker said in a conversation relayed from Seattle. ''It just shows what you can do through international cooperation if you get the best people in the world together and focus on a goal.''

Fourteen climbers from the three-nation expedition had earlier scaled the peak since Monday. The total of 20 broke the record of 17 Everest summit

conquerors in one expedition set by a Norwegian team in 1986, Whittaker said.

Whittaker, 61, of Port Townsend, Wash., in 1963 was the first American to conquer Everest, a decade after it was first scaled by Sir Edmund Hillary of New Zealand and Tenzing Norgay of Nepal.

Peter Hillary, 36, son of Sir Edmund Hillary, reached the summit Thursday morning, the Nepal Ministry of Tourism reported.

The Hillarys are the first father and son to accomplish the feat. It was Peter Hillary's first success in four attempts to scale Everest.

The younger Hillary made it to the summit with Robert Hall, 29, leader of the eight-member New Zealand Centenary International Expedition, Gary Ball 37, and guide Apa Sherpa, 33.

About 1 1/2 hours earlier, five Americans and two Sherpa guides from a 16-member expedition reached the summit Thursday morning after an 8 1/2-hour climb from their final camp, the Ministry of Tourism said.

The seven who made it were Glen Porzak, 42, a lawyer from Boulder, Colo.; Michael Browning, 38, a lawyer from Manitou Spring, Colo.; Brent Manning, 40, a lawyer from Salt Lake City; Peter Athens, 33, a mountain guide from Salt Lake City; and Dana Coffield, 32, a geologist from Columbia, S.C. The Sherpa guides were Nima Tashi, 30, and Ang Zambu, 27.

The balloon attempting to fly over Everest crashed about an hour after takeoff from Tingri in Tibet because of insufficient winds. It was to glide over Everest at an altitude of 31,500 feet and land in Nepal in Tumlingtar, about 110 miles east of Katmandu.

A Japanese doctor rescued the balloon's pilot, 41-year-old Michio Kanda, said ministry spokesman Prachanda Shrestha. Details of the rescue were not immediately known.

Copilot Saburo Ichiyoshi, 44, who suffered leg injuries when part of the balloon caught fire during the crash-landing, and cameraman, Atsushi Saito 37, remained stranded in a remote area, believed to be near the Tibetan town of Nelamo at an altitude of about 16,400 feet, officials said.

After two days of discussions between Katmandu, Tokyo and Beijing, Nepal's army was cleared to try to rescue the stranded Japanese by helicopter, but strong winds prevented the chopper from reaching the balloonists, the Tourism Ministry said.

''Another attempt will be made Friday,'' said ministry spokesman Shrestha.

The expedition was sponsored by Japan's TBS television network.

#90130u0541 05/10/1990 ~United Press International

BANGKOK, Thailand (MAY 10) UPI - An American publisher and business consultant was being held by Vietnamese security agencies for ''violation of Vietnamese regulations,'' and a decision will be made soon on whether to charge him, a Vietnamese government spokesman said Thursday.

Michael Morrow, 43, owner of ''Asia 2,000'' publishing company and an independent business consultant, was being legally detained, said Tran Ngoc Thach, a spokesman for the Foreign Ministry in Hanoi.

''Mr. Morrow has been detained for violation of Vietnamese regulations,'' Thach said in a telephone interview. He declined, however, to say what regulations had been violated.

He said Morrow was being ''well treated and is in good health.''

''Government officers will make a decision on his case within a few days '' he said.

Earlier, a U.S. government spokesman in Bangkok said the U.S. Embassy has contacted the Vietnamese Embassy to ask for information on Morrow's case. The United States has no diplomatic representation in Vietnam.

Morrow was arrested April 23 near Danang, in southern Vietnam, according to French businessman Thierry Rodzynek, who was briefly detained along with the American.

Rodzynek, who had retained Morrow to help investigate the possibility of building a hotel in Danang, said officials originally said there was a technical problem with their visas.

''But now it is clear that it is something more than that,'' he said after his release and return to Bangkok.

He speculated that Morrow may have been used as a pawn in a conflict among internal Vietnamese factions.

In Hong Kong, Morrow's brother, Peter, and Rodzynek appealed to Hanoi for Michael's release and said at least one of the businessman's Vietnamese associates had also been detained.

''We urge the Vietnamese to release Michael immediately and unconditionally, to release all of his commercial notes and references, to account for all of his business contacts who might have been detained and

to give us a detailed explanation for his detention,'' Peter Morrow told reporters.

Rodzynek said a Vietnamese business associate who was with the two men in Danang had also been arrested.

''He had not been released when I left,'' Rodzynek said. ''I don't know if more of his (Morrow's) associates have been detained but I think there is reason for concern.''

Morrow, originally from Seattle, speaks Vietnamese and worked in Vietnam during the Vietnam War as a journalist for Dispatch News, a small independent news agency.

According to his wife, Paijong, he was expelled by the U.S.-backed government for his reporting.

Since Vietnam started opening its economy to foreign investment in 1987, Morrow has been acting as a consultant for firms interested in business opportunities there.

Rodzynek said he told authorities that the detentions of legitimate businessmen would hurt government hopes to attract investment, but he said they replied that it would be worth losing some investment if Vietnam's rules would be made clearer to foreigners.

Vietnamese sources said security agencies have become increasingly concerned at the number of foreigners traveling unsupervised around the country.

They also said conservative elements fear that opening the economy too fast may undermine the socialist system.

The United States currently bans commercial transactions with Vietnam, but does not forbid businessmen from going to Vietnam for fact-finding visits.

#90130u0611 05/10/1990 ~United Press International

BEIJING (MAY 10) UPI - China, in an unexpected move to show an improving human rights record, announced Thursday the release of 211 people jailed since last year's crackdown on the pro-democracy movement, including several prominent dissidents.

Diplomats believed the release, the second announced since the crackdown, was aimed at blunting lobbying in the U.S. Congress to revoke a preferential trade status for China. Chinese leaders are known to be concerned over impending moves in Washington on the ''most favored

nation'' status.

Six dissident intellectuals were cited by name, with some believed to have already been released and under house arrest.

The statement, issued by a spokesman of the Ministry of Public Security and carried by the official Xinhua news agency, also said 431 other people were still under investigation and some were being prosecuted.

That number was the first Chinese authorities have given for suspects being investigated. The statement did not, however, say whether all were in custody or whether 431 was the total involved.

Western diplomats and human rights organizations say 10,000 to 30,000 people were arrested or detained in a nationwide dragnet after the Chinese army fired on pro-democracy protesters in Beijing last June 3-4, ending six weeks of demonstrations for greater freedom. At least hundreds died in the crackdown.

The ministry statement said ''another 211 lawbreakers involved in the turmoil and counterrevolutionary rebellion last year have been given lenient treatment and released upon completion of investigations.''

Among those named was Zhou Duo, a former executive of the Beijing Stone Group, a pioneering company that became involved in the protests and whose director, Wan Runnan, fled after the crackdown and now leads overseas dissidents.

Zhou was among four intellectuals who took part in a last-ditch hunger strike last June in Tiananmen Square. At least two others were previously released.

Also named were Cao Siyuan, who headed a Stone Group research institute; Li Honglin, former president of the Fujian Province Academy of Social Sciences; Dai Qing, China's best-known woman journalist, and two other prominent intellectuals.

China has been trying to portray an improved human rights record, both to calm fears of renewed unrest at home before the anniversary of the crackdown and to quiet criticism in Western nations.

Especially troubling has been the ''most favored nation'' trade status issue. Revocation, which Congress could base on human rights grounds, would cost China billions of dollars in exports.

President Bush, who must recertify China for MFN status by June 3, last week said he was disappointed in Beijing's lack of gestures on human rights.

''The timing is transparently linked to MFN,'' said a Western diplomat. ''The question is how useful it is and how much effect it will have.''

A Chinese student still under investigation said Chinese leaders are showing they are ''afraid of intellectuals.''

''They're warming up a little but it's just on the surface to get our cooperation,'' the student said. ''The party wants us to listen to them but not talk back.''

The release was the second announced. The government said Jan. 18 that 573 people were freed after investigations on similar charges.

The ministry spokesman said 431 ''lawbreakers'' were still being investigated by police, and ''some of the criminal offenders are being dealt with by judicial departments,'' meaning prosecution.

#90130u0755 05/10/1990 ~United Press International

MOSCOW (MAY 10) UPI - Master Soviet spy Kim Philby's KGB handler reportedly confirmed for the first time Thursday that a long-suspected ''fifth man'' was involved in the espionage ring.

''(Handler) Yuri Modin not only confirms the existence of the fifth man but says he was was personally acquainted with him,'' said the Sovetskaya Rossia newspaper, a conservative state-run daily.

Modin's revelation was published on the eve of a new television film about Philby, ''Cambridge Graduate,'' that might reveal the name of the fifth man.

The four known members of the spy ring are all dead - Philby, Guy Burgess, Donald Maclean and the queen's former art adviser, Anthony Blunt. All the members of the spy ring were disaffected members of the British upper class with links to Cambridge.

Burgess, Maclean and Philby, who fled to the Soviet Union when they were on the verge of being detected, all died in their adopted land.

Speculation on a possible fifth man has long ranged from Roger Hollis, former head of the British counterintelligence agency MI5, former Prime Minister Harold MacMillan and author Graham Greene, Sovetskaya Rossia said.

Hollis, who like MacMillan is dead, appeared before an investigative tribunal that exonerated him of any links with the Kremlin. The investigation was carried out by a group of young intelligence officers, who included Peter Wright, author of the controversial book ''Spycatcher.''

Modin, boasting about the ring's successes, said, ''I think that the spy ring was unique in the history of all espionage. Despite their being revealed, no one was arrested, no one was imprisoned.''

The new film says it was the fifth man, not Philby, who tipped Maclean a day before an arrest warrant was issued for him. Maclean fled to Moscow on May 25, 1951. Burgess also fled and both men surfaced in Moscow in 1956.

Philby did not arrive in Moscow until 1963 and even after he was suspected of treason, he was kept on the payroll of MI6 - the operations branch of British intelligence - and worked for eight years in Lebanon.

Blunt's role was not revealed until 1979. He died in London in 1983.

The new film, to be aired Friday, may also solve the mystery on why the Soviets insisted on keeping Nazi Rudolf Hess in Spandau Prison until his death in 1988 - long after the other war criminals were released.

Again, Philby may have been involved. The Sovetskaya Rossia newspaper intimated that Philby's reporting on Hess's stay in Britain may have led to Soviet insistence that he remain imprisoned.

Hess fled to Britain in a German plane in May 1941, landing first in Scotland. The KGB file on Hess, which will be shown in the film, contains a photograph of Hess and documents forwared to the Kremlin by Philby, whose code name in the operation was ''Soehnchen,'' which means ''little son'' in German.

Hess, who had been close to Adolf Hitler and a World War I pilot, flew to Scotland in a stolen plane on May 10, 1941.

''Judging by dates, 'Soenchen' learned about Hess's flight to Britain the next day,'' the official Tass news agency said. ''It took him another day to check the information. On the third day the information was in Moscow.''

Josef Stalin's biographers have long believed the Soviet dictator thought Hess made his flight to persuade Britain to sign a separate peace with Germany so the full Nazi military might could be directed against the Soviet Union.

Spandau Prison, where Hess was incarcerated, was run by the four Allied victors of World War II - France, the United States, Britain and the Soviet Union.

#90130u0773 05/10/1990 ~United Press International

CHICAGO (MAY 10) UPI - Whispered conversations amid the uproar of the Chicago Mercantile Exchange Swiss franc trading pit will be the key to the verdict in the racketeering and conspiracy trial of three traders, according to prosecutors' opening statements.

The prosecution, in a two-hour opening Wednesday, explained the basics of commodities trading and the scheme the government contends the defendants used to bilk customers. Defense attorneys were to present their opening statements Thursday.

Assistant U.S. Attorney Mark Pollack told jurors Wednesday they will hear hours of tapes made in the trading pits by FBI agent Randall Jannett, who

spent eight months posing as a corrupt Swiss franc trader.

In the background of the tapes, Pollack said, jurors will hear the uproar of "open outcry" trading - "the chaos, the clamor of the bids and order" executed by traders with frenzied shouts and hand signals as the price board displays the constantly changing prices.

"But pay particular attention to the softer, quieter conversations in the foreground ... in which these defendants and their colleagues engage in illegal, private, and secretive, non-open outcry transactions," Pollack said. "These are the acts for which the defendants are on trial," he said.

Swiss franc traders Robert Mosky, Danny Scheck, and David Zatz are the first defendants to face trial on charges arising from a two-year FBI undercover investigation at the Mercantile Exchange and the Chicago Board of Trade that led to the indictments of 47 traders and a clerk. The trial, before U.S. District Judge Ann Williams, is expected to take six to eight weeks.

Mosky, 33, Chicago, is charged with racketeering conspiracy, 28 counts of fraud and 51 counts of violating trading rules and could face 415 years in prison and fines of more than $12.4 million if convicted.

Scheck, 28, of suburban Skokie, is charged with eight fraud counts and ten counts of violating trading rules. Conviction on all counts could bring a sentence of up to 90 years in prison and a fine of up to $3 million.

Zatz, 43, of Chicago, is charged with six counts of fraud and eight counts of violating trading rules. He could face up to 70 years in jail and a fine of up to $2.1 million if convicted.

Pollack said Mosky was the kingpin in a band of brokers who rigged trades in the Swiss franc pit to cover their mistakes and "further line their pockets at the expense of their customers."

"On a systematic basis, Mr. Mosky chose to ignore the rules, chose to subvert the rules," he said. "He needed the assistance of others in the illegal execution of orders. They included Mr. Zatz and Mr. Scheck."

Pollack said there were two motives behind the scheme. "First, plain and simple greed. And second, a false sense of security that their scheme, their illegal trading activties, would go undetected by the public," said Pollack. "Little did they know that they were engaging in their illegal trading activities in front of and with an undercover FBI agent," he said.

Pollack told jurors they will need no special expertise in the complexities of commodities trading and commodities law to render a proper verdict in the case. "These were not complicated crimes. They were simple crimes that

occurred in a complex setting," he said. "A thief who plies his trade with a white trader's jacket and a stack of customer orders is no less a thief than a common cat burglar."

#90130u0807 05/10/1990 ~United Press International

BUCHAREST, Romania (MAY 10) UPI - A second opposition candidate has offered to pull out of the presidential race if front-runner and interim President Ion Iliescu will do the same, published reports said Thursday.

Ion Ratiu of the National Peasant Party said a withdrawal by all three presidential candidates was the only way to halt a growing wave of political unrest, the official news agency Rompres said.

National Liberal Party candidate Radu Campeanu made a similar proposal in a statement carried by Rompres Wednesday.

''Mr. Campeanu is ready to withdraw from the presidential elections if his counter-candidates do the same, (after which) the interim president could be elected by the future parliament until the constitution is drafted,'' the statement said.

There was no immediate response from Iliescu, whose National Salvation Front is confident of victory in the May 20 elections, Romania's first democratic vote in four decades. The Front came to power after a revolution that ousted communist dictator Nicolae Ceausescu last December. Ceausescu was executed.

A pre-election survey released Wednesday by Rompres suggested Iliescu would easily win the presidential race, garnering 70 percent of the vote compared to 13 percent for Campeanu, 6.4 percent for Ratiu and the rest undecided.

Both opposition candidates say they have been victims of violent attacks, and they accuse the provisional government of supporting a campaign of harassment and intimidation, a charge Iliescu denied.

The call for Iliescu to withdraw from the race came two days after U.S. Ambassador to Romania Alan Green Jr. warned that U.S.-Romanian relations would be jeopardized if election violence continues.

Iliescu, addressing 20,000 supporters Wednesday in the city of Ploesti, declared he would not bow to pressure to postpone elections or change the election law to prohibit former communist officials from running - one of the chief demands of anti-government activists staging an 18-day demonstration at Bucharest's University Square.

Iliescu agreed Wednesday to hold talks this weekend with leaders of the demonstration, a day after a planned meeting was scrubbed due to a dispute over television coverage.

''It was agreed that the planned dialogue between (Provisional National Unity Council) President Ion Iliescu and the representatives of the Bucharest University Square demonstrations be held on May 12,'' Rompres said in a one-sentence dispatch.

There was no immediate explanation for the decision to reschedule the talks. The provisional government said in its statement it agreed to the meeting despite the ''illegal character'' of the demonstration.

TOKYO (MAY 10) UPI - Mitsubishi Rayon said Thursday it is launching a wholly owned subsidiary in Fountain Valley, Calif., to manufacture and market carbon fiber products in the United States.

Mitsubishi Rayon said it had acquired and combined two U.S. chemical companies - Newport Adhesives, Inc. of Fountain Valley and Newport Composites Inc. of Santa Ana, Calif. - to launch Newport Adhesives and Composites Inc.

Mitsubishi Rayon executives said Newport Adhesives and Composites will produce and market carbon fiber-reinforced plastic in the United States with technical support from Mitsubishi Rayon.

Mitsubishi estimated the new company will have sales of $20 million in 1990.

AKRON, OH (MAY 10) UPI - Former Duke basketball star Danny Ferry, who played this past season in Italy, says he has some ideas for a contract with the Cleveland Cavaliers and wants to settle soon where he will be playing in 1990-91.

The Cavaliers obtained the rights to Ferry early last season from the Los Angeles Clippers in a deal that sent star guard Ron Harper and future draft picks to the Clippers.

Ferry was the second player chosen in last year's NBA draft but rejected the Clippers and signed to play in Italy for $2 million. His team was eliminated from the playoffs last Friday.

''I'm really anxious to talk with the Cavs and get things taken care of one way or the other,'' Ferry told The Akron Beacon Journal in a telephone interview from Rome published Thursday. ''My (Italian) team has been asking me what my plans for next season are. They talked to me about it right before the playoffs and several times during the playoffs.

''I can undersand their need to know. In June is when Italian teams sign their players for next season. I told them I'd give them a decision as soon as I can.''

His contract in Rome will extend to next season if he fails to make a decision by July 1.

''I don't want this to just drag on and on,'' Ferry said. ''I have some ideas (about a contract) and I'll talk to (agent) David Falk about them. I don't want special treatment. I don't want to be recruited. I really just want to get this done as soon as possible.''

Ferry, who played 55 games in Italy, said he wants to play a lot this summer and lift weights to get into better condition.

''This year was good for me because it told me that I have a lot of work to do,'' Ferry said. ''Because I went to another country and everything, I didn't play that much basketball last summer. I think that hurt me.''

(MAY 10) UPI - The latest news from across the nation and around the world... details and developments from the wires of United Press International.

Emergency officials in Arkansas are expecting relief today after two days of heavy flooding along the Arkansas River at Little Rock and Pine Bluff.

Nearly 300 homes in Pine Bluff were flooded yesterday when the river crested at 48 feet, one foot above flood stage. And in Little Rock, officials say sandbagging and pumping prevented additional homes from being flooded as the river crested Tuesday at more than four-and-a-half feet above flood stage.

The Arkansas River is expected to drop below flood stage today.

In Texas, Governor Bill Clements called out the National Guard to help shore a levee threatened by the rising Red River, which is threatening about 100 homes in an unincorporated area north of Texarkana. The Trinity River in Texas also spilled over its banks, flooding mostly farmland and damaging crops.

There have been NO flood-related deaths in Arkansas... but at least 12 people have died in Texas in two weeks of torrential rains and thunderstorms.

Further north, an early evening twister in the central Illinois town of Virden destroyed two homes and cut a swath of trees. Authorities say the same tornado touched down near Springfield, tearing down a store under construction. There were NO injuries.

A cold front moved into the northern Great Lakes and snowflakes ''the size of quarters'' were reported in Rhinelander, Wisconsin.

Cold also invaded Idaho and Montana, with temperatures dropping below freezing. A frost warning was in effect for all of southern Idaho.

#90130u0828 05/10/1990 ~United Press International

(MAY 10) UPI - Emergency U-S aid for Panama and Nicaragua will be further delayed after House-Senate talks on a supplemental spending bill broke down yesterday.

Democratic Representative Jamie Whitten, chairman of the House Appropriations Committee... says his panel needs more time to understand the 180 amendments the Senate added to the House version of the measure.

Senator Robert Byrd... Whitten's Senate counterpart... reluctantly agreed to a delay. Byrd and Whitten will meet on Monday to discuss when full-scale talks might resume.

During yesterday's half-hour meeting, House members said they wanted to trim the Senate legislation. It adds hundreds of Millions of dollars in spending as well as controversial amendments on abortion and the death

penalty.

Senators expressed frustration, saying it's wrong for the United States to keep telling its allies in Central America that ''the check is in the mail.''

State Department officials say U-S and Iranian envoys have reached substantial agreement on closing thousands of outstanding small claims cases stemming from frozen relations during the last decade.

U-S officials say the settlement closes some two-thousand 500 cases with a net payment to the United States of about 105-Million dollars. The disputes date to the 1979 Islamic revolution that forced the Shah of Iran from power.

The final small claims agreement is expected to be announced next week.

Despite this agreement, a number of large claims remain to be settled. They include Iranian demands for U-S military equipment ordered by the deposed shah but never delivered to the Islamic Republic by the United States.

The State Department insists there's NO connection between the technical negotiations, which began in 1981 after the U-S Embassy hostages were released from Iran... and the cases of U-S hostages held in Lebanon.

However, some Iranian officials have made such a link. They say that an end to the hostage-holding must be preceded by a show of good will from the United States. A settlement of the claims is one of the examples of ''good will'' cited by some Iranian officials.

#90130u0839 05/10/1990 ~United Press International

(MAY 10) UPI - Prices closed slightly higher on the Tokyo Stock Exchange on the strength of the Japanese yen Thursday after rebounding from some profit taking.

The key Nikkei Stock Average of 225 selected issues, which lost 24.97 points Wednesday, gained 34.65 to close at 30,980.26. The Tokyo Stock Prices Index of all major listed stocks, which gained 5.19 points Wednesday, rose 4.06 points to 2,312.85.

An estimated 730 million shares changed hands, compared with 753.5 million shares Wednesday. Gainers outpaced losers 623 to 348, with 150 issues unchanged.

Brokers said the yen's strength lifted the market in the morning, but some investors turned to profit taking when the trend tappered off. On the Tokyo currency exchange, the dollar closed at 156.75 yen, down 0.28 yen from Wednesday's close of 157.03 yen.

Rubber and paper-pulp issues gained along with warehouses and nonferrous metals. Large-capital issues such as steels and shipbuildings lost ground together with electric powers.

Elsewhere in Asia, prices soared on the Hong Kong Stock Exchange as heavy buying by overseas investors reversed a two-day losing streak.

The Hang Seng Index jumped 43.15 points to close at 2,985.42. The gain followed a drop of 11.31 points Wednesday.

Utilities rose 29.80, Financials closed up 7.02 points, and Industrials gained 52.73. Properties jumped 103.51. Volume was about 1.46 billion shares, compared with 1.07 billion shares Wednesday.

"Stocks rose on overseas buying at first and then local investors followed and increased the gain," said Anthony Mak, an analyst with Citicorp Scirmgeour Vickers HK Ltd. "There wasn't any real reason for today's rise, the market has just been down for so long, it has basically become a good buy now." "Things may level off for a bit, but I would look for the market to continue to rise," he added.

Prices edged up on the Singapore Stock Exchange as investors followed the higher closing in Tokyo.

The Straits Times Industrial Index rose 6.84 to 1523.27, after gaining 1.95 points Tuesday. The Singapore Stock Exchange was closed Wednesday for a public holiday.

The All Singapore Index, which fell 0.19 points Tuesday, gained 2.55 to 420.90. Turnover was 57 million shares, compared with 73 million shares Tuesday.

Profit taking dominated the morning session, but Tokyo's strong performance fueled purchase activity in the afternoon, analysts said. Some dealers expressed disappointment that Monday's substantial rebound did not continue following the public holiday Wednesday. But others said the huge jump early in the week may have been a case of "too much too soon."

Gainers included Singapore Airlines (foreign), United Overseas Bank (foreign), Overseas Chinese Banking Corp., Magnum Corp., Seaview, National Iron, and Cycle & Carr.

Losers were Development Bank of Singapore, Ming Court, Oriental Holdings, Singapore Land, Metro Holdings, and Singapore Press (foreign).

In Australia, stocks continued to slide on the Sydney Sharemarket, depressed by a string of unfavorable corporate reports.

The key All Ordinaries Index closed down 3.3 points to 1474.5, after losing 0.2 points Wednesday. Turnover was 84 million shares, compared with 71 million shares Wednesday.

Brokers said the Sydney market could not blame foreign markets for its poor showing, which reflected unacceptable levels of corporate borrowings and falling assets' value.

Major investors expressed concern over troubled Elders IXL, where Chief Executive Officer John Elliott's future role is in doubt. The company's stock fell 3 cents to $1.88 in early thin trading.

Most of the trading activity centered around blue-chip industrial issues.

Losers included News Corp., down ten cents to $10.10, Coles Myer, down eight cents to $7.46, Brambles, down ten cents to $12.85, and FAI, down four cents to $1.65.

Investors also turned away from banking issues, which already recorded strong declines Wednesday. Contributing to the trend were reports that John Spalvins' Adelaide Steamship was selling its holdings in NAB and Westpac. Westpac fell four cents to $5.14, and NAB was unchanged at $6.20.

#90130u0842 05/10/1990 ~United Press International

(MAY 10) UPI - China's leaders made an unexpected move today, apparently to show they're trying to improve their human rights record.

China announced the release of 211 people jailed since last year's crackdown on the democracy movement, including many prominent intellectuals. Several of the people named were believed to have been already released and under house arrest.

The statement, carried by the official Chinese news agency, also said 431 other people are still being investigated and some are being prosecuted.

The release is the second one announced. The government said in January that 573 people were freed after investigations on similar charges.

Western diplomats and human rights organizations have estimated between 10-thousand and 30-thousand people were arrested or detained after the army broke up pro-democracy demonstrations 11 months ago.

About 19-hundred South Koreans have been detained in the aftermath of a series of violent demonstrations.

About 100-thousand students and other dissidents staged violent demonstrations in 248 locations across South Korea yesterday. Some attacked police with firebombs and rocks in the worst anti-government riots in two years. Some burned public offices. One of the dozen public facilities hit was the U-S Information Service building in Seoul.

A national police spokesman says 18-hundred 64 people were arrested. The spokesman says most will be freed- but those identified as ''radicals'' will be charged and prosecuted.

The protests were called by a coalition of 17 dissident groups to protest a national convention of the new ruling Democratic Liberal Party born through a three-party merger. President Roh was elected its top leader.

#90130u0847 05/10/1990 ~United Press International

NORFOLK, VA (MAY 10) UPI - The officer killed in the fire aboard the USS Conyngham rescued a fellow crewmen and returned to smoke-filled areas of the destroyer to evacuate other sailors before he died, a sailor says.

The sailor, who asked not to be identified, told the Newport News Daily Press in Thursday's editions that Lt. Algernon Pope Gordon Jr., 34, helped officers escape Tuesday's blaze by awaking them from their sleeping quarters. The crewmen were in danger due to flames rising from a boiler room where the fire started while the ship was on routine maneuvers off North Carolina.

The sailor told the newspaper Gordon rescued an officer who was one of the most seriously injured in the fire, which caused 18 to be hospitalized. He then headed back into a smoky area of the guided missile destroyer and never returned, the crewman said. "He might have thought somebody else was in there," he said of Gordon, a native of Montgomery, Ala. "He was an unselfish individual."

Lt. Cmdr. Steve Burnett of the Atlantic Fleet said Thursday that the Navy was still looking into the fire and could not confirm the sailor's account. Gordon was the ship's operations officer and was responsible for coordinating the ship's communications, radar, and sonar information. Navy officials have said Gordon likely died of smoke inhalation.

Ten of the 18 sailors injured in the fire remain at Portsmouth Naval Hospital. Early Thursday, one was in guarded condition and six were in satisfactory condition, Burnett said.

The cause of the fire has not been determined. Capt. Raymond Sharpe Jr., commander of Destroyer Squadron 10, has been appointed to head an investigation.

The crippled 437-foot destroyer was towed into Norfolk by the USS Opportune, a Navy salvage ship, early Wednesday morning. A dark, blistered area on the ship's starboard side stands as evidence of the roaring fire.

#90130u0849 05/10/1990 ~United Press International
(MAY 10) UPI - Two juries are deliberating the fates of two young white New Yorkers accused of murder in the death of a black teen-ager.

The victim was 16-year-old Yusuf Hawkins, who was shot to death in the Bensonhurst section of Brooklyn August 23rd. Hawkins was with three black friends, who ventured into a mostly white neighborhood to look at a used car.

19-year-old Joseph Fama is the alleged triggerman. Keith Mondello, also 19 is accused of stirring Fama and six other young whites into a murderous frenzy. The trial has two juries because Mondello gave statements to police accusing Fama of shooting Hawkins.

Demonstrators yelled ''Yusuf! Yusuf! Yusuf!'' outside the state Supreme Court building in Brooklyn to demand a guilty verdict. One punched a defense attorney in the jaw.

One of New York's most flamboyant black militants... the Reverend Al Sharpton... warned of violence if the juries come back with a verdict of less than murder.

The two panels deliberated until mid-evening and were sequestered overnight. They are due to return to court this morning.

#90130u0878 05/10/1990 ~United Press International
PARIS (MAY 10) UPI - Lithuanian Prime Minister Kazimiera Prunskiene arrived Thursday as part of a four-nation swing aimed at obtaining Western backing for her Baltic state's battle for independence from the Soviet Union, officials said.

Prunskiene came to Paris from London, where she said the republic would persist in its secession campaign even though a Soviet embargo will leave Lithuania without oil by May 25.

Prunskiene, at a news conference Wednesday after meeting with Prime Minister Margaret Thatcher, repeated that Vilnius was willing to freeze and renegotiate with Moscow all laws approved subsequent to its March 11 declaration of independence, she said.

The prime minister stressed, however, ''independence is not up for discussion.''

Prunskiene arrived Tuesday from Washington, where she met President Bush,

and later this week will visit French President Francois Mitterrand and West German Chancellor Helmut Kohl.

Prunskiene and Thatcher agreed during 80 minutes of talks that Lithuania's drive for independence should not jeopardize Moscow's relations with the West, a spokesman for Thatcher said.

At the news conference, Prunskiene said Moscow's oil blockade created a ''crisis situation'' and that Lithuania's reserves would run out by May 25.

''Because of a shortage of black oil, light industry, transport, the different branches of our economy will come to a halt,'' said the prime minister. Priority has been given to supply fuel to hospitals, schools and humanitarian organizations, she said.

''We are lucky because summer is coming.''

Fuel supplies are Lithuania's gravest concern, Prunskiene said. Medicine has been supplied through Poland, and Lithuania is self-sufficient with food, she said.

With the pressure rising as fuel supplies dwindle, Prunskiene said her colleagues were pursuing a compromise solution forwarded by Mitterrand.

The proposal calls for Lithuania to concede to negotiations on all laws it has approved since declaring independence, including measures affecting the control of the republic's borders, military and economy.

''The essence of this formula was that we are prepared for negotiations for a compromise,'' Prunskiene said through a translator. ''We would like to come to a situation that is agreeable to all three sides - to Moscow, to Vilnius and the West.''

But she stressed independence is non-negotiable.

''Lithuania will keep knocking on the window to keep itself from being suffocated. Moscow will not succeed in isolating us from Latvia and Estonia,'' the two other Baltic republics that also are seeking independence.

Prunskiene said the West's concern about Mikhail Gorbachev's future as Soviet president is ''one-sided and dramatized.''

''The West inadequately understands that we are prepared for our statehood. The Supreme Council does govern the civilians of Lithuania. The West, by not supporting the positive elements here, are giving life to the reactionary forces,'' she said.

''The Soviet Union does not live in the cosmos. It is part of the world and must take into account the reactions of other countries.''

Of her talks with the British prime minister, Prunskiene said, ''Mrs. Thatcher thoroughly understood the situation confronting Lithuania.''

''There are several ways to go here, and Mrs. Thatcher will develop the ways that are best for her. We expressed the hope that she would not sit on the sidelines and would use her good situation with Mikhail Gorbachev.''

Thatcher, who has a friendly political relationship with Gorbachev, plans to visit the Soviet Union next month.

Britain, along with most other Western nations, has never recognized the Soviet Union's annexation of the Baltic states in 1940 but has taken a cautious stance toward Lithuania's secession drive because it does not want to jeopardize its relations with Moscow.

Thatcher's spokesman said she and Prunskiene ''got on extremely well'' in a meeting that lasted twice as long as scheduled.

''Both agreed it was necessary to get a practical solution to Lithuanian independence, while preserving the gains made in East-West relations,'' the official said.

#90130u0927 05/10/1990 ~United Press International

LONDON (MAY 10) UPI - Prices on the London International stock exchange were lower at midday Thursday as investors poised before key U.S. economic data to be released Friday and the final day of the U.S. Treasury's $30.5 billion refunding program. Dealers also said investors were awaiting a report Friday on Britain's inflation rate.

The blue-chip Financial Times 100-stock index, which was down 2.3 points at midday trading Wednesday, eased 1.2 points to 2,161.50. The narrower top 30 industrial average, which was down 7.9 at 1,702.2 at midday Wednesday, was up 0.6 point to 1,696.2. Volume was 225.9 milllion, up from 183.6 million shares traded in the same period Wednesday.

Dealers said investors lacked incentives and received no boost from GKN, a leading British automotive parts manufacturer, which reported lowered profits.

Smithkline Beecham gained 24 cents to $7.76, on the strength of improved quarterly earnings; strong financial results also boosted BOC shares which gained ten cents to $8.20. Glaxo gained 18 cents to $12.67 on institutional support.

Losers included British Telecom, down six cents to $4.06. Brent Walker was down 27 cents to $4.46.

#90130u0958 05/10/1990 ~United Press International

SAN ANTONIO (MAY 10) UPI - Portland's injury troubles at center worsened as back spasms forced Wayne Cooper, a standout in starter Kevin Duckworth's absence, to wait until Thursday to join the Trail Blazers for their night game against the San Antonio Spurs.

Cooper, a 33-year-old veteran backup, has been a key in containing San Antonio star center David Robinson, which has been a major factor in the Trail Blazers' 2-0 edge in the best-of-seven Western Conference semifinal.

Coach Rick Adelman was optimistic that Cooper would be available for Game 3 at HemisFair Arena after staying home the extra day to get treatment for the recurring problem. Cooper was set to fly to Texas Thursday morning.

The back spasms caused the 6-foot-10 Cooper to sit out the fourth quarter of Portland's 122-112 victory Tuesday at Portland. Even so, Cooper collected six rebounds and four blocked shots in 19 minutes and was a driving force during the Trail Blazers' decisive third-period surge.

''I think he'll play,'' Adelman said Wednesday. ''I was surprised how well he played Tuesday night, because he was really hurting.''

Cooper missed three games at midseason due to the back injury but has been able to play through any pain most of the year.

His role has become even more important with Duckworth out of the series - and perhaps the playoffs - with a broken bone in his right hand.

''You can't look at the numbers to measure the impact Coop has with us,'' Portland point guard Terry Porter said. ''It's all the little things he does that mean so much to our club.''

The Trail Blazers have defeated San Antonio in 15 of their last 16 meetings and are 5-1 against the Spurs this season, losing only a 107-106 decision.

''I've told the team we can't look ahead,'' Adelman said. ''Sure, I'd like to get two wins here but I think you have to take each game as it comes.''

#90130u0965 05/10/1990 ~United Press International

SIDON, LEBANON (MAY 10) UPI - Iran's charge d'affaires in Lebanon said Thursday four Iranians who disappeared eight years ago in the Christian enclave are still alive, despite claims to the contrary from Arab sources in Washington.

''We have information that they ... are being held in Christian east Beirut,'' said Mohammed Zamanian, addressing reporters in the port city of Sidon, 24 miles south of Beirut.

The four men are former Charge d'Affaires Mohammed Musavi, Revolutionary Guard official Ahmed Motavasselian, Iranian News Agency photographer Kazem Akhavan and their Lebanese driver, who had Iranian citizenship and was identified only as Bahardhoust.

They vanished at a checkpoint manned by the Christian Lebanese Forces militia in Barbara, 25 miles north of Beirut, in July 1982. Iran said Lebanese Christian Phalange forces kidnapped them and handed them over to Iraq, which was then suffering setbacks in the war against Iran.

On Wednesday, Zamanian told the pro-Iranian Hezbollah's ''Radio of Islam'' station that ''those who claimed the diplomats were killed did not present any proof.''

Lebanese Forces militia leader Samir Geagea denied last week that his group was holding the four Iranians and blamed former militia chief Elie Hobeika for the abduction. He said that when he ousted Hobeika Jan. 15, 1985, there was no trace of Iranian prisoners in militia cells.

In August 1988, Geagea offered the first official militia reaction on the fate of the four missing Iranians. He said that Hobeika, who was the militia intelligence chief in 1982, took them to his headquarters in Beirut for questioning.

Last week, Arab diplomatic sources in Washington confirmed the United States informed the Iranian government that its four diplomats killed by Lebanese Christian militiamen who ambushed them in Beirut in 1982.

Two of the Iranians died of wounds, the other two were executed by their captors, the sources said.

Zamanian denied any link to Iran with the issue of 16 Western hostages believed held by radical Moslem groups. ''Iran was the first victim of kidnapping and has always condemned such activity,'' he said.

There are still 16 Western hostages held in Lebanon. They include six U.S. citizens, four Britons, two West Germans, one Irishman, one Italian and two Swiss.

SYRACUSE, N.Y. (MAY 10) UPI - Rob Moore, the all-time leading receiver at Syracuse University, said he will enter the NFL's supplemental draft this summer, a published report said Thursday.

Moore, 21, a 6-foot-2, 201-pound wide receiver from the Long Island community of Hempstead, caught 106 passes and set school records by gaining 2,122 yards and scoring 22 touchdowns during his three years at Syracuse.

In 1989, he led the Orangemen with 53 receptions for 1,064 yards and nine touchdowns.

Moore has one year of college football eligibility remaining, but he told The Post-Standard he has completed his undergraduate studies, received a bachelor's degree and will seek work in the NFL.

Larry Kimball, a team spokesman, said he could not confirm the report because Moore was out of town, but that it came as no surprise.

''We fully expect that this is exactly what is going to happen,'' said Kimball. ''He passed everything, so to the best of our knowledge he graduated.''

Moore told the newspaper he would soon submit a petition for the supplemental draft, which an NFL spokesman has said is expected to be held in late June or early July.

Syracuse Coach Dick MacPherson has called Moore an impact player and one of the greatest athletes ever to play football for the Orangemen.

PORTLAND, OR (MAY 10) UPI - Authorities are looking for suspects Thursday in an apparent arson fire at a clinic that has been a target of protests by abortion opponents.

The fire Wednesday night at the Lovejoy Surgicenter caused $15,000 damage. Authorities said quick action by a neighbor prevented even more destruction.

Firefighters found a 1-gallon gasoline can in the examining room where the blaze started. Batallion Chief Steve Johnson said someone apparently entered by pushing an air conditioner through a window of the room.

Mark Lakeman, who lives across the street from the clinic, said he was eating dinner when he heard a loud noise, looked out the window and saw flames bursting from a window on the north side of the building.

''I grabbed a fire extinguisher and ran over there,'' he said.

By the time firefighters arrived moments later, Lakeman had extinguished the flames.

Johnson said an examining table was destroyed, along with some other equipment. He estiamted the damage at $12,000 to equipment and $3,000 to the building.

Lakeman, an artist, provided authorities with a sketch of a man he saw running on the street after the fire broke out. He described the man as having long, flowing, dark hair and a beard.

Several abortion protesters were jailed earlier this year for refusing to agree to limit protest activities outside the clinic.

WASHINGTON (MAY 10) UPI - A number of religious groups Thursday asked the Supreme Court to reconsider a recent decision that freedom of religion does not extend to the use of drugs.

The request for a rehearing, which are rarely granted by the court, was filed by the American Jewish Congress, the Presbyterian Church U.S.A., the Lutheran Church and a variety of other groups including the American Civil Liberties Union.

The request asked the court to reconsider its April 17 decision that the First Amendment guarantee of freedom of religion does not protect those who use drugs as part of religious ceremonies.

The case involved two drug abuse counselors from Oregon who were fired for using peyote during American Indian religious ceremonies. They claimed their use of the powerful, organic drug was protected by the Constitution.

Justice Antonin Scalia, joined by Chief Justice William Rehnquist and Justices Byron White, John Paul Stevens, Sandra Day O'Connor and Anthony Kennedy, rejected that claim.

The American Jewish Congress had criticized the ruling, claiming it ''threatens the religious liberty of all Americans and particularly those of minority faiths.''

In asking the justices to again take up the case, the religious groups said the court took ''a major step away from settled law'' in its ruling.

The Rev. Dean M. Kelley, director for religious liberty at the National Council of Churches, said the court's ruling ''not only devastated the Native American Church, but struck a serious blow at all religious groups in this country.''

WASHINGTON (MAY 10) UPI - The government announced the recall Thursday of a faulty resuscitator that has gained widespread use in part due to the AIDS epidemic.

The Food and Drug Administration asked hospitals, emergency rescue personnel and other medical facilities to return the Pulmanex Manual resuscitators to the manufacturer, Life Design Systems Inc. of Carrollton, Texas.

A valve on the devices can become dislodged and prevent air from reaching patients, the FDA warned.

''The resuscitators have become popular among health and rescue personnel since the advent of the AIDS epidemic because they eliminate the need for mouth-to-mouth contact,'' the FDA said.

Made in adult, pediatric and neonatal sizes, the resuscitator consists of a mask that is placed over the patient's nose and mouth and attached to a plastic bag. Squeezing the bag at the prescribed rate forces air into the patient's lungs, the FDA said. The resuscitator can also be attached to an oxygen supply.

When the valve dislodges, the patient cannot be adequately ventilated with the device, the FDA said. Delay in recognizing the problem and in using an alternate means of resuscitation could lead to death, the agency said.

But no deaths have been linked to the use of faulty resuscitators, the agency said.

The products being recalled include all model numbers beginning with 90, 91, 95 or 96 and ending with a 0, 1, 2 or 3 after the hyphen, the FDA said. The recalled models have lot numbers 9321 through 9361 and were manufactured Nov. 17, 1989, through Dec. 27, 1989.

The company has recalled other models of the resuscitators in five previous recalls because of a variety of other defects, the FDA said.

GRAND FORKS AIR FORCE BASE, ND (MAY 10) UPI - A Soviet team is scheduled to visit the Grand Forks Air Force Base Friday to inspect the Air Force's B-1 bombers, officials said.

The 10-member team will spend the day looking at physical differences between a B-1 bomber with cruise missile capability and a standard B-1 aircraft, said base public affairs officer Capt. Tom Pander.

The base is assigned 16 B-1 bombers.

The inspection is part of pre-Strategic Arms Reduction Treaty verification measures, Pander said.

Soviet and American officials signed a heavy bomber exhibition agreement last December during the 12th round of treaty talks. The Soviets exhibited their Bear bomber to U.S. military officials in mid-April.

The Grand Forks base is about 15 miles west of Grand Forks in northeastern North Dakota.

MINNEAPOLIS (MAY 10) UPI - Northwest Airlines posted nearly $90 million in operating losses in the first three months of the year on revenues of $1.62 billion, it was reported Thursday.

For the same period a year ago, Northwest reported an operting profit of $9.4 million on $1.44 billion in revenues.

Most of the operating loss came from higher fuel costs and devaluation of the Japanese yen, said John Dasburg, Northwest's executive vice president.

When other non-operating income and taxes are figured in, the net loss was $39.3 million for the lastest period, compared with a $16.8 million profit for the year-ago period.

The information was contained in a quarterly report the Star Tribune said would be filed Thursday with the U.S. Department of Transportation. The numbers pertained only to the Twin Cities-based airline, giving an incomplete picture of Northwest's parent corporation, NWA Inc. But the airline operations account for most of the company's revenues.

NWA Inc. was taken private in a $3.65 billion buyout last year by an investment group led by Al Checchi, who is now Northwest's chairman.

Northwest expects to report profits in the next two quarters as traffic picks up and fuel prices stabilize, Dasburg said. The first and fourth quarters are traditionally slow for airlines.

Dasburg said he was not bothered by the reported operating loss because the airline registered a positive cash flow of $72 million for the quarter.

(MAY 10) UPI - Three rivers are causing devastation in Texas and Arkansas. The Arkansas River flooded nearly 300 homes in Pine Bluff by the time it crested yesterday. Texas Governor Bill Clements called out the National Guard to help brace levees along the Red River... which Arkansas Governor Bill Clinton says is eight miles wide in some places. Hundreds of people are still trying to reinforce levees or build new ones with sandbags. The Trinity River is threatening widescale damage in Southeast Texas.

The man blamed for the worst savings and loan collapse in American history offered an apology yesterday to investors, saying- quote- ''I'm dreadfully sorry.'' Charles Keating said there is ''an excellent chance'' the money will be repaid. Keating is chairman of the failed Lincoln Savings and Loan of Los Angeles. Keating still says he is innocent of fraud and racketeering in the two-and-a-half-BILLION-dollar collapse. In a speech at the National Press Club in Washington, Keating also said he is broke.

The first trial connected to an F-B-I undercover investigation at the Chicago Mercantile Exchange and the Chicago Board of Trade has opened. Three traders in Swiss francs are the first defendants to stand trial. The prosecution accuses one of them of heading a band of brokers who rigged trades in the Swiss franc pit. The three are among 47 traders and a clerk who were indicted.

One of bio-technology's flagship products is taking a blow. The Food and Drug Administration says it will require stronger warning labels on genetically engineered human growth hormones. The F-D-A decision comes after researchers found new cases of leukemia in children who had taken growth hormones. However, F-D-A consumer safety officer John Short says there's NO proof that growth hormones caused the leukemia.

#90130u1052 05/10/1990 ~United Press International

(MAY 10) UPI - Cresting floodwaters in Arkansas and Texas surged southward Thursday, leaving behind hundreds of evacuees and untold millions of dollars in property, crop and livestock damage that officials said could have been worse.

Crews sandbagged levees in the southern reaches of the Arkansas, Red and Trinity rivers, where high-water marks were still to come, authorities said.

Texas Gov. Bill Clements called out the National Guard to help brace levees along the Red River. As many as 300 Guardsmen, Marine reservists and volunteers from three states filled sandbags along the Red in Texarkana, where at least 100 homes were endangered.

''The river is no longer a river,'' Arkansas Gov. Bill Clinton said after touring the Red River region. ''In some places it's 8 miles wide.''

The issue of flood-management by the Army Corps of Engineers was raised again, this time by Clinton, who questioned the decision to open dams in Hugo, Okla., on the Red River to allow floodwater to flow toward Arkansas.

Brig. Gen. Robert Lee, commander of the Southwest Division of the Engineers in Dallas, ''If those decisions had not been made and those reservoirs had not been there, the water would have been 8 feet deeper than it is.''

Officials in southeast Texas were worried about what would happen when the Trinity River crest reaches Lake Livingston, which River Authority spokesman John Jadrosich said may be facing one of the worst floods this century.

Nearly 300 homes in Pine Bluff, Ark., were flooded before the Arkansas River crested Wednesday at 48 feet, 1 foot above flood stage but 6 inches lower than expected, officials said.

''We've got about 297 homes with water as of now,'' said Danita Morris, a spokeswoman for the state Office of Emergency Services.

Upriver in Little Rock, the Arkansas River began to ebb. Sandbagging and pumping saved many homes and National Guardsmen called out to thwart looting in the Pinnacle Valley area were deactivated.

Farmer Bart Moreland, who farms 2,800 acres along the Arkansas at Natural Steps, near Little Rock, thought the cause of the high water was more human than divine. ''The rain is an act of God, but some of the flooding is an act of the Corps of Engineers.''

No flood-related deaths have been reported in Arkansas, but at least 12 people died in Texas in two weeks of storms and thunderstorms. Nearly 600 head of cattle in Texas and 200 in Arkansas drowned, as many as 20,000 farm animals were stranded and tens of thousands of acres were flooded in southwestern Arkansas.

A surprise storm dropped more than 6 inches of heavy, wet snow on eastern Wisconsin, prompting the closing of schools in several cities. It was snow-blower time again in Michigan's Upper Peninsula where as much as 8 inches of snow fell overnight. Further south, strong winds knocked out power to thousands of homes in the Detroit area.

''We try to look at this as some sort of cruel joke,'' said radio operator Jeff Seleski at the State Police Post in Negaunee. ''The temperature will be in the mid 50s this weekend so it'll all be gone anyway.''

Northeast Illinois was under a flood watch after 3 inches of rain battered the area. The central Illinois town of Virden began cleaning up after a tornado Wednesday that destroyed two homes, ripped roofs off four more and caused $75,000 in damage. No injuries were reported, police said.

''It just kind of hit and missed. I don't think it hit the ground,'' said Brad VanHuss, a police dispatcher in Virden. ''If it had hit the ground we'd have even more than what we had. We have a lot of cleaning up to do.''

Flooding was reported along the Des Plaines River and Salt Creek, Brumer said. Low-lying streets and roads in Chicago and the suburbs also reported flooding problems.

''Practically every street in town is flooded,'' said LaGrange Park Police Dispatcher Mary Harder.

Rainfall amounts ranged from 3.35 inches at Naperville and 3.1 inches at O'Hare International Airport to less than an inch in various parts of downtown Chicago. Southern Illinois was spared much of the rainfall, with Moline and Peoria each getting 1.2 inches and Springfield getting less than an inch.

More than 2,000 Commonwealth Edison customers around the Wrigley Field area in Chicago were without power early Thursday. The cause of the power failure was likely an electrical surge from a lighting strike, said Tom Leimbach, a ComEd spokesman.

An earlier outage for 1,100 ComEd customers in the south suburbs lasted about two hours.

A lightning bolt hit the Itasca transmitter of WBBM-AM Wednesday afternoon knocking out power to the 50,000 watt station for about 15 minutes. The station returned to the air at reduced power.

The West Coast was partly cloudy, with fog inland over northern and central California. Light showers fell in the Sierra Nevada range. Temperatures ranged from 35 degrees in Butte, Mont., to 82 in Phoenix.

In New England, a high-pressure system off the Atlantic Coast early Thursday brought temperatures in the upper 50s and lower 60s and scattered showers.

There was rain and thunderstorms in the mid-Atlantic region and threats of tornadoes. Regional temperatures ranged from the mid 50s to the mid 60s.

Southern skies cleared Thursday after showers that left more than an inch of rain in Columbus, Ga., Chattanooga, Tenn., and Milton, Fla.

NEW YORK (MAY 10) UPI - Latest metal market prices as quoted Thursday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 73.00-74.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 136.40 c-lb.

Lead, common, U.S. primary producers 45.00 c-lb.; U.S. non-primary (secondary) producers 49.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.45-$4.70 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $118.00-120.25 per troy ounce.

Platinum, soft, 99.5 fine, producer - $478.00-$479.00; dealer-approx., $478.00-$481.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $110.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $109.37 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 308.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 87.00-87.75 c-lb.

#90130u1065 05/10/1990 ~United Press International

AUSTIN, TX (MAY 10) UPI - Jurors convicted Paul Stedman Cullen of criminal mischief in the poisoning of the historic Treaty Oak, once called the most perfect live oak specimen in North America.

Cullen, 46, of Stubenville, Ohio, who prosecutors contend poisoned the tree as part of an occult love rite, could be given a life sentence because of previous burglary convictions when the trial's punishment phase

Thursday.

Cullen was accused of pouring the herbicide Velpar around the base of Treaty Oak, a historic live oak tree in West Austin, and was found guilty of second-degree felony criminal mischief.

The poisoning attack killed most of the tree but part of the giant oak is still alive and experts are hopeful it will survive.

''They (jurors) didn't see it the way we did,'' said Cullen's attorney, Terry Kirk. ''Other than that, I have no comment.''

Cullen's sister, Elizabeth Cullen, said she believed ''an innocent man was convicted.''

The jury returned the guilty verdict Wednesday night after deliberating about 3 1/2 hours.

The Treaty Oak, one of the few survivors of a stand of trees called the Council Oaks, was considered a spiritual tree by the Indians, who gathered beneath its sprawling limbs 100 years ago. It has been an Austin landmark since the days of founder Stephen F. Austin.

The tree, once called the most perfect live oak specimen in North America, is believed to be from 300 to 400 years old.

Kirk had urged jurors not to convict Cullen because he was a ''loser'' who took credit for the vandalism because he was trying to impress a woman.

''That's the key to the entire case. Paul thought of himself as a loser,'' said Kirk. ''I don't think there was any doubt he had low self-esteem. He wanted her to think he was somebody.''

Kirk also argued to the jury that the state's key witness, Cindy Blaco, lied to collect a $10,000 reward in the case.

Prosecutors alleged that Cullen poisoned the tree as part of an occult ritual to impress a woman. Blaco taped recorded a conversation in which Cullen discussed poisoning the tree and traces of the potent Velpar were found in his pickup truck.

Assistant District Attorney Kent Anschutz reminded the jury that Blaco went to police before the reward was reported in the media, and accused the defense of engaging in speculation.

Anschutz also ridiculed the testimony of a surprise defense witness who testified that she saw two men other than Cullen pouring jugs of liquid around the base of the tree at about the same time it was poisoned with

Velpar.

Cullen was living in the back of a truck in nearby Elroy when he was arrested June 29, 1989. He has been in custody since that time on a $20,000 bond.

#90130u1073 05/10/1990 ~United Press International

MOSCOW (MAY 10) UPI - The Baltic republics of Lithuania, Latvia and Estonia established direct trade links for agricultural products Thursday as part of their drive for independence from the Soviet Union, the Soviet news agency Tass reported.

Tass said the agriculture ministries of the three republics ''reached agreement on direct mutual supplies of farm produce, raw and other materials for agriculture, bypassing federal (Soviet) organizations.''

All three Baltic republics declared independence in the past two months. Moscow imposed a partial economic blockade against Lithuania to force it to back off its declaration and has threatened similar sanctions against Latvia and Estonia.

The republics produce food and manufactured goods but are nearly totally dependent on the Soviet Union for oil and many raw materials.

#90130u1078 05/10/1990 ~United Press International

CHICAGO (MAY 10) UPI - The Art Institute of Chicago is putting 11 works on the auction block, including paintings by Monet, Picasso, Modigliani, Utrillo and Degas, to raise the $12 million purchase price of a bronze sculpture, ''Golden Bird,'' by Constantin Brancusi.

The Art Institute, which in the past has resisted selling works to purchase others, is making an exception in this case, the Chicago Sun-Times reported Thursday.

''To let the Brancusi leave is unthinkable,'' Director James N. Wood said. ''The work is seminal to Chicago's reputation as a center for modern art.''

The Brancusi is owned by the Art Club of Chicago, which is selling it to buy a new gallery for its other works. Wood said the Art Institute already has possession of the sculpture and is committed to paying $8 million by the end of June and $4 million more over the next 10 years.

Christie's in New York City will offer for sale next week Modligliani's ''Portrait of Mme. Zborowska,'' with a suggested price of $4 million to $6

million, and Utrillo's ''Le Lapin Agile,'' valued at $700,000 to $900,000.

Sotheby's will auction four other works with a total estimated value of $13 million to $17 million, the museum said.

Wood said the Institute carefully selected for sale works deemed not essential to its collection.

#90130u1084 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - Rep. Barney Frank, D-Mass., described as ''complete lies,'' Thursday a claim by a prostitute that he knew a brothel was being operated from his Capitol Hill apartment.

The woman told CNN Wednesday night she worked for the prostitution ring operated by Stephen Gobie, a male prostitute and former acquaintance of Frank. The woman was not identified by CNN.

Frank's relationship with Gobie is the subject of an investigation by the House ethics committee, which is trying to decide how to handle charges that the congressman associated with the male prostitute from 1985 to 1987.

Frank, in a statement, said, ''Reports by a female prostitute - who first surfaced as part of Mr. Gobie's deal with Penthouse Magazine - are complete lies, fabricated stories about events which did not happen.''

He said the allegations, ''which are being repeated now, were first made'' in the magazine interview with Gobie.

Frank also provided a sworn statement by his landlady in which she expressed her ''strong belief'' that Gobie ''had begun to misuse the apartment without Congressman Frank's knowledge or permission.''

The landlady, Mary Jo Daugherty, said Frank ''seemed stunned'' when she informed him that various women were visiting Gobie in Frank's apartment and that prostitution activity appeared to be taking place there.

Daugherty said none of the activities she described occurred when Frank was present and she believes ''based on my knowledge of both Congressman Frank and Mr. Gobie, that Gobie took advantage of Frank and had begun to misuse the apartment.''

She said she never saw Gobie again after informing Frank, who has said he kicked Gobie out when he learned of the prostitution activity.

There were reports last week the 12-member panel was divided along party lines about punishment for Frank. Democrats favored lenient measures,

while Republicans wanted strong action.

Frank has acknowledged that he paid Gobie for sex and hired him to clean his house and drive his car, but the congressman said he fired Gobie after he learned of the prostitution ring.

Gobie admitted running the business and said Frank knew about the male-female ring while it was in operation.

The woman interviewed by CNN said she worked for the prostitution ring for three months and that Frank definitely knew the brothel existed.

''He would call and he would say, 'Hi, it's me. I'm on my way in. Are there any clients there?''' the woman said. She said Frank knew she took clients to his bedroom when he was not home and that he would ask if the house was in order before returning.

The new development could force the ethics panel to expand the formality of its investigation. CNN said the woman was to give a deposition to the panel on Thursday.

Frank, a Massachusetts congressman since 1980, has announced his bid for re-election.

#90130u1099 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - The mutual fund industry Thursday predicted it will continue to grow at a healthy clip in the 1990s even though the tenfold growth of mutual fund assets in the 1980s to nearly $1 trillion may not be matched.

"The next decade offers wonderful opportunities for us all," said Investment Company Institute Chairman Tom Powers during the opening session of the Mutual Fund Association's national convention.

Powers noted that during the decade an aging and more affluent U.S. population will have wealth to invest in mutual funds. "All investors will continue to shy away from both individual securities and complicated derivative products, and will increasingly opt for diversification and professional management," he said.

The ICI chairman said that "the world will continue to open up as the capital markets of Europe and the East will offer new and exciting investment opportunities and mutual funds will be the best way for most to participate."

Powers said the mutual fund industry's ascendance to third place in

financial services behind commercial banking and life insurance has resulted in higher visibility, and thus closer scrutiny from government and the news media.

"We are going to have to accept new responsibilities," Powers said, urging his fellow industry executives to "rise above the level of self interest that plagues so many other industries."

#90130u1104 05/10/1990 ~United Press International

BONN, WEST GERMANY (MAY 10) UPI - Foreign Minister Hans-Dietrich Genscher Thursday rejected a Soviet proposal to wait until after German unification to decide whether the united country could become a member of NATO.

Genscher, in a report to Parliament on the six-power meeting Saturday in Bonn, said a unified Germany should be free from limits on its sovereignty and have the right to join the North Atlantic Treaty Organization, even if Soviet troops remain for a transitional period in what is now East Germany.

Despite rejection of the plan, Genscher said it was in Germany's interest to support Soviet President Mikhail Gorbachev and expressed understanding for the Soviet stand that German unity must not work to the disadvantage of the Soviet Union.

The rejection put to rest reports of a split over the Soviet plan between Genscher, who leads the small Liberal Free Democratic Party, and Chancellor Helmut Kohl, the head of the Christian Democrats.

In previous statements, Genscher seemed to indicate that the proposal by Soviet Foreign Minister Eduard Shevardnadze to ''decouple'' the NATO and unification issues was worthy of consideration.

But Kohl rejected the plan immediately, dismissing it as ''negotiations poker.'' Sources in the Foreign Ministry had criticized Kohl's strong rejection of the proposal.

Along with the rejection of the ''decoupling'' proposal, Genscher stressed his intent to expand all ties with the Soviet Union after unification. He said unification would allow the full flowering of ties.

''It is in our interest that the policy of President Gorbachev be successful at home and abroad,'' he said.

''We are aware of the many-sided problems facing the Soviet leadership now which require from us a large measure of responsibility,'' he said. ''This responsible policy, which has replaced the power policy of the past, demands from us avoidance of seeking unilateral advantages.''

Despite the disagreement on NATO membership, Genscher said the foreign ministers meeting Saturday - the first of at least four such sessions - was a ''good start.'' The talks are dubbed the two-plus-four negotiations because they are conducted among officials of the two Germanys plus the four Allied victors of World War II: the United States, the Soviet Union, Britain and France.

Kohl, in a statement to Parliament on the unity negotiations, said there was a ''decisive breakthrough'' at the meeting last week. He said the German monetary, economic and social union will go into effect July 2.

#90130u1105 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - Privately owned housing completions rose 1.1 percent in March to an annual rate of 1.37 million from 1.36 million in February, the government reported Thursday.

March housing completions were 5.6 percent below their March 1989 level, according to a joint release of the Commerce Department's Census Bureau and the Department of Housing and Urban Development.

During the first three months of the year, 298,100 housing units were completed, down 7.8 percent from 323,300 units in the same year-earlier period. The figures were adjusted to take into account seasonal factors such as the weather.

The March rate of single-family housing completions was 1.03 million, down 1.9 percent from February's revised rate of 1.05 million units. The March rate for multi-family housing units was 347,000, up 11.2 percent from 312,000 units in February.

Housing completions dropped in the Northeast, to 165,000 units in March from 187,000 units in February, and in the Midwest, to 232,000 units in March from 270,000 units in February.

In contrast, the number of new privately owned housing units rose in the South, to 597,000 units in March from 528,000 units in February, and in the West, to 379,000 units in March from 373,000 in February.

At the end of March, the seasonally adjusted estimate of housing units under construction was 891,000. Of these, 571,000 units were single-family structures, and 320,000 were multi-family structures, the government agencies said.

LANSING, MI (MAY 10) UPI - Lt. Gov. Martha Griffiths Thursday shot down speculation that she plans to retire at the end of her current term and left the fate of her political future up to Gov. James Blanchard and the Democratic Party.

The lieutenant governor's announcement at a Lansing news conference caught

political observers off guard. Party leaders had been quoted earlier as saying she was virtually certain to announce that she would not seek re-election, ending a 40-year public career.

''I am leaving this decision to the governor and the Democratic convention '' Griffiths told reporters. ''I am experienced, I am qualified and I am available.''

But she said if Blanchard decided on another running mate, she would not contest his decision.

''He can decide on someone else if he wants to,'' Grifftihs said. ''It's going to be his decision, not my decision.''

She said the purpose of her announcement was to put Blanchard, a three-term Democrat, ''on the spot and pressure him into making a decision.''

''It's the business of politics to be on the spot. You're on the spot every day. I think he can stand it.''

Griffiths, 78, a longtime advocate of women's rights and civil rights, said she had not discussed her decision with Blanchard before her announcement.

''I don't want him trying to talk me out of something,'' she said. ''I was afraid he was going to try and control what I was going to say here.''

Griffiths said she initially had decided not to seek another term, but changed her mind because many people urged her to run.

''I came pretty close to deciding not to run,'' she said. ''I consider it my duty to take their pleas and urging seriously.''

Griffiths said despite her age, she considers herself a plus on the Democratic ticket.

''I'll be glad to do it. I won't be a liability in my judgment,'' she said.

But she added: ''I think it is the business of the governor to decide who the lieutenant governor is going to be.''

For several months Griffiths had told those close to her she intended to announce her retirement early this year. She had expressed interest in spending more time with Hicks Griffiths, her husband of 56 years, who frequently has been in poor health.

Griffiths, who has served as lieutenant governor since 1982, is the

highest-elected woman in Michigan history.

Her political career started in the state House in 1948. She became the first woman in Michigan to serve on Detroit Recorder's Court in 1953, and she served in Congress from 1955-75. She came out of semi-retirement to join the Blanchard ticket when he first ran for governor.

In her $80,300 job as lieutenant governor, her only official duty is to preside over the sessions of the Michigan Senate. Outspoken and acerbic-tongued, she often rules over the Senate like an impatient school teacher.

As Blanchard's second-in-command, she also has served as the state's chief affirmative action officer.

#90130u1212 05/10/1990 ~United Press International

NEW YORK (MAY 10) UPI - British Petroleum Co. reported Thursday that its first-quarter earnings fell 10.2 percent largely as a result of increased taxes and lower chemical profits.

The London-based international company reported first-quarter earnings of $599 million, or $1.35 an American Depositary Receipt, compared with $667 million, or $1.34 an ADR, in 1989's first quarter.

First-quarter revenues rose to $8 billion from $6.5 billion in the same period last year. The January sale of oil and gas fields, mainly to Oryx Corp., realized $1.3 billion, BP said.

ADRs are certificates issued by U.S. banks to ease trading in foreign securities and their conversion into foreign currencies.

Replacement cost earnings exclude inventory gains and losses and are the closest item to net cincome reported by U.S. corporations.

''The decrease from last year's first-quarter result was primarily attributable to increased taxation,'' BP said.

Higher average crude prices improved exploration and production earnings, BP said, noting that North Sea Brent averaged $19.81 in the first quarter compared to $17.62 a barrel in 1989 and Alaska crude averaged $19.44 as opposed to $14.92 a barrel a year ago.

BP deputy chairman and chief operating officer David Simon said, ''Profits from the chemical segment decreased significantly'' to $105 million from $285 million in the first quarter in 1989 due to an oversupply in some chemicals, notably ethylene oxide derivatives and acrylonitrile.

#90130u1257 05/10/1990 ~United Press International
GENEVA (MAY 10) UPI - A U.S. official Thursday rejected the creation of an international agency to help developing countries reduce their output of ozone-depleting chlorofluorocarbons.

But U.S. delegate Richard Smith told an intergovernmental meeting of experts convened by U.N. Environment Program, or UNEP, that Washington would support financial aid to help the nations lower CFC use.

The offer came in response to a plan by developing countries and the U.N. Environment Program, which had proposed a $100 million special fund and administering agency to help the Third World cut back on CFCs.

''We should make use of existing institutions and not waste time and scarce resources creating new institutions,'' Smith said, adding agencies such as the World Bank could help disperse funds for lower CFC use.

Smith's remarks came during a three-day meeting in Geneva, the last in a series of sessions to prepare for a full international conference in London in June to review and amend the 1987 Montreal Protocol on

protection of the ozone layer.

The Earth's ozone layer filters out the sun's harmful ultraviolet rays, which can cause cancer and global warming. The ozone layer is being depleted by widespread use of CFCs in freezers, refrigeration units, air conditioners and aerosol sprays.

While the Montreal Protocol called for a 50 percent reduction in CFC use, the London conference objective is an agreement to completely eliminate use of the chemicals by the year 2000.

The London conference will be in two parts - a high-level negotiating session June 20-26 followed by an environment ministers meeting June 27-29 to complete and adopt an agreement.

U.S. rejection of the $100 million fund and administrative agency on CFCs came one day after eight Democratic senators criticized President Bush for his ''short-sighted'' opposition to the plan.

Smith, a deputy assistant secretary for environment, health and natural resources, said Washington ''agrees in principle to support financial assistance for developing countries.''

Proponents of the aid plan say Third World countries do not have the money to adopt more expensive CFC substitutes on their own and that their participation is essential to protecting Earth's ozone layer.

Without aid, many rapidly industrializing Third World nations likely will increase CFC use, negating efforts by developed countries to eliminate their use, supports contend.

Sen. Claiborne Pell, D-R.I., chairman of the Senate Foreign Relations Committee, said the three-year aid plan would have required a relatively modest U.S. contribution of $8 million a year.

''It's a bargain,'' Pell said. ''It's one of the best long-term investments in protecting human health and the environment that we could ever take.''

#90130u1262 05/10/1990 ~United Press International

NEW YORK (MAY 10) UPI - CBS won more daytime Emmy nominations Thursday than any other contender, its soap operas ''Guiding Light'' and ''The Young and The Restless'' had the most individual nominations - and Susan Lucci of ABC's ''All My Children'' received her 11th nomination as outstanding soap actress.

Lucci has never won.

Among her competition is Jeanne Cooper, mother of ''L.A. Law's'' Corbin Bernsen.

Alex Trebek picked up two nominations as outstanding game show host on competing networks, one for ''Classic Concentration'' (NBC) and one of ''Jeopardy!'' Bob Barker was nominated as the host of ''The Price Is Right'' (CBS).

The nominations for the 17th annual Daytime Emmy Awards were announced in New York and Los Angeles by the National Academy of Arts & Sciences and the Academy of Television Arts & Sciences. The 1989-90 awards will be broadcast live from New York on Thursday, June 28 on ABC.

CBS walked away with 74 nominations, trailed by ABC with 38; NBC, 30; PBS, 29; syndicated programs, 29; Disney, two; HBO and MTV, one each.

''Guiding Light'' and ''The Young and the Restless'' (CBS) had 14 nominations each. ''All My Children'' (ABC) had 13; ''Pee-wee's Playhouse '' 12; ''Santa Barbara'' (NBC) and ''Sesame Street'' (PBS), nine each.

The soap operas nominated for Emmys as outstanding dramatic series were ''All My Children,'' ''Guiding Light,'' ''Santa Barbara'' and ''The Young and the Restless.''

In the game/audience participation category, the nominees were ''Jeopardy!'' syndicated; ''The Price Is Right,'' CBS; ''Wheel of Fortune '' CBS, and ''Win, Lose or Draw,'' NBC.

Outstanding talk/service show nominations went to ''Donahue,'' ''The Oprah Winfrey Show'' and ''Sally Jessy Raphael,'' all syndicated, as well as to PBS shows ''The Frugal Gourmet'' and ''This Old House.''

Nominated for outstanding actress in a drama series were Lucci (Erica Kane); Elizabeth Hubbard (Lucinda Walsh Dixon in ''As The World Turns''); Finola Hughes (Anna Devane Lavery, ''General Hospital,'' ABC); Kim Zimmer (Reva Shayne Lewis, ''Guiding Light''), and Jeanne Cooper (Katherine Chancellor Sterling, ''The Young and the Restless'').

Lead actor nominations went to David Canary (Adam & Stuart Chandler, ''All My Children''); Stephen Schnetzer (Cass Winthrop, ''Another World,'' NBC); A Martinez (Cruz Castillo, ''Santa Barbara''); Peter Bergman (Jack Abbott, ''The Young and the Restless'') and Eric Braeden (Victor Newman, ''The Young and the Restless'').

Named for outstanding supporting actress were Julie Barr, ''All My Children;'' Lynn Herring and Mary Jo Catlett, ''General Hospital;''

Michelle Forbes, ''Guiding Light'' and Jess Walton, ''The Young and the Restless.''

The nod for supporting actor went to Robert Gentry, ''All My Children;'' Kin Shriner, ''General Hospital;'' Kristoff St. John, ''Generations'' (NBC); Jerry Ver Dorn, ''Guiding Light;'' Roscoe Born and Henry Darrow, ''Santa Barbara,'' and Quinn Redeker, ''The Young and the Restless.''

Outstanding soap opera female juvenile nominations went to Liz Vasey and Cady McClain, ''All My Children,'' Charlotte Ross, ''Days Of Our Lives'' (NBC) and Kimberly McCullough, ''General Hospital.''

In the male juvenile category the nominees were Andrew Kavovit, ''As The World Turns'' and Bryan Buffington, ''Guiding Light.''

#90130u1265 05/10/1990 ~United Press International

NASHVILLE, TN (MAY 10) UPI - A Baptist minister said church officials should quit complaining about declining membership, stop telling the faithful ''thou shalt not'' and start having some fun instead.

Anthony Campolo, president of Evangelicals for Social Action in Pennsylvania, offered the advice Wednesday to 1,300 participants at the National Evangelism Workshop.

Compolo, a minister and sociologist, said churches should try to make religion less somber. The Bible is not as brooding and humorless as many churches portray it to be, he said.

''Jesus said the kingdom is like a wedding reception and he's the bridegroom. Jesus was Jewish, which is almost as good as Italian,'' he said. ''They know how to throw a wedding.''

The National Evangelism Workshop is an ecumenical gathering of church officials and members who meet every two years to lay plans for reversing three decades of membership declines.

''There's a deadness in the church. You've taken a party and made it boring,'' he said. ''No wonder we're losing a generation. Who wants to hear a dirge when they could go to a party?

''To be Christian is to be on the side of people who don't get invited to parties,'' he said. ''When people ask you in church what time it is, tell them, 'It's party time.'''

#90130u1269 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - Mayor Marion Barry is opposing an amendment to a foreign aid bill in Congress that would allow his city to finance abortions because it also would permit the death penalty for drug-related murders in the district.

However, the mayor's attempt to help remove what has become a major roadblock to legislation granting $720 million in emergency aid to Panama and Nicaragua appeared Thursday to be having little effect.

Sen. Brock Adams, D-Wash., sponsor of the amendment that would allow the district to use local tax money to pay for abortions for poor women, said through a spokesman that he would not drop his proposal.

Both the House and Senate have passed 1990 supplemental spending bills with the aid for the new U.S.-backed governments in Panama and Nicaragua, but the Senate version also contains the abortion and death penalty amendment.

President Bush said he would veto the bill - even though it contains nearly all of his foreign aid request - if it contains the abortion provision. Last year, Bush vetoed the district's regular appropriations bill because it contained the same abortion language.

Senate conservatives also sought to block the abortion amendment. But when that failed, they successfully added language allowing the death penalty in the district in an apparent attempt to force Senate liberals to back down.

Barry said in a letter to Adams this week that he wants the district to be allowed to use its own tax money to pay for abortions. But Barry nonetheless asked Adams to withdraw his amendment.

"The price for enhancing home rule on the issue of locally funded abortions - acceptance of the death penalty in the district - is too great to endorse," said Barry, who is currently facing three felony perjury counts and five misdemeanor counts of cocaine possession.

Steve Elmendorf, an Adams spokesman, said Thursday the senator will do "everything he can do" to keep the abortion amendment in the bill. "He is not going to back down on the choice issue because of this (letter)," said Elmendorf, who added that Adams favors the death penalty.

House-Senate negotiations on the supplemental spending bill broke down Wednesday amid complaints from the House that the Senate had added amendments to the legislation that did not provide for "emergency" appropriations.

Bush's original request for $870 million in emergency foreign aid ballooned to include $2.4 billion in new spending by the time it left the House April 3 and $3.7 billion by the time the Senate finished it May 1.

Rep. Jamie Whitten, D-Miss., chairman of the House Appropriations Committee, and Sen. Robert Byrd, D-W.Va., chairman of the Senate Appropriations Committee, said they would meet Monday to discuss when talks might resume.

#90130u1270 05/10/1990 ~United Press International

EVERETT, WA (MAY 10) UPI - A Soviet hammer and sickle flying over what looks like a stylized American flag is making military and veterans groups see red.

The controversy is over the logo of the 1990 Washington International Air Fair, scheduled for the second week in August at Paine Field.

Several Veterans of Foreign War units and the Prisoner of War/Missing In Action Association are demanding that the design be dropped, claiming the logo amounts to taking away the sacredness of the American flag.

''I feel like they're desecrating the flag, just like stepping on it,'' said Richard Keeton, VFW post commander in nearby Federal Way. ''Any flag on top of our flag, I can't approve of that.

''I can't see any U.S. Air Force officers participating in this air show once they find out what's going on.''

The fair's executive director, Charles Crum, said the logo ''is NOT a flag'' and was carefully designed not to appear identical to the American flag. He also said active combat pilots haven't objected.

Crum said the logo was designed as a symbol of ''two countries trying to change their relationship, trying to put on an air show.''

#90130u1273 05/10/1990 ~United Press International

DAYTON, OH (MAY 10) UPI - A couple who billed themselves as ''Barbie'' and ''Malibu Ken'' as they stripped to their bare essentials on the ''Phil Donahue Show'' is being sued by Mattel Inc.

Mattel, owner of the trademark Barbie and Ken dolls, filed suit Wednesday against Michael and Saundra Cherwenka in U.S. District Court in Dayton. The suit claims the couple advertised and sold stripping services in flagrant violation of Mattel's trademark rights.

Michael Cherwenka said he and his wife were just portraying a character, but he said fighting Mattel would be fruitless.

''We can't fight a multimillion-dollar business like that,'' he said.

Cherwenka said he recently agreed with Mattel to get out of the stripping business and is considering joining his father, a Chicago real estate businessman.

But he said business took off after the couple's appearance on television. Michael Cherwenka is featured in the May issue of Playgirl as the ''Real Man of the Month.''

He said he missed being the centerfold because his wife wouldn't let him take off all his clothes.

#90130u1277 05/10/1990 ~United Press International

CAIRO, EGYPTS (MAY 10) UPI - Egyptian President Hosni Mubarak left Thursday on an eight-day, five-nation tour aimed at boosting trade and diplomatic ties and renewing old friendships at a time of increasing Middle East tension.

Foreign Ministry officials said Mubarak's talks with the leaders of Oman, China, North Korea, the Soviet Union and Britain were expected to cover a wide range of Arab and international issues, including pro-Israeli changes in Eastern Europe and Arab fears that increased Soviet Jewish migration to Israeli-occupied territories might hinder Palestinian chances of statehood.

Mubarak's visit to Moscow would be his first trip to the Soviet Union since becoming president in 1981 and the first by an Egyptian leader there in 18 years.

The tour comes as tension between Iraq and a number of Western governments and Israel's apparent stalling on the U.S.-sponsored peace plan which foresees Israeli-Palestinian talks, ''has raised fears of renewed conflict in the region,'' according to Cairo newspapers.

As head of the Organization of African Unity, Mubarak was also expected to discuss debt rescheduling problems facing the developing world and ways of boosting technology transfer. Egypt itself is currently negotiating with the International Monetary Fund to reschedule $5 billion of its $50 billion foreign debt.

Mubarak's talks with Oman's Sultan Qaboos bin Said would reinforce the traditional friendship between the two states. Unlike other Arab nations,

Oman did not break diplomatic relations with Cairo when the late President Anwar Sadat signed a peace treaty with Israel in 1979.

Mubarak last visited Pyongyang and Beijing in 1983, and signed a number of agreements to cooperate on land reclamation, fishery and industrial production projects. Egypt hopes to reschedule some $70 million in military debts to China, and to boost exports of Egyptian goods to both the Asian states in return for technology and more arms, Cairo newspapers reported.

The daily Al Akbhar said Mubarak also hoped China, would ''... consider a $100 million loan to construct a conference hall as a gift from the Chinese people to the Egyptian people on the occasion of (Mubarak's) visit.''

U.S. officials have in the past accused China of selling medium-range missiles to Middle East states such as Saudi Arabia and Iran. Unconfirmed reports said China was developing a new missile for sale to Egypt's ally Iraq, despite U.S. objections.

Egyptian newspapers said Cairo saw China as an important ally because of its potential influence on world affairs, but no newspaper mentioned the crushing of China's democratic movement as an obstacle to improved ties.

''China is emerging as one of the big powers in the near future, and despite its close ties with the Arabs, it remains a focus of attention for Israel,'' wrote Makram Mohammed Ahmed, editor of the influential weekly Al Mussawar.

After Beijing, where Mubarak would be meeting with Chinese President Yang Shangkun, Premier Li Peng and the first secretary of the Chinese Communist Party, Mubarak was scheduled to travel to Pyongyang for talks with North Korean leader Kim Il Sung.

Mubarak will then travel to Moscow for talks with Soviet leader Mikhail Gorbachev on issues ranging from trade to political developments in the Middle East.

Mubarak told China's Xinhua news agency that he would press during his discussions with Gorbachev for a reduction in the flow of Soviet Jews to Israel. But Soviet diplomatic trouble-shooter Yuli Vorontsov said during a recent swing through the region that Moscow could no longer stop its people leaving.

Moscow's internal difficulties have led to a reduced Soviet profile in the Middle East. But many Arab states such as Egypt, Syria, Libya and Iraq use Soviet military hardware, and need assurances that they will continue to receive spare parts.

The Soviet Union had been Egypt's main arms supplier from the 1960s, when revolutionary leader Gamal Abdel Nasser ruled the country, until 1972 when Sadat expelled 20,000 Soviet technical and military advisers.

Moscow agreed in 1987 to reschedule Egypt's $2.5 billion military debt for 25 years, and ties between the two states have improved since, although Cairo receives some $2 billion a year in economic, military and food aid from the United States.

KEY BISCAYNE, FL (MAY 10) UPI - Exiled anti-Castro activists have organized a 100-vessel flotilla that will go within 14 miles of Cuba to show solidarity with their countrymen and support for democracy, a spokesman said Thursday.

''We are demonstrating for our people to know that we are next to them, that we are trying to bridge that wall of water in the same way that the Berliners did with theirs,'' Jose J. Basulto, spokesman for the ''Flotilla de la Hermandad,'' or flotilla of brotherhood, told a news conference.

The flotilla, which will include leaders from most of Miami's Cuban exile groups, will leave Key West before dawn on May 20, the day Cubans celebrate their independence from Spain.

''We are trying to let them know that we are at least spiritually with them and we are in their support,'' said Basulto, member of the Association of Veterans of Special Missions, a group of former anti-Castro militants who conducted U.S.-sponsored operations in the 1960s.

''The association ... hereby sends a message that it will remain active in support of those of our countrymen who remain loyal to the cause of freedom past the 20th of May, as it has done in the past,'' Basulto said.

The demonstrators are scheduled to arrive near Cuba mid-afternoon for a one-hour peaceful demonstration, Basulto said.

''We will proceed orderly and peacefully toward Havana in a column formation to a point 13.5 miles offshore and will remain in international waters at all times,'' he said.

The demonstration will include multi-denominational religious services ''honoring those who have died fighting for democracy in Cuba and those who have lost their lives while attempting to cross the Florida Strait in search of freedom,'' he said.

The exiles hope that Cubans will hear about the demonstration through Radio Marti and other media, and will be able to see the flotilla from the tops of buildings on the island.

''Our intent is to show our support to our countrymen in Cuba as close as we can and to deliver a message of solidarity in their hopes for freedom '' Basulto said.

Organizers said the U.S. Coast Guard has been informed of their plans, but is not providing an escort. The group expects no retaliation from Fidel Castro or the Cuban government, Basulto said.

''We are entirely peaceful,'' he said. ''We are announced, so there is no reason why they should bring any trouble to us while we will remain in international waters.''

At the same time as the flotilla is demonstrating off the shores of Cuba, exiles will form a caravan of cars to parade through Miami's Little Havana district as a show of support, organizers said.

CHIHUAHUA, MEXICO (MAY 10) UPI - Pope John Paul II traveled to the northern city of Chihuahua Thursday on the fifth day of his weeklong visit to Mexico, and a crowd of more than half a million people gathered to hear the pontiff celebrate mass.

The pope arrived in Chihuahua, about 750 miles north of the capital, at noon and was received by the state governor. He was to say a mass dedicated to the family before traveling on to Monterrey, 425 miles north of Mexico City.

More than 500,000 faithful had been waiting since early morning in Chihuahua to get a glimpse of the pontiff. Organizers of the event said as many as 1 million people could attend the pope's mass.

Later, John Paul II was to travel to the industrial town of Monterrey to celebrate an open-air mass on the banks of the river Santa Caterina, where Hurricane Gilbert killed about 125 people in September 1988.

On Wednesday, John Paul II urged businessmen in Durango, 300 miles northwest of the capital, to improve the conditions of their employees by creating jobs and paying fair wages.

He said Latin American businessmen have an important role to play ''since the profound existing social differences are in everyone's sight and constitute a giant challenge to those with ... responsibility in the

socio-economic field.''

''Beside great riches and similiar lifestyles, sometimes superior to those in more prosperous countries, you find large majorities without even the most basic resources,'' the pontiff told the businessmen.

''It is always the weakest ones who suffer the worst consequences,'' the pope said. ''And how can we not say that the misery of the weakest cries out to the highest?''

John Paul II offered a list of responsibilities he said businessmen have to their employees, to society and to the environment. He acknowledged the role of the foreign debt in Mexico's current economic problems, but also called for ''sacrifices on the part of everyone.''

#90130u1291 05/10/1990 ~United Press International

PITTSBURGH (MAY 10) UPI - The wait will be longer than expected for the official results from this week's apparent rejection by USX Corp. shareholders of a restructuring plan proposed by financier Carl Icahn.

USX spokesman Don Herring said Thursday he expects it will be no sooner than May 18 before a private firm sorts through a couple million proxy ballots. "It's a very labor intensive project," Herring said.

The votes were cast Monday in Findlay, Ohio, at the USX annual meeting and results originally were expected by next Wednesday. The Pittsburgh company said about 75 percent of its 256 million shares were represented at the meeting.

Shareholders apparently rejected Icahn's proposal to spin off USX's steel business from its oil interests in hopes of boosting the company's stock. Icahn, a New Yorker who owns 13 percent of the firm's stock, said he went to the meeting with 80 million votes, less than two-thirds of what he needed to declare victory.

USX Chairman Charles Corry had strong support, saying the company is strong and Icahn's plan depended on a compounding of assumptions. "We can't really tell until the vote comes in," Herring said. "But we have to assume that Mr. Icahn knows how many votes he has."

#90130u1296 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - An Army scientist's controversial claim that a newly discovered microbe may play an important role in AIDS gained support Thursday from a co-discoverer of the AIDS virus.

Dr. Luc Montagnier, a French researcher credited along with American Robert Gallo with discovering the AIDS virus, told the journal Science that the type of microbe identified by Shyh-Ching Lo of the Armed Forces Institute of Pathology may speed progression of AIDS.

Montagnier said that, like Lo, he found a primitive microorganism, called a mycoplasma, in cells taken from people infected with the AIDS-causing human immunodeficiency virus, or HIV.

The Pasteur Institute researcher said he found that treating such cells with antibiotics, which wipe out mycoplasmas but have no impact on HIV, prevented the cells from being killed by HIV.

The most likely explanation for the results is that HIV and the mycoplasma act together to kill cells, Montagnier said in a study published in Research in Virology.

Montagnier said he does not know if his mycoplasma is the same as the one discovered by Lo, which is dubbed mycoplasma incognitus.

''This is the beginning of a very interesting story,'' he said. He planned to present further findings on the microbe next week, he said.

Mycoplasmas previously have been known to cause walking pneumonia, arthritis and spontaneous abortion. But until the latest work, the microbes had not been clearly associated with fatal infections.

Lo said he found the microbe in 22 of 33 AIDS patients, as well as in 10 people who are not infected with the AIDS virus. Although most of the infections in the non-AIDS patients resulted in death, Lo said one patient recovered after being treated with the antibiotic tetracycline.

The controversy over the possible role of mycoplasmas in AIDS began in 1986 when Lo reported he had identified a new ''virus'' in AIDS patients. Those findings were sharply criticized by other AIDS researchers, and Lo last year revised his conclusions to say that the mystery microbe was a mycoplasma, not a virus.

Despite the new reports, many scientists remain unconvinced the microbes found by Montagnier and Lo have an important bearing on AIDS.

''My concern is that the mycoplasma is a contaminant'' of laboratory-grown cells, Jay Levy of the University of California-San Francisco told Science. Barbara Laughton of the National Institutes of Health, agreed: ''Everyone who works with tissue cultures works with fear of having mycoplasmal contamination.''

Montagnier's work ''raises more questions than it answers,'' Laughton added.

But another NIH scientist, Robert Quackenbush, said he thinks Lo's and Montagnier's findings are ''significant,'' adding that ''until last year, most people just thought this stuff was crock.''

Quackenbush said if the mycoplasma is as prevalent in AIDS patients as Lo's data shows, ''treatments directed against it could radically improve the quality of life for most AIDS patients.''

#90130u1307 05/10/1990 ~United Press International

TORONTO (MAY 10) UPI - Cara Operations Ltd. reported fourth-quarter earnings of $10.6 million, or 28 cents a share, up 15 percent from $9.2 million, or 25 cents a share, in the year-ago period. Revenues in the quarter increased to $185.7 million from $173.9 million in the fourth quarter of 1989.

Cara, which released its results after the market closed Wednesday, had year-end earnings totalling $32.4 million, or 85 cents a share, up from $27.4 million, or 73 cents a share, in 1989. Revenues during the year increased to $616.4 million from $571.2 million. M. Bernard Syron, president and chief executive officer, said "Cara has posted another successful year in earnings growth."

Cara, which failed in a joint attempt last year to takeover Dunkin' Donuts of Randolph, Mass., recently acquired Grand & Toy Ltd., one of Canada's largest office supplies retailers. The deal will cost Cara about $90 million and is expected to close in late June.

Cara's principal business involves operating a number of fast food outlets and restaurant chains including Harvey's, Steak and Burger and Swiss Chalet. Other activities include operating an in-flight airline food service, and gift, duty-free, and tobacco shops at major airports, railway stations, and hotels.

#90130u1314 05/10/1990 ~United Press International

(MAY 10) UPI - The Soviet Union revealed new information today about Britain's worst spy scandal. A Soviet newspaper quotes master spy Kim Philby's K-G-B handler as confirming that the British espionage ring had five members. Only four are known... all are dead. A film to be aired tomorrow may reveal who the fifth man was.

The Soviet film may also tell why the Soviets insisted on keeping Nazi

Rudolf Hess in Spandau Prison until his death in 1988... long after the other war criminals were released. The other World War Two allies saw little reason to keep Hess in prison until his death two years ago.

The House plans a final vote today on legislation that would require employers to offer workers unpaid family and medical leave. The measure faces a veto threat from President Bush. The Chamber of Commerce and other business groups oppose the measure because it would force some companies to provide the leave.

Senate Republicans have agreed on a final vote today on a measure to allow more political activities by federal and postal workers. The measure would change the 51-year-old Hatch Act. Passage is almost certain... but President Bush threatens to veto the legislation. A similar bill already cleared the House.

The House voted to re-authorize federal support for Amtrak... even though both Presidents Reagan and Bush have tried to eliminate subsidies for the passenger rail system. The bill the House approved yesterday is a compromise with the Senate, which has yet to vote on it.

#90130u1325 05/10/1990 ~United Press International

VANCOUVER (MAY 10) UPI - Gold producer Placer Dome Inc. Thursday reported first-quarter earnings of $29.8 million, or 13 cents a share, down seven percent from $32.1 million, or 14 cents a share, in the year-ago quarter. Revenues increased to $254.9 million from $195.8 million in the first quarter of 1989.

Placer Dome said contributions from increased gold production and lower costs were offset by reduced earnings from other metals. Gold production jumped 46 percent to 337,000 ounces compared to 230,000 ounces in last year's quarter and pushed gold sales to $149.6 million at an average price of $436 an ounce, the company said.

Placer Dome said its gold production costs dropped nine percent to $254 an ounce due to the opening of new mines and higher production at its Campbell and Kidston properties.

Placer Dome last week announced a $336 million deal to sell its oil and gas operations based in Texas to Unocal Corp. of Los Angeles. The sale was part of the gold producer's strategy to concentrate on its core mining businesses.

The British Columbia-based company mines gold, silver, copper and molybdenum at properties in Canada, the United States, Australia, Chile, and Papua New Guinea.

#90130u1340 05/10/1990 ~United Press International

NEW YORK (MAY 10) UPI - The two juries for the accused triggerman and the ringleader in the Brooklyn racial slaying of a black teenager resumed deliberations Thursday, with the accused killer's panel apparently focusing on testimony backing up the prosecution's star witness.

The jury for Joseph Fama, 19, began its fourth day of discussions by asking for a repeat of Wednesday's reading of testimony by Joseph Gibbons, 21, a black resident of Bensonhurst, who said Frank Tighe told him he saw Fama shoot Yusuf Hawkins, 16, last Aug. 23.

Tighe, 20, a neighborhood buddy of Fama's with a history of mental illness and hallucinations, testified during the trial that he saw Fama point a gun at Hawkins and fire it four times.

The slaying exposed the deep racial divisions in New York City and triggered months of demonstrations and protests.

Demonstrators demanding guilty verdicts kept an almost round-the-clock vigil outside state Supreme Court in Brooklyn.

Wednesday, a crowd of protesters screaming insults surrounded Fama's attorney Stephen Murphy as he left the courthouse, and one of them punched him in the jaw.

Fama is charged with second-degree murder in the slaying of Hawkins, who had ventured into the mostly white Bensonhurst neighborhood with three friends to look at a used car and was attacked by a crowd of white youths wielding baseball bats.

Fama's jury also asked to look at the half dozen or so ''Big Man'' baseball bats that police confiscated after the attack, and a reading of testimony by two women who said they saw the mob race by seconds before the attack. One of them said she saw accused ringleader Keith Mondello, 19 leading the pack.

As the deliberations dragged on, the defendants' families spent much of their time waiting in a small room down the hall from the courtroom. Hawkin's family were assigned to another room about 100 feet away.

Mondello's jury began its third day of deliberations after spending much of Wednesday discussing the four murder charges against Mondello, and reviewing testiony.

The panel also asked for a definition of ''intent,'' photos and diagrams

of the crime scene, and a readback of the statement Mondello made to police after his arrest last August, in which he fingered Fama as the killer.

Mondello is accused of being the instigator who believed his former girlfriend's story that her black and Hispanic friends were coming to Bensonhurst, and organized his white friends to ambush them.

The trial has two juries because of Mondello's statements incriminating Fama. The two are the first of eight young white men to be tried in the case. The other six are to go on trial next month.

#90130u1346 05/10/1990 ~United Press International

PARIS (MAY 10) UPI - The French high-speed Train a Grande Vitesse has broken its own world speed record, reaching 317 mph on a run between Courtalain and Tours in central France, officials said Thursday.

The previous record was set Dec. 5, when the TGV reached 289.4 mph on the same run. The train runs at 180 mph in commercial service.

The TGV, which first came into service in 1981 between Paris and Lyon, recently opened a new line from Paris that eventually will reach Bordeaux on the Atlantic Coast.

Officials at the French National Railroads said the speed tests are continuing and that they expect the slender, silver and blue train to break the record it set Wednesday in the coming weeks.

Until last December the train world speed record of 243.6 mph was held by the West German ICE protoype, which has yet to enter commercial service.

After the TGV broke that record, the West Germans said their train would pass the 300 mph mark when a new track between Mannheim and Frankfurt is completed at the end of this year.

#90130u1347 05/10/1990 ~United Press International

(MAY 10) UPI - Easter clothing purchases helped several of the nation's largest department stores and specialty retailers to report respectable April sales gains Thursday, contrasting with weaker performances of some discount merchants.

Two of the larger chains, May Department Stores Inc. and Dayton Hudson Corp., said their cash-register receipts, on a comparable-store basis, increased 8.8 percent and 5.5 percent, respectively, from last year.

Comparable- or same-store sales include results from units that have been open at least one year. It is generally considered a better measure of a retailer's performance than overall revenues.

Since Easter 1989 fell in March, merchants had high hopes that this April would be a month of significant sales gains compared to a year ago as consumers shopped later for their holiday purchases.

Only some discounters and general merchandisers, including Sears, Roebuck & Co. and Wal-Mart Stores Inc. who reported April sales May 3, were disappointed. "Apparel was the strongest area in the stores during April," said Daniel D. Barry, a securities analyst with Kidder, Peabody Inc. in New York.

St. Louis-based May, whose operations include Volume Shoe stores, said total April sales amounted to $752.9 million, up 14 percent from $658.8 million last year. Dayton Hudson, headquartered in Minneapolis, said its net sales for the month rose 12 percent to $947 million from $847 million a year earlier.

K mart Corp., the country's second-largest retailer, said April comparable-store sales were up 6.3 percent, while total sales for the period rose 16 percent to $2.42 million from $2.08 million.

"Sales were strong in April, aided by the later date for Easter ... and by favorable weather conditions throughout much of the East and Midwest," said K mart Chairman Joseph E. Antonini.

By contrast, fast-growing Wal-Mart, which had an uncharacteristically sluggish month posting a single-digit sales gain of seven percent, was hurt by April floods in the South where it has a strong base.

Sears, whose everyday low pricing strategy has failed to catch on with customers after one full year, posted a same-store gain of just 1.6 percent. Other retailers reporting their April sales Thursday included The Gap Inc. of San Francisco. The clothing chain posted a robust same-store gain of 20 percent, while total sales rose 31 percent to $138 million from $105 million.

Another apparel retailer, The Limited Inc. of Columbus, Ohio, reported a 16 percent comparable-store gain in April. Net sales of $362.5 million represented an 19 percent gain over $307 million a year ago.

Among the poorer showings, Los Angeles-based Carter Hawley Hale Stores Inc. posted a 1.6 percent same-store gain, and eked out a two percent total sales gain to $191.2 million from $187.2 million.

Walter Loeb, whose New York-based Loeb Associates tracks the retail industry, said the weak spots evident in April indicate a possible slowdown in consumer spending for the next few months. "Stores are not promoting as heavily and consumers are more likely to put their money into savings," he said.

Among other retailers, The Neiman Marcus Group Inc. of Chestnut Hill, Mass. said comparable revenues were up 12 percent while total sales grew 15 percent to $119.9 million from $104.2 million.

Newark, Calif.-based Ross Stores said same-stores sales slipped five percent, while total sales of $58 million were up four percent from $56 million a year ago.

Charming Shoppes Inc. of Bensalem, Pa., said comparable-store sales rose nine percent and total sales were up 15 percent to $66.9 million from $58 million.

Hills Department Stores Inc. of Canton, Mass., said same-store sales were essentially flat while total sales were off 3.5 percent to $140.5 million from $145.6 million.

#90130u1355 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - A half-dozen representatives announced a loose-knit coalition Thursday aimed at killing parts of the farm program they regard as wasteful, such as high sugar subsidies and huge payments to wealthy farmers.

The group, which included longtime critics and newcomers, said the budget crunch required a hard look at agricultural spending and that Congress would not blindly accept programs written by its agriculture committees.

Most of the members of the group have sought in the past to change parts of the farm program but have failed. They said they hoped there would be success in numbers this time.

"A broader support group will augur more success," said Rep. Charles Schumer, D-N.Y., who wants to deny crop support payments to farmers with income above $100,000. Schumer said the "egregious" elements of farm policy would be challenged on the floor, where critics think they have the best chance of success.

Added Rep. Barney Frank, D-Mass., often a critic of the dairy program, "The public no longer is willing to say as long as the money's being wasted in my district, it's OK."

During a news conference, leaders said they had 15 to 20 members of the coalition but that members were not bound to vote as a bloc. The group includes congressmen crusading against water subsidies, others who want to reduce the sugar support price, some like Schumer and Rep. Dick Armey, R-Texas, who want to impose income "cut-off" points for farm payments and foes of the peanut program.

"When you talk about sacred cows, you start with the little ones first,"

Armey said. He hinted the group would look at as many as a dozen areas for reform.

One member of the group, Rep. Dana Rohrabacher, R-Calif., wants to eliminate the farm program altogether. Schumer said he wants to see the program "fixed" but not eliminated.

A common theme among the speakers was that the budget crunch required cuts in federal spending but that farmers were getting special treatment. "We are giving billions of dollars to the equivalent of small businessmen," Rohrabacher said, referring to farmers. "There is no reason to believe they deserve more consideration" than anyone else.

Armey, who regards the farm program as wasteful, says it should be reorganized to help prop up the income of struggling farmers. At present, the farm program is defined as a production management tool, with farmers being eligible for crop supports in exchange for idling land. Armey said he would file legislation next week to eliminate quotas on peanut production.

Also speaking at the news conference were Reps. Tom Downey, D-N.Y., Claudine Schneider, R-R.I., Bill Frenzel, R-Minn., and John Porter, R-Ill. Frenzel, the GOP leader on the House Budget Committee, endorsed the group's efforts to "challenge programs that need challenging" but did not pass judgment on any of the areas they had targeted.

Armey said other members of the coalition were Reps. George Miller, D-Calif., Thomas Carper, R-Del., Jim Bates, D-Calif., Robert Torrecelli, D-N.J., and Sam Gejdenson, D-Conn.

#90130u1356 05/10/1990 ~United Press International

ATLANTA (MAY 10) UPI - More Americans than ever are watching their cholesterol but more than 75 percent of adults with dangerous levels of the artery-clogging substance are unaware of the problem, federal health officials said Thursday.

The proportion of people who have had their blood cholesterol level checked increased from 35 percent in 1983 to 58 percent in 1988, the latest year for which figures were available, a federal Centers for Disease Control report said.

The rate of Americans who reported knowing the level of the heart-threatening material in their blood climbed from 3 percent to 17 percent during the same period.

Cholesterol levels increase through intake of foods containing animal fat,

including cheese and other dairy products. Its presence in excessive amounts has been linked to an increased risk for heart disease, the nation's No. 1 killer.

While federal health officials considered the statistics on ''cholesterol awareness'' promising, they reported that more than three-quarters of the 36 percent of adults with life-threatening levels were unaware it.

''This study provides evidence that Americans are rapidly becoming more cholesterol-conscious,'' said Dr. Eric Mast, the CDC physician who authored the study. ''The report provides good news that screening awareness has increased substantially, but we still have considerable progress to be made.''

A cholesterol level of 240 or higher is considered dangerous, combined with other factors such as stress levels, diet and family heart disease history, Mast said.

A level between 200 and 239 is considered borderline high, with the desirable cholesterol level under 200, he said.

Cholesterol levels in America decreased overall between 3 percent and 4 percent between 1960 and 1980, the latest year for which figures wereavailable, Mast said. Each 1 percent decrease in the level of cholesterol corresponds to a 2 percent reduction in the risk of heart disease.

Continued progress was expected.

Mast said programs being conducted by the American Heart Association and the National Cholesterol Education Program should help satisfy proposed national health objectives for cholesterol awareness by the year 2000.

Those objectives were for 90 percent of people older than 18 to check their cholesterol at least once every five years, and for 75 percent of the same group to know their level.

In a CDC survey of cholesterol level awareness in the District of Columbia and 32 states released Thursday, the proportion of people who reported knowing their level increased from 15 percent to 29 percent between 1987 and 1988, the report said.

The District of Columbia reported the lowest proportion of people who knew their cholesterol level in 1988 - 6 percent. Washington, Maine and Wisconsin reported the highest proportion - 21 percent.

The percent of adults who reported ever having been told their cholesterol level ranged from 18 percent in South Carolina and Tennessee to 40 percent

in Wisconsin.

''The bottom line is we don't know why there are state variations,'' Mast said. ''We believe it has to do with when the programs got started and differences in age, race and socioeconomic status.''

-30- 3465

#90130u1375 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - The House passed a family and medical leave bill Thursday that supporters called pro-family and an economic necessity for workers but opponents argued takes away business' right to choose worker benefits.

Rep. Henry Hyde, R-Ill., separated himself from fellow conservatives and President Bush, who has threatened a veto, by supporting the bill. He said a pregnant working woman ''needs to have job security and have an incentive to have that child, not exterminate that child, so she doesn't lose her job.''

The House passed the bill on a 237-187 vote.

Under the approved compromise bill sponsored by Reps. Bart Gordon, D-Tenn. and Curt Weldon, R-Pa., businesses with more than 50 employees must offer up to 12 weeks in one year of unpaid leave for workers to care for newborns, newly adopted children or a seriously ill child, parent or spouse. During the leave, employees would have job protection and receive health benefits.

House employees would receive the same benefits, while other federal employees would receive up to 18 weeks in two years for family leave and up to 26 weeks in one year for medical leave.

''This is the most pro-family legislation in this Congress,'' said Rep. Nita Lowey, D-N.Y., adding that workers should not be forced to choose between a job and caring for a family member.

''We talk about family values in this town a lot. ... Why don't we do something about it,'' said Rep. Sherwood Boelhert, R-N.Y. ''We have considered the needs of small business; it is not overly burdensome or costly.''

The General Accounting Office estimated the bill would affect 5 percent of all employers, costing each about $5.30 per covered employee. The bill would affect about 44 percent of all workers, the GAO said.

Echoing Bush's troubles with the bill, opponents said the federal government should not force particular benefits on employers.

''It is mandated benefits and by being mandates, it will cost some employees their jobs and other benefits,'' said Rep. Steve Bartlett, R-Texas. ''It is the federal government deciding what kind of leave policy every employer should offer.''

But co-sponsor Weldon said his support for the bill fits in with his support for the free enterprise system.

''There is a role for the government to play in setting parameters for the private sector,'' he said, adding that business has ''overreacted'' in its opposition.

Rep. Barbara Vucanovich, R-Nev., said she fears the bill will discriminate against women and the working poor.

''Companies, when faced with two equally qualified candidates, will surely hire the one less likely to elect mandatory leave, thus potentially eliminating workers between the ages of 20 and 35 from being hired in the first place or being promoted,'' she said.

Under the bill, employers who violate the law would be liable for at least any wages, benefits or other compensation denied the worker plus interest.

The 237-187 vote did not fall along strict party lines, with 39 Republicans voting for the bill and 54 Democrats voting against it.

The Senate has not yet acted on the bill.

#90130u1379 05/10/1990 ~United Press International

MOSCOW (MAY 10) UPI - A joint European Community-Soviet commission met for the first time Thursday to discuss trade and other economic cooperation but a participant cautioned against expecting an immediate large increase in trade.

''This meeting is a historic event, marking a new and highly promising stage in relations between the Community and the Soviet Union,'' Frans Andriessen, vice president of the Commission of the European Communities, said after the meeting.

Andriessen said during his meeting with Soviet Foreign Minister Eduard Shevardnadze he had also expressed the EC's ''concern about the use of economic measures'' against Lithuania.

He said the subject of direct trade between the EC and Lithuania was not mentioned. The Baltic republic, hit by a Soviet embargo after its Mar. 11

declaration of independence, has been seeking ways to replace Soviet oil and other supplies.

''Lithuania was raised more as a general feature of the process of decentralization than as a specific issue,'' Andriessen said.

Shevardnadze called the meeting a ''significant and major event'' and said it would help create a ''common European home'' and overcoming divisions in Europe.

Andriessen said the two sides discussed the huge potential for future trade and other agreements, provided reforms continued in the Soviet Union.

''One of the conditions is the continuation of the reform process, both political and the move toward a market economy,'' Andriessen said.

Andriessen said Thursday's meeting, provided for under a December 1989 agreement between the Soviet Union and the EC, showed great possibilities for cooperation but that the process would take time.

Asked about any immediate increase in trade under the agreement, Andriessen replied, ''It will not be of an explosive nature.''

Only about 3 percent of the European Community's exports go to the Soviet Union. Trade with the Community accounts for 11 percent of the Soviet Union's imports and 14 percent of its exports.

A spokesman said the Soviet side was very pleased with the meeting.

''Were trying to establish new working links with the Community, and I'm quite happy to say that this process has gained momentum,'' said Yevgeni Saffronov, an aide to Deputy Foreign Minister Ernest Obminsky, head of the Soviet delegation.

#90130u1382 05/10/1990 ~United Press International

MANILA, PHILIPPINES (MAY 10) UPI - U.S. Ambassador Nicholas Platt expressed hope Thursday that exploratory talks opening next week would lead to an extension of leases on U.S. military bases in the Philippines, but the Manila side said it first wants $222 million in promised aid as a down payment on rent.

''I hope that at the end of the period of talks there will be a decision to proceed with formal negotiations, but I don't know if that will happen '' Platt told a meeting of the Foreign Correspondents Association here.

Platt said Richard Armitage, former U.S. assistant secretary of defense,

was expected to arrive over the weekend for the talks beginning Monday at the heavily guarded Central Bank building at the edge of Manila Bay.

The 1947 treaty covering six U.S. facilities, including the sprawling Clark Air Base and Subic Bay Naval Base, expires in September 1991.

Authorities have placed police forces in metropolitan Manila on alert for planned anti-bases demonstrations.

Foreign Secretary Raul Manglapus, head of the Philippine negotiators, said at a news conference Thursday he would press for the resolution of a $222 million shortfall in aid Washington had pledged to provide for continued use of the facilities.

Manglapus said the talks would be ''open-ended,'' but warned, ''It's not possible to enter into an agreement until this thing (aid cut) is cleared.''

Platt declined comment on the aid issue which he said would be discussed in the talks.

He also declined to comment on the effects of the slaying of U.S. Marine Gunnery Sgt. John Fredette a week ago outside Subic on the talks, saying the matter was still under investigation.

Eight Americans have been killed since October 1987 in attacks blamed on guerrillas of the communist-led New People's Army.

Platt stressed there has been no change in Washington's favorable backing of President Corazon Aquino despite the six coup attempts she has weathered since she took power in February 1986.

The envoy also sought to justify continued U.S. presence in the Philippines, the last American military toehold in Southeast Asia, despite the sweeping changes in Eastern Europe and the Soviet Union.

''I think the nations of the region agree that the U.S. presence here is a stabilizing factor and they would like to see it continue,'' Platt said.

He added that the changes in Asia as a result of the thawing of the Cold War in Europe had been minimal.

''We wish to adjust, but the rationale for forward basing military posture is still a good one, given our increasing trade relations in this part of the world and in our official relations,'' Platt said.

Armitage, a former assistant secretary of defense, is a no-nonsense negotiator whose Manila talks untimately will decide the fate of America's

largest Asian military facilities.

#90130u1394 05/10/1990 ~United Press International
BURLINGTON, VT (MAY 10) UPI - More than 75 anti-abortion protesters staged prayer vigils Thursday less than 24 hours after their release from jail, where they were held more than two months for occupying a women's health clinic.

The protesters knelt, prayed and sang songs outside Planned Parenthood of Burlington, The Burlington Free Press, the home of Vermont District Court Judge Matthew Katz and Burlington District Court.

Police also expected the group, which was traveling from spot to spot on foot, would hold a vigil outside the Burlington Women's Health Center, the site of demonstrations that landed members of the group in jail.

No arrests were reported Thursday.

On Wednesday, 95 members of the group were released after 78 days in jail on contempt-of-court charges.

The protesters were set free from a makeshift jail in Waterbury after reaching a plea agreement with the state.

Katz jailed the protesters for refusing to identify themselves following their arrests. The group said they were acting in ''solidarity with the unborn.''

The demonstrators, many of them from other states, agreed to plead guilty to trespassing and Katz sentenced them to time served.

Leaders of the national anti-abortion movement converged on Vermont last month after the Rev. Michael McHugh, a key figure in the local demonstrations, was charged with obstruction of justice for protests conducted outside Katz's Burlington home.

As he left the jail Wednesday, McHugh said most of the out-of-state demonstrators would head home after Thursday's vigils.

''The Vermonters, we'll be planning our next rescue,'' McHugh said.

#90130u1407 05/10/1990 ~United Press International
SEATTLE (MAY 10) UPI - Mount St. Helens, nearing the 10th anniversary of its last eruption, could blow again during the next 20 to 30 years,

according to a University of Washington seismologist.

In a ranking of the Cascade volcano most likely to erupt next, UW geophysics researcher Steve Malone said St. Helens should have another ''throat clearing'' within 30 years.

The mountain's big blow on May 18, 1980, shortened it by 1,300 feet and killed 57 people. The dome is slowly rebuilding as lava occasionally pushes skyward to trigger tremors.

Of the other volcanos rated, Mount Rainier, the highest peak in the Cascades at 14,410 feet, edged Mount Hood for second. Others rated as possibly erupting in this generation were Mount Shasta and Lassen Peak, both in Northern California.

Those considered unlikely to erupt by Malone and a team of seismologists monitoring the Pacific Northewest were three Washington mountains, Glacier Peak, Mount Baker and Mount Adams; and Mount Jefferson and Three Sisters in Oregon.

Malone said the rankings were based mainly on seismic activity near the volcanoes, which he considers a good indicator for eruptive potential.

Malone said the team has recorded thousands of earthquakes a year near St. Helens, several as powerful as 3.5 on the Richter scale. He said no other volcano in the Cascade Range has nearly as much activity.

''When magma miles below a volcano rises in the Earth's crust, it shoulders rock aside,'' Malone said. ''And that's what an earthquake is - the breaking of rock.''

Malone said the probability for an eruption increases with the frequency and magnitude of the earthquakes.

''Our capabilities for monitoring volcanoes have improved since St. Helens erupted,'' Malone said. ''We have more and better equipment in place and we are better at interpreting the signals.''

Malone said most volcanologists peg eruption forecasts to historical data and the geological record instead of seismology. However, most Cascade eruptions were prehistoric and the volcanoes do not eaily lend themselves to historical predictions.

St. Helens is a notable exception since it blew only 123 years before its 1980 eruption.

Malone said Mount Baker has been active over the past two centuries, but the northern Washington volcano has released only hot air. Malone said

there is no rumbling beneath the mountain.

#90130u1419 05/10/1990 ~United Press International

CHICAGO (MAY 10) UPI - Defense laywers at the racketeering and fraud trial of three Chicago Mercantile Exchange traders said Thursday an FBI undercover agent who infiltrated the trading pit was hopelessly confused and did not understand what was going on around him.

Defense attorney Elliott Samuels said tapes made by undercover agent Randall Jannett do not show any illegal activity but rather are of conversations required by law to confirm orders with other parties to the sales.

Swiss franc traders Robert Mosky, Danny Scheck and David Zatz are the first defendants to face trial on charges arising from a two-year FBI undercover investigation at the CME and the Chicago Board of Trade that led to the indictment of 47 traders and a clerk.

The trial, before U.S. District Judge Ann Williams, is expected to take six to eight weeks.

Samuels said Jannett, who used the name Randy Jackson during the investigation, did not understand all the complex signals of the hectic CME Swiss franc trading pit, where about 80 traders gather to buy and sell some 25,000 futures contracts a day. He said the agent likely misconstrued as illegal activities some of the signals and deals going on around him.

Samuels said that different traders use different signs and signals to indicate trades and that most of their veteran colleagues knew their patterns and signals.

''But Jackson (Jannett) may not have known it. He's the stranger here. He's the Johnny-come-lately. But everybody else knows,'' Samuels told the jury.

Samuels also scored prosecutors for their opening statements, which included quotes attributed to his client, Mosky.

Prosecutors described Mosky as the kingpin in a band of brokers who rigged trades to cover their mistakes and ''further line their pockets at the expense of customers.''

The prosecution Wednesday said Mosky made several illegal trades with Jannett and at one point told him, ''Good things happen to those who help

out.''

But Samuels said they will not hear that conversation on the tapes.

''The government has placed very, very great weight on the tape recordings. So do I,'' Samuels said. ''What you will hear in the tapes is that my client is complying with the law.''

That the conversations were private, he said, was in keeping with the law because federal rules require all trades be confirmed between traders privately. Samuels said the government's attempt to construe those converstions as illegal trading outside the pits is ''misrepresentation.''

The prosecution, in a two-hour opening presentation Wednesday, explained the basics of commodities trading and the scheme the government contends the defendants used to bilk customers.

Assistant U.S. Attorney Mark Pollack said jurors will hear hours of tapes made in the trading pits by Jannett, who spent eight months posing as a corrupt Swiss franc trader.

In the background of the tapes, Pollack said, jurors will hear the uproar of ''open outcry'' trading - ''the chaos, the clamor of the bids and order'' executed by traders with frenzied shouts and hand signals as the price board displays constantly changing prices.

''But pay particular attention to the softer, quieter conversations in the foreground ... in which these defendants and their colleagues engage in illegal, private and secretive non-open outcry transactions,'' Pollack told the jury.

''These are the acts for which the defendants are on trial,'' he said.

Mosky, 33, of Chicago, is charged with racketeering conspiracy, 28 counts of fraud and 51 counts of violating trading rules. He could face 415 years in prison and fines of more than $12.4 million if convicted.

#90130u1432 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - The United States recalled its ambassador from Bucharest on Thursday as a signal of concern that the campaign for the May 20 elections in Romania is flawed.

State Department spokeswoman Margaret Tutwiler said that U.S. Ambassador Alan Green Jr. was called back to Washington for ''consultations.'' She described the action as a ''public signal of our concern for the process of free and fair elections.''

When he visited Bucharest in February, Secretary of State James Baker warned the transitional Romanian government that future U.S. economic assistance would be affected by Romania's ability to carry out genuine multi-party elections.

Tutwiler said that the United States was concerned about reports it had received about intimidation and harassment of some opposition parties and by their inability to get equal radio and television broadcast time.

She did not lay the blame on any particular faction, but opposition leaders who met in February with Baker said that the National Salvation transitional leadership, including President Ion Iliescu, were tainted by their past association with the Communist Party led Nicolae Ceacescu, who was executed in December.

In Romania, Ion Ratiu of the National Peasant Party said a withdrawal by all three presidential candidates was the only way to halt a growing wave of political unrest.

National Liberal Party candidate Radu Campeanu made a similar proposal Wednesday. Campeanu was roughed up in a campaign rally last week.

There was no immediate response from Iliescu, whose National Salvation Front is confident of victory in Romania's first democratic vote in four decades.

But Iliescu has said he would not bow to pressure to change the election procedures before the elections.

A declaration by the democratic opposition issued a manifesto last month calling for the removal of any election candidate who was part of the Ceaucescu government, as Iliescu was, or the Securitate, the secret police.

A pre-election survey released Wednesday by the news agency Rompres suggested Iliescu would easily win the presidential race, garnering 70 percent of the vote compared to 13 percent for Campeanu, 6.4 percent for Ratiu and the rest undecided.

Tutwiler said Green would return to Bucharest before the elections.

#90130u1478 05/10/1990 ~United Press International

LONDON (MAY 10) UPI - Prices closed slightly lower on the London International stock exchange Thursday as dealers mostly held back while awaiting for the government to release its latest inflation figures Friday.

The Financial Times Stock Exchange 100-share index closed down 5.7 points to 2,157, compared with 2,162.7 Wednesday. The Financial Times 30 index closed down 4.8 points to 1,690.8 points.

Volume was 406.3 million shares, down from 425 million shares Wednesday.

The FTSE 100 initially rose 6 points, with dealers expressing hope during thin trading that inflation figures to be released Friday will be around 9.5 percent and not cross the psychological barrier into double digits.

But earnings released in the morning by car parts company GKN and by Standard Chartered Bank depressed the market and wiped out the gains.

GKN shares fell 50 cents to $5.85 on poor results.

A $167.25 million reduction in profits forecast for Standard Chartered Bank saw its stock drop 29 cents to $7.49.

Other leading industrial shares were dragged down in tandem, with Lucas slipping 32 cents to $9.45, and Brent Walker dropping 40 cents to $4.32.

But better-than-expected financial results boosted some other shares. Smithkline Beecham rose 34 cents to $7.89, and Ladbroke added 18 cents to reach $4.60 amid rumors that the freeholder of the Tokyo Hilton had offered to buy from the company its unexpired lease of the hotel for $334.5 million.

Traders said the slow rate of trading was because most players preferred to wait for the inflation figures, which they believed may not be as dire as earlier predicted.

''There is much talk of the markets taking off if the rumours prove to be true'' one dealer said.

Elsewhere in Europe, prices closed mixed in Frankfurt in quiet trading as a late rally managed to erase some profit taking.

The German stock index closed at 1893.42, down from 1896.58.

#90130u1479 05/10/1990 ~United Press International

(MAY 10) UPI - Arkansas and Texas are NOT the only parts of the nation suffering from seasonal flooding. Northeast Illinois is on a flood watch after three inches of rain inundated the area yesterday. Low lying streets and roads in Chicago and the suburbs are reporting flooding problems. Said one suburban Chicago police dispatcher... ''When you come through town, bring a raft.''

The House plans to vote today on a bill that would require employers to offer workers unpaid family and medical leave. The Family and Medical Leave Act has gained some G-O-P support in the House. But President Bush, the U-S Chamber of Commerce and other business associations strongly oppose the measure. They argue that the law would be bad for business.

Two Japanese men remain stranded in the Himalayas one day after their ballon crashed while they were trying to fly over Mount Everest. Rescue efforts today by a Nepalese army helicopter were thwarted by high winds. One member of the three-man crew has been rescued... but details are NOT available. The balloon crashed yesterday in Tibet due to insufficient winds.

China today announced the release of 211 people, including several prominent dissidents, who were jailed since last year's crackdown on the pro-reform movement. Diplomats believed the release is an effort by Beijing to improve its human rights record in the face of possible trade sanctions by the United States. Chinese leaders fear China may lose ''most-favored nation'' trade status.

#90130u1490 05/10/1990 ~United Press International

(MAY 10) UPI - South African President de Klerk is to meet French President Mitterrand today in Paris. Mitterrand... who's a staunch opponent of apartheid... deliberately snubbed de Klerk's predecessor, Pieter Botha, when the former South African leader visited France in 1984 and '86. De Klerk is on a nine-nation tour to bolster South Africa's image in Europe.

In Manila, U-S and Philippine officials allowed a chartered Northwest Airlines jet to take off today after it was ordered to land by the Philippine air force. The Northwest Boeing 747 reportedly was over Philippine airspace twice without proper clearance. Northwest Airlines officials in Manila declined comment on the incident.

95 anti-abortion protesters were released yesterday from a Burlington, Vermont, jail after being held for 78 days on contempt of court charges. The protesters had taken part in a series of actions at local women's health clinics to prevent women from getting abortions. The protesters were ordered held by a Vermont district court judge for refusing to identify themselves.

The Soviet Union is revealing details from its part in Britain's worst spy scandal. A Soviet newspaper says that the K-G-B ''handler'' for the British-born Soviet spy Kim Philby is confirming for the first time the existence of a ''fifth man'' in the espionage ring. Four members of the

spy ring gradually broken up in the 1950's and '60's are dead. Officials always had suspected the existence of a ''fifth man'' who never was discovered.

#90130u1492 05/10/1990 ~United Press International

LONG BEACH, CA (MAY 10) UPI - An executive at the huge Douglas Aircraft plant has warned that McDonnell Douglas Corp. might close the plant by the end of the year, the Orange County Register reported Thursday.

However, a company spokesman denied the report. ''Douglas has no plans to close the Long Beach operation,'' spokesman Warren Lamb said.

John Capellupo, deputy president of Douglas, told a group of managers at the plant last week that management McDonnell Douglas is considering closing the plant, if its major aircraft assembly programs do not improve their performance, the newspaper said.

Those programs include the MD-80 mid-range twin-jet and its successor MD-90 version, the MD-11 wide-body long-range tri-jet and the C-17 Air Force cargo plane. It has amassed huge order backlogs on the two commercial planes of more than $60 billion, including options.

But analyst Michael Rosen of Smith Barney said he doubted the report is true because of the huge amount of business that Douglas, which employs about 50,000 workers, represents.

''I just don't think it's going to happen, because the backlog is so tremendous,'' Rosen said. ''I don't think that closing Douglas is realistic.''

Douglas said two weeks ago that ''poor financial performance and a review of cost projections'' had led to stringent cost-cutting steps, including the elimination of 3,000 of the 50,000 jobs at the company. Lamb said Thursday that the number of jobs to be eliminated has been boosted to 4,000.

The Douglas division lost $222 million on revenues of $4.74 billion last year, while McDonnell Douglas, of St. Louis, earned $219 million on revenues of $14.6 billion. The results included a $72 million write-off to cover increased costs of development and testing of the C-17, which is due for its first flight next year.

Federal regulators are currently conducting flight testing of the MD-11 and the company expects to begin deliveries of the plane late this year.

Capellupo told managers that McDonnell Douglas executives have become

dissatisfied with slower-than-expected production rates at Douglas, the newspaper said, citing an internal memo written by a customer-support manager who attended the meeting.

''The company (Douglas) is in BIG TROUBLE,'' the memo reportedly said. ''If the C-17 has any more problems; and if the MD-11 sin't certified and delivers 5-6 aircraft by the end of the year; and if the MD-80 doesn't start producing aircraft like they are supposed to (should have produced something like 39 the first quarter and produced 24) ... then DAC (Douglas Aircraft Co.) could be history.

Spokesman Lamb, while refusing to comment on the accuracy of the memo, said Capellupo's statements at the meeting were made simply to produce better results from his employees.

''The comments were made to help employees understand the need for improved perforamnce at all levesl of our organization,'' Lamb said. ''Our deputy president routinely comments to employes about the need to perform.''

Lamb said Douglas has 875 commitments for the MD-80, which costs about $30 million each, and 346 for the MD-11, which costs about $100 million each. ''We feel we have a tremendous opportunity, but as has been stated, we need to perform to take advatange of these opportunities,'' he said.

McDonnell Douglas stock was off 25 cents to $47.375 a share in afternoon trading Thursday on the New York Stock Exchange.

#90130u1505 05/10/1990 ~United Press International

BOGOTA, COLOMBIA (MAY 10) UPI - Soldiers arrested a lawyer Thursday who has served as an intermediary between the warring Medellin Cartel of cocaine traffickers and the Colombian government, the lawyer's wife said.

The army also raided an underground cocaine lab located in a cave complete with an electrical system and sleeping quarters.

Guido Parra was arrested early Thursday at his residence and his office was raided in the city of Medellin, 160 miles northwest of Bogota, his wife, Patricia de Parra, told the radio station RCN.

Parra, a former presidential secretary, has served as a spokesman for the Medellin Cartel and acted as an intermediary in the kidnappings by the cartel of various people. He was arrested by soldiers of the army's 4th Brigade, de Parra said.

''They arrived at 5 in the morning,'' she said. ''They took his passport

and some papers.''

Parra served as a mediator between the government and the cartel after cocaine gunmen on Dec. 20, 1989, kidnapped businessman Alvaro Montoya, son of German Montoya, a prominent advisor to President Virgilio Barco.

Montoya was freed Jan. 22 in a gesture of peace by the cartel, which was seeking an end to its war with the government. The government has refused to negotiate a peace agreement with the cartel.

Parra, a former congressman, has called on the government to negotiate with the cartel and for an end to extradition of the United States of indicted cocaine traffickers.

Authorities also reported soldiers raided an underground cocaine lab operating in a cave with its own electrical system and sleeping quarters for some 30 people.

Soldiers also confiscated a ton of cocaine in the cave near Puerto Triunfo along the Magdalena River 90 miles north of Bogota in the state of Antioquia.

A laboratory complete with all the equipment and chemicals needed to make cocaine was discovered in the cave, along with microwave ovens.

Colombian television Wednesday night showed lagoons in the cave and a series of catwalks for those working there.

In another raid, police captured 880 pounds of cocaine in the city of Santa Marta on the Caribbean Coast, 470 miles north of Bogota, Col. Hugo Pulido said.

The cocaine was destined for the United States aboard a ship, he said.

#90130u1531 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - Smoking cuts nearly 18 years off the life of the average male smoker, a study released Tuesday said.

The study, which examined smoking habits and death age among 1,807 men living in Erie County, Pa., from 1972 to 1974, found a 30-year-old man who does not smoke can expect to live 17.9 years longer than one who smokes his entire lifetime.

The difference decreased with age - the average 50-year-old non-smoker lived about 13.5 years longer than a smoker and a 75-year-old non-smoker enjoyed about 5.5 more years of life than a smoker, researchers said in a

study published in Contingencies, a journal of the actuarial profession.

Cigarette smoking is known to increase the risk for a variety of health problems, including heart disease, lung cancer and other respiratory disorders.

Robert J. Myers, former chief actuary for the Social Security Administration, and his colleagues said they consider their study better than past efforts to gauge smoking's impact on lifespan because it made adjustments for non-respondents and looked at a large percentage of a total population. Most previous studies on smoking habits looked at death rates and did not include data on living people, they said.

The American Cancer Society has estimated an overall seven-year difference between smoker's and non-smoker's life expectancies and the Veterans Administration found a nine-year difference.

Joan Schellenbach, a spokeswoman for the cancer society, said her group had no quarrel with the new estimates and said all the studies show smoking substantially shortens life.

The actuarial study defined lifetime smokers as people who smoked from their pre-teens, teens or early adult years onward, with the possible exception of the last year of life. Non-smokers were those who smoked less than 20 packs of cigarettes during their lifetime, or who only occasionally smoked a pipe or cigar. Of the 1,807 men studied in Erie County, 1,375 were smokers and 432 were non-smokers, researchers said.

#90130u1540 05/10/1990 ~United Press International
BIRMINGHAM, AL (MAY 10) UPI - Several former Ku Klux Klansman linked to a violent clash with black marchers 11 years ago will gather Saturday for a course in brotherly love conducted by the man who led the march.

But one of the former Klan leaders said Thursday the two-hour class by Southern Christian Leadership Conference President Joseph Lowery in Birmingham would not change his attitude toward blacks.

''I don't know what he's going to say, but he's not going to change my way of thinking,'' said Roger Handley of Gardendale, the former leader of the

American Invisible Empire: Knights of the Ku Klux Klan.

''I don't believe in integration. I don't believe in interbreeding. I don't hate anybody, but I'm not going to change my way of thinking on that.''

Eight former Klansmen were ordered to attend the course as part of a settlement of a lawsuit related to a bloody confrontation between the KKK and black marchers that took place in Decatur, Ala., in 1979. Four men - two blacks and two whites - were wounded then in an exchange of gunfire when the Klan tried to break up a march, which was on behalf of a retarded black man convicted of raping a white woman.

''One of their Cyclops (a Klan leader) up in Connecticut called it (the course) cruel and unusual punishment,'' said Lowery, who escaped injury while leading the 1979 march. ''I reckon it might be.''

Lowery said he plans to talk about the oneness of the human family and how the Klansmen may have been used by ''demagogic'' leaders.

Commented former klansman Handley: ''I spent four months in prison and it didn't change my mind. I don't see how two hours in a meeting is going to. If there's any good in it, it will be that Lowery listens to what I have to say and takes it to heart.''

Southern Povery Law Center director Morris Dees, who handled the civil suit that led to the meeting, said the meeting at least brings the two sides together in a peaceful setting.

''Maybe they're talking because it was part of a court settlement, but at least they're talking,'' Dees said.

#90130u1562 05/10/1990 ~United Press International
DETROIT (MAY 10) UPI - Top Ford Motor Co. executives told shareholders during the company's annual meeting Thursday that the automaker's spending on buyer incentives is at a record rate of $4 billion a year, nearly twice year-ago levels.

Ford Chairman Harold A. Poling and President Philip E. Benton Jr. said at the sparsely attended 35th annual meeting that the figure is based on a record $1,000 per vehicle in buyer rebates or low-rate financing offers during the first quarter of 1990.

However, they said they expect such spending to decline because the No. 2 U.S. carmaker's vehicle inventories are at normal levels and demand for new products is expected to be strong into the summer selling season.

Ford now has a 61-day supply of cars and a 63-day supply of trucks on hand Poling said.

Ford also told the 570 shareholders in attendance at the two-hour meeting that it spent $1.2 billion on worldwide advertising last year, up $91 million from 1988. The company's U.S. advertising alone totaled $644 million, up from about $571 million.

Poling, who took over as chairman March 1, told reporters after the meeting that Ford is now spending a high of $1.1 billion a year on medical costs, which translates into $352 a car.

''Medical costs are one of the most serious problems facing us,'' he said, adding the company and the United Auto Workers union are studying ways to reduce them.

But he declined to say if medical costs would be a major issue at the bargaining table this summer, when the UAW begins negotiating new national contracts covering about 500,000 workers at Ford as well as General Motors Corp. and Chrysler Corp.

''At Ford, we want a peaceful, fair, equitable settlement that enhances our business,'' Poling said, noting that Ford and the UAW reached an ''historic'' labor agreement in 1987 without any work disruption.

Three-year contracts between the Big Three carmakers and the UAW expire Sept. 14.

During the meeting, Poling said that despite an unfavorable business

environment, Ford intends to make record investments in new products.

''Expenditures for new products and facilities modernization in the next five years will be up substantially over the record $23 billion we spent during the past five, including $6.8 billion last year,'' he said.

Poling also said that while Ford has supported President Bush's clean air bill, further Congressional proposals have only frustrated the company.

''Now Congress has progressed well beyond that proposal and is considering emission standards that will present a far greater challenge to the industry and result in higher costs to consumers but yield relatively modest improvements in the quality of our air,'' he said.

One of the biggest competitive concerns continues to be excess worldwide capacity, expected to reach 8.4 million units this year, Poling told shareholders.

''That's 20 percent more cars and trucks than consumers will demand,'' Poling said.

On other matters, Poling said no decision has been made yet on whether to contruct a new Jaguar plant. He said that detailed studies are being done ''to determine what Ford could bring to Jaguar'' and that a business plan will be formulated later this year.

Ford purchased Jaguar last year for $2.5 billion, about five times the British luxury carmaker's net worth, according to Ford's annual report.

During the meeting, shareholders overwhelmingly approved Ford's current slate of 17 company directors. The two management proposals, including one that sought to adopt a long-term compensation plan for company officers, were also overwhelmingly approved.

Also on the agenda were three shareholder proposals calling for the disclosure of certain compensation information, the reporting of political action committee contributions and the adoption of cumulative voting in the election of directors. All three were soundly defeated.

Ford has 287,000 stockholders. A total 357.4 million shares of common and Class B stock were represented at the meeting in person or by proxy. That represents 85.4 percent of the vote that could be cast.

#90130u1564 05/10/1990 ~United Press International

JERUSALEM (MAY 10) UPI - Israel's Labor leaders reversed a day-old decision Thursday to enter talks on a coalition with the Likud Party,

leaving the field clear for acting Prime Minister Yitzhak Shamir to form a narrow right-wing government. Labor's new course, although not irreversible, raised the prospect of a power struggle within the party and national elections.

Since the collapse of the last "national unity" government two months ago, chances have appeared slim that Labor and Likud - unable to resolve fundamental differences over the Middle East peace process - would join forces again. But the right-wing National Religious Party has tried to broker another Likud-Labor coalition.

On Wednesday, the center-left Labor Party indicated it would consider a NRP proposal for a broad coalition, but demanded the same number of Cabinet ministers as the right-wing Likud. In response, the NRP told Labor it had until Sunday to accept its proposition, which did not include parity between the country's two major parties.

"The NRP showed a lot of goodwill," said former Defense Minister Yitzhak Rabin, a Labor leader, "but the Likud never did intend to form such a government. Without a balance in the government, there's nothing to talk about."

While continuing his efforts to set up a narrow coalition of Likud, right-wing and religious parties, Shamir said Wednesday he would consider the NRP proposal, but showed little enthusiasm for the idea.

As another condition for joining a coalition, Labor leaders demanded Likud agree to pursue the peace process and approve a U.S. formula proposed by Secretary of State James Baker. "We remain loyal to our principles," said Labor Party chairman Shimon Peres. "Without a yes to Baker, we do not join a unity government."

Shamir's refusal to accept the Baker plan for Israeli-Palestinian talks brought about the collapse of the 15-month-old "national unity" government March 13.

Charging the Likud had no intention of pursuing the peace process, Labor Party doves sharply criticized their leaders for agreeing to consider a coalition with Likud. The rejection of the "national unity" option exposed the simmering leadership battle within Labor.

"I think that the Labor Party, under the assumption we will join the opposition, will have to get prepared for the next elections ... and the question who will lead the party," Rabin said. Former Energy Minister Moshe Shahal told Army Radio it was time for a new generation of members to assume the leadership of the party.

The Likud Party claims it has enough support to assemble a slim majority in

the 120-member Parliament to lead a coalition. Shamir has slightly more than a week under a presidential mandate to present a government.

In the occupied Gaza Strip Thursday, soldiers shot and killed a 24-year-old Arab from the village of Beit Hanoun during a clash with stone-throwing youths, Palestinian sources said.

Villagers said the victim, Fayez Mohammed Hamad, was not involved in the clashes and was playing soccer on a nearby field when he was shot, the sources said. He was taken to Gaza City's Ahli Hospital where he was pronounced dead, doctors said.

The family took the body and immediately buried it. At least nine people were wounded in clashes that erupted during the funeral, the sources said. The army imposed a curfew on the village and said it was investigating the circumstances of the death. At least 660 Palestinians have been killed by Israelis since the start of the uprising against Israeli occupation.

WASHINGTON (MAY 10) UPI - Americans borrowed $2.6 billion more in installment loans during March for a total of $721.5 billion at an annual growth rate of 4.4 percent, the Federal Reserve reported Thursday.

The Fed also said it has drastically revised downward its estimate of consumer borrowing for February to a gain of only $62 million, or a 0.1 percent annual rate, and for January, to a growth of $2.2 billion, or a 3.7 percent annual rate.

Last month, the Fed had estimated February's consumer borrowing increase at $3.4 billion, or a 5.7 percent annual growth rate, and January's at $3.8 billion, or a 6.4 percent annual growth rate.

February's automobile loans were revised to a fall of $1.3 billion from an increase of $889 million in the month as previously reported. Miscellaneous loans were revised down to a growth of $514 million from an advance of $2 billion as previously reported.

February revolving loans, in particular credit card, were revised by the Fed to an increase of $786 million from the $485 million previously reported for month.

The Fed's major revision for January data was in miscellaneous types of loans to a drop of $789 million from an increase of $1.5 billion.

The Federal Reserve indicated it also was revising consumer installment credit data to incorporate new information and updating seasonal

adjustment factors from the year 1980 on.

Most of the increase in consumer borrowing during March was registered in automobile loans, up $1.8 billion, at a 7.5 percent annual rate, and in revolving types of loans such as credit cards, up $2 billion, at a 12.1 percent annual rate.

In the category of miscellaneous types of loans, consumer borrowing fell $1.2 billion during March, at a 7.2 percent annual rate, the Fed said. Credits for mobile homes increased $17 million, at a 0.9 percent annual rate.

Auto finance companies March interest rates on new car loans averaged 12.31 percent, down from 12.67 percent in February; on used cars, rates increased to 15.97 percent from 15.91 percent, the Fed said.

#90130u1574 05/10/1990 ~United Press International

CHICAGO (MAY 10) UPI - Trading was choppy and grain and soybean futures were mixed at the close Thursday on the Chicago Board of Trade.

The volume was relatively light ahead of the wheat production estimates and the supply and demand report from the Agriculture Department.

Corn prices were supported by widespread rain and much cooler weather across the Corn Belt. Traders note that delays in corn planting could mean some of the acreage intended for corn could be planted to soybeans if it gets too late in the season.

Nearby May wheat was higher on news the Soviet Union was re-bidding for 550,000 tons under the export bonus program. New-crop wheat was lower on profit-taking and indications the USDA would predict a larger wheat crop than last year.

Old-crop soybeans were moderately higher on follow-through buying and reports of active trading on European markets. More than 40,000 tons of soybean meal was traded in Rotterdam.

Country movement was light.

At the close, corn was off 3/4 to up 3 1/4, soybeans up 1 1/4 to down 3, wheat up 2 1/2 to off 2 1/2 and oats unchanged to up 3/4.

-30- 1274

#90130u1589 05/10/1990 ~United Press International

NEW YORK (MAY 10) UPI - A federal appeals court ruled Thursday that

begging on the subways is not a constitutionally protected form of free speech and is ''nothing less than assault'' on citizens by panhandlers.

The decision by the 2nd U.S. Circuit Court of Appeals overturned a Jan. 26 ruling by U.S. District Judge Leonard Sand that poor people had a First Amendment right to beg.

''We hold that the subway regulation does not violate the First Amendment '' the appeals court said in the 3-1 decision upholding the Metropolitan Transportation Authority's ban on panhandling in the city's subway system.

Sand's ruling fueled a heated debate on panhandling and heightened frustration of commuters complaining about increasingly aggressive homeless people asking for money.

Douglas Lasdon, executive director of the Legal Action Center for the Homeless, one of the parties that brought the suit against the MTA ban, said he was ''disappointed with the ruling.''

''Silencing poor people will not solve the hunger or homeless problem,'' Lasdon said.

The appeals court decision cited a recent Supreme Court ruling warning against the view ''that an apparently limitless variety of conduct can be labeled 'speech' whenever the person engaging in the conduct merely intends to express an idea.''

''It seems fair to say that most individuals who beg are not doing so to convey any social or political message,'' said Judge Frank Altimeri, who wrote the 50-page decision. ''Rather, they beg to collect money.

''Begging is inherently aggressive to the captive passengers in the close confines of the subway atmosphere,'' the ruling said.

''Begging in the subway often amounts to nothing less than assault, creating in the passengers the apprehension of imminent danger,'' the court decision continued.

In a 12-page dissent Judge Thomas Meskill said: ''Begging is speech protected by the First Amendment that may be regulated, but not entirely prohibited to achieve the government interests advanced in this case.

''I simply fail to see why the Transit Authority should be able to permit organized charities, but not beggars, to a rattle a cup full of change as one passes by,'' Meskill wrote.

MTA Chairman Robert Kiley praised the ruling as a victory for subway riders.

''In upholding the Transit Authorities rules and regulations, the court has ruled in favor of the rights of our customers,'' Kiley said. ''The Transit police may now proceed with our efforts to restore order to the transit system,'' he said.

Sand had directed that begging and panhandling be permitted on subway platforms and mezzanines but temporarily prohibited such behaviour on subway trains and other areas.

The appeals court also said begging, which ''disrupts'' and ''startles'' passengers, raises concerns about public safety.

In short, ''We think (Sand's) analysis reflects an exacerbated deference to the alleged individual rights of beggars and panhandlers to the great detriment of the common good.''

#90130u1629 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - Senior Army aviation officials offered a strong defense of their CH-47D Chinook helicopter Thursday, telling a congressional panel the oft-grounded aircraft is the safest cargo helicopter in Army history.

The defense was mounted to claims about the helicopter's reliability and safety contained in a year-long General Accounting Office study conducted for the investigations subcommittee of the House Energy and Commerce Committee.

Maj. Gen. Donald Williamson, head of the Army Aviation Systems command in St. Louis, told the panel that the Army has moved to fix each problem as it arose and considers the helicopter safe.

''The CH-47 is a safe helicopter,'' said Williamson, presenting a point-by-point defense of the aircraft that addressed safety allegations raised by the GAO.

Williams agreed with the finding that the Army is short of helicopter mechanics, but disagreed with the contention the CH-47D program should be stopped until the problems are fixed.

While arguing that the Army safety program has been ''pro-active'' in an effort to ensure safe flight for soldiers, Williamson did concede that ''in hindsight we should have'' followed a 1972 recommendation from Boeing builder of the helicopter, to replace flammable aluminum flight control rods with stainless steel ones.

The recommendation was made well before the Army embarked on a program of using airframes from older models as the basis for the D model. The Army has since replaced all the rods with stainless steel ones.

Other problems have included transmission cooling fans that have come apart and sometimes started fires, cracks in three-piece drive shafts connecting the two jet engines to a central transmission, and cracks in nuts holding a forward transmission to the airframe. The fans have been redesigned and a new one-piece drive shaft has been developed. A manufacturing problem is suspected in the transmission nuts.

Williamson said the new fans have been tested for 20,000 hours and appear to be working well.

Leo Sullivan, one of the GAO investigators assigned to the subcommittee, said he suspects the aircraft may have a problem with a harmonic vibration that is at the core of the troubles with the various parts.

Although he was critical of the Army's handling of the program, Sullivan said the fatality statistics for the CH-47D are ''a little bit lower'' than for other programs.

The figures show that it has a major accident rate - defined as damage of $1 million or more, a loss of life or a disabling injury - of 4.26 per 100,000 hours of flight, lower than the CH-46, two models of the CH-53 and just higher than the UH-60. The overall Army rate is 2.2. The rate of fatal accidents for the CH-47D is just 1.42 per 100,000 hours, better than all the other cargo helicopters.

Williamson said that of seven major accidents, two of which claimed a total of 15 lives, three were attributable to human error, two were due to manufacturing errors and just two were attributable to material failures. He also disputed the GAO claim there were 25 potentially disastrous emergencies with the helicopter, saying 13 were not potentially disasatrous and 12 others were minor mishaps.

The Army plans to buy a total of 472 Chinooks to complement the current fleet of 302. The aircraft are expected to cost about $6.4 million each.

(MAY 10) UPI - Crews are working to shore up levees in the southern reaches of the Arkansas, Red and Trinity rivers, where high-water marks are expected. Volunteers from three states are helping fill sandbags along the Red River in Texarkana, Texas, where at least 100 homes are endangered. In the Midwest, a flood watch was posted in northeast Illinois after three inches of rain hit the area.

Officials in India now say at least 50 people were killed in the hurricane that left a trail of destruction through flooded coastal areas of southern Andra Pradesh state. The hurricane moved inland and began dissipating today, its 155-mile-an-hour winds reduced to 50 miles an hour. Officials say the death toll will likely climb higher as relief teams reach the affected areas.

Czechoslovak President Vaclav Havel is calling for the creation of a ''Helsinki security zone'' merging NATO and the Warsaw Pact. The playwright-president says the move would be a step toward building an Organization of European States modeled after the Organization of American States. Havel spoke today in France before the Parliamentary Assembly of the Council of Europe.

A Vietnamese government spokesman says an American publisher and business consultant is being held for what is termed ''violation of Vietnamese regulations.'' The spokesman declined to be more specific about the charges against 43-year-old Michael Morrow, owner of the ''Asia 2000'' publishing company. The spokesman says officials will make a decision in the case in the next few days. Morrow was arrested on April 23rd, near Danang.

#90130u1698 05/10/1990 ~United Press International

BUCHAREST, ROMANIA (MAY 10) UPI - The incidence of AIDS among Romanian adults, nearly all of them heterosexual, has reached epidemic proportions largely because of prostitution, the director of a French charity declared Thursday.

Statistics showed the number of AIDS virus infections among the adult population now totals about 130,000 cases, researcher Jacques Lebas said.

Lebas, president of Medine du Monde, said the figures he obtained from the Romanian Institute of Virolgy revealed that 40 out of 7,000 adult blood donors tested positive for the HIV virus that causes acquired immune deficiency syndrome.

The revelation deepens a national tragedy that came to light three months ago with the discovery that hundreds of Romanian children were accidentally infected with the AIDS virus.

Health officials have laid much of the blame for the spread of the disease on executed dictator Nicolae Ceausescu, who suppressed information about AIDS and allowed outmoded medical practices.

If the statistics reflect the nationwide picture, as many as 130,000 Romanians may carry the virus out of a population of 23 million, he said.

The provisional government refused to confirm the figures, which have not yet been officially released.

''Every government wants to be cautious about revealing facts at the beginning of an epidemic,'' Lebas said. ''But we believe the only way to fight problems on this scale is to speak out clearly.''

The provisional government launched an emergency AIDS and research and screening program with the help of World Health Organization (WHO) after it was discovered that 800 children and babies in state-run orphanages in Romania had contracted AIDS from contaminated blood transfusions.

The official AIDS Commission has confirmed only 50 adult AIDS cases in the country.

Lebas, who was instrumental in bringing the 800 child AIDS cases to light, said the main source of transmission for adults appears to be prostitution.

''We are very concerned about the role of prostitution in Romania,'' he said. ''It is officially illegal and very difficult to monitor.''

''I'm sure the spread is almost exclusively among the heterosexual population in Romania, as it is in Africa,'' said Min Stacopoole, a nurse at an AIDS treatment center in Bucharest.

She said several of the 25 child AIDS patients at the clinic are children of prostitutes.

The Romanian AIDS Commission has confirmed 50 adult AIDS cases.

In February, WHO officials reported that tests on 2,184 Romanian children

showed that more than one-third were infected with the HIV virus. The agency said 50 children under the age 5 had developed full-blown cases of AIDS and 102 others suffered from AIDS-related complex, or ARC.

The tests were peformed on children living in orphanages or undergoing treatment at pediatric hospitals.

In most cases the virus was spread through the discredited practice of giving blood transfusions to weak or malnourished infants.

Romanian health officials said Ceausescu suppressed research that pointed to an alarming number of HIV infections among children, and refused to order precautions against the further spread of the virus.

Because there is no cure for AIDS, doctors and nurses at Romania's AIDS treatment centers can do little for their patients but try to make them comfortable.

''All will die,'' said Neil Hartley, a nurse from Manchester, England, who cares for AIDS-infected children. ''We spend a lot of time just cuddling them.''

#90130u1705 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - Warning of ''trouble in paradise,'' a congressional report said Thursday the United States is in danger of losing the goodwill it gained in the South Pacific by liberating the region from Japan in World War II.

The report by a three-member House delegation said the United States still has ''important political, security, economic and humanitarian interests'' in the South Pacific but has ignored the area for more than four decades.

''At best our policy toward the region has been one of benign neglect,'' said Rep. Steven Solarz, D-N.Y., who visited the South Pacific last August with Reps. Robert Dornan, R-Calif., and Eni Faleomavaega, D-American Somoa.

''As a consequence, the tremendous store of goodwill that our wartime liberation of the region gained us in the South Pacific has gradually diminished, until today that reservoir of friendliness and sympathy toward the United States is in danger of drying up,'' Solarz said.

The report said there is a ''widespread perception that the United States has not been responsive to the needs or the sensibilities'' of the 17 countries in the region, which have 5.5 million people and cover a 5,497-mile-long area.

In particular, the report, titled ''Trouble in Paradise,'' faulted the United States for failing to ratify a treaty making the South Pacific a nuclear free zone or to clearly oppose French nuclear testing in the region.

The report also calls on the United States to increase aid in the region, set up more diplomatic missions and pay more attention to environmental concerns such as the dumping of wastes in the South Pacific.

The report said the United States has a strategic interest in keeping the sea lanes of the area open and an economic interest in ''rich marine resources'' and possible mineral deposits.

In addition, the report said the United States has a political obligation to its ''sister democracies'' in the South Pacific and a humanitarian interest in fighting widespread poverty in the region.

The three House members visited the South Pacific from Aug. 5 to Aug. 16, traveling to the nations of Kiribati, Fiji, Western Somoa, New Caledonia, Vanuatu, Papua New Guinea and the Solomon Islands.

Solarz assured reporters that he and the other congressmen did not go to the beach once during their trip.

KANANASKIS VILLAGE, ALBERTA (MAY 10) UPI - NATO defense ministers agreed Thursday to cut short-range nuclear weapons in Europe, and Defense Secretary Dick Cheney said a unilateral pullout of the alliance's nuclear artillery is ''entirely possible.''

At the end of a two-day meeting of NATO's Nuclear Planning Group of defense ministers, NATO Secretary-General Manfred Woerner announced that the NATO summit of heads of state will be held in London from July 5-6.

''There's clear agreement to reduce (short-range weapons in Europe),'' Woerner said at the conclusion of the meeting.

The defense ministers directed NATO's High Level Group to study the Atlantic alliance's future nuclear needs and to determine the numbers and types of weapons needed.

When asked, Cheney addressed a Dutch proposal that the alliance unilaterally withdraw nuclear artillery from Europe without waiting for arms talks with the Soviets. The shells have a range of about 8 miles.

''If unilateral is to mean a decision made up by and within the alliance to reduce the stockpile of nuclear artillery in Western Europe, it's entirely possible,'' Cheney said. ''It wouldn't be the first time that it's been done. At this point no decision has been made in the alliance.''

He said the decision would be made during a comprehensive review.

A West German spokesman said he thought a decision on nuclear artillery might be made at the London summit.

The final communique issued by the planning group welcomed President Bush's decision to cancel new ground-based nuclear weapons for Europe and to review thoroughly NATO's political and military strategy in light of the democratic reforms in Eastern Europe and the lessened Soviet threat.

''We are ready to build upon the achievements of the past 40 years, to seize the opportunities created by a new and changing Europe,'' the statement read.

''Given the political and military changes now taking place in Central and Eastern Europe, together with the prospect of earlier signature and implementation of a Conventional Forces in Europe Treaty, we agree that there is a diminishing need for nuclear systems of the shortest range,'' it said.

But the ministers left open the possibility that the short-range weapons might be replaced by the longer-range air-launched Tactical Air-to-Surface Missile, or TASM, that the United States currently has under development.

''We noted that sub-stragetic nuclear systems offering both flexibility and longer range will assume relatively greater importance (in Europe),'' the statement read.

Woerner told reporters that the TASMs issue was not discussed during the meeting and that ''there is no need to discuss or decide within NATO on TASM at this moment.''

A senior U.S. official said the defense ministers appeared ''pretty enthusiastic'' about Bush's initiative on short-range weapons.

There are an estimated 3,400 NATO nuclear warheads in Europe - 400 for the Lance missile, 1,500 for artillery and 1,500 bombs. Most of the Lance and artillery weapons are in West Germany and the Netherlands.

''We should abandon the artillery and we can do that unilaterally, and we should negotiate the short-range missiles,'' said Adrian Jacobovits de Szeged, the Netherlands' ambassador to NATO.

''There's a general feeling (among NATO ministers) that nuclear artillery should go,'' Jacobovits de Szeged told reporters.

Referring to the democratic reforms in Eastern Europe and the withdrawal of Soviet forces, Jacobovits de Szeged said, ''If the enemy goes away and the artillery is short-range, well?''

#90130u1750 05/10/1990 ~United Press International

SAN FRANCISCO (MAY 10) UPI - California Energy Co., whose once high-flying stock has dropped more than 20 percent this month, denied allegations Thursday that it overcharged partners in a Southern California geothermal project.

The company said the assertions, contained in a demand of arbitration by one of its partners, were ''completely without merit.''

California Energy's stock has been battered since word of the dispute was circulated among investors. The stock, trading at $10.25 a share late Thursday, has dropped from $13 a share at the end of April.

In its arbitration demand, Catheness Corp. of New York, accused California Energy of overcharging partners in the Coso Geothermal Joint Venture in Inyo County, Calif., by $17 million from 1986 through 1989.

On Tuesday, the New York Supreme Court stayed arbitration of the matter. California Energy contends Catheness did not meet certain conditions required before it could demand arbitration.

California Energy and its partners have been in talks for more than a year over the operating budget of the $625 million Coso joint venture and the

allocation of certain expenses to the joint venture partners, California Energy said.

Chairman and Chief Executive Charles Condy blames short sellers and other bears on the stock for spreading bad news about the company in hopes of driving the stock down.

#90130u1755 05/10/1990 ~United Press International

WAYNESBURG, KY (MAY 10) UPI - A man fatally shot his estranged wife Thursday at the elementary school where she worked as a secretary and then drove away and killed himself in his car, authorities said.

No one else at the school was hurt in the shooting.

Shannon Greer, 46, used a shotgun to kill Glenda Greer, 42, his wife of 22 years, at about 9 a.m. at Waynesburg Elementary School in a tiny unincorporated community in Lincoln County about 50 miles south of Lexington, police said.

Police found his body about two hours later in his car about 5 miles from the school.

Mrs. Greer's attorney, James Williams, said Mrs. Greer had filed for divorce and obtained a restraining order against her husband, who had threatened her life.

''This lady was afraid enough to convince me to get a restraining order out on this man,'' Williams said. ''However, I explained to her that it was just a piece of paper, and she couldn't hold back a person bent on violence.''

A petition filed by Williams in the circuit clerk's office said Mrs. Greer feared for her safety, believing her husband would become violent upon service of divorce papers.

''He harassed her, following her to her place of employment,'' the decree said. ''The respondent had previously threatened to kill the petitioner and to kill himself. At one time, the respndent actually got a gun and was in the process of loading the same while threatening to kill himself. On April 20, 1990, the respondent became violent with the petitioner and choked her.''

''No students were directly involved,'' said Violet Smith, deputy clerk in the office of County Sheriff Earl McWhorter.

School officials were unavailable for immediate comment on the shooting.

''She had filed divorce papers Saturday morning, with a restraining order to keep him away from her,'' Smith said. ''The sheriff served a divorce summons on the husband on Monday.''

Smith said the couple had an adult son and daughter, both living away, and two grandchildren.

School officials dismissed classes for the rest of the day following the shooting.

''The town has no police force. It's just a stopping place,'' said Don Young, the police chief of Stanford, the county seat about 12 miles to the north of Waynesburg.

#90130u1796 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - The team of Kremlin officials in charge of planning for the May 30-June 3 summit between President Bush and Soviet President Mikhail Gorbachev wound up its work Thursday and headed back to Moscow.

U.S. Chief of Protocol Joseph Reed and other administration officials met with the 16-member Soviet team over the past week to work out details of the five-day summit. Most of the talks will take place at the White House and Bush also is inviting Gorbachev to join him for a weekend at Camp David, officials said.

White House officials have not announced precise details of the summit, the second for the two leaders, which is being designed along the lines of a state visit.

Also on Thursday, administration officials indicated Bush will travel to London from his Kennebunkport, Maine, summer home on the Fourth of July to attend a two-day NATO summit meeting, set for July 5-6.

Bush is likely to return to Washington for a brief time following the NATO meeting, then head to Houston for the July 9-11 economic summit of the seven major industrialized democracies.

The diplomatic whirl is to begin in earnest when Gorbachev and his wife, Raisa, arrive in Washington on Wednesday, May 30, with the formal welcome and a state dinner held Thursday.

The Soviet team also looked over the Camp David presidential retreat in Maryland Wednesday and are taking a package of the U.S. recommendations back to Gorbachev, including possible trips for Mrs. Gorbachev.

One idea is for Mrs. Gorbachev to accompany Barbara Bush to Wellesley College in Massachusetts where the first lady is to deliver a commencement address June 1.

Also possible is a visit to Colonial Williamsburg, a restored Revolutionary-era village in Virginia, on Saturday, June 2, while the two presidents meet at Camp David.

#90130u1828 05/10/1990 ~United Press International

MOSCOW (MAY 10) UPI - Master Soviet spy Kim Philby's KGB handler confirmed for the first time Thursday that a ''fifth man'' was involved in the most celebrated espionage ring in Soviet and British history.

''It is a fact. The fifth man existed, and I was personally acquainted with him,'' Yuri Modin, 67, Philby's KGB handler, said in a new joint Soviet-British film made with KGB material and shown to journalists

Thursday.

The film, ''Cambridge Graduate,'' will be shown to Soviet viewers Friday night on the second anniverary of Philby's death. It was not immediately known if the movie will be shown outside the Soviet Union.

The film failed, however, to reveal the identity of the fifth KGB mole in the British secret service. In place of the photograph of the ''fifth man '' the movie showed only part of a forehead and then a giant ''question mark'' of the elusive double agent.

Modin also refused to name the elusive fifth man of the spy ring of upper class Britons. ''They have wasted 30 years looking for him,'' he told journalists. ''Let them go on trying.''

The four known members of the spy ring are all dead - Guy Burgess, Donald Maclean, Philby and the queen's former art adviser, Anthony Blunt.

Burgess, Maclean and Philby, who fled to the Soviet Union when they were on the verge of being detected, all died in their adopted land. Burgess and Maclean fled to Moscow in 1951 and Philby 12 years later in 1963.

But the fifth man, who obviously helped tip them, has never been revealed.

A prime suspect had long been the late Roger Hollis, who headed British Counter Intelligence, or MI5, and who was interrogated after his retirement in 1965.

British Prime Minister Margaret Thatcher formally cleared Hollis in 1981, and when asked about Hollis on Thursday, Modin told reporters: ''I don't want to help narrow the search.''

The new film revealed very little that was new, but did make known that Philby's favorite song in his later years was Frank Sinatra's ''My Way.''

Soviet viewers may also find it piquant that the headquarters of MI6, where Philby first worked, were on Baker Street, the fictional home of Sherlock Holmes.

The British turncoats, all members of the upper class, were recruited by Moscow in the early 1930s and all had links to Cambridge University. All spied for Russia in the 1930s right through World War II and during the post-war Cold War years.

Philby was the highest placed, rising to the head of the Soviet desk in the MI6 operations wing of British intelligence, an astoundingly-well placed slot for a KGB spy.

KGB operatives inteviewed in the film reveled over the rare fortune of having their master spy supposedly overseeing anti-Soviet operations.

Modin, boasting about the ring's successes, said: ''I think that the spy ring was unique in the history of all espionage. Despite their being revealed, no one was arrested, no one was shot, no one was imprisoned, all died normal deaths.''

Philby also headed the MI6 station in Washington during the war, and Modin said that Philby helped set up the American CIA after the war ''which did us quite a lot of harm.''

Asked why he thought Philby betrayed his homeland, Modin said: ''Philby was a revolutionary. He believed in world revolution and saw the Soviet Union as a little corner of that revolution.''

Modin said that Philby, like all defectors, became critical of his adopted socialist motherland, but he never stopped believing in the path he chose.

Speculation on the ''fifth man,'' the film said, has even bandied about such names as the late Prime Minister Harold MacMillan and author Graham Greene.

Modin, a veteran KGB agent who obviously enjoyed playing cat and mouse with the press, said even he found some of the speculation incredible. In all, 40 names have been put forward at one time or another.

The new film did very little to solve the mystery of why the Soviets insisted on keeping Nazi Rudolf Hess in Spandau Prison until his death in 1988 long after the other war criminals were released.

But again, the treacherous hand of Philby may have been involved. The film intimated that Philby's reports about Hess may have led to the Soviet insistence that he remain imprisoned.

Hess fled to Britain in a German plane on May 10, 1941, landing first in Scotland. The KGB file on Hess, which is shown in the film, contains a photograph of Hess and documents forwarded to the Kremlin by Philby, whose code name in the operation was ''Soehnchen,'' which means little son in German.

''Soehnchen'' (Philby) learned about Hess' flight to Britain the next day '' the film said. ''It took him another day to check the information. On the third day the information was in Moscow.''

Josef Stalin's biographers have long believed that the Soviet dictator believed Hess made his flight to try to get Britain to sign a separate peace with Germany so that the full Nazi military might could be directed

against the Soviet Union.

Spandau Prison, where Hess was incarcerated, was run by the four Allied victors of World War II - France, the United States, Britain and the Soviet Union. All, except Moscow, saw little purpose in keeping Hess in the cavernous facility as the sole inmate attended by a staff of personnel.

#90130u1830 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - The Congressional Budget Office detailed to a Senate panel Thursday a way in five years to cut 463,000 troops and save about $43 billion in defense spending by relying more on reserve forces.

The presentation to the Senate Armed Services Committee followed a call by Chairman Sam Nunn, D-Ga., for the Pentagon to consider how it will reduce its forces because of the reduced threat in Europe.

There are now 2.1 million men and women in uniform and another 1.1 million in the reserves. The Pentagon is now embarked on what is called a Total Force Study, an attempt to decide what the mix between active and reserve forces should be and how much of an active duty force should be retained.

CBO Director Robert Reischaer told the panel that if forces required for the defense of Europe were cut in half, the United States would have 11 Army divisions and 14 fighter wings on active duty, a cut of seven divisions and 10 tactical fighter wings in relation to current levels. A reduction of 463,000 troops, he acknowledged, would force some career personnel to leave military service early, particularly in the Army. Under the plan laid out by Reischaer, there would be no reduction in the size of the reserve force.

He said annual budgets for the armed services would fall to about $227 billion, down $43 billion from the 1990 level. He detailed two other plans for increasing reliance on reserve forces, one costing $238 bilion and another costing $235 billion.

Former Army Secretary John Marsh said that Congress should permit soldiers with useful civilian skills to transfer into regular government jobs in force reductions, such as letting those with extensive anti-drug background work for the Drug Enforcement Agency. And he said senior non-commissioned officers who are forced out should be allowed into the reserve so they can continue to build retirement credits.

Retired Maj. Gen. Evan Hultman, executive director of the Reserve Officers Association of the United States, told the panel that with increased warning time in Europe, greater use can be made of the reserves.

He recommended that additional Army reserve units be combat units rather than combat service or support units. He suggested that the Navy reserve take on greater anti-submarine warfare operations and have a greater involvement in mine-sweeping work. Air Force reserve fighter units should be increased from 18 to 24 planes and C-130 units likewise should be expanded from eight to 12 or 16 aircraft.

WASHINGTON (MAY 10) UPI - Tart language underlined increasing strain on the relationship between the United States and Israel Thursday over new Jewish settlements in Israeli-occupied territories.

The clash escalated Wednesday when Israeli Foreign Minister Moshe Arens summoned U.S. Ambassador William Brown to protest U.S. involvement in formulating a resolution by a group of Arab nations for consideration by the United Nations opposing settlement of Soviet Jewish immigrants in the occupied territories.

Since Soviet authorities have loosened limits on emigration and immigration to the United States is limited, the flow of Jewish emigres to Israel has reached 10,000 per month.

Israeli officials said Arens told Brown that Israel expects the United States to fight Arab attempts to block Jewish immigration.

Referring to Arens' complaint, State Department spokeswoman Margaret Tutwiler said Thursday, ''We find the foreign minister's comments a little confusing. He knows very well what our policy is, and I would like to state it again.

''First, we wholeheartedly support Jewish emigration from the Soviet Union and absorption of the these emigrants into Israel. We have and we will continue to press for steps that facilitiate and expedite that emigration, such as direct flights (from the Soviet Union). And Minister Arens is very well aware of this.''

But Secretary of State James Baker has said the United States opposes settling any new immigrants in the occupied territories, including East Jersualem, which Israel annexed in the 1967 war.

Such settlements are seen as an obstacle to peace talks between Palestinians and Israel, since a key topic will be the political future of the occupied areas, including the Gaza Strip and West Bank regions.

There have been reports that President Bush is particularly concerned about the issue of new Israeli settlements in the territories.

While Tutwiler said, ''We want to see emigration take place and will oppose efforts by anyone to block it,'' she continued:

''We draw a distinction between absorption of Soviet Jews into Israel and their movement to the territories. The government of Israel is well aware of our concern that Soviet Jews not be encouraged to move into the territories.''

Prime Minister Yitzhak Shamir told U.S. officials, including Bush, that less than 1 percent of the new immigrants are going to the occupied territories.

But, in congressional testimony Wednesday, U.S. officials said the real figure - including the expanded East Jerusalem area - is closer to 10 percent of new Soviet immigrants.

Asked about Arens' reported comment that the U.S.-Israeli relations have reached a low point, Tutwiler said the relationship remains ''very, very strong.''

In New York, the Arab group decided Wednesday to postpone putting forward the U.N. resolution on Jewish emigration.

WASHINGTON (MAY 10) UPI - Farmers will harvest 2.09 billion bushels of winter wheat this year, the largest crop since 1981 and a stunning 44 percent increase from 1989's weather-scarred crop, the government predicted Thursday.

The Agriculture Department estimate was based on a 23 percent increase in harvested acreage and a yield of 41 bushels an acre - the second highest ever. This year's robust crop has been boosted by favorable weather and 76 percent of the acreage is listed in good or excellent condition.

''May 1 conditions point to higher yields than last season in most states '' the department said. ''Harvested acreage levels are greater than 1989 in most states.''

The department's list of likely output by state showed how dramatic the turnaround might be. Kansas, the No. 1 winter wheat state, was forecast to harvest 460 million bushels - more than double its 1989 figure. Wheat acreage is up 3 million acres.

Texas and Washington state also were forecast to grow twice as much wheat as last year. Oklahoma, usually No. 2 in production, was projected to see a 60 million-bushel increase to 214.2 millon bushels.

By contrast, last year's crop of 1.45 billion bushels was the smallest since 1978. It averaged 35.1 bushels an acre.

Winter wheat, which is planted in the fall, lies dormant during winter and is harvested in the summer, accounts for three-fourths of U.S. wheat production.

Two years of bad weather in the Wheat Belt have drained U.S. stockpiles to low levels. Warehouses are forecast to hold only 442 million bushels - the smallest amount since 1974-1975 - by the time the harvest begins in a few weeks.

If the winter wheat crop lives up to predictions, it would allow some rebuilding of U.S. reserves. With the prospect of a sizable crop, the government said wheat prices were likely to range from $2.90 to $3.30 a bushel during 1990-1991, compared to $3.71 a bushel for this marketing year.

Based on May 1 conditions, the department forecast farmers would send combines across 50.8 million acres, compared to last year's 41.5 million acres.

In March, growers indicated they would expand their winter wheat acreage by 4 percent for a total of 57.2 million acres. Overall wheat acreage - including durum and spring wheat - was pegged at 77.6 million acres, up only 1 million acres or 1 percent.

The government encouraged farmers to grow more wheat this year by cutting in half the amount of land they must idle in order to qualify for farm program benefits, such as crop loans and subsidy payments. This year's set aside is 5 percent. In addition, the government gave farmers a chance to plant 10 percent more acreage than normally allowed if they accepted a reduction in crop supports.

In a report last month, government analysts suggested there was potential for a substantial increase in wheat production despite the small gain in acreage. For one thing, they said, the impact of this year's acreage gain was understated because some land was planted - and counted - twice last year because of crop failure.

In addition, analysts said, there was less winter kill this year, meaning a larger percentage of land could be harvested.

In 1989, farmers planted 55 million acres of winter wheat, but harvested only 75 percent of the land, a much greater loss in acreage than normal.

In addition to making the first winter wheat estimate, the government made an initial assessment of U.S. grain production this year. The assessement, which was described as highly tentative, foresaw production of 316 million metric tons, compared to 281.7 million tons in 1989.

#90130u1906 05/10/1990 ~United Press International

DETROIT (MAY 10) UPI - Honda Motor Co. Ltd. announced Thursday a major reshuffling of top executive posts, naming senior managing director Nobuhiko Kawamoto, 54, to take over as president and chief operating officer June 28.

Kawamoto, senior managing and representative director of Honda, will succeed 58-year-old Tadashi Kume, who will assume the post of director and advisor after heading the company since 1983.

Honda also said Shiochiro Irimajiri and Yoshihide Munekuni, also both senior directors of Honda in Japan, were named executive vice presidents of the company.

Munekuni is currently president of Honda of North America Inc., in Torrance, Calif., although he was mostly based in Tokyo.

No successor was immediately named to Munekuni's post, a spokesman at HondaNorth America Inc.'s Detroit office said.

Munekuni, 51, served as president of American Honda Motor Co. in Gardena, Calif., from 1987 to 1989. Irimajiri, 50, served as president of Honda of America Mfg. Inc., in Marysville, Ohio, from 1984 to 1988.

Company Vice President Koichiro Yoshizawa, 58, was promoted to chairman, which is more of an advisory post and not directly involved in day-to-day operations.

All these changes will take effect June 28 as well.

BEVERLY HILLS, CA (MAY 10) UPI - Hilton Hotels Corp., citing improved profits this year, said Thursday it has increased its quarterly cash dividend by 20 percent to 30 cents a share from from 25 cents a share.

''The increase in the cash dividend reflects the record pace of earnings,

our sound financial condition and the favorable outlook for the business '' said Barron Hilton, chairman and president. The dividend is payable June 15 to stockholders of record on June 1.

The hotel-casino company last increased its dividend in May 1988 when it boosted the figure from 45 cents to 50 cents a share, prior to splitting the stock.

Hilton also said Thursday it had recorded the highest April and four-month earnings in its history. Earnings for April were $15.5 million, or 32 cents a share, up from $14.6 million, or 30 cents a share, with the 1990 results including the traditionally slow Easter period.

For the four months ended Apr. 30, Hilton earned $40.5 million, or 84 cents a share, up from $27.7 million, or 57 cents a share, in the 1989 period.

The announcements come two months after Hilton took itself off the sales block after bidders failed to meet the company's reported asking price of about $80 a share. The stock had been bid up to as high as $115 a share last summer in expectation of a sale, but sank to about half that once reports emerged of a lack of interested buyers.

Hilton stock was off 62.5 cents at $48.125 a share at the close of trading Thursday on the New York Stock Exchange.

(MAY 10) UPI - A new round of unrest in South Korea, where the government is dealing with its worst anti-government riots in two years. Police fired tear gas on a crowd of about two-thousand dissident students today in Seoul. The protesters responded with hundreds of firebombs and concrete blocks.

An Iranian official in Lebanon says four Iranians who disappeared eight years ago in a town about 25 miles north of Beirut are still alive. The Iranian charge d'affaires told reporters that the four officials reportedly are being held in Christian east Beirut. Arab diplomatic sources in Washington last week said the United States told Iran that the men were dead.

The government is recalling a faulty resuscitator that has gained widespread use in part due to the AIDS epidemic. The Food and Drug Administration today asked hospitals, emergency rescue personnel and other medical facilities to return the Pulmanex Manual resuscitators because a valve on the devices can become dislodged and prevent air from reaching patients.

A report published today in a Virginia newspaper portrays the officer killed in the fire aboard the U-S-S Conyngham as a hero. A sailor who does NOT want to be identified says the officer rescued a fellow crewman before being killed himself in Tuesday's blaze, which also injured 18 sailors.

#90130u1965 05/10/1990 ~United Press International
WASHINGTON (MAY 10) UPI - The Senate voted Thursday to allow more partisan political activity by federal employees and postal workers - the first reforms of the 51-year-old Hatch Act - despite a veto threat by President Bush.

The Senate approved the legislation 67-30, setting up a conference with the House which last year virtually repealed the Hatch Act.

After defeating every Republican proposal during eight days of deliberations, the Senate approved on a 97-0 vote an amendment by Senate Republican leader Robert Dole of Kansas to exclude from the more liberal rules the 240 employees of the Federal Election Commission.

But the Senate rejected on a 58-39 vote an amendment by Sen. Pete Domenici R-N.M., to exempt the Justice Department and 11 agencies and to prohibit solicitation of campaign contributions by federal employees and postal workers.

Sen. John Glenn, D-Ohio, Democratic floor manager for the bill, said just before the vote, ''I thought we could work out some compromise language. That doesn't seem to be the case.''

Glenn had offered to discuss a compromise with backers of the amendment but no agreement was reached.

Similiar attempts to exempt certain agencies and to ban soliciting

campaign money were rejected.

The bill, the first revisions in the Hatch Act since 1939, was assured of passage despite the threat of a veto by President Bush. There are about 3 million federal employes and postal workers.

The bill opens up some political activities federal and postal employees can engage in when they are off duty, but prohibits any political activity on the job.

Two activities permitted under proposed reforms would allow employees to hold office in a political party and would permit them to solicit money for a union political action committee if the solicitor and donor are members of that union.

The employees also would be allowed to distribute campaign literature and solicit votes, to organize and participate in political meetings, to work on phone banks and publicly to endorse and campaign for political candidates.

The bill would not allow these employees to run for partisan office or solicit contributions from the general public - two activities permitted by the bill passed in the House last April.

Sen. William Roth, R-Del., who led the Republican opposition, charged that the bill would ''accomplish a very fundemental change in the American government itself and would ''exhort and encourage'' civil service employees to work against the interests of the public.

But Glenn said, ''It just does not do that. It allows these civil servants to participate voluntarily in the political process.''

Glenn said the bill was a ''modest proposal'' designed to refine the Hatch Act and ''make it workable.''

The Domenici amendment differed from the numerous others rejected by the Senate in that it was co-sponsored by five Republican senators who have said they want to see some reforms in the law. Other amendments have been offered by outright opponents of the bill.

Domenici proposed exempting the Justice Department, the Internal Revenue Service, the Central Intelligence Agency, the Federal Election Commission, the National Security Council, the National Security Agency, the Merit Systems Protection Board, the Office of Special Counsel, the Secret Service, the Defense Intelligence Agency, the Customs Bureau and the Bureau of Alcohol, Tobacco and Firearms.

Domenici said these ''critical agencies'' should ''not have any taint or

suspicion of political pressure,'' adding that those employes would vote ''overwhelmingly'' vote to stay under the currenr restrictions.

''They would be more apt to suffer than to gain, be respected less under the bill than if left alone,'' Domenici said.

#90130u1990 05/10/1990 ~United Press International

EAST HARTFORD, CT (MAY 10) UPI - Pratt & Whitney plans to continue efforts to team up with a West German manufacturer despite a federal court order temporarily halting the action, officials said Thursday.

U.S District Judge Robert P. Patterson Jr. of the Southern District of New York has issued a temporary restraining order against Motoren und Turbinen Union of Munich.

The restraining order prohibits MTU from sharing with Pratt & Whitney proprietary jet engine information acquired from General Electric Co.

''We are proceeding with our plans to work out details of the alliance and we expect it to be formed,'' said Dan Harrison, spokesman for United Technologies Corp., parent of Pratt & Whitney.

Fairfield, Conn.-based GE, a rival of Pratt & Whitney, sought the restraining order after filing a $1.15 billion lawsuit charging MTU broke a jet engine deal with GE in favor of the alliance with Pratt & Whitney.

''Since we are not a party to the lawsuit, we will not comment on the suit and the temporary restraining order,'' Harrison said.

The order, issued last Friday in New York, will remain in effect until a hearing there on May 22, when GE will seek a preliminary injunction

against MTU.

An injunction would postpone any further business deals between MTU and Pratt & Whitney until the lawsuit is settled.

That would be a setback to the broad MTU-Pratt & Whitney partnership envisioned in March, when United Technologies Corp. and MTU parent Daimler-Benz, of Stuttgart, announced a collaboration agreement.

The restraining offer now in effect also prevents MTU from entering into a non-GE venture to build a jet engine with more than 50,000 pounds thrust, which would power large passenger jets.

#90130u1994 05/10/1990 ~United Press International

SACRAMENTO, CA (MAY 10) UPI - A jailhouse informant testified Thursday that mass murder suspect Dorothea Puente admitted killing several of her elderly boarders for their Social Security checks.

''She had gotten, in her exact words, a little greedy,'' said Michelle Crowl, who was in a cell next to Puente at the Sacramento County Jail for three months.

''She said they were killed. She dispensed medication to them, ''Crowl said. ''...There was just a little bit extra medication given to them.

''She told me they (the boarders) were given medication with alcohol. It suppressed their breathing,'' Crowl said at a preliminary hearing to determine whether there is enough evidence for a trial.

Puente, 61, is charged with murdering seven tenants at her midtown Victorian-style boardinghouse by poisoning them and burying their bodies in her yard so she could cash their government benefit checks. She is also accused of two other murders that occurred earlier.

Crowl, who is currently in jail on drug charges, testified that Puente said her tenants trusted her with their money and allowed her to administer medication.

''She was like a mom to them. They trusted her with everything,'' said Crowl, who testified under a bargain with Deputy District Attorney George Williamson. In exchange for the testimony, Williamson will not send Crowl to prison for violating parole.

Defense lawyers did not get a chance to cross-examine Crowl before Municipal Court Judge Gail Ohanesian halted the hearing for a break.

Crowl said Puente also admitted killing Everson Gillmouth, 77, whose body was found by a fisherman on New Year's Day, 1986, in a 6-foot wooden box abandoned on the bank of the Sacramento River. Gillmouth was a former tenant at the boarding house.

Puente was suprised by television reports while in jail that investigators had linked the unsolved 1986 murder to the seven bodies unearthed from the F Street house in November 1988, Crowl testified.

''She told me that that was the first body killed,'' Crowl said. ''She said that she killed him, but Mr. (Ismael) Florez helped take him down to the river.''

Florez, who worked as a handyman for Puente, told police he built the box and helped Puente move it to the river, but denied he knew there was a body inside.

In other testimony, a former inmate who knew Puente for a year while both were imprisoned at the California Institution for Women in Frontera said Puente planned to move to Sacramento when she got out of prison, open a nursing home for the elderly and put drugs in their food to control them.

''She said one way to control people was to use over-the-counter medicine, like eyedrops or Visine ... and you put that medicine in their food,'' said Joan Miller, who was sent to prison for selling securities without a permit. Puente was in prison for drugging and robbing elderly bar patrons and for forgery.

#90130u2002 05/10/1990 ~United Press International

PARIS (MAY 10) UPI - South African President Frederik de Klerk, declaring ''there is no turning back'' his nation's reform of apartheid, began a nine-nation tour of Europe Thursday with an unprecedented meeting with his French counterpart, Francois Mitterrand.

''Just the fact that I met with them shows a recognition of the change under way in South Africa,'' de Klerk told a news conference after an hour of talks with Mitterrand at the Elysee Palace and a separate session with Prime Minister Michel Rocard.

He was welcomed with all the pomp and ceremony befitting a head of state. Republican guards wearing silver breastplates and plumed helmets lined the courtyard of the Elysee Palace as the Socialist Mitterrand came out on to the steps, smiling broadly to welcome the reforming South African politician.

''There is no turning back,'' de Klerk said after his 60-minute meeting. ''South Africa will get a constitution that is fair to all South Africans. It will not be racialist and it cannot be discriminatory in any way.''

De Klerk said he won no promises from Mitterrand on rolling back sanctions against Pretoria but that it would have been unrealistic to expect any unilateral moves in that direction.

''I did not come here with my hat in my hand,'' he said. ''It was my impression that there is a realization that the situation in South Africa

has developed to such an extent that the question of sanctions should be dealt with but that this must be in the European context.''

France has made it clear it will only reduce sanctions in concert with all 12 European Community members.

Mitterrand for his part told de Klerk that France ''only asks to accompany the evolution (in South Africa) that it hopes will be as rapid as possible towards a situation of legal rights,'' Elysee Spokesman Hubert Vedrine said.

After the discussions, Mitterrand strolled out with de Klerk in an unusual gesture of hospitality. The red carpet greeting underlined the importance of what is widely regarded in South Africa as the most important mission abroad by a South African leader in more than four decades of Apartheid rule.

It was the first meeting between a French Socialist President and a South African head of state since the South African Republic was proclaimed in 1961.

African National Congress leader Nelson Mandela said in an interview with France's Europe 1 radio that he had no objection to the warm welcome France gave de Klerk and hinted he himself might run for the South African presidency one day.

Asked if the French attitude was incorrect, Mandela said, ''I do not think so. Our policy of isolation of South Africa is clear. But Mr. de Klerk has started dialogue with credible (ANC) leaders of the country.''

''I am convinced he is a man of integrity.'' Mandela said, playing down the prospect of his eventual candidature for the presidency. ''That does not depend on me but on the ANC and the South African people. I will do what they ask me to do. I would accept any position that the people would confide in me.''

Vedrine said Mandela will meet with Mitterrand June 7.

The French president always has been a fierce opponent of the Apartheid system of racial discrimination. He twice snubbed de Klerk's predecessor, Pieter W. Botha, when that South African leader visited France in 1984 and 1986.

On Friday de Klerk flies to Athens for the second leg of his nine-nation tour.

De Klerk's European tour will seek to capitalize on the successful conclusion of a round of talks last week with the ANC and on positive

international response to recent racial reforms.

The French Foreign Ministry issued a statement saluting de Klerk's ''courage'' earlier this year after he announced the release from prison of Mandela.

But Mitterrand also has made it clear that he expects South Africa to press reforms aimed at dismantling apartheid. Elysee sources said Mitterrand will ''plead in favor of the pursuit of peaceful dialogue that rejects extremists of both camps.''

France's only bilateral sanction against South Africa affects coal trade between the two countries.

In the 1960s and 1970s, France was a leading exporter of arms - especially Mirage jet fighters - to South Africa. But Paris now adheres to the international arms embargo against Pretoria.

France is now South Africa's sixth-largest foreign trade partner, after West Germany, Japan, the United States, Great Britain and Italy. Fruit and uranium for French nuclear plants and bombs are the main South African exports to France, which exports mainly machinery and industrial equipment to South Africa.

De Klerk will visit Britain May 19 for talks with Prime Minister Margaret Thatcher, the European leader thought to be most sympathetic to his position on lifting sanctions. He also will tour West Germany, Switzerland Greece, Portugal, Spain, and two other countries, believed to be Italy and Belgium.

#90130u2031 05/10/1990 ~United Press International

NEW YORK (MAY 10) UPI - A homosexual activist group Tuesday hailed a decision by two women entertainers to refuse to appear on ''Saturday Night Live'' with raw-mouthed comedian Andrew Dice Clay.

In a statement, the Gay & Lesbian Alliance Against Defamation said it ''applauds the decision'' of Nora Dunn, a cast member of the NBC late night show, and singer Sinead O'Connor to stay off the show after it was announced Clay was going to be a host this weekend.

''Clay's continued homophobic and sexist comments are offensive and perpetuate prejudice against gays, lesbians and heterosexual woman, the statement said.

''Moreover, SNL is watched by many young people, and Dice's 'act' only works to reinforce sterotypes and negative images that can lead to violence against minorities,'' it added.

''If SNL is looking for a 'ratings grabber' let them look elsewhere. Dice's brand of humor is worse than offensive - it is dangerous.''

NBC did not respond to specific allegations, saying only that the show would meet the network's own standards. ''The content and performances on all 'Saturday Night Live' telecasts must conform to NBC broadcast standards,'' the network said in a statement. ''This Saturday's program is no exception.''

O'Connor informed NBC through a spokesman Wednesday she would not appear on the same bill as Clay, noted for his explicit and raw sexist and racist jokes.

Earlier in the week, comedian Nora Dunn, a veteran performer on the 15-year-old comedy show, announced she would not perform with Clay on the show.

''I don't want to be associated with him, and I oppose his work,'' the 37-year-old actress said. Dunn has been a regular on the comedy show since the 1985-86 season.

At the time, producer Lorne Michaels, said: ''We're proud of Nora Dunn's statement and her stand on this. But the show will go on.''

An NBC spokesman said O'Connor's decision would not stop the show, either.

Clay recently was cited by Time magazine as part of a new breed of performers who specialize in the humor of shock. His performances have been banned by MTV because of their raunchiness.

In a television interview Wednesday on ''Entertainment Tonight,'' Clay said of Dunn's withdrawal: ''I think she's just doing this because I'm the hottest comic in the country.''

#90130u2042 05/10/1990 ~United Press International

AVIGNON, FRANCE (MAY 10) UPI - A Jewish cemetery in southern France was badly damaged Thursday by vandals who destroyed 34 tombstones and unearthed several coffins, police said.

The vandalism at the Carpentras cemetery, one of the oldest Jewish burial grounds in France, came at a time when racist acts are on the rise in France and caused indignation among the country's religious and political leaders.

''It is not the body of a Jew that has been profaned but the image of mankind that has been striken,'' Joseph Sitruk, the chief rabbi of France, said in a statement.

''A civilization that does not respect the dead eventually destroys the living,'' Sitruk added.

President Francois Mitterrand, calling the action ''a despicable act,'' demanded that those responsible be captured and punished. Prime Minister Michel Rocard expressed horror and indigantion.

The extreme right-wing National Front Party of Jean-Marie Le Pen, whose campaign against immigrants has been blamed by many for creating the current rise in racism in France, also joined the chorus of outrage by saying it condemned the act ''with the greatest vigor'' and called it ''a provocation''

Police believe at least four persons broke into the cemetery in the town of Carpentras north of Marseille in the early Thursday and attacked the tombs.

They said the vandals unearthed a coffin, removed the corpse of an 80-year old man, and impaled the body with a steel-pointed umbrella.

The vandals also attempted without success to remove the body of a woman from one of the coffins they had unearthed.

''Tombstones had been broken, others lifted. Caskets were unearthed, everything was upside down,'' said an unidentified employee of the cemetery. ''It's abominable.''

No messages were left at the cemetery by the vandals and no one has claimed responsibility for the action, according to police.

The Jewish community of Carpentras was particularly shocked by the act because there had been no previous signs of anti-Semitism in the town, which has the oldest synagogue in the country.

The desecration of the cemetery came just two days after anti-semitic inscriptions and portraits of Hitler were found painted on store fronts in Avignon, just southwest of Carpentras.

#90130u2044 05/10/1990 ~United Press International

HYDERABAD, INDIA (MAY 10) UPI - A hurricane dissipated Thursday as it moved inland after leaving at least 63 people dead, about 5 million others without electricity and submerging more than 100 villages in coastal areas of southern India.

Officials said the toll was expected to rise once remote areas cut off by the storm become accessible.

By evening, wind speeds had dropped from 155 mph to about 50 mph, although heavy rains continued to pelt many areas of Andra Pradesh state, said officials in the capital of Hyderabad.

More than 200,000 people had to be evacuated at the height of the storm. Property damage and crop destruction also was widespread. Authorities said smooth evacuation of people in the storm's path saved an unknown number of lives.

The hurricane's center was located near the inland town of Bhadrachalam, about 130 miles north of where it roared out of the Bay of Bengal Wednesday night.

Relief Commissioner C. Arjun Rao told United Press International that meteorologists expected the storm to dissipate totally by Friday morning. ''The hurricane has almost lost its power. It will not cause any more damage. It is all over,'' he said.

Rao said that at least 63 people had died in weather-related incidents. ''By and large, (the fatalities) are all because of wall collapses. Only a few are due to electrocution,'' he said.

Rao said the death toll was certainly higher. He said officials had been unable to communicate with many interior areas and relief teams had not reached several locations to assess casualties and damage.

More than 100 villages and some 351 smaller hamlets were submerged in West Godavari district, said Rao, adding that relief workers would have to be sent to the flooded areas in boats as roads are cut off.

But he added that the number of casualties would have been much higher had the state government not prepared days in advance for the storm, evacuating more than 200,000 people since Tuesday to 450 relief camps set up on high ground.

Authorities also dispatched 400 teams, comprising 2,000 relief workers, in advance of the hurricane and placed hundreds of vehicles at their disposal.

Rao said he expected widespread damage to property and crops, but added that he would be unable to give estimates until relief workers conducted assessments in hard-to-reach locations.

''The electricity supply is badly affected as two thermal power stations in Vijayawada are badly damaged. The areas around Vijayawada are completely under darkness,'' he said.

He said the blackout affected about 5 million people in districts around the city, 150 miles southeast of Hyderabad. Authorities hoped that within ''two or three days,'' alternative power supplies would be arranged.

The central government promised to provide relief to Andhra Pradesh and the neighboring state of Tamil Nadu, both of which were swept for days by heavy rains and high winds preceding the storm.

Large swaths of land and many roads were reported inundated and several villages were flooded by huge tides raised by the hurricane.

Railroad, telecommunications and power supplies were severed in towns and villages, and in the coastal city of Machilipatnam heavy winds and rain collapsed a radar system, officials said.

#90130u2046 05/10/1990 ~United Press International

NEW YORK (MAY 10) UPI - Bearish sentiment battered the dollar for the second day in a row in New York trading Thursday, driving the U.S. unit below the level of 1.63 German marks for the first time in about 29 months.

Currency traders said the dollar recovered in earlier trading from its heavy losses of the previous day, then drifted downward again and was hit by a late flurry of selling orders near the close of the session.

''The last half hour was just wham!'' exclaimed one New York dealer after the dollar's dramatic session-end plunge.

Prevailing Thursday, as the day before, was strong investor interest in the dominant Swiss franc and West German mark on the general presumption that U.S. interest rates are likely to move down. Lower U.S. rates mean less global investor interest in dollar-priced investments.

The tone was set for that view by last week's feeble U.S. unemployment data, and amplified Wednesday when the White House suggested efforts to reduce the budget deficit should be matched by lower interest rates.

''The sentiment is still bearish,'' said Earl Johnson, a foreign exchange vice president with the Harris Trust & Savings Bank in Chicago. Participants are ''convinced U.S. interest rates are going lower,'' he said, adding that success of the Treasury refunding also boded lower rates.

In late New York trading, the dollar changed hands at 1.6290 West German marks, down from 1.6350 marks Wednesday. Traders said the dollar had not gone below 1.63 marks since December 1987. It was quoted at 156.75

Japanese yen, up slightly from 156.50 yen the day before.

Barclays Bank trader David Jaques said the main feature of the day was direct trading between Swiss francs, on an upswing, and Japanese yen, on almost as much of a downtrend as the dollar, in so-called cross-trading.

Another New York trader cited rumors that the late, sharp dollar decline was due to heavy buying of deutsche marks for yen, indirectly pushing down the dollar, the intermediary currency in many such deals.

Dealers intent on riding the dollar-bearish trend apparently were not worried that U.S. government data on retail sales and wholesale inflation, to be released Friday, might hold some surprises.

Other dollar rates: 1.3880 Swiss francs, down from 1.4015; 5.5050 French francs, unchanged; and 1,200 Italian lire, against 1,202.

The British pound firmed to $1.68, up from $1.6785.

In Europe, the dollar closed broadly lower in quiet trading. It moved up in Frankfurt to 1.6415 deutsche marks compared to 1.6380 Wednesday, but fell in Zurich to 1.4010 Swiss francs against 1.4075.

In London the pound closed down at $1.6755 against $1.6790.

''The overall tone is bearish for the dollar,'' said Geoff Earnshaw, deputy of the Strategy Trading Department for the National Westminster Bank.

Optimism that British inflation will not be as bad as expected prevented the pound from losing more ground Thursday, dealers said.

The U.S. unit fell back in Paris, Milan and Brussels to 5.5280 French francs against 5.5370, 1,206.20 Italian lire compared with 1,208.60, and 33.95 Belgian francs against 34.0350.

Earlier in Tokyo, the dollar fell against the Japanese yen on the view that U.S. interest rates will remain stable or decline. The dollar closed at 156.75 yen, down from Wednesday's close of 157.03.

Republic National Bank in New York closed cash gold at $370.25 an ounce, off from $371.75 Wednesday. The New York Commodity Exchange settled spot gold at $370.10 an ounce, down from $371.90. Gold rose in Zurich to $371.50 an ounce from $370.50 Wednesday. London gold rose to $371.75 an ounce from $370.75.

Republic closed cash silver at $5.11 an ounce, up from $5.045. Comex spot silver ended at $5.088 an ounce, up from $5.028. Zurich silver moved up to

$5.10 an ounce from $5.07. London silver shot up to $5.10 an ounce from $5.01.

(MAY 10) UPI - Arkansas Governor Bill Clinton is questioning a decision by the Army Corps of Engineers to open dams in Oklahoma, allowing floodwater to flow toward his state. But the commander of the Southwest Division of the Engineers says that if the dams were NOT opened- in his words- ''the water would have been eight feet deeper than it is.'' Floodwaters caused Millions of dollars in damage and forced hundreds of people to evacuate in Arkansas and Texas.

Authorities say at least 57 people are dead and the death toll is expected to climb after a hurricane devastated coastal areas of India's southern Andra Pradesh state. Officials say about five-Million other people are without electricity and property damage and crop destruction is widespread. The storm has almost lost its power, with winds dropping from 155 miles an hour to about 50. But officials say heavy rains continue to pelt many areas of the state.

West Germany's foreign minister is rejecting a Soviet proposal to wait until after German unification to decide whether the united nation could become a member of NATO. Hans-Dietrich Genscher today joined Chancellor Helmut Kohl in rejecting the Soviet plan. However, Genscher says it is in Germany's interest to support Mikhail Gorbachev and NOT work against the Soviet Union.

A report published today in Seattle raises questions about the safety of nuts and bolts used in airplanes world-wide. The report says the aerospace industry's largest supplier of the parts is charged with falsifying and omitting tests on their product. Two V-S-I Corporation managers are expected to file a plea agreement in federal court today.

#90130u2110 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - Rep. Morris Udall, D-Ariz., a 28-year veteran of Congress and chairman of the House Interior Committee, plans to seek one more term and then retire because of his health and other reasons, an aide said Thursday.

Udall, 67, who sought the Democratic nomination for president in 1976, acknowledged several years ago that he suffers from Parkinson's disease, an often fatal degenerative brain disorder.

''Parkinson's is a factor,'' Matt James, the congressman's administrative assistant, said. ''But there are a lot of other factors that weigh in on his decision, and there are a lot other things Mo wants to do other than the grind of Congress, once he has his major agenda items completed.''

The Arizona Democrat, known as a master storyteller with a keen sense of humor, is considering writing a fourth book and has been offered numerous jobs in business and teaching, James said.

Udall first disclosed his decision in an interview earlier this week in the Phoenix Gazette.

He plans to seek one more term in office - his fifteenth - and retire at the end of 1992, giving him time to see through some last legislative initiatives, James said.

Udall is one of the House members who, if they retire before January 1993, can convert their campaign money to personal use.

Udall was first elected to Congress in 1961 to fill the seat vacated by his brother, Stewart, who was named interior secretary by President Kennedy.

As chairman of the House Interior and Insular Affairs Committee since 1977 Udall has played a key role in shaping legislation governing the management of land, water and natural resources on federal lands.

In 1976, Udall sought the Democratic presidential nomination and ran up a string of second place finishes. But he failed to win a single primary, finishing second in delegate strength to Jimmy Carter and finally bowed out of the race.

#90130u2147 05/10/1990 ~United Press International
NEW YORK (MAY 10) UPI - Assets of the nation's 508 money market mutual funds decreased $2.22 billion to $383.50 billion for the week ended Wednesday, the Washington-based Investment Company Institute reported Thursday.

The institute said broker-dealer fund assets decreased $854.3 million to $159.84 billion, assets of general purpose funds decreased $531.6 million to $132.17 billion and institutional fund assets decreased $831.2 million to $91.48 billion.

''Yields on money market funds changed very little during the week and the yield differential favoring money market funds over competing instruments available to individual investors barely changed,'' said Jacob Dreyer, vice president and chief economist at the institute.

''But yields on direct money market instruments were quite volatile. These changing relationships among yields might have prompted money managers, as well as individuals, to engage in asset shuffling.''

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization, of Holliston, Mass., said Wednesday average seven-day simple yields were at 7.66 percent, down from 7.67 percent in the previous week, and 30-day simple yields were unchanged at 7.68 percent.

The average maturity of fund portfolios was unchanged at 44 days.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money market deposit accounts, 6.06 percent, unchanged; Super-Now accounts, 4.99 percent, down from 5.0; six-month certificates of deposit, 7.80, up from 7.78; one-year CDs, 7.92 percent, up from 7.87; 2 1/2-year CDs, 7.94 percent, up from 7.90; and five-year CDs, 7.97 percent, up from 7.94.

The average rate for a one-year adjustable-rate mortgage was 8.67 percent, up from 8.66.

Average rates on 15- and 30-year fixed-rate mortgages moved down in the latest week, to 10.24 percent and 10.41 percent, respectively. Corresponding rates were 10.25 percent and 10.45 percent a week earlier.

The average rate for a four-year automobile loan was unchanged at 12.24 percent.

#90130u2152 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - The Senate approved compromise legislation Thursday that authorizes funds for Amtrak and gives the Interstate Commerce Commission the power to prevent railraod takeovers if they threaten harm employees or service.

The bill, worked out by Senate-House negotiators, was approved by voice vote in the Senate. It still must be approved by the House.

The bill authorizes $684 million for fiscal 1991 and $712 million for fiscal 1992.

The House included in its bill the new powers for the ICC to prevent acquisition of railroads by companies not involved in the railroad

business. The ICC already has the authority oversee mergers.

Transportation Secretary Samuel Skinner said he would recommend President Bush veto the bill because it contained the ICC language and because the authorizations are too high.

In his 1991 budget, Bush asked for no money for Amtrak, the national rail passenger service.

#90130u2153 05/10/1990 ~United Press International

NEW YORK (MAY 10) UPI - Stocks closed slightly higher in moderate trading Thursday, bolstered by news of healthy demand for the new 30-year bonds auctioned in the final leg of the Treasury's quarterly refunding.

The Dow Jones industrial average, which lost 0.68 Wednesday, added 5.63 to close at 2738.51.

Among broader market gauges, the New York Stock Exchange composite index rose 0.65 to 188.14 and Standard & Poor's 500-stock index added 0.96 to close at 343.82. The price of an average share rose 12 cents.

Advances led declines 839-597 among the 1,956 issues crossing the NYSE tape. Big Board volume totaled 158,460,000 shares, compared with 152,220,000 shares traded Wednesday.

The Treasury Department wrapped up its quarterly refunding Thursday with the auction of $10 billion in 30-year bonds at an average yield of 8.84 percent.

The yield was the highest since 9.11 percent on May 5, 1989, and higher than the last refunding Feb. 8, when the bonds yielded 8.5 percent. The total amount of bids received was $19.95 billion.

The $30.5 billion proceeds of the three-day refunding will pay for the bailout of the thrift industry, settle securities reaching maturity and raise new cash for the government.

The yield was within, if not better than, expectations, analysts said, meaning that rates did not have to rise sharply to attract investors.

''The market was receptive to the auction,'' said Jeff Kaminsky, head of institutional sales trading at Mabon, Nugent & Co., despite a slight pullback in the Dow late in the session. ''For many it was confirmation that rates have peaked and now have settled back to comfortable levels.''

He said Wall Street had feared that rates would go higher, that the

economy would slow and that inflation would become a concern.

''But for many this is a signal that it's okay to jump back into the water '' Kaminsky said. ''There's no wild buying, no terrific volume, but we've drawn in some who were out of the market for fear of higher rates.''

The market is also setting its sights on Friday's producer price data, hoping that it will provide evidence of an easing of upward pressure on prices. First-quarter economic reports had signaled a pickup in inflation.

Economists expect the producer price index to have risen by 0.2 percent last month and by 0.3 percent if often volatile food and energy prices are excluded.

On the trading floor, Kemper was the most active issue, up 3/8 to 35 1/2.

General Electric followed, up 1/2 to 67 1/4. Eastman Kodak was third, up 1 to 39 1/8 after saying Wednesday it expects improved sales and earnings this year.

Also active were Georgia Gulf, up 5/8 to 7 after an analyst's recommendation and SmithKline Beecham, rallying 2 to 39 3/4 after analysts termed first-quarter results reported Wednesday ''encouraging.''

Other stocks benefiting from analysts' recommendations included Motorola, up 2 to 74 5/8, and Prime Motor Inns, up 1 to 10.

Among the other blue chips, AT&T rose 5/8 to 41 1/4, IBM jumped 1 1/8 to 112 3/8 in active trading but Westinghouse slid 2 to 72 after what was said to be a ''lackluster'' presentation by the company's president at a meeting with analysts Tuesday.

Elsewhere, ITT surged 2 to 54 3/4 after reportedly indicating that it was willing to discuss the sale of its stake in Alcatel with the giant French electronics manufacturer that owns the rest.

And Shaw Industries sank 1 1/2 to 28 3/4 after two brokerages were said to cut their earnings forecasts for the current quarter.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 196,254,320 shares, compared with 183,604,850 shares traded Wednesday.

Prices closed higher in moderate trading on the American Stock Exchange.

The Amex Market Value index rose 0.39 to close at 348.92. The price of an average share gained 1 cent. Advances led declines 284-254 among the 815 issues traded. Composite volume totaled 15,559,500 shares, compared with

16,392,775 traded Wednesday.

B.A.T Industries led the Amex issues, down 1/16 to 11 7/16 after announcing details of the spinoff of its paper unit. Shareholders will get one share of the paper unit for every three B.A.T shares they own, reports said.

The National Association of Securities Dealers composite index rose 1.86 to close at 433.20.

#90130u2163 05/10/1990 ~United Press International

(MAY 10) UPI - Senate Republican leader Robert Dole is sending mixed signals on the budget summit scheduled to begin next week. The Kansas lawmaker is urging his colleagues to keep an open mind to give the negotiations a chance. But at the same time, Dole has appointed Texas Senator Phil Gramm to be his emissary to the talks. Gramm is a rigid, NO-tax conservative.

Michigan Lieutenant Governor Martha Griffiths stunned political observers today by announcing that she will run again, if asked. Democratic party leaders had been quoted earlier as saying the 78-year-old politician was virtually certain to announcement her retirement at the end of her term, ending a 40-year public career. But Griffiths told a Lansing news conference today- ''I am leaving this decision to the governor and the Democratic convention.'' She added- quote- ''I am experienced, I am qualified and I am available.''

#90130u2171 05/10/1990 ~United Press International

KUWAIT (MAY 10) UPI - The Iraqi government said Thursday the electronic device, allegedly capable of triggering a nuclear weapon, that President Saddam Hussein displayed on television last week was imported legally from the United States.

Saddam also displayed a second, similar device that he claimed Iraqi engineers had successfully copied from the American model. Iraq reiterated that it had no intention of using the devices for nuclear purposes, but wanted them for scientific research.

"The condensers displayed by President Saddam Hussein at the Arab conference for solidarity with Iraq on May 5 are of U.S. origin, and were legally imported from the United States in 1988 by the Technical University in Baghdad," a Foreign Ministry spokesman, quoted by state-run Baghdad Radio monitored in neighboring Kuwait, said. "Iraq has no intention of using them for nuclear purposes but for scientific research."

The Iraqi statement appeared to be a reply to a request from the United States that Baghdad clarify Saddam's statement claiming Iraqi engineers successfully copied the U.S. devices.

On Wednesday, U.S. State Department spokesman Richard Boucher said in Washington the United States was seeking urgent clarification of Saddam's claim.

Saddam had told the Arab conference that Iraqi engineers had succeeded in manufacturing similar devices to the six alleged U.S.-made nuclear triggers that British customs impounded in London earlier this year.

But military experts expressed skepticism over the Iraqi claim, pointing out that the devices were highly sensitive and needed to withstand years of exposure to radiation within a nuclear weapon.

Boucher said it was impossible to tell from television pictures whether the alleged Iraqi-made devices were were fully capable military capacitators. "But let me note that we expect Iraq to observe U.S. laws in its commercial dealings with the United States, and we will take whatever action is necessary to ensure our laws are observed," Boucher added.

#90130u2195 05/10/1990 ~United Press International

BUDAPEST, HUNGARY (MAY 10) UPI - The Prince and Princess of Wales wrapped up a four-day trip to Hungary Thursday with meetings with business and religious leaders and a tour of a center for handicapped children.

Prince Charles and Princess Diana boarded a jet for Britain at Budapest's Ferihegy airport, ending the first visit to a Warsaw Pact country by the royal family.

Seeing them off at the airport was acting President Arpad Goncz, who was appointed to his post last week at the inaugural session of Hungary's new, democratically-elected Parliament.

Charles, the highest ranking foreign official to visit Hungary since last month's elections, met early in the week with the leaders of the new government, including Prime Minister-designate Jozsef Antall.

The highlight of the visit was a speech Tuesday at Budapest's University of Economics, where he praised Hungary for its pioneering role in Eastern Europe's reform movement and spoke out against lingering totalitarianism in the Soviet Union.

In his final day in the Hungarian capital, Charles met with Hungarian

religious leaders and invited private businessmen to join the "Prince of Wales Business Leaders' Forum," to improve links with international firms doing business in Hungary. Diana, meanwhile, paid a visit to Budapest's Peto Institute, which treats physically disabled children from around the world.

#90130u2196 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - A scientist vowed Thursday to defy a request to appear before a congressional panel investigating scientific fraud, denying she falsified data supporting a paper co-authored by Nobel Prize winning biologist David Baltimore.

Thereza Imanishi-Kari of Tufts University School of Medicine in Boston said she will not show up for Monday's hearing by the powerful House subcommittee on oversight and investigations.

For the past two years, the panel, chaired by Rep. John Dingell, D-Mich., has been investigating allegations Imanishi-Kari significantly altered or falsified data to suport a paper published in April 1986 in the journal Cell.

The case has attracted widespread attention by focusing attention on the issue of scientific fraud, pitting scientists who fear government intrusion against those who charge the scientific community has failed to police itself.

Imanishi-Kari, who appeared before the committee last May, was asked to testify at a Monday morning hearing at which Secret Service investigators will present further results of their examination of her scientific notebooks. The Secret Service investigated the case at the request of Dingell.

''I would love to go if I had more information,'' Imanishi-Kari said at a news conference.

But the researcher, whose paper described mouse experiments on the genetic control of the immune system, said the reports provided to her by the committee do not contain enough details or state the specific accusations against her.

A subcommittee investigator, who asked not to be named, said: ''There is a question about authenticity of the data in the notebooks.'' Although the committee has the power, it probably will not subpoena Imanishi-Kari to appear Monday, he said.

The Tufts scientist has repeatedly rebuffed requests for private

interviews with congressional staff and National Institutes of Health officials, which are conducting their own probe, the investigator said.

Unlike past hearings where Baltimore appeared along with his lesser known co-author, the congressional committee wanted to talk with Imanishi-Kari alone.

''They are turning the guns on the little guy. This is a far more dangerous threat to science than going after the more prestigious names,'' said Bruce Signal, Imanishi-Kari's lawyer.

When asked by reporters if she ever falsified data, Imanishi-Kari said: ''No.'' The researcher also said: ''All of the experiments were done before 1986.''

On Monday, the Secret Service is expected to expand on allegations that some of the entries purportedly recorded in Imanishi-Kari's notebook in 1984 and 1985 were actually made in the spring of 1986 after the controversial paper had already been published.

In addition, the Secret Service report raises new questions about the dating of tapes produced by radioactive counters - tapes that bear measurements vital to the experiments.

Investigators said their examination shows counter tapes glued into notebook pages dated for February, March and June 1985 ''are not consistent with'' the type style from tapes for experiments performed by other researchers in the same lab around those dates.

Imanishi-Kari said she wants to know exactly what ''not consistent'' means and emphasized that none of the notebook pages called into question by the Secret Service contained data used for the Cell paper.

But the subcommittee investigator said those pages ''certainly'' were used to support the scientist's case after her work was challenged by Margot O'Toole, a former post-doctoral researcher in Imanishi-Kari's lab.

In the past, Imanishi-Kari has admitted that the manner in which she keeps her scientific notes may appear sloppy to others. And Thursday she conceded that dates in her notebooks may indicate either when an experiment began, when the data was actually counted or when the work ended.

''In this type of experiment, my notebook dates are irrelevant. What is relevant is the name of the cell being used,'' she said.

ST. REGIS INDIAN RESERVATION (MAY 10) UPI - Canadian police with the blessing of Mohawk Indians opposed to gambling arrested 21 people Thursday in a pre-dawn raid and seized about $1 million in cocaine and marijuana and a small cache of weapons.

The raids in the city of Cornwall and on Cornwall Island - both on the Canadian side of the sprawling Mohawk reservation near Massena - were carried out primarily by the Ontario Provincial Police and the Royal Canadian Mounted Police.

Ontario Police Sgt. Al Crocker said police had warrants out for 16 others. He said the arrests capped a 14-month investigation dubbed ''Operation Trident.''

Police seized three handguns, six rifles and three assault weapons in the raid, and confiscated narcotics with an estimated street value of $1 million, authorities said.

The Mohawk Bands Council - elected Indian leaders on the Canadian side of the reservation who are unanimously opposed to casino gambling - were quick to laud the raid.

''The good people of Akwesasne have requested action on several occasions at public meetings because it is no secret that massive illicit drug operations have been going on for years,'' said Timothy Thompson, a Bands Council spokesman.

He confirmed the 14-member Akwesasne Mohawk Police Force, funded by the Council, also participated in the raids.

Opponents to casino gambling on the reservation - which remained otherwise quiet 10 days after all-night gun battles killed two Mohawks - immediately pointed fingers at the militant Warrior Society, the self-proclaimed protectors of Mohawk sovereignty funded by the reservation's casino owners.

''It's a demonstration of the activities they are involved in,'' said Salli Benedict, a member of the anti-gambling faction. ''(The warriors) were abusing the border with drugs.''

But Francis Boots, a Warrior Society leader, said his group is not involved in drugs in any way and, in fact, led a War of Drugs program last summer.

''We went and tried to get the people to clean the s-t up,'' Boots said. ''The Warrior Society put together a campaign against drugs. We went to the known drug people on the territory and said it was unacceptable behavior.''

Predictably, Boots blamed the Mohawks' three anti-gambling chiefs for allowing narcotics trafficking to fester on the reservation.

(MAY 10) UPI - Oil prices ended mixed Thursday with U.S. crude returning close to the previous day's level after testing what traders see as the top of the current trading range.

''It was a topsy-turvey day,'' said Kirk Kinnear of the Phibro division of Salomon Brothers, Greenwich, Conn. ''We had a pretty good rally and then gave it all back in the last hour of trading.''

On the New York Mercantile Exchange, the benchmark West Texas Intermediate crude for June delivery settled at $19.02 a barrel, up 3 cents on the day, after trading as high as $19.31 a barrel.

Trading volume was a heavy 96,316 contracts.

''WTI has been selling in the $17.50-$19.50 trading range and we're testing the top of that trading range,'' said Mary Haskins of Paine Webber Inc. in New York.

Traders couldn't agree on what ''fundamentals'' might have been behind the rally and the subsequent selloff.

Among the possible factors mentioned by traders were indications that Saudi Arabia would deliver on promised production cutbacks of crude oil and unfounded rumors of North Sea production problems and U.S. refinery woes.

''It was a combination of factors,'' said Nauman Baraket, first vice president of Shearson Lehman Hutton's International Energy Desk in New York.

Operator Texaco Inc. said it expected to complete repairs and have back on-stream sometime Thursday the pipeline that carries about 95,000 barrels of crude oil daily from 36 oil platforms in the Gulf of Mexico to Louisiana.

A leak in the pipeline Monday helped trigger a runup in WTI prices Tuesday but news that the pipeline would be returning to operation appeared to cause nary a ripple in Thursday's market.

Gasoline prices stalled Thursday after tightness in the U.S. Gulf coast market sent prices there spiraling up 6.8 cents Wednesday.

Unleaded gasoline for June delivery fell 0.29 cent to 63.88 cents a gallon on the Merc, while prompt delivery gasoline gained 0.45 cent to 66.20 cents a gallon on the New York Harbor.

Giving up some of Wednesday's gains, prompt delivery unleaded was quoted at 69.20 cents a gallon on the U.S. Gulf Coast cash market, a drop of 3.8 cents.

Analysts also could not explain why heating oil prices rose with the heating oil season long past.

Heating oil for June delivery rose 0.37 cent to 51.71 cents a gallon on the Merc while prompt delivery contracts were being bid up 0.35 cent to 56.45 cents a gallon on the New York Harbor cash market.

On the U.S. Gulf Coast crude cash market, WTI gained 5 cents to $19 a barrel.

On the European spot market, Britain's widely traded North Sea Brent fell 13 cents to $17.25 a barrel.

The United Arab Emirates' Dubai Light - the key OPEC crude from the Middle East shipped mainly to the Far East - dropped 23 cents to $14.92 a barrel after rising 65 cents Wednesday.

#90130u2257 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - The Soviet Union will harvest 215 million

metric tons of grain this year - its largest crop in 12 years - but still will import huge amounts of foreign grain, the Agriculture Department forecast Thursday.

Analysts said a ''narrowing wheat-corn price spread'' would boost Soviet wheat purchases and lead to a modest reduction in feed grain purchases. Grain imports were projected for 36 million tons, including 15 million tons of wheat and 20 million tons of feed grains.

The Soviet Union became a large-scale grain importer in the 1970s as part of an effort to increase livestock production and improve the diet of its citizens.

Imports during the marketing year ending this June 30 were forecast to total 38 million tons, including 14 million tons of wheat and 23 million tons of feed grains.

A 215 million-ton Soviet crop would mean grain yields at record levels. Soviet grain area was estimated as 112 million hectares, similar to last year, when the harvest totaled 211.1 million tons. A hectare equals 2.47 acres.

It would be the largest crop since 1978's harvest of 237.4 million tons but would be part of a recent string of large crops. In 1986, 1987 and 1989, the harvest exceeded 210 million tons.

A recent report in Pravda indicated fall-planted crops were in above-average condition and that winterkill losses were half of the usual level of 16 percent to 20 percent of the winter grain acreage.

A mild spring has allowed a speedy start to the planting season.

''The Soviet Union's dependence on imported grain is expected to continue heavy in 1990-1991 despite prospects of a slightly larger grain crop this year and the announcement of programs which are intended to increase state grain procurements,'' the Foreign Agricultural Service said.

If wheat prices become more attractive, the Kremlin is likely to buy sizable quantities of wheat for livestock feed, analysts said. However, ''strong demand from the livestock sector is expected to result in another of large (Soviet) corn purchaes.''

''The (United States) will again be the major supplier as competitor supplies are expected to be limited,'' the FAS said.

It said the availability of financing was likely to be a major consideration on where the Soviet Union buys its grain. A slow-down in U.S. purchases early this year sparked concern about Soviet finances.

''The Soviets apparently have taken a number of actions in recent weeks in an attempt to alleviate certain concerns about delayed payments and credit needs,'' the FAS said.

The department said the Soviet crop was likely to include 95 million tons of wheat, 106.5 million tons of feed grains and 13.5 million tons of miscellaneous grains.

Since last Oct. 1, the Soviet Union has purchased 15.6 million tons of U.S. corn and 3.3 million tons of wheat. The Kremlin is the No. 1 customer for U.S. grain.

#90130u2261 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - A federal grand jury Thursday indicted Washington's embattled Mayor Marion Barry for the second time in three months, charging him in six new misdemeanor counts with using and possessing cocaine over the past six years.

Barry is now charged with 10 misdemeanor counts of cocaine possession, three felony counts of perjury and one misdemeanor count of conspiracy to possess and use cocaine and crack. Thursday's 14-count indictment, stemming from an ongoing investigation, also includes eight counts from a Feb. 15 indictment.

If convicted of all counts, Barry could be sentenced to 26 years in prison and fined $1.85 million.

The earlier indictment included the three felony perjury counts and five counts of misdemeanor drug possession, but alleged drug activity dating only back to 1988.

The superseding indictment charged that Barry bought and used cocaine and crack with more than 10 unnamed co-conspirators dating back to 1984, and possessed illegal drugs on many occasions from November 1987 to January 1990.

The conspiracy count, a misdemeanor, charges Barry obtained, possessed and used cocaine and crack with ''more than 10 persons at more than 20 locations including private residences, hotels, government offices and business establishments and on boats, in the District of Columbia and elsewhere, both inside and outside the United States.''

The earlier charges of cocaine possession dealt only with Barry's meeting with former city worker Charles Lewis at a downtown Ramada Inn in December 1988 and his arrest in an FBI sting operation Jan. 18 at a second hotel,

the Vista International.

While the mayor was scheduled to stand trial June 4 on the eight earlier charges, it was not immediately clear whether the new counts would delay the trial.

Barry must be arraigned on the new charges within 14 days. Judy Smith, a spokeswoman for U.S. Attorney Jay Stephens, said the hearing was not expected before next week and said a June 4 trial is still possible. ''We're ready to go,'' she said, adding that the grand jury investigation was not complete.

Barry's lawyer, R. Kenneth Mundy, said he resents the ''lateness'' of the new charges, but said he did not expect to ask for a new trial date. ''We don't want a delay,'' he said.

Barry was touring a senior citizens center when he heard of the new indictment. ''I said earlier I had no comment on this matter,'' he told reporters. ''The proper place is in the courtroom, and I urge you wonderful people to let me go about my business.''

The new indictment said Barry conspired to possess and use cocaine and crack from the fall of 1984 until his Jan. 18 arrest, and that he possessed cocaine in November 1987; on Sept. 7, 1987; on Aug. 26, 1989; on Nov. 7, 1989, and from Jan. 1 through Jan. 18 this year.

''It looks like the prosecutors shook the tree and some more fell out,'' said City Council Chairman David Clarke, a candidate for mayor. ''The indictments just add to the rough situation the city is going through.''

Council member John Ray, another mayoral candidate, said, ''I don't think this is going to change the mayor's view of whether he should resign or run for re-election.''

The three-term Democratic mayor, first elected in 1978, has said he will not announce if he will seek a fourth term in this year's election until after the trial. Under city law, he would be precluded from holding office only if jailed after a felony conviction.

In motions filed Monday in U.S. District Court, Stephens said he has at least a dozen witnesses to testify about drug activity they observed involving the mayor, some of which allegedly took place in the Bahamas and the U.S. Virgin Islands, and others who will claim they saw him use powder cocaine as early as 1984 and crack cocaine as early as 1987.

Stephens also said scientific analysis of a hair sample taken from Barry the night of his arrest contained evidence that he used drugs ''repeatedly'' in the six weeks before his arrest, evidence Stephens said

would refute Barry's claims he was coerced to use drugs in the FBI sting operation.

The grand jury began investigating Barry 16 months ago after a planned police drug raid at the downtown Ramada Inn was aborted when police saw Barry enter the room of Lewis, the subject of the investigation.

Lewis has since been convicted of drug crimes in Washington and the Virgin Islands. He initially told the grand jury he had not used drugs with Barry but later testified he used drugs repeatedly with the mayor at the Ramada Inn on many occasions in December 1988.

Barry testified before the grand on Jan. 19, 1989, and denied seeing Lewis use drugs in Washington and the Virgin Islands, and denied giving drugs to Lewis or receiving drugs from him. That testimony led to the three perjury charges.

Barry, 54, spent seven weeks at in-patient substance abuse treatment facilities in Florida and South Carolina after his arrest. He has acknowledged alcoholism and addiction to prescription drugs, but has never admitted using illegal drugs.

#90130u2306 05/10/1990 ~United Press International

LOS ANGELES (MAY 11) UPI - Energy giant Unocal Corp. said Thursday that it has received a strong response to the company's two-week-old offer to buy 7,000 pre-1971 cars for $700 each as a smog-cutting measure.

Since announcing the plan April 26, Unocal has made more than 2,500 appointments to accept the cars from owners. Unocal, based in Los Angeles, will begin buying the cars in June.

The company is introducing the $5 million car-buying offer to take the older cars off the road since they emit pollutants at levels 15 to 30 times those of new cars.

The South Coast Recycled Auto Program is designed to remove 6 million pounds of pollutants per year from the Los Angeles Basin, which contains

some of the nation's dirtiest air.

Richard J. Stegemeier, Unocal's chairman, chief executive officer and president, said the response by potential sellers to a toll-free telephone number had been greater than expected and required the installation of additional phone lines.

''We were swamped with calls,'' he said. ''We couldn't answer the phones fast enough. We're well on our way to reaching the 7,000-car mark.''

Other parts of Unocal's smog-cutting plans for the Los Angeles area include a $5 million program offering free smog checks and tune-ups to owners of pre-1975 cars and a patrol in which emergency vehicles will offer free services to motorists in stalled cars.

#90130u2322 05/10/1990 ~United Press International

WELKOM, SOUTH AFRICA (MAY 10) UPI - The government tried to defuse a tense racial conflict Thursday in a conservative gold mining town where blacks are boycotting white-owned businesses to protest the rise of vigilantism.

Surrounded by some of the world's largest gold mines, Welkom shopping areas were virtually deserted by blacks who live in the nearby township of Thabong and withdrew their mighty buying power Monday.

Since two extremist movements began night patrols in March coinciding with a right-wing backlash over President Frederik de Klerk's racial reform initiatives, at least one black has been beaten to death in Welkom. Several others have been assaulted.

Thabong leaders said a black woman driving through Welkom last weekend was grazed in the neck by a bullet fired by a white man in a passing vehicle.

''At the moment business is quite bad,'' said one storekeeper of the boycott.

What finally sent boycott organizers into action was the deployment of extra police in the area whom they said directed their action against Thabong residents and adopted a hands-off policy toward the vigilantes.

Amid a nationwide crime crackdown, police Wednesday night swept through Thabong and briefly detained 2,156 residents. All but two were released, a spokesman said.

''They're bringing more police into our areas than into the white areas,'' said boycott organizer Mbulelo Bungane. ''What we are seeing now is

harassment of our people instead of a crackdown on the vigilantes. The government has a duty to protect the residents of Thabong.''

Searching for an end to the ''confrontational politics'' that have characterzied the country's racial conflict for decades, Law and Order Minister Adriaan Vlok flew to Welkom Thursday to negotiate with Thabong leaders, the extremists and worried local businessmen.

Vlok insisted the local police were ''loyal to the government of the day.'' He denied they had favored the white vigilantes and said allegations that the gunman involved in last Saturday's shooting was a policeman were under investigation.

At the same time, he expressed concern that Welkom may become the flashpoint for a rise in vigilantism across the country.

''The sooner we can stop it where it started the better... before there is the danger of it spreading to other parts of the country,'' he said at a news conference. ''Welkom will be here always and Thabong will be here always. The moment we decide to accept that fact we can try to work out something to live in peace.''

After a day of meetings, one extremist group, the Blanke Veiligheid (White Security), agreed to a three-month suspension of its vigilante patrols at Vlok's request.

''We are law-abiding citizens,'' said the group's leader, Hennie Muller, a burly 43-year-old businessman who runs an auto body shop and blames all the assaults on the local branch of the rival extremist group, the Afrikaner Resistance Movement (AWB).

''Let's see what Mr. Vlok can do,'' Muller said. ''He promised us law and order and he said the boycott will end straight away. Maybe he's right.''

In exchange, Vlok agreed to increase police patrols in Welkom, sending in 30 extra men and 10 extra vehicles and a mounted police unit. At the same time he appealed to Welkom's residents ''to maintain calm.''

Vlok also was scheduled to hold talks with the AWB, whose members are identified by Swastika-like shoulder patches. Six khaki-clad AWB members, some packing pistols, presented a letter to Vlok at Welkom's police station but refused to hold talks until next week.

They left aboard a blue Land Rover with a bumper sticker that read ''If Guns Are Outlawed, How Can We Shoot the Liberals?''

Boycott organizers made no decision to end the protest pending Vlok's talks with the AWB. In the meantime, local businesses fretted over the

loss of customers and hoped for a settlement.

#90130u2325 05/10/1990 ~United Press International

NEW YORK (MAY 10) UPI - The Federal Reserve Board said Thursday that the basic U.S. money supply, narrowly defined under the name of M1, fell $0.3 billion in the latest reporting week. The broader aggregates M2 and M3 also declined.

M2 fell $5.0 billion and M3 dropped $8.4 billion.

M1, which is made up of cash, checking accounts and NOW accounts - money that is available for immediate spending - fell to a seasonally adjusted average of $805.4 billion in the week ended April 30 from a revised $805.7 billion the week before.

Over the latest 13 weeks, M1 averaged $804.4 billion, a 5.8 percent rate of increase from the previous 13 weeks, the Fed reported.

The broader measure of money, M2, averaged an estimated $3,268.7 billion in the latest week, down from a revised $3,273.7 billion. M2 includes M1, plus passbook savings, small time deposits, including money market deposit accounts, consumer money market mutual funds and certain other short-term assets.

M3, which includes M2 plus large time deposits, repurchase agreements longer than one day at banks and thrifts, and institutional money market funds, averaged $4,060.0 billion in the latest week, down from a revised $4,068.4 billion, the Fed said.

#90130u2330 05/10/1990 ~United Press International

LOS ANGELES (MAY 10) UPI - An 11-year-old girl broke down on the witness stand Thursday while being cross-examined in the McMartin Pre-School molestation trial and for a time refused to testify.

Prosecutors said that, after having wrapped up her first day of testimony in Raymond Buckey's retrial Wednesday, the girl told her parents she not want to return to court. But after talking it over with her parents and prosecutors, she decided to complete her testimony.

But soon after the proceedings resumed Thursday, the child complained of a stomach ache while being cross-examined by defense lawyer Danny Davis. The judge then ordered a short recess.

The child was taken to the office of Deputy District Attorney Pam Ferrero,

where she broke down and cried for about an hour, the prosecutor said.

She then returned to court and retook the witness stand, but shed even more tears and refused to continue testifying. Jurors were not in the courtroom at that time.

Superior Court Judge Stanley Weisberg ordered yet another recess to allow the girl to regain her composure. A short time later, she resumed her testimony. Less than an hour later, she was smiling broadly when Davis completed his questioning.

''She was not enjoying herself,'' Ferrero told reporters later. ''But she could not articulate why she was upset.''

The prosecutor said she had her own theory about why the girl became upset: ''Because the questions bring up memories she's trying to forget.''

Had the child refused to complete her cross-examination, her previous testimony could have been stricken by the judge, leading to the possible dismissal of the two molestation charges concerning her.

That possibility was remote, Ferrero said. ''There's not going to be a mistrial because of her,'' she said. ''She's OK now.''

On Wednesday, the girl testified that Buckey touched her in a manner she did not like. But under cross-examination by Davis, she conceded that she does not remember Buckey performing the sex acts with which he is charged.

Prosecutors contend that Buckey, 31, molested the girl sometime between September 1981 and November 1983, when she was three to five years old.

Buckey is being retried on eight molestation charges stemming from the alleged molestations of the girl and two other girls at the now-closed Virginia McMartin Pre-School in Manhattan Beach from 1979 until 1983.

Buckey and his mother, Peggy McMartin Buckey, 63, were acquitted Jan. 18 at the first McMartin trial of 52 other molestation counts. Jurors at that trial deadlocked on the charges on which Buckey is being retried.

The first trial, which involved the alleged molestations of 11 children, lasted nearly three years and cost taxpayers $13 million, becoming the longest, costliest criminal trial in U.S. history.

#90130u2369 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - NASA engineers began beaming a corrected computer program to the Hubble Space Telescope Thursday to point the giant

observatory in the right direction so it can take its first picture of the universe by next week.

The Space Telescope Science Institute in Baltimore planned to beam the commands for the Goddard Space Flight Center in Greenbelt, Md., for relay to the telescope from 6 p.m. EDT Thursday to 6 a.m. Friday as it orbited Earth 381 miles up.

The correct commands are needed to test the telescope's three fine guidance sensors, which will enable the telescope to locate and lock onto targets with unprecedented accuracy during its 15-year exploration of the universe.

The $1.5 billion telescope is expected to help astronomers gain fundamental new insights into how the universe was formed, the age of the cosmos, how galaxies are structured and perhaps the ultimate fate of the universe.

Equipped with five highly advanced instruments and placed above Earth's obscuring atmosphere, the telescope will enable astronomers to study planets, stars and galaxies in greater detail than ever before.

A math error that occurred when a 1954 star chart was updated had pointed the 12-ton observatory in slightly the wrong direction, spoiling tests of the guidance system this week and delaying the telescope's first picture.

After the new commands are in place, engineers planned to repeat the 36-hour procedure of locating stars and matching what they find with what was anticipated, said David Pine, deputy program manager for the telescope.

A 38-hour process will follow of carefully focusing the telescope's wide field planetary camera, which will take the telescope's historic ''first light'' picture between May 16 and May 18 depending on whether the focusing process needs repeating, Pine said.

''Our expectation is that this photograph should be about equal to a decent terrestrial (Earth-based) observatory,'' said Pine, noting that the camera will not be fully focused when the picture is taken.

The subject of the picture, which is intended as a test and not to produce any new discoveries, will be a 3 billion-year-old star cluster known as NGC 3532, about 1,500 light years from Earth in the constellation Carina.

NASA had hoped to take the picture earlier but problems in the start-up process that began after the telescope was deployed by the crew of the space shuttle Discovery April 25 put the work behind schedule.

Technicians have resolved most of the problems but were still working on

two unusual movements in the telescope, including one that occurs whenever it goes into or out of sunlight.

#90130u2370 05/10/1990 ~United Press International

WASHINGTON (MAY 10) UPI - President Bush said Thursday he plans to nominate John McBryde as a U.S. district judge for the Northern District of Texas, and Paul Niemeyer as a judge on the 4th U.S. Circuit Court of Appeals in Richmond, Va.

Bush also said he intends to nominate Frederick Stamp as U.S. district judge for West Virginia, and Charles Pickering as U.S. district judge for the Southern District of Mississippi.

If confirmed by the Senate, McBryde, 58, of Aledo, Texas, would succeed Eldon Mahon, and Niemeyer, 49, of Baltimore, would replace Harrison Winter.

Stamp, 56, of Wheeling, W.Va., and Pickering, 53, of Laurel, Miss., would succeed William Kidd and Walter Nixon, respectively.

McBryde has served as a partner with the law firm of McBryde and Bennett in Fort Worth, Texas, since 1969. He is a 1953 graduate of the University of Texas, and a 1956 graduate of Texas School of Law.

Niemeyer has served as a U.S. district judge in Maryland since 1988. He graduated from Kenyon College in 1962, and from the University of Notre Dame Law School in 1966.

Since 1960, Stamp has served as an associate, and then as a partner, with the law firm of Schrader, Stamp, Byrd and Companion in Wheeling, W.Va. He was a member of the West Virginia House of Delegates from 1966 to 1970.

Pickering has served as a partner with the law firm of Pickering, Williamson and Walters in Laurel, Miss., since 1981. He was a state senator from 1972 to 1980.

#90130u2432 05/10/1990 ~United Press International

SAN DIEGO (MAY 10) UPI - Former president Gerald Ford Thursday criticized American tuna canners for their recent decision to purchase only ''dolphin-safe'' tuna and said his family would stop eating tuna to protest the move.

In a letter to the heads of three major American tuna canneries, Ford said their stance would put American tuna fleets out of business.

''I am sad and angry at the action of StarKist, Chicken of the Sea and Bumble Bee. This decision will very likely wipe out the U.S. domestic tuna fishing industry,'' Ford wrote.

''Your decision means that you will buy tuna from foreign sources where there is no monitoring of the dolphin kill. At the same time, you will refuse to buy tuna from the U.S. fishermen who are dolphin monitored and who have made great progress in significantly reducing the dolphin loss,'' Ford wrote.

The canners and environmental groups that organized the ''dolphin-safe'' campaign said Ford was misinformed.

''President Ford should get his facts straight,'' said Brenda Killian, associate director of Earth Island Institutes' Save the Dolphins Project.

''Foreign boats don't have a competitive advantage because they have to obey the rules, too. The United States is their most important market and they want to keep their customers here,'' said Killian.

About one-third of foreign tuna boats, like most American tuna boats, carry observers who make sure the vessels do not harm dolphins, Killian added.

Dan Sullivan, president of Bumble Bee in San Diego, said, ''There's some confusion about what the facts are on the part of whomever wrote the letter. We won't purchase tuna from U.S. or foreign vessels unless they are certified by observers as being dolphin-safe.''

In April, the three canners, which together process more than 75 percent of all tuna sold in the United States, announced they would stop buying tuna caught using methods that killed dolphin.

Environmentalists have long urged consumers to boycott tuna because the fish are routinely caught in nets that also haul in dolphin swimming above tuna schools.

Ford said he wrote the letter after reading a Los Angeles Times article describing the economic hardship the ban will have on tuna fishermen.

Ford's letter was released by the American Tunaboat Association, a group that has vehemently fought the ''dolphin-safe'' policy. A spokeswoman for the group said the former president is not associated with the tuna industry, nor was he paid for writing the letter.

Ford told the canners his family, which has always enjoyed eating tuna, would mount their own boycott as a show of support for domestic tuna fleets.

''Presumably, you will pick up some customers who can now enjoy your tuna caught by foreign fisherman, where there is no control over the dolphin kill,'' Ford wrote.

(MAY 10) UPI - Officials say Lake Livingston in southwest Texas may be facing one of the worst floods this century. The concern came as cresting floodwaters in Arkansas and Texas headed south, leaving behind hundreds of evacuees and Millions of dollars in damages to homes and crops. Crews filled sandbags in both states to help brace levees along the Arkansas, Red and Trinity rivers.

Residents in eastern Wisconsin are digging out from under several inches of heavy, wet snow dumped on the area by a surprise spring storm. Six inches of snow fell on the town of Hartford, about 20 miles northwest of Milwaukee... prompting officials to declare a state of emergency and close businesses and many schools. Traffic on highways in Waukesha County was at a virtual standstill. Officials say 21 snowplows were called out in Waukesha, which had more than six inches.

In California, strong winds raked the drought-parched farmland on the west side of the San Joaquin Valley for the second day today. Dust storms nearly obliterated Highway 41, forcing its closure. Officials say the winds gusted as high as 50 miles an hour at times and sent a plume of dust as high as 100 feet into the air in the Kettleman City area yesterday.

West Germany's foreign minister says a unified Germany should be free from limits on its sovereignty and have the right to join NATO, even if Soviet troops remain for a transition period in what is now East Germany. In a report to Parliament today, Foreign Minister Hans-Dietrich Genscher rejected a Soviet proposal to wait until after German unification to decide whether a united Germany can become a member of NATO.

Britain's ruling Conservative Party is squabbling over Prime Minister Thatcher's controversial poll tax plan. A main rival of Thatcher says in a newspaper editorial today that the tax is seen as unfair and could cost the party the next election. Michael Heseltine says the community charge should be graded by income, rather than the flat fee mandated by Thatcher.

#90130u2447 05/10/1990 ~United Press International

SMYRNA, Tenn. (MAY 11) UPI - Officials at Nissan Motor Manufacturing Corp. U.S.A. said Thursday they have no problem with a federal inquiry to determine if Japanese automakers in the United States favor Japanese

suppliers over others.

The Federal Trade Commission announced this week plans to investigate certain business practices by foreign automakers, including Nissan, with U.S. operations. The probe was requested by the House Judiciary and Senate Commerce Committee.

The FTC will in particular look at ownership of interests, supply contracts, and any evidence of discriminatory pricing to see if such practices exclude or limit the ability of U.S. firms to compete effectively.

''As it relates to our company, (the investigation) will not turn up anything,'' said Bob Taylor, director of purchasing at Nissan's Smyrna manufacturing plant. ''I can't speak about how other companies do business but that's not the way we do ours.''

FTC officials said they will investigate allegations that the Japanese ''keiretsu'' system of automobile cross-ownership of Japanese autoparts suppliers may now be occurring in the United States.

Keiretsu is defined as an intermixing of companies through equity exchanges, intra-group financial commitments, joint research efforts, and memberships in exclusive councils or clubs.

In the auto industry, these relationships are usually between manufacturers and their suppliers.

Taylor said he was not sure what percentage of Nissan suppliers are Japanese companies. ''As far as our suppliers go, we don't really track them by who owns them,'' he said. ''We track them based on their capability, not who owns the company.''

''Without a lot of research, it would be very difficult to know who owns the company we deal with,'' Taylor added. ''We buy tires from General Tire and they are owned by the Germans. We buy tires from Firestone Tire, and they are owned by the Japanese.''

#90130u2575 05/10/1990 ~United Press International

MOSCOW (MAY 10) UPI - Dizzy Gillespie treated a Moscow audience Thursday night to nearly three hours of the finest American jazz in his first Soviet appearance ever and was rewarded with bouquets after nearly every number.

The 72-year-old trumpeter, born John Birks Gillespie the year of the 1917 Bolshevik Revolution, said he had always dreamed of playing in the Soviet Union but never had the chance.

''This happens to be the culmination of all my expectations,'' Gillespie told the audience at the Rossiya Hotel concert hall.

Muscovites packed the 2,500 seats of the hall, spilled out into the aisles and along the walls and crowded in front of the stage to hear the American jazz master with the trademark bulging cheeks and turned-up trumpet. Dozens who lacked the connections to get inside literally pressed their noses against the glass doors outside the hall.

The Soviet audience seemed to thoroughly enjoy the show. Fans brought flowers onto the stage after nearly every number. The crowd roared its appreciation after solos and when Gillespie took breaks from the trumpet to dance or sing ''scat.''

''I never thought I'd see so many flowers at once in my lifetime,'' Gillespie said.

The concert was part of a three-show tour that included a stop in Berlin and was to continue in Prague.

The ''One World'' tour was organized by the Baha'i International religious faith, of which Gillespie is a member. Organizers said its main purpose was primarily to bring the joy of jazz to Eastern Europe and the Soviet Union and not to make money.

''More than any other art form, jazz exemplifies those high ideals of freedom and democracy,'' Gillespie said before the concert. ''Jazz transcends political ideologies - from the United States to the Soviet Union. ... Jazz brings people together.''

Gillespie and his group - Ignacio Berroa on drums, Ed Cherry on guitar, Giovanni Hidalgo playing percussion, Ron Holloway on saxaphone and John Lee on bass - played a selection of old and new compositions by Gillespie and his band as well as classics from such legends as the late Thelonious Monk.

Cuban horn player and band leader Paquito de Riviera joined Gillespie and his sextet for many of their numbers, and Soviet jazz musicians came on stage for an extended jam session at the end of the show.

Gillespie has played for nearly every American president since Eisenhower and has appeared around the world - often on goodwill tours at the request of the U.S. State Department - since he and Charlie Parker led the ''bop'' movement in jazz in the 1940s.

He played in 26 countries last year alone and recently performed at the Namibian independence ceremonies, but the current tour is his first in the Eastern bloc.

#90130u2608 05/10/1990 ~United Press International

MINNEAPOLIS (MAY 11) UPI - Honeywell Inc. shareholders rejected a proposal that the company prepare a written report on its involvement with strategic defense programs.

The proposal was offered Wednesday at the annual meeting by the Interfaith Center on Corporate Responsibility but only 4.28 percent of the shares represented at the meeting were voted for it.

Company officials opposed the proposal, saying, ''It is political and ideological in nature.''

Also, they said, the company ''cannot determine U.S. defense policy, which is the responsibility of elected government representatives.''

Earlier this year company officials said they were considering selling off the defense contract division but a spokesperson said the issue was not discussed at the meeting.

She said a proposal on a possible spinoff is still being considered and will be offered to the board of directors later this year.

In other action, the shareholders rejected a proposal to submit to a shareholder vote the company's shareholder rights plan, which is designed to protect shareholders in a takeover bid.

The plan encourages an interested buyer to negotiate with the board.

The proposal, supported by 35.4 percent of the shares, was opposed by the company, which said the repeal would deprive the board of an important legal measure that empowers the board to act in the best interest of the company and it shareholders.

Also rejected was a proposal from the New York City Employees' Retirement System for a method of keeping confidential all shareholder proxies, ballots and voting tabulations,

#90130u2617 05/10/1990 ~United Press International

(MAY 10) UPI - A report provides details on Washington, D-C, Mayor Marion Barry's activities on the night he was arrested on drug charges in January. Among other things, Barry is alleged to have given a woman who acted as an F-B-I informant 30 dollars to buy crack cocaine.

Floodwaters in Arkansas and Texas moved southward today, leaving behind hundreds of damaged homes. Authorities say the damage could have been worse, but some are questioning flood-management policies of the Army Corps of Engineers. The Red River near Texarkana, Texas, has crested, but officials say sand-bagged areas appear to be holding.

Parts of Wisconsin are cleaning up from a surprise snowstorm today that left some areas blanketed with seven inches of snow. Waukesha County was the hardest hit, with more than 100 power lines down. A county sheriff's dispatcher is advising people to stay off the roads until snow, fallen branches and live electrical wires can be cleared.

In India, at least 57 people are dead following a hurricane that blew through the southern coastal area of Andra Pradesh state. About five-Million people are without electric power and more than 200-thousand had to be evacuated from their homes. Officials say advance preparation for the storm's arrival saved many lives.

Federal health officials at the Centers for Disease Control in Atlanta say more Americans than ever are watching their cholesterol. But, they add that more than 75 percent of adults with high cholesterol levels are NOT aware of the problem. Too much of the artery-clogging substance can lead to an increaed risk of heart disease.

#90130u2626 05/10/1990 ~United Press International

BOSTON (MAY 11) UPI - Standard & Poor's Corp., a major rating agency, Thursday predicted creditors of the troubled Bank of New England Corp. will likely lose money on their investments in the banking company.

''It is likely that bank holding company creditors will suffer losses,'' S&P said in lowering the company's long-term debt ratings.

The agency also lowered ratings on certificates of deposit and letter of credit-backed issues of Bank of New England's two biggest subsidiary banks the Bank of New England in Boston and the Connecticut Bank & Trust Co. in Hartford.

In separate announcements, S&P lowered on some long-term debt rating of both Bank of New England and Bank of Boston Corp., two of the region's biggest bank holding companies. Both have been hard-hit by a faltering real estate market.

However, Bank of Boston's debt remained above minimum investment grade levels and was not included in the prediction of losses.

About $675 million of Bank of New England Corp. debt is involved.

The company's senior debt was downgraded to a CCC rating from B+ and its subordinated debt fell to CC from B-.

Bank of Boston's senior debt was reduced to BBB- from BBB+ and subordinated debt to BB+ from BBB.

About $820 million of Bank of Boston debt was affected.

S&P cited a ''continued deepening of the New England regional real estate recession'' in the Bank of Boston announcement.

S&P analyst Donna Dickert said Bank of New England bond holders are ''at risk of not getting full and timely payment'' of interest on their bonds.

But James Dorsey, a Bank of New England spokesman, said: ''We're planning to make our payments when they're due.''

He also said the company has ''stopped issuing short-term paper and we have not been offering any additional long-term debt.''

Reduced ratings would mean a higher cost of new borrowings for both companies.

In its announcement on Bank of New England, S&P said: ''Given a stringent regulatory environment and general illiquidity of the parent company, it is likely that bank holding company creditors will suffer losses.''

''The bank has made strides in coping with its difficult operating environment, especially in stabilizing its immediate liquidity troubles,

but its viability is dependent on improvement in the region's economy and continued regulatory forbearance,'' S&P said.

Meanwhile, addressing Bank of Boston's situation, S&P cited a ''relatively high-risk loan profile'' and predicted ''lower profitability in future quarters.''

#90130u2640 05/10/1990 ~United Press International

LOS ANGELES (MAY 10) UPI - Actor Kelsey Grammer, a cast member of the ''Cheers'' television comedy, was taken into custody Thursday after showing up in court to respond to an arrest warrant in a drug case.

Van Nuys Municipal Court Judge Aviva Bobb issued the arrrest warrant for Grammer on May 2 after he failed to appear in her court to prove that he was enrolled in a drug rehabilitation program as an alternative to standing trial on cocaine possession.

When Grammer, 35, appeared in court Thursday, Bobb ordered him taken into custody in lieu of $7,500 bail. Grammer was expected to post that bail.

According to court records, Grammer did not enroll in the drug program. Grammer asked Bobb for a second chance to enter the program, but his request was rejected, Deputy District Attorney Andy Diamond said.

Grammer will now face prosecution in the cocaine case. Bobb scheduled a preliminary hearing for May 21.

Grammer then was taken to another Van Nuys courtroom where he had missed two court appearances in a 1987 drunken driving case. Arrest warrants were previously issued for Grammer for those missed appearances as well.

Grammer plays the brainy psychiatrist Frasier Crane in the ''Cheers'' sitcom on NBC.

#90130u2728 05/10/1990 ~United Press International

LOS ANGELES (MAY 10) UPI - Two toxic waste haulers have been indicted for smuggling hazardous material across the border and dumping it in Mexico in the first such case to be prosecuted under federal laws, authorities announced Thursday.

The indictment was the result of a law enforcement crackdown on the disposal of toxic waste by businesses in California that have been secretly shipping it to Mexico in the wake of stricter U.S. environmental regulations and the high cost of lawful hazardous waste disposal.

In announcing the charges, U.S. Attorney Robert Brosio said that an inter-agency task force on environmental crimes has been formed to combat the apparently rampant practice of across-the-border dumping.

''We are actively pursuing the prosecution of individuals responsible for smuggling narcotics into this country,'' Brosio said, ''and we cannot be any less diligent in our efforts to bring to justice those who are smuggling American-produced hazardous waste out of the country.''

The indictments accused two men, Raymond Franco, 57, of El Toro, and David Torres, 39, a Mexican national who resides in Huntington Park, of dumping dozens of drums of hazardous waste on property owned by Torres in Tijuana, Mexico, in the fall of 1988. They were charged with nine counts.

Authorites seized 82 drums of hazardous waste at the site in April 1989, Assistant U.S. Attorney Adam Schiff said. The drums contained paint, flammable solvents and other toxics.

Additionally, Laminating Co. of America, based in Garden Grove, was charged with 47 criminal counts in a separate indictment which alleges Franco had some of the firm's hazardous waste dumped at the Santiago Landfill in the City of Orange, south of Los Angeles, and attempted to have 16 drums shipped to Mexico. Most of that cargo, however, was intercepted by authorities in October 1988.

The charges against Laminated grew out of an investigation of Franco and Torres. A federal grand jury returned both indictments late Wednesday,

marking the first prosecution for across-the-border toxic waste dumping, Brosio said.

Franco, who is licensed to transport and dispose of industrial waste, was arrested late Wednesday in New York City. Authorities expected to arrest Torres later this week.

If convicted, Franco faces a maximum sentence of 32 years in prison and Torres faces a maximum of 27 years. Both could be fined $250,000 for each count on which they are convicted.

District Attorney Ira Reiner said local prosecutors ''knew of Franco before he was arrested'' but referred the case to the U.S. Attorney's Office because stiffer penalities can be assessed for such crimes in federal rather than in state court.

Reiner said hazardous wastes dumped in Mexico by California businesses are ''poisons'' which ''will come back to haunt us.''

''The poisons find their way into the river and ground water that nuture the produce we consume,'' he said. Reiner, a candidate for state attorney general, said he hoped to ''replicate a statewide hazardous waste task force'' if elected.

On Tuesday the EPA announced a new rule, expected to make legal dumping even more costly. It requires more kinds of waste that pose a threat to humans, or the environment, to be treated before dumping in landfills is allowed.

#90130u2864 05/10/1990 ~United Press International

BOSTON (MAY 10) UPI - Procter & Gamble withdrew all of its June advertising from WHDH-TV Thursday, one day after the CBS network affiliate broadcast a peace group's ad urging a boycott of Folgers coffee because it uses beans from El Salvador, the station said.

The loss in revenue from advertising of such P&G products as Head and Shoulders, Spic 'n Span, Bold detergent, White Cloud toilet tissue, Citrus Hill orange juice and Folgers will cost the financially struggling station more than $70,000, said Sy Yanoff, WHDH president and general manager.

He said the station broadcast the 30-second spot urging the Folgers boycott as ''a matter of principle.''

The San Francisco-based group Neighbor to Neighbor is pressing for an end to American aid to El Salvador because of alleged human rights violations by the U.S.-backed government and the continuing civil war with leftist

guerillas.

It has called for a boycott of coffee containing beans grown in the Central American nation in hopes of pressuring the Salvadoran government into negotiating an end to the war. Folgers, the No. 1 coffee roaster in the United States, says only a small percentage of its beans come from El Salvador.

Procter & Gamble's advertising on the station, Boston's Channel 7, averages about $1 million a year, said Yanoff. He said he was not sure how long the cancellation would last.

On Wednesday Procter & Gamble denied that it has threatened to withhold advertising from stations that run the commercial.

''Since we are the only station that has accepted the ad, it could be sending a message to other media across the country,'' Yanoff said.

Yanoff said he did not regret running the commercial, which cost the San Franciso-based peace group Neighbor to Neighbor $900 for two airings.

''This is strictly a matter of principle, if you're going to have any form of integrity,'' Yanoff said.

The group's 30-second spot, narrated by actor Edward Asner, ends with an upside-down coffee mug spilling what appears to be blood as Asner says: ''Boycott Folgers Coffee. What it brews is misery, destruction and death.''

WHDH's broadcasting of the commercial followed ad rejections by stations in other cities, including the major markets of Washington, D.C., Kansas City, Mo., and Cincinnati, the home of Procter & Gamble.

''We don't agree or disagree (with the Folgers boycott ad), but it has the right to be aired,'' Yanoff said. ''I can't believe a major company could take issue with this.

''It is interesting the amount of muscle someone can attempt to garner if they want to,'' the WHDH execitove said. ''This is the greatest amount of pressure on the television station.''

In a statement Wednesday, Procter & Gamble said it might halt Folgers advertising on stations that air the spot because of the atmosphere created by the ad, but did not expect to pull other company products from the advertising docket.

Yanoff said he was given that same message Wednesday in a phone call from P&G media director Jim Van Cleve. But on Thursday, Van Cleve said the wholesale cancellation of P&G June advertising was ordered by the

company's president, according to Yanoff.

''WHDH agreed that every line in this spot was documented and truthful, and I think that Procter & Gamble's retaliation is shameful,'' said Rob Everts, a spokesman for Neighbor to Neighbor. ''I applaud the decision by Channel 7 to run the spot in the face of the threats of an advertising giant like Procter & Gamble.''

Procter & Gamble contends that its Folgers subsidiary is being unfairly singled out by the peace group. Company spokesman Don Tassone said less than 2 percent of Folgers' beans come from El Salvador.

''We feel we are being thrust unfairly into a disagreement between Neighbor to Neighbor and the State Department over our country's foreign policy,'' P&G spokesman Don Tassone said.

#90130u2982 05/10/1990 ~United Press International

(MAY 10) UPI - Crews in Arkansas and Texas continue to battle surging floodwaters... Washington, D-C, Mayor Marion Barry is indicted for the second time in three months... The leaders of France and South Africa hold unprecedented talks in Paris... And the House passes a family and medical leave bill... U-P-I's top news, next.

Arkansas residents near Little Rock and Pine Bluff are trying to dry out from heavy flooding that left nearly 300 homes damaged. Farther south, residents are keeping a close watch on sand-bags as floodwaters move their way.

At Index, Arkansas, north of Texarkana, the Red River has crested, and officials say they expect it to be a ''long, flat crest.''

Arkansas Governor Bill Clinton is questioning whether flood-management policies of the Army Corps of Engineers were correct. The corps opened dams in Hugo, Oklahoma, on the Red River to allow floodwater to move toward Arkansas.

Elsewhere, the eastern two-thirds of Wisconsin is shoveling out from as much as seven inches of snow today. Waukesha County is reporting the most problems with many downed trees and electrical wires.

The snowstorm took everyone by surprise. Officials say crews had to put plows and sanders back on trucks before they could get out to clean the roads.

In India, at least 57 people are dead following a hurricane in the southern coastal region of Andra Pradesh state. About five-Million people

are without electrical power. The hurricane packed winds of 155 miles an hour and forced the evacuation of 200-thousand people.

#90130u3002 05/10/1990 ~United Press International

(MAY 10) UPI - A federal grand jury in Washington, D-C, today indicted Mayor Marion Barry for the second time in three months. Barry is charged with 14 counts involving drugs and perjury.

The indictiment includes eight counts from a February 15th indictment stemming from the mayor's arrest on January 18th at the Vista Hotel, and adds six new misdemeanor charges.

Barry faces 10 misdemeanor charges of cocaine possession, three felony counts of perjury and one misdemeanor count of conspiracy to possess and use cocaine and crack. The new indictment charges that the embattled mayor possessed illegal drugs on numerous occasions from November 1987 to January 1990.

U-S Attorney Jay Stephens says he has at least a dozen witnesses willing to testify about drug activity involving Barry.

A report based on information allegedly obtained from the surveillance tape of the January 18th drug sting was released today. The report says a woman working for the F-B-I called Barry ''chicken'' when he hesitated before putting a crack pipe in his mouth.

The report also says Barry gave informant Rasheeda Moore money to buy crack cocaine.

The defense is expected to use parts of the surveillance tape to support the assertion that Barry was improperly lured into using drugs the night of his arrest.

French President Francois Mitterrand warmly welcomed South African President Frederik de Klerk to Paris today. The French government greeted the South African leader with all the traditional pomp and circumstance bestowed on a visiting head of state.

Mitterrand and De Klerk met for an hour in the first talks between a French Socialist president and a South African head of state since 1961... when the South African Republic first was proclaimed.

After the meeting, French officials said there would be NO lifting of sanctions against the Pretoria government. France has made it clear it only will reduce sanctions along with all 12 European Community member nations.

De Klerk is on a nine-nation tour, widely viewed as the most important mission abroad by a South African leader in more than 40 years of apartheid rule. Tomorrow he travels to Athens, Greece.

#90130u3057 05/10/1990 ~United Press International

(MAY 10) UPI - The House approved a controversial family medical and leave bill today that President Bush has threatened to veto.

Under the measure, firms with more than 50 employees must offer up to 12 weeks in one year of unpaid leave for workers to care for newborns, newly adopted children or a seriously ill child, parent or spouse. During the leave, employees would have job protection and receive company health benefits.

House employees would receive the same benefits, while other federal employees would receive up to 18 weeks in two years for family leave and up to 26 weeks in one year for medical leave.

Backers of the bill call it pro-family and an economic necessity. Opponents claim it takes away business's right to select worker benefits.

The measure won approval on a 237-187 vote.

The White House has reiterated its commitment to budget talks with Congress on a NO-conditions basis.

That pledge came from White House spokesman Marlin Fitzwater today. It also came as a follow-up to comments by White House Chief of Staff John Sununu that appeared to shed some doubt on the administration's NO-conditions stand.

Sununu is reported to have told reporters early yesterday that President Bush is opposed to higher taxes and would adamantly resist them. Later in the day, Bush met with congressional leaders... telling them- quote- ''We will consider every option that comes to the table.''

Bush and the lawmakers are also said to have reached a bi-partisan accord covering negotiations aimed at combating the budget deficit problem.

#90130u3078 05/10/1990 ~United Press International

(MAY 10) UPI - Federal health officials report a mixed public reaction to the cholesterol problem.

They say more people than ever are keeping track of their cholesterol. But more than 75 percent of adult Americans with the artery-clogging substance are unaware of the problem.

A federal Centers for Disease Control report says the proportion of people who have had their blood cholesterol level checked increased from 35 percent in 1983 to to 58 percent in 1988. In addition, the rate of Americans who reported knowing the level of the heart-threatening material in their blood climbed from three percent to 17 percent in the same period.

Health officials say they are pleased that cholesterol awareness has grown. But the officials voice concern that more than three-quarters of the 36 percent of adults with life-threatening levels are unaware of it.

Engineers swarmed over the shuttle Colombia at Cape Canaveral, Florida, today.

They are preparing to replace a faulty cooling system valve in what is described as a ''tricky'' repair job. The problem has delayed the shuttle's launch to around the end of the month.

Columbia and its seven-member crew had been scheduled to lift off next Thursday on a long-awaited Spacelab astronomy mission. But NASA managers decided yesterday to delay the flight and ordered replacement of a valve in one of two coolant ''loops'' that are critical to safe operations in space.

NASA says a target date for the shuttle launch will NOT be set until next week. This will be after engineers have a better idea on how long it will take to do the valve replacement work.

The hope is that this can be done in time for possible blastoff on May 30th.

#90130u3103 05/10/1990 ~United Press International

LOS ANGELES (UPI) - Lyle Alzado Thursday announced he will attempt a comeback next season with the Los Angeles Raiders, the team the 41-year-old defensive end retired from after the 1985 season.

A published report said Alzado has agreed to a series of three 1-year contracts, none of which offer guaranteed money.

''I decided to come out of retirement to help (the Raiders) come back to dominance,'' Alzado said during a news conference at his restaurant. ''It was hard to watch the team dismantle itself and not be what it once was.''

Alzado, who became an actor after his retirement, played 15 NFL seasons and was named to the Pro Bowl in 1977 and 1978. One of the game's most colorful players, he spent seven years with Denver and three with Cleveland before joining the Raiders in 1982.

Alzado, who said he first spoke to Raiders owner Al Davis about returning about a year ago, said personal trainers ''have taken my body and pulled it back in time.''

Los Angeles Coach Art Shell would not rule out the possibility that Alzado could make it back.

''I don't know what to expect from him,'' he said. ''I know one thing: What we'll get out of him is a total effort from a guy who has a lot of pride.

''The guy has played in Pro Bowls and Super Bowls, and there's a positive there. I see him as a positive influence. And don't underestimate a guy like Lyle when he's determined to do something.''

The Raiders signed free agent wide receiver Rod Barksdale, who played with them in 1986 and Dallas in 1987 before suffering a knee injury.

(MAY 10) UPI - Mexican authorities say a plane carrying pilgrims to see Pope John Paul crashed today. A Red Cross spokesman says 29 people died and 12 people survived the crash near an airport about 400 miles southeast of Mexico City.

The United States has recalled Ambassador Alan Green Junior from his post in Bucharest. A State Department spokswoman says the action stems from American concern that the campaign for national elections in Romania on May 20th may be flawed.

A New York federal appeals court today ruled that begging on the subways is NOT a constitutionally protected form of free speech. Calling it ''nothing less than assault,'' the court overturned a January ruling that said people have a First Amendment right to beg.

In Brooklyn, New York, the two juries deciding the fate of the accused triggerman and the ringleader in the Brooklyn racial slaying of Yusuf Hawkins are deliberating for a fourth day.

The Senate Judiciary Commitee says that slightly more than two-Million Americans sre hard-core cocaine addicts. The panel says that's nearly three times the estimate cited by the government in its war on drugs.

Several religious groups have asked the Supreme Court to reconsider a recent decision that freedom of religion does NOT extend to the use of drugs. The court ruled last month that religious freedom does NOT protect those who use drugs as part of religious ceremonies.

A 50-year-old man from Alburquerque, New Mexico, faces up to 20 years in jail for allegedly punching an airline pilot who decided the passenger had too much to drink. The altercation occurred Tuesday night aboard a Continental Airlines flight en route from Denver to Orlando.

Authorities in Portland, Maine, are looking for suspects in an apparent arson fire at a clinic that in the past has been a target of protests by abortion opponents. The fire erupted last night and caused 15-thousand dollars damage.

#90130u3572 05/10/1990 ~United Press International

(MAY 10) UPI - Mexican authorities say 18 people were killed today and 17 others injured in the crash of a passenger plane carrying pilgrims to see Pope John Paul during his visit to Mexico. Officials say 16 people... including a Roman Catholic bishop... are still unaccounted for. The plane went down while attempting to land in southeastern Mexico.

The Senate has voted to allow federal employees and postal workers to

participate in more partisan political activities. The Senate voted 67-30 to approve the Hatch Act Reform Bill... the first revisions since 1939. It opens up some political activities to federal and postal workers when they are NOT working, but continues to prohibit any political activity on the job. President Bush has threatened to veto the bill.

Authorities say levees at Texarkana, Texas, held today as the turbulent Red River crested near the city. Floodwaters from Arkansas and Texas are sweeping southward leaving death and destruction in their wake. Hundreds of people in the two states have been evacuated to safer areas and property damage is estimated in the Millions of dollars. The job of building and strengthening levees continues.

NATO defense ministers agreed today to reduce the number of short-range nuclear missiles in Europe. Meeting at a resort near Calgary, Canada, the ministers named a panel to study the Atlantic Alliance's future needs and to determine the number and types of weapons needed. Defense Secretary Cheney termed a unilateral pullout of NATO's nuclear artillery ''entirely possible.''

(MAY 10) UPI - A federal grand jury has indicted Washington, D-C, Mayor Marion Barry for the second time in three months. It charged him today with 14 counts involving drugs and perjury. The indictment includes eight counts from a February 15th indictment and adds six new misdemeanor counts. The new indictment charges Barry possessed illegal drugs on numerous occasions from November 1987 to January 1990.

Israel's Labor Party leaders have reversed yesterday's decision to enter into coalition talks with the Likud Party. This leaves room for acting Prime Minister Yitzhak Shamir to form a narrow right-wing government. Labor Party members say the Likud has NO intention of pursuing the Mideast peace process. Many criticized their leaders for even considering forming another ''national unity'' coalition with Likud.

#90130u3861 05/10/1990 ~United Press International

(MAY 10) UPI - Arkansas Governor Bill Clinton says flooding across the state has forced 700 to 800 residents to flee their homes as surging waters continue to ravage Arkansas and Texas. Work crews continued to sand-bag levees along southern reaches of the Arkansas, Red and Trinity Rivers today. The Red River crested early today near Texarkana... and officials say the sandbagged levees appear to be holding. Elsewhere, a storm dropped up to seven inches of snow on eastern Wisconsin, closing schools in several cities.

South African President Frederik de Klerk today declared that segregation is ending in his country and there will be ''NO turning back'' on his nation's reform of apartheid. De Klerk spoke to reporters after an hour-long meeting with French President Mitterrand in Paris. The South African leader says he won NO promises from Mitterrand on rolling back sanctions against Pretoria, despite the recent reforms.

The K-G-B contact for spy Kim Philby confirmed for the first time today that there was a ''fifth man'' involved in the best-known espionage ring in Soviet and British history. Philby's K-G-B handler, Yuri Modin, said he ''was personally acquainted with'' the spy. Modin made the comments in a new Soviet-British film made with K-G-B material and shown to reporters in Moscow. Philby headed the Soviet desk of British intelligence in the years after World War Two.

Pan American World Airways has reached a settlement with 250 Scottish families of victims killed or injured on the ground when Flight 103 blew up and crashed in Lockerbie, Scotland. The amount of the settlement was NOT disclosed. But victims' lawyers said the airline was responsive to the claims. Lawsuits are still pending involving the passengers and crew killed in the 1988 terrorist bombing. Crash investigators are to disclose their findings in September.

#90130u3904 05/10/1990 ~United Press International

(MAY 10) UPI - U-S Ambassador Nicholas Platt says he's hopeful exploratory talks opening next week will lead to an extension of leases on U-S military bases in the Philippines. Talks open Monday on the 1947 treaty covering six U-S facilities, including the sprawling Clark Air Base and Subic Bay Naval Base. The treaty expires in September 1991.

In India, the death toll has risen to at least 63 from a hurricane that devastated southern coastal areas. Officials say the toll will go higher once remote areas cut off by the storm become accessible. The hurricane, which packed 155-mile-an-hour winds. dissipated today as it moved inland. It left about five-Million people without electricity and more than 100 villages under water.

The Coast Guard today said a woman jumped from a commercial fishing boat into San Francisco Bay last week to escape from the captain, who beat, shot at and sexually abused her. Investigators say the female crew member swam to a passing boat on Friday. The Coast Guard arrested skipper Paul Batsford at sea and ordered him into Santa Cruz Harbor Tuesday. Officials say a search of his boat turned emeralds and small amounts of marijuana and cocaine.

A defense lawyer says the flamboyant preacher who introduced T-V evangelist Jim Bakker to Jessica Hahn will plead guilty to lying to a federal grand jury. John Wesley Fletcher is to plead guilty to lying about whether he knew he was flying Hahn to Florida in 1980 for sexual services for Bakker. Bakker was estranged from wife Tammy Faye at the time. Fletcher's attorney compared the plea agreement to folding to cut one's losses in poker.

#90130u4212 05/10/1990 ~United Press International

(MAY 10) UPI - Embattled Washington, D-C, Mayor Marion Barry was indicted today on six new drug counts. A federal grand jury returned the second indictment in three months against Barry, charging him with misdemeanor counts of using and possessing cocaine during the past six years. The 14-count indictment stems from an on-going investigation and includes eight counts from a February 15th indictment. If convicted on all counts, Barry could be sentenced to 26 years in prison and fined one-pointMillion dollars.

Police in Caldwell, Idaho, are holding a woman without bond on charges she killed her two-month-old son with an overdose of cocaine to keep him from crying. 22-year-old Maria Reyes faces arraignment tomorrow morning in U-S District Court on a felony charge of causing injury to a child. Officials say lab tests of the baby's blood and urine showed 200 times the lethal dose of cocaine in his body for his size and age.

The Navy today held a memorial service for a young officer hailed as a hero for rescuing others from a deadly fire aboard ship. About 150 people attended the service in Norfolk, Virginia, for Lieutenant Commander Algernon Pope Gordon Junior. A sailor said Gordon rescued one of the 18 sailors injured in Tuesday's boiler room fire on the U-S-S Conyngham. Gordon went back into the smoke and NEVER returned.

The owner of the trademark Barbie and Ken dolls is suing a couple who billed themselves as ''Barbie'' and ''Malibu Ken'' as they practically stripped on a t-v talk show. Mattel Incorporated alleges Michael and Saundra Cherwenka advertised and sold stripping services in flagrant violation of the toymaker's trademark rights. Michael Cherwenka claims he and his wife were just portraying a character, but says he caN'T fight a multi-Million-dollar business like Mattel.

#90130u4381 05/10/1990 ~United Press International

(MAY 10) UPI - White House practices damage control before budget summit... more cocaine charges against Washington's Mayor Barry... House approves family and medical leave bill... and Texas-Arkansas flooding.

U-P-I has it all, next:

Democratic leaders are questioning whether they're getting double-talk from the White House on whether President Bush is willing to consider new taxes in upcoming budget negotiations.

The anger of Democrats in Congress was sparked by published remarks today from White House chief of staff John Sununu. The report said Sununu claimed President Bush would reject any tax hike proposed by congressional negotiators in talks starting Tuesday.

Senate Democratic leader George Mitchell called Sununu's remarks ''UNtrue, UNfair and ill-timed.''

House Speaker Thomas Foley called the incident ''serious,'' saying it could threaten the success of the budget talks.

Sununu today said he only meant tax increases would NOT necessarily be part of any budget agreement.

The White House repeated earlier promises that the president ''will consider every option that comes to the table.'' That stance has drawn fire from Republicans who want Bush to honor his campaign pledge of ''NO new taxes.''

#90130u4409 05/10/1990 ~United Press International

(MAY 10) UPI - Washington, D-C, Mayor Marion Barry isN'T commenting about the latest drug related charges filed against him.

A federal grand jury in the nation's capital today indicted Barry for the second time in three months. The panel charged him with six new misdemeanor counts of using and possessing cocaine over the past six years.

Barry was touring a senior citizens center when he heard of the new indictment and told reporters- ''I said earlier I had NO comment on this matter. The proper place is in the courtroom.''

But his attorney, Kenneth Mundy, said Barry resents the ''lateness'' of the new charges. The indictment comes come less than one month before the mayor is scheduled to stand trial on eight earlier charges, including three felony perjury counts and five counts of misdemeanor drug possession.

Today's superseding 14-count indictment alleges Barry bought and used cocaine and crack with more than 10 UNnamed co-conspirators dating back to 1984, and possessed illegal drugs on many occasions from November 1987 to January 1990.

It's NOT immediately clear whether the new counts will delay Barry's June 4th trial stemming from his arrest in January on drug charges.

If convicted of all counts, Barry could be sentenced to 26 years in prison and fined more than one-point-eight-Million dollars.

Nearly one out of every 100 Americans is a weekly cocaine user. That's according to a report released today by the Senate Judiciary Committee.

The panel says almost two-point-two-Million Americans are hard-core cocaine addicts... a figure much higher than previous estimates of around 850-thousand.

Senate Judiciary Committee Chairman Joseph Biden calls the finding ''as alarming as it is tragic.'' The Delaware Democrat told a news conference that the report suggests- ''that we have a hard-core addict problem that

is far worse than virtually every previous estimate of its scope.''

The report says some states have ''extraordinarily high concentrations of such addicts,'' with New York topping the list with one of every 40 people a hard-core cocaine user.

#90130u4421 05/10/1990 ~United Press International

(MAY 10) UPI - The House today passed a bill to require large companies to provide UNpaid leave for workers to care for newborn or ailing loved ones.

Supporters call the bill pro-family... but opponents argue companies should be able to choose worker benefits.

Representative Henry Hyde separated himself from fellow conservatives and President Bush by supporting the bill. The Illinois Republican said a pregnant working woman needs to have job security and an incentive to have a child rather than abort it.

The House passed the bill 237-187, and the voting was NOT along strict party lines.

The measure would require businesses with more than 50 employees to offer up to 12 weeks in one year of UNpaid leave for workers to care for a child parent or spouse. During the leave, employees would have job protection and receive health benefits.

The General Accounting Office estimates the bill would affect five percent of all employers and 44 percent of all workers. It would cost an estimated five dollars per covered employee.

The Senate has NOT yet acted on the bill. But President Bush has threatened to veto it.

#90130u4429 05/10/1990 ~United Press International

(MAY 10) UPI - Authorities say a plane carrying pilgrims to see Pope John Paul speak crashed in Mexico today, killing 18 people and injuring 17 others.

The bishop of Tapachula, Mexico... who was to take part in ceremonies honoring the pope tomorrow... was among those killed.

Aviacsa Flight 100 had taken off from Tapachula and flown 125 miles to its destination, 400 miles southeast of Mexico City. But an aviation official

told U-P-I the Dutch-made Fokker F-27 lost contract with the radio tower and crashed minutes later less than one mile from the runway.

A government spokesman said the plane had a capacity of 40 and might have been carrying more.

In Chihuahua, the pope addressed 750-thousand followers on the fifth day of his week-long visit to Mexico.

He called for the right of parents to choose religious education for their children. He also called for children's education in sexuality to reduce promiscuity in youth.

The pontiff further chastized parents for practicing artificial birth control, saying it separates husbands and wives from God. And the pope assailed abortion as the killing of children.

#90130u4446 05/10/1990 ~United Press International
(MAY 10) UPI - Pan American World Airways has reached a settlement with 250 families who were in Lockerbie, Scotland, when Pan Am Flight 103 crashed following a terrorist bombing.

The families included victims killed or injured on the ground in the 1988 catastrophe. 11 Lockerbie residents were killed by falling debris and fires triggered by the explosion.

Lawyers for the Scottish victims said the airline was responsive to the claims, but the amount of the settlement was NOT disclosed.

The settlement has NO bearing on lawsuits filed on behalf of the 259 passengers and crew members killed on the flight from London to New York.

Scottish authorities investigating the crash are expected to disclose the results of their probe in September. Lawsuits filed for those on board are on hold pending the release of those findings.

#90130u4732 05/10/1990 ~United Press International

(MAY 10) UPI - Defense Secretary Cheney says the unilateral pullout of NATO's nuclear artillery in Europe is ''entirely possible.'' Cheney's comment comes at the end of a two-day meeting of NATO defense ministers

near Calgary, Canada. The ministers agreed to reduce short-range nuclear weapons in Europe. They called for a study of future nuclear weapons needs. Cheney went beyond that to open the door to getting rid of very short-range nuclear shells.

Israel's foreign minister today protested U-S involvement in formulating a proposed U-N resolution opposing settlement of Soviet Jews in the occupied territories. Israel said it expects the United States to fight Arab attempts to block Jewish immigration. The State Department repeated its position that it favors the emigration of Soviet Jews into Israel, but NOT into areas gained in military conquests, such as the Gaza Strip and West Bank.

Iraq today said the alleged nuclear weapon trigger President Saddam Hussein displayed on television last week was imported legally from the United States. Saddam also displayed a similar device that he claimed Iraqi engineers had successfully copied from the American model. Iraq says it has NO intention of using the devices for nuclear purposes, but wants them for research. U-S officials had asked for clarification of Saddam's claims.

The House today passed a bill to make employers give workers UNpaid time off to attend to ailing family members, newborns, or newly adopted children. Democratic Representative Nita Lowery of New York said workers should NOT be forced to choose between a job and caring for a family member. The bill would only apply to companies with 50 or more workers. It would have to pass the Senate before facing a threatened veto from President Bush.

-30- 1961

#90130u4742 05/10/1990 ~United Press International

(MAY 10) UPI - Authorities in Waynesburg, Kentucky, say a man shot his estranged wife to death today at an elementary school where she worked apparently because she filed for a divorce after 22 years of marriage. State police say 43-year-old Shannon Greer entered the Waynesburg Elementary School office this morning and used a shotgun to kill Glenda Greer. Greer later found dead in an apparent suicide about five miles away.

A kidnapped five-year-old Massachusetts girl has been found UNharmed in Eastpoint, Florida. Authorities found the the girl, identified as Nicole Ravesi of Milford, living in a trailer at a lodge on the Florida panhandle. The owner of a fishing camp recognized her from a television report on the kidnapping and called police. 24-year-old Kenneth Cole, a former baby-sitter, was arrested is in F-B-I custody.

Actor Kelsey Grammer of the hit television comedy ''Cheers'' was taken into custody today after he showed up in court to respond to an arrest

warrant in a drug case. The warrant was issued for Grammer last week after he failed to appear in court to prove he was in a drug treatment program as an alternative to standing trial on cocaine possession. Court records show the 35-year-old actor did NOT enroll in the drug program and now will face prosecution in the case. Grammer plays the brainy psychiatrist Frasier Crane in the ''Cheers'' sitcom.

In Austin, Texas, Paul Cullen faces anywhere from five years to 99 years or life in prison on his conviction for poisoning the historic Treaty Oak in an alleged cult ritural. Defense lawyers today pleaded for leniency in sentencing Cullen. The 46-year-old Stubenville, Ohio, resident was convicted yesterday of second-degree criminal mischief that left most of the tree dead. The Austin landmark, once called the most perfect live oak specimen in North America, is believed to be up to 400 years old.

LONG BEACH, CA (MAY 11) BUSINESS WIRE - Douglas Aircraft Co., a division of McDonnell Douglas Corp., said Friday that it has no plans to close its Long Beach aircraft operations.

Responding to a news report saying the transport aircraft division might close, the company denied that it is being forced to shut down if production doesn't improve. "There is no plan to close Douglas Aircraft," said Mike Brandt, director of communications.

"We have 875 customer commitments for our MD-80 twin-jet series, 346 commitments for our new MD-11 tri-jet, and the C-17 military airlifter is scheduled for first flight in 1991."

Brandt said Douglas has a tremendous opportunity to improve its financial situation. "As stated by our deputy president, John Capellupo, we need to perform to take advantage of these opportunities," said Brandt.

"Mr. Capellupo's reported remarks that Douglas Aircraft might be forced to close were inaccurately paraphrased comments of a deputy president talking to his people about the need for performance and discipline," he said.

SACRAMENTO, CA (MAY 11) BUSINESS WIRE - Aerojet Friday consolidated two Sacramento rocket propulsion units into the Aerojet Propulsion Division and renamed three other divisions.

Roger I. Ramseier, Aerojet's president, said the changes will increase Aerojet's ability to compete in the rapidly changing markets for its aerospace products. Aerojet products are used for national defense and also used in space exploration.

The rocket propulsion consolidation at Sacramento, he added, will mean the elimination of approximately 200 jobs and lower Aerojet's Sacrameno Area employment to about 3,500.

Combined at Sacramento are Aerojet's liquid rocket engine operations, Aerojet TechSystems, and the solid rocket motor operations, Aerojet Solid Propulsion.

Terry M. Jenkins, president of Aerojet TechSystems, will move to Aerojet headquarters to serve as executive vice president for new business development. Richard S. Simonsen, president of Aerojet Solid Propulsion, will be president of the new propulsion division. Both will report to Ramseier.

Aerojet, a leader in the production of rocket propulsion systems, ordnance and electronics, is a segment of GenCorp, a technology-based company with strong positions in aerospace, automotive and related polymer products.

RICHLAND, WA (MAY 11) BUSINESS WIRE - The Westinghouse Hanford Co. of Richland has been named the U.S. Small Business Administration ''Distinguished Prime Contractor of the Year'' for the Pacific Northwest (Region 10).

The award was presented Thursday night (May 10) in Washington D.C. to David K. Quigley, manager of Procurement and Materials for Westinghouse Hanford, during U.S. Small Business Week ceremonies in Washington D.C.

''This award provides recognition for the exemplary efforts of Westinghouse Hanford on behalf of small business subcontractors,'' said Robert J. Moffitt, SBA associate administrator for Procurement Assistance in Washington D.C.

''Westinghouse Hanford's support for small, disadvantaged, minority- and women-owned businesses has been a model program....a real beacon among those 'thousand points of light,' '' said Harold (Hal) Wolf, Seattle, regional administrator for SBA Region 10 (Alaska, Washington, Oregon and Idaho.)

Ten regional winners representing all 50 states received awards at the Washington Hilton and Towers Hotel in Washington D.C.

Westinghouse Hanford is the main operating contractor for the U.S. Department of Energy at the Hanford Site. The company is responsible for waste management, chemical processing, Fast Flux Test Facility, reactor operations, environmental cleanup and restoration, and site support services such as security, fire, transportation, maintenance, utilities and a supplies warehouse of some 10,000 line items.

SALT LAKE CITY (MAY 11) BUSINESS WIRE - Universal Resources Corp., a subsidiary of Questar Corp., Friday announced the purchase of 1.77 million net equivalent barrels of proven oil and gas reserves from Woods Petroleum Corp., a subsidiary of Dallas-based Sunshine Mining Co.

The reserves are predominantly natural gas reserves being produced from wells in western Oklahoma and Texas. Purchase price was approximately $4.50 per NEB.

Universal Resources explores for and produces oil and gas primarily in the Midcontinent region. Universal Resources also offers unregulated gas-acquisition, processing, gathering, compression and marketing of natural gas.

Since January, Questar Corp., through its oil and gas subsidiaries, has purchased about 2 million NEB of proven oil and gas reserves at an average cost of about $5 per NEB. The corporation is in the process of closing on properties that will add an additional 500,000 NEB by the end of the second quarter.

PUEBLO, CO (MAY 11) BUSINESS WIRE - CF&I Steel Corp. (NASDAQ:CFIP) has announced that Richard F. Walker of Boulder, Colo., has been elected to its board of directors.

Walker recently retired as chairman, president and chief executive officer of the Public Service Co. of Colorado after 40 years of service.

A native of Alliance, Neb., Walker received a bachelor of science degree in electrical engineering from Colorado University. He also served in the 75th Infantry Division during World War II.

Currently, Walker is vice chairman of Colorado Trust, a member of the State Board of Social Services, and past chairman of the Denver Chamber of Commerce. He is also a member of the American Nuclear Society, Institute of Electrical and Electronic Engineers, the National Society of Professional Engineers and is on the executive board, North Central Region Boy Scouts of America.

Walker and his wife Marian have four children and five grandchildren and reside in Boulder.

SAN DIEGO (MAY 11) BUSINESS WIRE - David J. Renke has been selected by the board of directors of Star System Inc. to be the network's new chairman, it was announced Friday.

The board of directors also named Robert S. Raye to the post of vice chairman and Joan M. Berry as treasurer.

The network also announced record transaction volume for the first quarter of 1990. STAR SYSTEM switched 27.8 million total transactions in the quarter, as compared with 19.5 million during the same period in 1989.

In addition, STAR SYSTEM processed more than 10 million total transactions in the month of March, the first time that the network exceeded the 10 million-mark. The EXPLORE point-of-sale network also achieved record volume in March, surpassing 1 million transactions.

Total live and committed cards increased nearly 3.8 million during the quarter. At the end of the first quarter of 1990, the network had 63.2 million cards, an increase of 175 percent over the first quarter of 1989.

''With the strong leadership of the board of directors, STAR SYSTEM has achieved record transaction volume and substantial growth in cards during the quarter,'' said Ronald V. Congemi, president. ''I am pleased that our new officers are committed to maintaining the successful strategic course that has enabled STAR SYSTEM to become the nation's leading shared network.''

Renke, a senior vice president with Valley National Bank of Arizona, was previously vice chairman of Star System Inc. Renke has been a board member since 1986.

Raye, a senior vice president with Bank of the West, has served as a member of the board since 1986. Berry, director of operations/loan servicing with HomeFed Bank, has been a board member for three years,

having joined in 1987.

Star System Inc. is the largest regional electronic funds-transfer network in the West, with 480 member financial institutions in Arizona, California Hawaii, Nevada, Oregon and Utah. The network switches more than 10 million ATM and point-of-sale transactions monthly through more than 21,000 ATM and POS terminals.

LOS ANGELES (MAY 11) BUSINESS WIRE - Color Systems Technology Inc. (ASE:CLR) Friday reported a loss for its third fiscal quarter ended March 31, 1990, in part the result of the company's employing substantial resources towards the color conversion of films for its own library.

For the third fiscal quarter ended March 31, 1990, the net loss was $1,433,443, or 24 cents per share, compared with a net loss of $481,721, or 9 cents per share, for the fiscal quarter ended March 31, 1989. Fiscal quarter 1990 results include an extraordinary item of $72,597 in debt concessions as part of the company's debt restructuring program.

Revenues were $1,012,705 in the third fiscal quarter compared with $2,343,424 in last year's comparable period. The weighted average number of common shares outstanding was 5,921,492 vs. 5,390,564.

For the nine months ended March 31, 1990, the net loss declined to

$1,733,386, or 31 cents per share, from a net loss of $2,803,390, or 52 cents per share, for the nine months ended March 31, 1989. The latest nine months results include an extraordinary item of $1,305,083 in debt concessions.

For the nine month period, revenues declined to $6,348,036, from $7,415,305 in the comparable period last year. The weighted average number of common shares outstanding was 5,521,698 vs. 5,390,564.

Buddy Young, president and chief executive officer, stated: ''During the third fiscal quarter, we completed color conversion of 12 films previously in the public domain. All of these films have been retained in the company's library.''

Young further noted that a significant portion of the debt restructuring took place after March 31, 1990, and, therefore, will be reflected in the company's fiscal 1990 year-end statement.

#90131b0122 05/11/1990 ~Business Wire

SUNNYVALE, CA (MAY 11) BUSINESS WIRE - DAVID Systems Friday announced the signing of a contract with the Cornell Information Technologies

organization of Cornell University providing for the purchase and development of up to 8000 nodes of DAVID ExpressNet 10BASE-T Ethernet LAN over the Cornell campus in Ithaca, N.Y.

The equipment involved includes various elements of the DAVID Systems family of 10BASE-T Ethernet Solutions, including DAVID ExpressNet Hubs, Intelligent Concentrators, and the DAVID ExpressView Network Management System, including SNMP. While the network is heavily unshielded twisted-pair wiring, there is also fiber connectivity involved as well.

''To the best of our knowledge, this is the largest single application commitment to 10BASE-T yet,'' Henry R. Nothhaft, president and chief executive officer of DAVID indicated. The deployment will be over a four-year period with a cumulative valuation estimated to exceed multiple millions of dollars.

The award was the result of an extensive RFP process with the DAVID Systems equipment being selected for deployment.

Several years ago Cornell established a ''master plan'' for campus-wide connectivity for voice and data. This plan, being implemented by Cornell Information Technologies, included the concept of providing high-speed data to the campus user community just like regular voice service. Unshielded twisted-pair Ethernet allows Cornell the opportunity to provide high-speed data connectivity as a commodity.

Subscribers to the service will see a line item added to their monthly telephone bill analogous to that for regular voice service. A major concern in providing high-speed data service was the ability to fit into the existing physical plant, so as to be cost effective.

The DAVID ExpressNet Hubs and Intelligent Concentrators fit into the existing environment, such as the wiring closets, and made full use of already deployed wiring with no additional wiring required.

DAVID ExpressView is trademark of DAVID Systems Inc., DAVID ExpressNet is a registered trademark of DAVID Systems Inc.

#90131b0124 05/11/1990 ~Business Wire

BEVERLY HILLS (MAY 11) BUSINESS WIRE - Unity Savings and Loan Association has announced that it sustained a net after-tax loss of $2,288,000 in 1989

compared with a net after-tax profit of $1,419,000 in 1988.

The 1989 loss resulted from the write-down of three commercial loans upon which recovery is doubtful because of the borrower's bankruptcy filing.

Shareholders' equity at year-end 1989 was $15,016,000, all in paid-in capital and retained earnings. Book value per share of fully diluted common stock was $11.92.

The association also announced that at Dec. 31, 1989, it did not comply with the minimum capital requirements imposed by the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA) adopted by Congress in August 1989. The association did meet the tangible capital and core capital requirements, but did not meet the ''risk-based'' standard. As a result, the association filed a Capital Restoration Plan with the Office of Thrift Supervision (OTS) in January, but the Plan has been rejected by the OTS pending certain changes requested by the agency.

Until a Plan is approved, the association is required to operate under certain restrictions placed by the OTS. Among these restrictions are a limit on new loans not to exceed $300,000 on single-family residences, and total association assets may not increase beyond their present level. The association is also restrained from completing development of some of its remaining real estate projects.

Among the Plan changes requested by the OTS are the addition of two outside members to the board of directors and the employment of a career chief executive officer. The association believes that it can comply with the requested changes and that the revised Plan will be approved by the OTS, at which time it anticipates that most, if not all, operating restrictions will be removed.

Unity Savings, with headquarters in Beverly Hills, operates branch offices in Brentwood, Los Angeles, Santa Monica and West Hollywood.

SAN FRANCISCO (MAY 11) BUSINESS WIRE - AT&E Corp. (ASE:ATW), a development stage company, Friday reported that for the first quarter ended March 30, 1990, the company had total revenue of $543,000 and a net loss of $6,698,000, or 66 cents per common share, compared to total revenues of $683,000 and a net loss of $4,214,000, or 43 cents per common share, for the like period in 1989.

The financial results are consistent with planned expenditures related to completing the testing of all elements of the RECEPTOR Personal Communications System (PCS) and to the establishment of a domestic and international organization to support the RECEPTOR PCS in anticipation of commercial introduction.

The RECEPTOR PCS will provide a low-cost, wireless link between standard telephones and subscribers using SEIKO RECEPTOR Message Watches.

#90131b0139 05/11/1990 ~Business Wire

PALO ALTO, CA (MAY 11) BUSINESS WIRE - Varian Associates Inc. Friday announced a substantial restructuring of its senior management organization and the process through which it guides the company's diverse portfolio of businesses.

According to Chairman and Chief Executive Officer J. Tracy O'Rourke, the company will now be managed through three newly established executive vice presidents reporting to him. Allen J. Lauer, Richard M. Levy, and Al D. Wilunowski have been elected to the new positions by Varian's board of directors.

Lauer and Levy move up from posts as senior vice president; Wilunowski was previously a corporate vice president. Each of the three had also held the title of group president which has been discontinued.

The restructuring means significantly broadened management assignments for all three executives who will now share responsibility for key staff functions with O'Rourke, in addition to heading Varian's principal businesses.

"The new management structure is designed to give us a closely integrated top management team that is positioned to deal with the broad strategic and operating issues confronting us," said O'Rourke.

"It provides an ideal framework to launch special actions and initiatives to promote our strengths and focus greater attention on areas needing improvement."

Levy, who has been with Varian for 21 years, will continue to provide active overall leadership for the company's semiconductor equipment businesses.

However, O'Rourke said a new president for semiconductor equipment

operations, who will report to Levy, will be selected in the near future to direct day-to-day operations. Levy will also continue to have overall operating responsibility for Varian's medical equipment and vacuum products businesses.

Under the new structure, Levy will now have lead corporate staff responsibility for the Varian Research Center headed by Corporate Vice President Alan Bennett, as well as for a newly formed corporate marketing function.

The latter, headed by Corporate Vice President Gary Simpson, who has been appointed vice president, marketing, is designed to give greater impetus to Varian's efforts to become a more customer-driven company. Simpson, formerly vice president, corporate communications, will continue to head the firm's public relations and community relations functions.

#90131b0150 05/11/1990 ~Business Wire

TORONTO (MAY 11) BUSINESS WIRE - NHI Nelson Holdings International Ltd. (ASE/ToSE/VcSE:NNH) (''Nelson'') Friday announced financial results (in U.S. dollars) for the first quarter ended Mar. 31, 1990.

Total revenues for the quarter were $18,917,000 compared with $16,355,000 in the first quarter of the previous year. The net loss for the first quarter of 1990 was $3,234,000, or 75 cents per share, compared with a net loss of $4,474,000, or $1.25 per share, in the first quarter of 1989.

The loss applicable to common shares (after taking account of the company's preferred dividend accrual in the first quarter of 1990 and 1989) was 92 cents for the quarter ended Mar. 31, 1990, compared with a loss per share of $1.50 in the same period last year.

The weighted average common shares outstanding for the quarter was 4,334,335 compared with 3,570,065 shares in the same period a year ago.

The company's filmed entertainment division (which includes the company's main operations) reported operating income of $1,309,000 for the first quarter of 1990 as compared with a loss of $1.5 million in 1989.

NVT's revenues also increased, but its first-quarter operating loss of $1,504,000, while declining from previous year levels, more than offset the gain from filmed entertainment, resulting in an operating loss for the company as a whole during the quarter.

NHI Nelson Holdings International Ltd. is the holding company for the

Nelson Entertainment Group whose subsidiaries include: Nelson Films, a film production company; Nelson Entertainment Home Video, a North American home video distributor; Nelson Entertainment International, which markets theatrical, video and television rights outside North America; Nelson Television, a television production company involved in all forms of television production; and for 68 percent-owned Nelson Vending Technology Limited, which currently operates as a videocassette retailer in Toronto utilizing a network of automated dispensing terminals.

KANSAS CITY, MO (MAY 11) BUSINESS WIRE - The Kansas Public Service division of UtiliCorp United (NYSE:UCU) Friday filed a request with the Kansas Corporation Commission to increase natural gas rates by $1.6 million, or 11.1 percent annually.

Kansas Public Service President William C. Salome III said the increase is needed to offset the costs of gas system improvements, increased operations and maintenance costs and other improvements. The average monthly bill of a residential customer using 10,000 cubic feet of gas would increase from $48.31 to $52.80. The division's last rate request was filed in 1985.

Kansas Public Service is replacing unprotected bare steel and cast iron sections of its gas distribution system. Significant gas line replacement expenditures are anticipated in the next five years. Since 1985, Kansas Public Service has invested more than $4.6 million in system improvements.

It is anticipated that a commission hearing on the filing will not be scheduled until this fall. The commission is expected to issue a decision in early 1991.

Kansas Public Service provides natural gas to 22,600 customers in the city of Lawrence, Kan. The University of Kansas is a major customer.

Based in Kansas City, UtiliCorp provides gas and electricity to more than 800,000 customers in eight states. Its divisions are Missouri Public Service, Peoples Natural Gas, Michigan Gas Utilities, West Virginia Power, Northern Minnesota Utilities and Kansas Public Service.

West Kootenay Power in British Columbia is a Canadian subsidiary. UtilCo Group and PSI are non-regulated subsidiaries specializing in utility and energy related enterprises.

ANAHEIM, CA (MAY 11) BUSINESS WIRE - General Automation Inc. (ASE:GA) Friday announced the resignation of John C. Ball from its board of directors.

Ball had served on the board since 1986.

General Automation recently announced revenues for the third quarter ended Mar. 31 of $12 million, and net profits of $475,000, or 5 cents a share. In the prior year third quarter, revenue was $11.4 million with $103,000, or 2 cents a share, in net profits.

General Automation designs and manufactures computer systems for the database-oriented business systems market. Its systems, related applications software and field service capability are distributed through a multinational network of computer marketing and service support companies in the United States, United Kingdom, Europe, Latin America and the South Pacific/East Asia Region (SGA). General Automation's proprietary GA/Maxial Hotel Property Management system presently operates in 14 countries. Annual revenues of the multinational group are approaching $100 million.

DALLAS (MAY 11) BUSINESS WIRE - Sunshine Mining Co. (NYSE) announced a net loss for the first quarter of 1990 of $9.1 million compared to $10.6 million for the first quarter of 1989.

After giving effect to preferred dividend requirements, the company reported a loss applicable to common shares of $.13 per share compared to $.15 per share for the first quarter of 1989.

Production from the Sunshine Mine for the first quarter was 1.3 million ounces of silver, compared to 1.1 million ounces in 1989. Average silver prices were $5.19 per ounce in the first quarter of 1990 compared to $5.93 per ounce in the first quarter or 1989.

The average prices received for oil and gas increased to $20.25 per barrel of oil and $1.72 per thousand cubic feet of natural gas through March 31, 1990, compared to $16.96 per barrel of oil and $1.63 per thousand cubic

feet of natural gas through March 31, 1989. Reduced oil and gas production volumes offset this increase.

Sunshine has a cash balance of $56.0 million and working capital of $61.2 million.

#90131b0230 05/11/1990 ~Business Wire
LOS ANGELES (MAY 11) BUSINESS WIRE - Lee Pharmaceuticals (ASE:LPH) reported its financial results for the second quarter ended March 31, 1990.

The company is engaged in the research, development, purchase, manufacture and marketing of a range of professional dental products and consumer cosmetic products, including nail care products, depilatories, eye care and a feminine hygiene line.

The company reported its second-quarter sales volume, for fiscal- year 1990 which decreased $1,943,000, or 26 percent, to $5,516,000 from $7,459,000 for the comparative quarter.

The company reported a loss of $134,000, or 3 cents loss per share, during the quarter ended March 31, 1990. This compares to reported income of $51,000, or 1 cent income per share, for the quarter ended March 31, 1989.

The company's reported loss was basically attributed to lower-than-projected sales of Lee Sculptured Nails and Lee Nail Care Collection.

The company is optimisitic about the introduction of five new shades: Miss Lee Sizzling Neons. The new shades are Sizzling Pink, Scorching Orange, Shocking Yellow, Screaming Green and Suddenly Fuchsia.

The above items have been received quite well to date. Additional new product launches are scheduled during the balance of fiscal-year 1990. The company anticipates a financial turnaround and expects to report a profit during the second half of the current fiscal year.

BUENA PARK, CA (MAY 11) BUSINESS WIRE - Knott's Berry Farm Foods has announced the launch of Knott's Berry Farm Light, the first nationally

distributed fruit spread to use NutraSweet brand sweetener, a registered trademark of The NutraSweet Company.

Calorie-conscious consumers now will be able to enjoy a fruit spread with the great taste of Knott's traditional jams, jellies and preserves but with only half the calories.

By combining the natural sweetness of fruit with NutraSweet, Knott's Berry Farm Light will have the same superior taste and appearance as their other products, but will contain only eight calories-per-teaspoon with no added sugar.

Knott's Berry Farm Light will initially be available in six flavors, including the company's signature flavor, boysenberry. The flavors are boysenberry, strawberry, apricot and pineapple, blackberry, red raspberry and raspberry and cranberry. Five of these flavors are currently available in Knott's traditional jams, jellies and preserves. Raspberry and cranberry will be an entirely new product flavor.

When the Food and Drug Administration approved this new use for NutraSweet last fall, Knott's research and food technology staff went to work. The company did extensive formulation, sensory testing, taste testing and market research. The research showed that consumers were thrilled to discover that the fruity, sweet, delicious fruit spread they had tasted was fat-free with half the calories of traditional jams, jellies and preserves.

SANTA ANA, CA (MAY 11) BUSINESS WIRE - The board of directors of On-Site Toxic Control Inc., a Colorado corporation, has announced that On-Site has extended the expiration date of the Class A unit warrants to Nov. 30, 1990.

The Class A unit warrants were previously due to expire on May 31, 1990. The Class B warrants are due to expire on Dec. 31, 1990.

The Class A unit warrants were issued along with common stock in an initial public offering completed in December 1987 and are exercisable to purchase one share of common stock and one Class B warrant at $2.50 per Class A unit.

The Class B warrants are exercisable to purchase one share of common stock at $6.25 per share. The warrants are not currently exercisable.

On-Site, through its subsidiary Ultrox International, is in the business

of the on-site destruction by oxidation of toxic substances found in groundwater and industrial wastewater. The toxic compounds are destroyed within the water, so that the legal liabilities associated with transportation, burning and burial can be avoided.

The Ultrox process photochemically eliminates organic contaminants present in streams of liquid by converting them into harmless substances through a patented oxidation process using ultraviolet light, ozone and hydrogen peroxide. Principal customers are major industrial corporations, water utilities and operators of Superfund Site cleanup programs.

OAKLAND, CA (MAY 11) BUSINESS WIRE - HEALS Health Plan of Oakland has accepted a purchase offer from Qual-Med Inc. of Colorado, pending final due diligence examination and approval by appropriate regulatory agencies.

Qual-Med, a Rocky Mountain-based managed care system, owns and operates HMOs in Colorado, New Mexico, Oregon, Washington and Idaho. HEALS was represented in the transaction by Michael Gallagher of Shamrock Investments, a Los Angeles based health care investment banking specialist.

Like HEALS, Qual-Med is a private practice HMO which compensates physician providers on a fee-for-service basis. ''Because Qual-Med's corporate philosophy is similar to our own, we expect a smooth transition period in the months ahead,'' said Woodbury.

HEALS Health Plan began operations in California in 1981 and currently provides health care benefits for approximately 95,000 members.

#90131b0262 05/11/1990 ~Business Wire
LA CROSSE, WI (MAY 11) BUSINESS WIRE - Responding to Stroh President Roger Fridholm's remarks expressing interest in Heileman, G. Heileman President and Chief Operating Officer Murray Cutbush stated Friday that past discussions between Stroh and Heileman did examine the possibility of a merger but those discussions have terminated.

Cutbush further emphasized that no negotiations can take place without the involvement of Heileman's management and its owner - the Bond Corp.

Cutbush explained that ''Heileman has lost all interest and is skeptical of joining with a company that has: an absence of strong senior management, an uncertain direction - changing policy from one day to the next, and an eroding distributor network.''

Cutbush stated that Heileman is on track with its business plan, is currently trading stronger than Stroh and is enjoying strong distributor relations from a supportive wholesaler network. Furthermore, Heileman is currently in the process of restructuring debt with its banks which will put the company on a strong financial basis.

Cutbush concluded that Stroh doesn't have the resources or management for such an acquisition, and their offer may be rhetoric to divert attention from the company's problems. According to Cutbush, any company, including Stroh, is entitled to make an offer for Heileman. However, he remains skeptical Stroh will be able to mount such an offer.

SAN FRANCISCO (MAY 11) BUSINESS WIRE - The annual meeting of shareholders of Western Investment Real Estate Trust (ASE:WIR) was held Friday in the A.P. Giannini Auditorium of the Bank of America Center.

A total of 91 percent of the Trust shareholders were represented in person or by proxy.

O.A. Talmage, James L. Stell and William A. Talmage were re-elected to three-year terms as trustees. O.A. Talmage is president and chief executive officer of the Trust and is one of the company's founders. Stell is the former vice-chairman of Lucky Stores Inc. William A. Talmage is president of DeWolf Realty Co., a San Francisco-based real estate corporation.

KPMG Peat Marwick was appointed as the independent public accountants of the Trust. In addition, certain amendments to the Trust's Trustee Emeritus Program and Death and Disability Program were approved.

Western Investment Real Estate Trust is a self-administered equity real estate investment trust based in San Francisco. The Trust has invested in properties consisting, for the most part, of shopping centers and commercial buildings in Northern and Central California and Nevada.

Founded in 1962, the Trust now has investments in 57 income producing properties, including 35 supermarkets and shopping centers.

ELMSFORD, NY (MAY 11) BUSINESS WIRE - THE COMPUTER FACTORY INC. (NYSE: CFA), Friday reported net losses for the fiscal 1990 second quarter and first-half periods ended March 31, 1990.

Net sales for the second quarter amounted to $87,720,000 as compared to the $94,322,000 reported for the quarter ended March 31, 1989.

The company noted that the decline in sales stemmed primarily from reduced purchasing by its large corporate customers, particularly in the banking and financial fields. The net loss for the fiscal 1990 second quarter amounted to $5,098,000, or 59 cents per share, as compared to the net income of $2,436,000, or 27 cents per share, recorded for the same period in the prior year.

The company completed a major evaluation of its business during this past quarter and recorded a $5,394,000 pre-tax charge against net income. This charge includes an adjustment on inventory now considered to be in less than new condition and a reserve for the potential expenses associated with the closing of underperforming stores.

Net sales for the fiscal 1990 first half amounted to $213,793,000 as compared to the $197,105,000 reported for the previous year's first half. The net loss for the half amounted to $3,095,000, or 36 cents per share, as compared to the $6,414,000, or 72 cents per share, earned in the first half of fiscal 1989. The company further reported that its previously announced corporate restructuring is resulting in lower inventory levels, diminishing debt requirements and tightened controls that are reducing shipping and other selling expenses.

THE COMPUTER FACTORY is engaged in the sale and servicing of personal computers, business computer systems, peripherals and computer software through a nationwide network of company-owned stores.

LOS ANGELES (MAY 11) BUSINESS WIRE - Aura Systems Inc. (NASDAQ:AURA), a world leader in magnetics technology, has received a $50,000 Small Business Innovative Research (SBIR) Phase I award from the U.S. Air Force to design an electromagnetic system to stabilize a telescope in the space shuttle, it was announced Friday by Harry Kurtzman, president of Aura Systems.

Under the terms of the contract, Aura will design an electromagnetically levitated stable platform for isolating a telescope from space shuttle vibration. Inserted in the window of the space shuttle, the telescope is used by astronauts to view objects on Earth and in space.

Aura's electromagnetic technology has been used in other defense and commercial applications, including stabilized state-of-the-art reconnaissance and missle-testing systems, magnetic gimbals and electromagnetic high-force actuators for isolating vibration in submarines automobiles and elevators.

Founded in 1987, Aura Systems is a leader in magnetic suspension technology, electro-optic projection systems and advanced computing systems. The company has headquarters in El Segundo, Calif.

NEW YORK (MAY 11) BUSINESS WIRE - ASARCO Incorporated (NYSE:AR) Friday announced that it acquired Industrias Oxy Metal, S.A. de C.V. (Oxy Metal), a specialty chemicals producer in Mexico City, from Industrias Oxy, S.A. de C.V. for approximately $5 million.

Oxy Metal was a licensee in Mexico of OMI International, which was acquired by Asarco in 1988.

Oxy Metal, which had 1989 sales of approximately $7 million, will operate as Enthone-OMI de Mexico S.A. de C.V., and will be part of Asarco's Enthone-OMI companies, its worldwide specialty chemicals business, which had revenues of $238.0 million in 1989.

Enthone-OMI, headquartered in West Haven, Conn., produces specialty chemicals for electroplating, metal finishing and electronics applications. In addition, Enthone-Rafco, S.A. de C.V., the former licensee for Enthone products in Mexico, will now become a distributor of Enthone-OMI de Mexico.

ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of nonferrous metals, principally copper,

silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services. Asarco had 1989 sales of $2.2 billion.

NEW ORLEANS (MAY 11) BUSINESS WIRE - The Digital Equipment Computer Users Society has conducted a survey on computer industry trends among the 6600 plus attendees at its Spring 1990 Symposium.

This is the second surveying of attendees at the society's bi-annual event.

Thirty-four percent of the attendees answered that 100 percent of the work force in their organizations have a terminal or PC on their desk and showing an increase of 8 percent from the response given in the November 1989, survey.

Also those responding that only 1 percent to 19 percent have PCs or terminals decreased significantly from 13 percent to 2 percent. Over half the respondents spend over six hours per day logged into their systems. There was also an increase in the amount of paper generated from 45 percent to 51 percent, only 19 percent felt it was decreasing, a 5 percent difference.

Trends appeared to remain the same in areas covering Information Technology Spending showing 64 percent of the organizations spending at a rate faster then inflation. Also noted there was a slight downshift in the allocation for personnel. This shift is still so close to portray a trend.

Seventy percent of the responders are users of computer hardware and software, 12 percent are manufacturers of hardware and software. They still remain reasonably satisified with their computer systems operations. In comparing the results from the first survey, the area still showing the most dissatisfaction is in computer security.

Industry standards are still considered much more important then vendor specific standards with a split of 70/30 percent reinforcing the results previously taken showing 67/30 percent split.

The goal of DECUS is to continue to run this survey at its future symposia both in the U.S. and abroad. With over 10 percent of the attendees responding, and the percentages remaining reasonably constant from the first survey, it gives DECUS a base-line standard for comparing future

studies.

The Digital Equipment Computer Users Society is the world's largest computer users society that focuses on a single vendor. DECUS is a volunteer, not from profit society open to anyone with a bonafied interest in DECUS and the use of Digital Equipment Corp. products. Its purpose is the exchange of information-processing-related information among users of Digital Equipment Corp. products.

#90131b0706 05/11/1990 ~Business Wire

PORTLAND, ME (MAY 11) BUSINESS WIRE - Unum Corp. (NYSE: UNM) announced that stockholders approved three proxy proposals at its annual meeting Friday.

Stockholders voted to elect two new directors: Robert E. Dillon, executive vice president of Sony Corp. of America, Park Ridge, N.J.; and Donald W. Harward, president of Bates College of Lewiston, Maine. James F. Orr III, Unum's chairman and chief executive officer, was re-elected a director.

Stockholders also ratified the appointment of Ernst & Young as independent public auditors, and approved adoption of the 1990 Long-Term Stock Incentive Plan.

In discussing the company's financial performance, Orr said, "We have had record results. We did what we said we'd do...we focused on the basics: growing premium, risk management, pricing actions and productivity."

Orr cited employees as instrumental to the company's success: "I am profoundly grateful to the Unum employees for their past performance - and know that they are capable of meeting the challenges of the future."

Orr spoke to stockholders about the recent scrutiny of the financial services industry. "Consumers typically respond to this situation by moving their business to institutions with outstanding reputations. With its financial strength and market leadership, Unum is in a good position to benefit from this 'flight to quality,"' he remarked.

Orr also announced the promotions of Stephen B. Center to group executive vice president, Specialty and Group Insurance Operations, and Robert G. Ostrander to senior vice president, Individual Disability. Unum Corp. is a

specialty insurance holding company with $8.5 billion in assets.

Headquartered in Portland, Maine, Unum is the nation's leading provider of group long term disability insurance and a major provider of employee benefits and individual disability insurance. The company also markets retirement plans and long term care insurance.

PORTLAND, ME (MAY 11) BUSINESS WIRE - Unum Corp. (NYSE: UNM) Friday announced that Stephen B. Center has been named group executive vice president of the company's newly formed Specialty and Group Insurance Operations unit.

Center will oversee management of the unit's activities, including product, finance, planning and marketing functions, as well as contribute to the management of the corporation. Specialty and Group Insurance Operations comprises the company's Long Term Disability division; Group Life, Health & Retirement division; and Long Term Care division.

In making this announcement at the company's annual meeting of shareholders, James F. Orr III, chairman and chief executive officer, said "Steve has had a profound impact on the businesses in Specialty and Group Insurance Operations. His new position recognizes his past contributions and his expanded responsibilities."

Since joining the company in 1963, Center has held a variety of positions, most recently that of executive vice president, Employee Benefits. Prior, Center was senior vice president, Employee Benefits, and also served as senior vice president, Individual Disability.

He also has been vice president of Branch Operations and vice president of Corporate Marketing and Communications. In addition, Center has worked in a number of field management positions.

Center is actively involved in the Life Insurance Marketing and Research Association (LIMRA) and currently serves on its board of directors. He is chairman of LIMRA's Group and Pension Future Direction Board Subcommittee. Center is also a member of the Group Insurance Committee of the American Council of Life Insurance and a member of the Area Development Council of the Portland Chamber of Commerce.

Unum Corp. is a specialty insurance holding company with $8.5 billion in assets. Headquartered in Portland, Maine, Unum is the nation's leading

NATICK, MA (MAY 11) BUSINESS WIRE - Waban Inc. (NYSE:WBN) Friday announced new appointments at its HomeClub and BJ's Wholesale Club divisions.

James F. Halpin, executive vice president of Waban and currently president of the BJ's division has been appointed president of HomeClub to replace John R. Chase, who has resigned. Herbert J. Zarkin, Waban executive vice president, will succeed Halpin as president of BJ's.

''We regret John Chase's decision to leave and appreciate the contributions he has made to our business during this past year,'' commented John F. Levy, Waban president and chief executive officer.

''We are indeed fortunate to have such seasoned and high-energy executives as Jim Halpin and Herb Zarkin to manage our two operating divisions. I am confident that Jim Halpin will bring to HomeClub the same level of merchandising excitement and operating efficiency that he has achieved at BJ's. Herb Zarkin, who has 30 years of varied retailing experience and has headed our HomeClub chain, is extremely well qualified to manage BJ's growth.''

Waban Inc. is a major participant in the rapidly growing field of warehouse retailing through its HomeClub and BJ's Wholesale Club business.

HomeClub is one of the nation's leading merchandisers of home improvement products at everyday low prices, operating 60 warehouses in 10 western states. BJ's Wholesale Club, which currently operates 23 clubs in the eastern United States, is a low-cost, low-margin, high-volume, membership-oriented distributor of food and general merchandise.

BEVERLY HILLS, CA (MAY 11) BUSINESS WIRE - John R. Russell has been elected executive vice president and chief operating officer of Litton's Houston-based Western Atlas International high tech oil services

subsidiary.

Thomas B. Hix Jr. has been elected a Western Atlas vice president and succeeds Russell as chief financial officer.

Russell, who took the post of recently retired Carroll M. Browning, had been Western Atlas' senior vice president and chief financial officer since 1987. For four years prior to the establishment of Western Atlas, he was senior vice president of finance and administration for Litton's Resources group. He joined the group staff in 1975 as a vice president.

Russell started work with Litton's Western Geophysical division in 1969, was advanced to controller the following year and named vice president of finance in 1973.

Hix had been controller of Western Atlas since 1987. He joined Litton in 1969 and was promoted to accounting supervisor at Western Geophysical in 1971. He then served two years in London as area financial manager. In 1974, he was promoted to controller and in 1984 to vice president of finance and administration.

Western Atlas, a majority-owned Litton subsidiary, is the world's leading single source of integrated reservoir description services.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

#90131b0737 05/11/1990 ~Business Wire

DALLAS (MAY 11) BUSINESS WIRE - Pratt Hotel Corp. (AMEX:PHC) reported a net loss of $6,620,000 or 13 cents per share for the quarter ended March 31, compared to a net loss of $1,877,000 or 4 cents per share for the same period in 1989.

Net revenues for the 1990 first quarter amounted to a record $61,386,000 compared to net revenues for the 1989 first quarter of $57,275,000.

PHC's flagship property, the Sands on the Park in Atlantic City, New Jersey, reported a seven percent increase in net revenues to $58.8 million on an 18.4 percent improvement in gross wagering to $415.3 million.

The growth in business volume resulted from continued favorable customer

response to a recently completed extensive capital improvement program and new marketing and promotional activities, including a slot marketing system instituted in the 1989 fourth quarter.

The decline in first quarter net income on a year-to-year comparison reflects higher operating expenses at the Sands on the Park, an increase in the provision for doubtful accounts and an especially favorable 1989 first quarter hold percentage.

The hold percentage is the amount of money a casino wins on its table games and fluctuates as a result, among other things, by chance. The Sands on the Park held a strong 18.3 percent in 1989's first quarter, compared with 1990's 15.6 percent, which is below the historic industry norm of approximately 16.2 percent.

William P. Weidner, PHC president, pointed out that the significant increase for doubtful accounts was necessary to bring the allowance up to an adequate level. He said he does not anticipate any additional significant increases for the rest of 1990.

Increased operating expenses were due, primarily, to higher wages and benefits. The Sands expanded staffing to provide improved customer service while maintaining higher than normal employment in anticipation of pressure on Atlantic City employment as a result of the opening of a new casino/hotel in April.

In addition, non-union workers received substantial wage and benefit increases, and a 1989 labor contract also impacted results.

NEW YORK (MAY 11) BUSINESS WIRE - Petrolane Gas Service Limited Partnership (owned since August 1, 1989, by QFB Partners) reported 1990 first quarter revenues of $249.7 million, an 8 percent increase over 1989.

Earnings before interest, taxes, depreciation and amortization for the 1990 first quarter were $51.4 million, a 10 percent decrease compared with 1989's first quarter. For the 1990 first quarter, the Partnership had net income after taxes of $6.4 million, compared with net income of $37.3 million for the first quarter of 1989.

Results of operations were adversely affected by extraordinarily warm weather in the 1990 first quarter, higher unit cost of propane and higher interest expense due to the incurrence of debt to finance the acquisition.

Petrolane Gas Service Limited Partnership is engaged in the domestic retail and wholesale distribution of liquefied petroleum gas, predominantly propane, for residential, commercial, industrial and agricultural uses. The Company is the largest domestic retailer and one of the largest wholesale distributors of propane based on gallons sold.

QFB Partners is a general partnership formed by affiliates of Quantum Chemical Corporation and CS First Boston, Inc.

ROCHESTER, NY (MAY 11) BUSINESS WIRE - Eastman Kodak Company Friday announced rental, service, and supply price increases for most of its copier and electronic publishing system product line.

List prices for the equipment will remain the same.

Equipment affected by the new pricing include Kodak Ektaprint mid- and high-volume copiers, Kodak ColorEdge copiers and IBM copiers serviced by Kodak. Also affected are Kodak electronic publishing systems.

Kodak copier equipment rental and service rates will increase by 5 percent. Existing rental and service contracts will be price-protected until their expiration date. Price of supply items such as toner will also increase by 3-5 percent. These changes will be effective July 1, 1990.

Service prices on most Kodak Ektaprint electronic products will increase by 20 percent. Selected older equipment will be handled under separate pricing rates. The new prices for service are effective June 1, 1990.

The company attributes the price increase to the rising cost of materials and labor as they relate to manufacturing, service, and field operations.

#90131b0811 05/11/1990 ~Business Wire

ATLANTA (MAY 11) BUSINESS WIRE - Turner Broadcasting System Inc. (ASE:TBS.A, TBS.B) reported Friday a 25 percent increase in revenues for the first quarter of 1990 compared to the first quarter of 1989.

Operating profit for the first quarter of 1990 remained stable reflecting a $3 million charge related to an additional anticipated loss on the 1990 Goodwill Games. In addition, the operating profit for the first quarter of 1989 includes a $3 million credit for the Atlanta Hawks' share of entry fees for the expansion of NBA teams.

The company reported net income of $4.3 million in the current period, compared to a $.4 million loss in the comparable period in 1989 due primarily to lower interest expense and elimination of minority interest.

WASHINGTON (MAY 11) COMTEX - A Senate panel was told today the U.S. lacks the leadership to keep America competitive in the global marketplace.

"Our economic position relative to our competitors is eroding day-by-day," said Clyde Prestowitz, president of the Economic Strategy Institute, an economic think tank. "We have failed to recognize we are moving into a new era. National security is now geoeconomic rather than geopolitical."

Prestowitz added the real problem for the U.S. is one of will. "We lack leadership prepared to go to the American people and challenge them," he said.

In absolute terms, the U.S. is still the world's most productive economy. According to Kent Hughes, president of the Council on Competitiveness, in 1987 German productivity was only 81 percent of America's, and Japan's productivity was just over 70 percent. However, the gap is closing and Hughes cited some negative trends on the U.S. technological position.

"Foreign applicants increased their share of U.S. patents from 35 percent in 1975 to 46.6 percent in 1987," Hughes told the Senate Commerce Committee. "U.S. companies claimed 90 percent of market share for phonographs and color televisions in 1970; by 1987 the figures were 1 and 10 percent, respectively. The domestic share for semiconductors slid from 89 percent in 1970 to 64 percent in 1987 and is still eroding."

Sen. Jay Rockefeller (D-W.Va.) also sounded the leadership theme. "For every depressing statistic there is a positive one," he said. "We are still the hardest workers. We are still the most creative and innovative. We've got the natural resources and the entrepeneurial vigor. With real leadership, we can compete in the global economy."

Hughes urged the federal government and private industry to take steps to reverse the relative decline of the U.S. industrial base.

"Deficit reduction will help lower the cost of capital and should stimulate added private investment," Hughes said. "Public investment in infrastructure will lower private costs and make industry more competitive."

Hughes urged business leaders to take a three-step approach in their thinking. This consists of taking a global view of competition, adopting pragmatic partnerships with other institutions and a renewed commitment to

total quality management.

Both witnesses agreed the Japanese economic system appears to violate most of our modern rules of thumb.

"U.S. economic policy is focused on consumer consumption," said Prestowitz. "We fear concentrations of economic power and think of trade as policy unrelated to other policies. The Japanese, Koreans and Germans focus on production and concentration of economic power. They go for market share rather than quarterly earnings and look at trade as a strategic matter. To the Japanese, trade is national security."

"In place of free trade, Japan coddles infant industries and has a distinct penchant for building and buying at home," added Hughes. "The Japanese approach has often short-circuited an American economy geared to innovation, mobility and geopolitics."

Hughes added Japan's combination of an emphasis on international competitiveness coupled with a protected domestic market has put American competitors at a double disadvantage.

"First, they (Americans) are denied the added sales that would come from equal access to the world's second largest national market," Hughes said. "Second, the Japanese firm can build its international position on a protected domestic base -- a luxury denied to most American firms."

As for U.S. trade policy, Hughes advocates linking trade policy to national security and adapting trade laws with global competition in mind. With the diminished military threat from Eastern Europe and the Soviet Union, he also recommends the U.S. ease its restrictions of goods and technologies, which by some estimates has cost the nation billions of dollars in high technology exports every year.

#90131d4680 05/11/1990 ~French/German News Agency

TOKYO (MAY 11) - Toyota Motor Corp. posted the largest corporate earnings in Japan in 1989 for the second year running, according to a survey released Friday by a private institution here.

Japan's top automaker declared 537.2 billion yen (3.42 billion dollars) in earnings, down 0.8 percent from the previous year.

Nippon Telegraph and Telephone (NTT) Corp. also retained its second spot with 423 billion yen (2.69 billion dollars), down 17.2 percent.

But industry leader Nomura securities, which declared earnings of 251.6 billion yen (1.60 billion dollars) for a half-year period, could replace

NTT with an estimated annual earnings of 503.3 billion yen (3.21 billion dollars), up 28.5 percent according to the survey by the Teikoku Data Bank Ltd.

Nomura's half year earnings, available only for a six-month period due to a change in book-closing months, still put it in 10th place overall.

Most commercial banks ranked higher than they did in 1988, with Sumitomo Bank third at 418.5 billion yen (2.67 biillion dollars), up 20.3 percent, followed by Fuji Bank with 411.1 billion yen (2.62 billion dollars), up 40 per cent.

MANILA (MAY 11) - Asia accounts for 91 percent of the world's annual rice production of 470 million tons, with China producing more than a third of the global total, the International Rice Research Institute (IRRI) says.

The latest survey by the Philippines-based IRRI, considered the world's foremost authority on the cereal, said Asia produced 433 million tons of rice a year, with China accounting for 175 million tons.

But the IRRI warned that rapid population growth in developing countries which consume the cereal called for intensified production.

It said world production must increase to 560 million tons by the year 2000 and 780 million tons by 2020 "just to keep up with population growth."

Forty-two countries produce more than 95 percent of the world's rice, and people living in them consume most of it, IRRI said.

Apart from China, India produces 92 million tons, Indonesia 40 million tons, Bangladesh 22 million tons, Thailand 19 million tons, and Vietnam 15 million tons, according to the IRRI survey, based on 1988 production figures for rough rice.

North Korea, South Korea, the United States and Egypt had the highest-yielding rice farms. Three of Asia's poorest countries - Burma, Laos and Cambodia - had the highest per-capita rice consumption, the IRRI said.

In terms of yield, North Korea's farms registered 7.1 tons per hectare (2.47 acres), South Korea 6.4 tons, the United States 6.2 tons, and Egypt 5.7 tons,
according to the IRRI study.

Asia's average was 3.4 tons, Latin America 2.3 tons and Africa 1.8 tons.

In consumption terms, Burma topped the list at 186 kilos (409 pounds) per person yearly, followed by Laos at 176 kilos (387 pounds), Cambodia at 166 kilos (365 pounds), Thailand at 157 kilos (345 pounds) and Vietnam at 149 kilos (328 pounds.)

#90131d5080 05/11/1990 ~French/German News Agency

BANGKOK (MAY 11) - Canada-based Lavalin International Group (LIG) has won a contract to build an elevated mass transit system to fight chronic traffic problems in Bangkok, bank officials said here Friday.

Thai Farmer Bank, which was LIG's local financial consultant, is now cooperating with the company to produce loan confirmation by May 24. This is to assure the Thai government the group can carry out the 40 billion baht (1.6 billion dollars) project, the officials said.

Lavalin was picked Wednesday by a special committee of the Interior Ministry as concessionaire of the Skytrain project, aimed at easing the Thai capital's notorious traffic jams.

However, Thai Farmer Bank officials said the company was not "fully relieved" about the project since the interior ministry and the cabinet have yet to make a final decision.

Bangkok has no mass transit railway and an inadequate road system, and is seen as symptomatic of growing infrastructure problems in Thailand.

The decision followed fierce competition between Lavalin and its rival company Asia-Euro Consortium (AEC).

AEC could not be reached for reaction Friday.

The Thai News Agency (TNA) reported earlier this year that AEC had received a letter of intent from the state-run Expressway and Rapid Transit Authority of Thailand late last year expressing interest in AEC undertaking the project.

The consortium needed formal approval from the cabinet to carry out the project, but the government had not made any progress on a decision, the report said.

#90131d5120 05/11/1990 ~French/German News Agency

KUALA LUMPUR (MAY 11) - The Kuala Lumpur Stock Exchange (KLSE) Friday ended a three-month-long exercise tracing missing share certificates,

saying its clearing house would report the loss of 8,474 scrips and replace them all.

The KLSE has taken the closing price of the shares, mostly lower liners, on May 8 and estimated their average value to be two dollars (74 U.S. cents) apiece, giving a total value of 18 million dollars (6.7 million U.S.).

KLSE executive chairman Nik Mohamed Din Yusoff told a news conference that the Securities Clearing Automated Network Services Sdn. Bhd. (SCANS) would begin reporting the loss to share registrars from Tuesday.

Each scrip would be replaced and the rightful owners would get all the entitlement - dividends, rights and bonus issues - due to them, Mr. Din said.

The stock exchange had since mid-February been bogged down by the massive task of tracing 71,686 share scrips that brokers said SCANS owed them but the KLSE said that the initial claims had been grossly overstated in some cases.

"We cannot afford to give the brokers any more time to amend their short claims. Otherwise we will have a never-ending exercise," Mr. Din said.

The problem arose when an unprecedented surge in business volume between late December and early February taxed the capablity of stockbroking companies and SCANS.

The missing scrip saga has led to an erosion of confidence in the KLSE as investors kept away but analysts said the government moved quickly to repair the damage by requiring broking firms to raise their working capital.

Mr. Din said that a special task force set up to verify the short claims determined that the net figure as of May 11 stood at 8,474 scrips.

He said, however, that discrepancies were still noted on the final short claims submitted by some stockbroking companies and that the task force had classified 2,019 scrips as doubtful claims.

Companies which have submitted these doubtful claims would be subjected to disciplinary action, including fines, suspension or reprimand.

Another measure which was being taken to restore confidence in the KLSE was the implementation of an interim central broker depository system to eliminate physical movement of scrip in July.

#90131d5160 05/11/1990 ~French/German News Agency

LONDON (MAY 11) - The British-French consortium charged with building a tunnel under the English Channel has asked Japanese banks to extend a further 736 million dollars to fund the project, The Times reported here Friday.

The fresh funds were to be part of a four billion dollar package of new credit that Eurotunnel has said it needs to cover cost overruns and complete the tunnel project, which was initially budgeted at around seven billion dollars.

Around 800 million dollars of the fresh funding which Eurotunnel has said is needed to finish the tunnel will come from a new shareholder's rights issue expected later this year.

The approach to Japanese banks comes after Eurotunnel chairman Alastair Morton announced on April 23 that higher raw material costs and slower-than-planned construction meant the cost of the tunnel project would have to be bumped up by more than 50 percent.

The article noted that Japanese banks, already facing a tough new set of regulations on capital adequacy requirements imposed by the Bank of International Settlements, would be reluctant to extend further credit to Eurotunnel.

"The project is itself very good. But the situation facing us now is very different from before, so we cannot respond very easily to any additional request for funds," a banker was quoted as saying.

#90131d5300 05/11/1990 ~French/German News Agency

PARIS (MAY 11) - The Paris commercial court has postponed a decision on sequestration of a 40 percent stake in France's only builder of reactors for nuclear power plants, Framatome, to prevent it passing out of state control.

The court said Thursday that a decision would be handed down on May 18.

The problem arose with the privatisation of French group CGE, which holds a 40 percent stake in Framatome.

Framatome is seeking to cancel the transfer of CGE's stake into the private sector at the time of the CGE privatisation, or at least enough of it to ensure that the state retains more than 50 percent of Framatome until a formal decision is taken on the privatisation of CGE's stake.

"No legal authorisation has been given for Framatome to leave the public

sector," the lawyer for Framatome told the court Thursday.

"You do not have the right to consider that the privatisation of CGE would automatically imply the privatisation of Framatome," which should remain in the public sector.

He cited a constitutional provision that any public service enterprise or one which exercised a monopoly belonged to the people as a whole, stressing that Framatome was a monopoly as it had been France's sole builder of reactors for nuclear power plants for 30 years.

At the moment, the state holds a 45 percent stake in Framatome through national electricity company Electricite de France (EDF) and CEA, with CGE holding 40 percent, 12 percent of which it plans to cede to Dumez.

Framatome's lawyers argued that they were not calling into question the privatisation of CGE, only that of Framatome.

But CGE's lawyer said this was "economic nonsense." "How can you privatise a holding without privatising its subsidiaries," he asked, noting that the value of the 40 percent stake in Framatome had been taken into account when CGE's value was assessed for privatisation."

NAIROBI (MAY 11) - Kenyan President Daniel arap Moi has alleged that two former ministers and churchmen plotted to kill government officials and later blame their deaths on his government, the press reported Friday.

Addressing a public rally on Thursday in central Kenya's Kirinyaga district, President Moi implicated former cabinet ministers Kenneth Matiba and Charles Rubia and a section of the Anglican Church in the conspiracy.

Mr. Matiba and Mr. Rubia -- former ministers for transport and communications, and housing and physical planning respectively -- earned the wrath of the political establishment here last week when they urged the scrapping of a constitutional amendment imposed by President Moi in 1982 to make the ruling Kenya African National Union (KANU) the sole legal party. They also called for the immediate dissolution of parliament and fresh elections.

The same day U.S. ambassador here Smith Hempstone warned that U.S. aid would be linked to multi-party politics, human rights and democracy. President Moi accused Washington of interfering in Kenya's internal affairs and of financing opponents of the government.

President Moi charged that the plotters, already forming a political party

in Scandinavia which they intended to set up in Kenya, planned to send two people to Uganda for training "to come back to kill government officials and other churchmen".

He accused the group of being behind the propaganda that followed the mysterious death of foreign minister Robert Ouko, whose mutilated and charred remains were found near his Koru farm in western Kenya on February 16, amid rumours that the government had a hand in his death.

The president warned that although he had always advised churches to avoid politics, "this same group went ahead to introduce politics into the church ... now they are introducing thuggery and even murders as their plans for the future."

"From today there will be no more leniency on the pretext of human rights. The days of mercy are over", President Moi declared.

SYDNEY (MAY 11) - Accor, the world's fourth largest hotel group, will open a Novotel here next May, its first venture in Australia, the hotel developer said Friday.

Derry Hill, development manager of Citistate Corporation Ltd., said the French-based Accor had signed an operational agreement to manage a 160 million Australian dollar (121 million U.S.) hotel being built next to Sydney's harbour.

The hotel will be a three-star, 536-room motel with its own monorail station, Mr. Hill said.

The agreement is for 20 years and does not involve Accor owning equity in the project, he said.

"We think it's a conflict of interest if someone owns minority equity and is operating the hotel," he said.

The French group currently operates 13 hotels in Asia and has another 15 under construction. Worldwide Accor has nearly 800 hotels and is one of France's leading restaurant companies.

Accor has long been keen on penetrating Australia and last year took an option on a controlling interest in the Greetings Group.

The French firm let the option lapse and Greetings went into receivership.

#90131d5620 05/11/1990 ~French/German News Agency
CANBERRA (MAY 11) - Treasurer Paul Keating said Friday that Australia could be heading for a second straight quarter of negative economic growth but he ruled out an immediate easing of monetary policy.

Mr. Keating also argued that Australia was not entering a recession, saying its definition as two consecutive quarters of negative growth, had "no great real world significance."

"We are not witnessing the sharp shake-out in the labour market that we did in 1974 and 1982, the last periods of real recession," he told the Economic Planning Advisory Council (EPAC).

Australia's gross domestic product (GDP) registered negative 0.2 per cent growth in the three months ending December 31 and Mr. Keating admitted the March quarter figure could also be negative.

He said the economy was going through "an adjustment phase" to lower spending and inflation and "this inevitably leads for a time to lower growth in activity and employment."

But Mr. Keating said the Labor government would not act "prematurely" by reducing interest rates further following three moves earlier this year to ease monetary policy..

"Official rates will not decline further until the government is confident that this will not refuel demand in an undesirable way," he said.

"Even so, retail and commercial rates could well fall further as a result of the earlier falls in official rates."

Monetary policy was last eased April 4 when the Reserve Bank said it lowered cash rates for overnight borrowing from 16.5 to 15-15.5 percent.

Mr. Keating reaffirmed the government's objective of reducing inflation to six percent by mid-1991. It was 8.6 percent for the year to March 31, its highest level for nearly three years.

A wool exports shortfall of up to two billion dollars (1.5 billion U.S.) would drive the current account deficit for the fiscal year ending June 30 slightly beyond the 18.5 billion dollars (14 billion U.S.) forecast in his budget, he said.

Mr. Keating said he expected a rise in the net foreign debt-to-GDP ratio which stood at 31 percent of GDP at the end of 1989 with net foreign debt amounting to 117.4 billion (88.8 billion U.S.).

#90131d5640 05/11/1990 ~French/German News Agency
MOSCOW (MAY 11) - Soviet citizens infected with the deadly Acquired Immune Deficiency Syndrome (Aids) will not face losing their jobs or homes, according to a law announced here Friday.

The legislation also legally guarantees that the children of Aids sufferers will have a right to pre-school education. It replaces previous legislation dating back to 1987.

Soviet citizens can only be forced by state prosecutors to take an Aids test under the new law which comes into effect on January 1, 1991.

According to Soviet Health Ministry figures, 482 Soviet citizens and 5,092 foreigners living in the country have contracted the Aids virus. Of those, 29 have contracted the disease. So far 19 people have died of Aids.

Experts expect the number of people in the Soviet Union infected with Aids to rise to more than 1,600 by the end of this year. The figure could reach 75,000 victims by 1993 and 1.5 million by the year 2,000, they add.

#90131d5670 05/11/1990 ~French/German News Agency
WARSAW (MAY 11) - The government, facing nationwide student unrest, has agreed to review plans to make students repeating a year pay for their studies,
officials said Friday.

University students had gone on strike across the country and begun occupying classrooms here in the capital, in Gdansk, Katowice, Krakow, Wroclaw,
Opole and Rzeszow.

Students were meeting Friday to decide whether to pursue their protest.

Education Ministry spokesman Andrzej Kafka said "the main thing is to have reached a compromise which in the future will enable to avoid misunderstandings.

NZS student union spokeswoman Joanna Szymaderska said she was very "satisfied" with the government's agreement to review the project.

Some 300,000 students are in Poland's state-funded higher education system.

#90131d5690 05/11/1990 ~French/German News Agency

JERUSALEM (MAY 11) - The deputy chairman of the Israeli Labor Party, Itzhak Rabin, Friday openly called for the resignation of party boss Shimon Peres after the chairman failed to build a Labour-led government coalition.

''The one who leads the party takes the credit if he succeeds, but he should take the responsibility for failure also,'' Rabin said on Israeli radio.

''I still hope that the one who failed will take responsibility and draw the necessary consequences,'' said Rabin, who has repeatedly expressed interest in taking over the party chairmanship.

The nationalist Likud bloc under acting Prime Minister Itzhak Shamir was making final preparations Friday for a coalition with right-wing and religious parties.

Shamir took over the mandate to form a new government April 26 as Peres' time ran out. Constant spoiling manoeuvres by Likud had kept support for a left-leaning Labour cabinet at just under the 61 deputies needed for a majority in parliament.

To secure the support of ultra-orthodox deputies, Shamir planned to introduce legislation in parliament next week banning the sale of pork and prohibiting ''immoral'' advertising.

The last government, a national unity coalition led by Likud and Labour, collapsed March 15 when Labour withdrew its support.

If Peres does not resign as Labour leader, the next opportunity to elect a new chairman would come at a party conference now set for late 1991. Labour conservatives, though, are calling for an earlier date.

#90131d5710 05/11/1990 ~French/German News Agency

BUCHAREST (MAY 11) - The opposition National Peasants' Party pulled out of the ruling Provisional Council of National Unity on Friday to protest acting President Ion Iliescu's refusal to delay the May 20 elections.

The opposition group announced that it was leaving the interim government as a plenary session of the Provisional Council got under way here Friday, the last meeting of the body ahead of the presidential and legislative elections.

Thousands of anti-government demonstrators and supporters of the National Salvation Front, which dominates the council, staged protests meanwhile near the former National Assembly building here where the session was

being held.

In another development, a spokesman for Prime Minister Petre Roman sought to play down the recall of U.S. ambassador Alan Green for consultations saying it was "normal".

The United States recalled Mr. Green this week amid concern that the May 20 vote, the first multi-party polls in Romania in 40 years, might not be fair.

A Peasants' Party official said the center-right opposition group was leaving the Provisional Council because of continuing "electoral terror" and the "unfair and arrogant" response of Mr. Iliescu to a demand that the elections be postponed to give the opposition more time to prepare.

Mr. Iliescu, who heads the National Salvation Front, which took power after the December ouster and execution of Nicolae Ceausescu, rejected the opposition demand, calling it "insolent".

Each political party has three delegates on the Provisional Council except for the National Salvation Front, which holds about half the seats.

Nearly 2,000 people gathered near the National Assembly building to demand that the elections be held as scheduled.

Romanian radio had called on members of the "May 20 Association," a group made up of Front representatives, unions and members of the media, to turn out in support of elections on May 20.

Front supporters had begun to gather in a street leading to the National Assembly building ahead of the opening of the Provisional Council meeting.

Carrying roses and signs saying "The Romanian People Want Elections on May 20," they shouted "May 20, May 20," as cars passed by carrying members of the Provisional Council to the session.

#90131d5830 05/11/1990 ~French/German News Agency
KUALA LUMPUR (MAY 11) - The executive committee of the Association of Tin Producing Countries (ATPC) will meet here for three days from Tuesday to review market and industry developments, an ATPC official said Friday.

Executive secretary Redzwan Sumun said that committee members would also consider ways and means to raise more funds for tin research and development to encourage bigger consumption of the metal.

The committee will also assess the stocks position since its last meeting in January when members - Australia, Bolivia, Indonesia, Malaysia, Nigeria,

Thailand and Zaire - agreed to a five percent cut in their overall export quota for the 10 months from March.

The measure was to help reduce stocks which built up to 35,000 tons at the end of last year from 33,000 tons at the end of July because of excessive production, especially in Brazil, the world's largest tin producer.

Brazil, a non-ATPC member, had pledged support for the group's efforts to reduce the stocks to 20,000 tons and to curb smuggling in the metal.

Analysts said tin market fundamentals had not improved much since then with prices still hovering around 17 dollars (6.3 U.S.) a kilogram (2.2 pounds).

"The current level seems to be the level that balances supply and demand," Mr. Redzwan said.

TOKYO (MAY 11) - Electronics firm Victor Co. of Japan Ltd. (JVC) said Friday it had agreed to provide technical assistance to Mongolian

Electronics Corp., enabling the country to assemble color televisions for the first time.

The company, Japan's biggest manufacturer of video equipment, said it would supply the Mongolian concern with knock-down kits through Japanese trading firm Nissho Iwai Corp. for an undisclosed sum.

Production at the company's Ulan Bator plant is expected to start in September, climbing from 10,000 television sets in the first year to about 20,000 in the third year, a JVC statement said. Initial output will focus on 14-inch models although 21-inch models will be introduced as the market develops.

"There is demand for color televisions in Mongolia but most people can't afford to buy imported models from Japan," a spokesman said.

Mongolia imports most of its televisions from the Soviet Union although about half of these are black and white models, an official at the Mongolian Embassy in Tokyo said.

#90131d5860 05/11/1990 ~French/German News Agency

NEW DELHI (MAY 11) - India has banned four top domestic cola firms from selling soft drinks on the grounds that the makers were using cancer-producing toxic ingredients to give the fizz extra tang, officials said Friday.

The Monopolies and Restrictive Trade Practices Commission (MRTP), a government watchdog body, Thursday also banned the four privately-owned firms from manufacturing citrus-flavoured drinks until July 6, MRTP officials said.

The MRTP, which has been crusading against hard-sell tactics of several Indian cola makers, said they were using Brominated Vegetable Oils (BVO) in the fizz which carried cancerous agents.

The Indian government had banned soft drink makers from using BVO's on April 16 on the grounds that they were injurious to health, and the trade watchdog body said the four firms had violated the law.

BVO is used as an agent to thicken and stabilise citrus-based fizz and increase its shelf-life. Reports say the four large firms had promised not to use the substance after the government banned it.

MRTP said the four firms would have to reply to government charges that they were engaging in "unfair trade practices" by the end of the two-month-long ban.

The four domestic firms entered India's tough cola market in the mid-1980's and quickly carved out a niche for themselves through major publicity efforts.

#90131d5910 05/11/1990 ~French/German News Agency

BEIJING (MAY 11) - The Chinese Foreign Ministry attacked one of its diplomats Friday for defecting in the United States, calling him a rumor-monger and a traitor to his country.

Xu Lin, a third secretary in the education section of the Chinese Embassy in Washington, had "openly spread rumors in a vicious attack on the Chinese government" after his defection May 1, the ministry said.

"He also cooked up a story of so-called political persecution," it said.

"This is a despicable act. A person like him betraying his own country does not deserve our comment."

Mr. Xu, 32, told a Washington press conference May 4 he was seeking political asylum in the United States after being threatened with reprisals for supporting last year's democracy movement in China.

"Many democracy activists in China now are being persecuted and arrested, and my situation would not be different," he said.

He added that his superiors had told him to go back to China in July after cutting short his four-year stint in Washington by two years.

#90131d6040 05/11/1990 ~French/German News Agency
Hong Kong (MAY 11) - Despite earlier fears of a worsening in Hong Kong's terms of trade, exports rose in the first quarter of 1990 came to 126.6 billion Hong Kong dollars (16.2 billion U.S. dollars) up five percent over the same period last year.

The Hong Kong government, reporting the figures said imports rose by two per- cent to nearly 132.7 billion Hong Kong dollars, narrowing the trade deficit slightly to about 6.1 billion dollars.

In March, Hong Kong's exports rose by 10 percent to 47.3 billion Hongkong dollars compared with the same month in 1989. Imports in March grew by six per cent to 51.1 billion Hong Kong dollars.

Particularly encouraging was the sharp rise in re-exports of goods coming from China. These grew by 11 percent over the first quarter compared with the same period in the previous year and rose by 16 percent in March.

DUSSELDORF, WEST GERMANY (MAY 11) - West German mechanical engineering concern Mannesmann said Friday its net consolidated profit soared 72.9 percent last year to 505 million Deutsche marks (302 million dollars).

Consolidated turnover was up 9.3 percent at 22.3 billion Deutsche marks (13.3 billion dollars) and dividend was fixed at eight Deutsche marks, up from 6.50 in 1988.

BONN (MAY 11) - A west German air force transport plane crashed into a forest 60 kilometres east of Frankfurt Friday, killing all 10 military personnel aboard.

The Bonn Defence Ministry said the Franco-German-built Transall plane was on a training flight at the time.

All 10 bodies had been recovered, a ministry spokesman said. Rescuers initially had difficulty reaching the crash site in rugged country near the town of Lohr next to the Main river.

An eyewitness told West German police she saw a propeller-driven plane fly very low past her and then heard a bang.

It was the third crash of a West German Transall, which can carry up to 93 soldiers or 16 tons of freight. The workhorse Luftwaffe (air force)

Transalls crashed in Crete in 1975 and in France some years later.

BRUSSELS (MAY 11) - The merger of troubled West German computer group Nixdorf with electronics giant Siemens cleared its final hurdle Friday, as the European Commission said the deal did not violate EEC competition rules.

The European Economic Community's executive said the merger "does not create or strengthen a dominant position" in the EEC, as the merged unit, Siemens Nixdorf Informationssysteme AG, will have "many major competitors" both inside and outside the Community.

Siemens announced it had 51-per-cent control of Nixdorf on January 10, in the first step of a process to combine its own computer and information technology activities with those of Nixdorf.

The merged unit, according to the Siemens plan, should rival the European market leader, Bull of France, which last year had sales of 6.5 billion dollars after buying the U.S. firm Zenith.

Nixdorf, created in 1952 by the computer genius Heinz Nixdorf, used to be one of the jewels of West German industry, achieving constantly rising sales and profits until it plunged into crisis after the death of the founder in 1986.

At present, the EEC Commission can only intervene after a merger has taken place if it finds that the deal violates competition rules. But in September, it will have the power to authorise, before the fact, all large mergers in the Community.

The West German anti-trust agency, the Bundeskartelamt, approved the Siemens-Nixdorf arrangement last month.

ISTANBUL (MAY 11) - Turkish retailers on Friday decided to continue a week-old boycott of Coca-Cola and Pepsi-Cola in protest at steep price hikes, despite an offer by the companies to sweeten the pill slightly.

Pepsi and Coca-Cola had said at the end of April they were doubling their prices, but in full-page advertisements in the Turkish press have now said that they will implement a price hike of only 80 percent.

The reduction in the price rise followed a more than 60 percent fall in

sales of the colas in Turkey.

But the retailers' union on Friday voted to continue the boycott despite the new offer.

Prime Minister Yildirim Akbulut has said the boycott is a good thing, as drinking cola is not a "useful" activity and people can just as well drink fruit juice.

Consumer groups are also targeting other imported products such as washing powders and detergents amid efforts to reduce the country's inflation, expected to be 63.5 percent this year after 70 percent in 1989.

Prices rose in April by 6.6 percent over the previous month's level, according to official statistics, although the Istanbul chamber of commerce has said the figure was nearer 11.3 percent.

LONDON (MAY 11) - Standard Chartered, one of the British banks most strongly involved in Asia and the Pacific, said Friday it had received authorisation to open a representative office in Vietnam.

The office would open in Ho Chi Minh City in July, the bank said.

Standard Chartered was forced to pull out of Vietnam in 1977 along with other western bankc, after 73 years in the country, and no British bank is currently represented there.

"The establishment of a representative office in Ho Chi Minh City reflects the confidence that the bank places on the long-term prospects for the Vietnamese economy," said Malcolm Williamson, group executive director, banking for the Eastern Hemisphere.

#90131d6650 05/11/1990 ~French/German News Agency

Bonn (MAY 11) - The West German government is calculating that the country's full-steam-ahead economy will produce as much as 35 billion marks (21.4 billion dollars) in extra tax revenues this year and next, the German Press Agency dpa learned here Friday.

The government estimates show added tax earnings of eight billion marks this year, followed by 26 to 27 billion marks in 1990, dpa learnt from Bonn sources ahead of next week's consultations among federal, state, and community authorities on tax issues.

According to the estimates, the federal government alone will enjoy six billion marks extra tax earnings this year, with the rest going to state and community governments.

Next year, the federal government's share of the extra tax revenues will amount to some 12 billion marks.

Economic analysts here say that if the estimates bear out, it will help Bonn considerably in shouldering the extra burdens expected in financing the costs of helping to rebuild East Germany.

Meanwhile the Bundesrat, the legislative chamber representing West Germany's ten states plus West Berlin, approved Friday Bonn's supplementary budget for 1990 of 306.9 billion marks, 6.8 billion higher than originally planned.

The supplement also foresees new government borrowing of 32.9 billion marks, 5.9 billion marks more.

#90131d6870 05/11/1990 ~French/German News Agency

GENEVA (MAY 11) - The number of cases of cholera throughout the world increased by 10 percent in 1989 to total 48,403 compared with 44,083 in 1988,
the World Health Organization (WHO) said on Friday.

Cases were reported by 35 countries compared with 30 countries in 1988, with Sao Tome and Principe and Yugoslavia reporting cases for the first time. Africa and Asia were particularly affected.

The disease was most prevalent in Africa, where 16 countries reported 35,606 cases compared with 23,186 cases in 12 countries in 1988.

Malawi was particularly affected, reporting 8,351 cases, but the worst-affected African country remained Angola which reported 17,601 cases. Sao Tome-et-Principe reported 3,953 cases.

In Asia, 12 countries reported 12,785 cases. The region of Xinjiang in China was particularly affected between May and September.

Cases were reported also in Kuwait, Macau, Burma and Nepal. These countries had been spared in 1988.

In Europe, six countries reported 11 cases, most of which had been imported,
the organization said.

It stressed that the figures were lower than the true number of sufferers because "as in previous years, there is strong evidence that the disease exists in several countries which have not declared it".

NEW DELHI (MAY 11) - India is hoping that exports in the current fiscal year ending March 1991 will total 20.5 billion dollars, federal commerce minister Arun Nehru said Friday.

Mr. Nehru informed parliament that the export target for 1989-90 had been set at 16 billion dollars and total exports from April 1989 until February this year were provisionally estimated at some 14 billion dollars.

The minister gave no further details.

India's main exports are handicrafts, textiles, gems and jewellery, machinery including transport equipment, ready-made garments, leather and its products, and cotton yarn.

#90131d6940 05/11/1990 ~French/German News Agency

NAIROBI (MAY 11) - The U.S. Export-Import Bank is to loan Kenya 63.6 million dollars to finance the expansion of the Nzoia sugar factory in western Kenya, a press statement from the U.S. embassy here said Friday.

The funds are to help expand the factory's production capacity from the previous level of 1,000 tons to 3,000 tons of cane per day, the statement said.

When completed, the Nzoia sugar factory will increase cane requirements to such a degree that an extra 16,000 hectares (39,200 acres) of land will be needed for cane production, providing a market for 16,000 small farm-holders on top of the current 15,000 growing cane in the area.

The factory's expansion work is currently being done by the U.S. firm, Arkel International.

#90131d6950 05/11/1990 ~French/German News Agency

KAMPALA (MAY 11) - Ugandan President Yoweri Museveni has sacked the governor of the Bank of Uganda, Suleiman Kiggundu, and the chairman and managing director of the government-owned Uganda Commercial Bank, Frank Mwine.

A statement broadcast over Radio Uganda Thursday night said the president had named Charles Kikonyogo as new governor of the Bank of Uganda and Samuel Owuori as acting chief executive of Uganda Commercial Bank. He also named Ezra Suruma as Bank of Uganda deputy governor.

The dismissal of Dr. Kiggundu followed the worsening image of the bank in recent weeks after the Ugandan High Court ordered impounding of the bank's vehicles and their sale at auction to pay the bank's debts.

Various consulting firms have sued the bank for a total of one billion Ugandan shillings (2.5 million U.S. dollars) for professional services for the bank since 1986.

During the same period, the bank has also lost 750 million shillings (1.75 million dollars) in frauds involving employees.

The dismissed boss of Uganda Commercial Bank, Frank Mwine, was seconded to the bank from the World Bank in 1986, but since then, he has been the subject of press reports in connection with lavish expenditure of bank funds, including construction of his official residence at a cost of 400 million schillings (about a million dollars).

The new Bank of Uganda chief is a well-known banker, who until his appointment was the managing director of well-run Nile Bank in Kampala. Before that, he was governor of the Bank of Botswana during his exile in the southern African country.

#90131d6960 05/11/1990 ~French/German News Agency

PRETORIA (MAY 11) - South Africa's money supply is to adopt a more African approach after a Cabinet decision to ditch the banknote portrait of the country's founder, Jan Van Riebeeck, in favour of motifs of five wild animals.

Reserve (Central) Bak Governor Chris Stals announced here that the green 10-rand note will have a rhino as motif, the brown 20-rand will feature a buffalo, the red 50-rand a lion, the blue 100-rand an elephant and the

orange 200-rand note a leopard.

The Bank will also move to decrease the number of banknotes in circulation by introducing South Africa's first ever 100 and 200 rand notes and replace the five-rand note with a coin. Earlier this year, a two-rand coin and a new five-cent copper coin were introduced.

The new motifs on notes, which indicate a strong symbolic shift away from South Africa's colonial past, will feature agriculture, mining, manufacturing, tourism and transport and communication as secondary themes.

The designing phase of the notes is under way and they are expected to appear late in 1992. The current series of banknotes was introduced in 1978.

MACAU (MAY 11) - China has suggested for the first time that it intends to station troops in Macau after the Portuguese colony returns to Beijing's control in 1999, informed sources here said Friday.

A meeting that ended Thursday in China between drafters of Macau's post-1999 mini-constitution, revealed a lack of concensus on all major issues between the Chinese and Macau sides, said the sources close to the Macau drafters.

The two sides opened the latest round of talks May 3 in the eastern Chinese city of Hangzhou. They met to discuss drafting the so-called Basic Law, which will eventually govern the territory.

During the talks, the Chinese drafters raised the prospect of stationing People's Liberation Army (PLA) troops in Macau after the handover date, according to Edmund Ho, one of the drafters for the Macau side.

A source in the colonial government here said he was surprised by the news, saying that until now the question had not been raised.

Beijing has said placing troops in the neighboring British colony of Hong Kong, which is to be transferred to China in 1997, is its own affair though no decision has yet been made.

The mostly-ethnic Chinese residents of Macau and Hong Kong were badly shaken by the PLA's bloody crackdown on the pro-democracy movement in Beijing last June, a movement which they had strongly supported.

But Mr. Ho said that stationing PLA soldiers in Macau would not threaten the rights and freedoms of Macau residents, which he said would be

guaranteed in the Basic Law.

The Portuguese colonial army left Macau in 1975, leaving their barracks to the Macau security forces.

The sources said another major bone of contention at the talks in Hangzhou, near Shanghai, was the nationality question.

Lu Ping, head of the Chinese side, announced shortly after the talks started that top positions in post-1999 Macau, including chief executive and president of the legislative assembly, could only be filled by Chinese nationals.

Carlos Assumpcao, currently assembly president, voiced the opposition of all Macau drafters to Mr. Lu's statement, saying it was in total breach of the spirit and letter of the Sino-Portuguese Joint Declaration.

#90131d7120 05/11/1990 ~French/German News Agency

KUALA LUMPUR (MAY 11) - United Engineers (Malaysia) Bhd. (UEM), which was awarded a multi-billion dollar privatized highway project, said Friday its group pre-tax profit rose 31 percent to 61.2 million dollars (23 million U.S.) last year.

The engineering and building construction group, which is linked to Prime Minister Mahathir Mohamad's new United Malays National Organisation, made a pre-tax profit of 46.8 million dollars (17.3 million U.S.) in 1988. UEM reported an 87 percent increase in turnover to 146 million dollars (54 million U.S.).

The group said that results for this year would exceed those of 1989 because of its acquisition of Cement Industries of Malaysia Bhd. in August and the completion of further sections of the North-South highway.

UEM Friday also announced it had entered into an option agreement to purchase a 50 percent stake in a private limited construction firm, Ho Hup Construction Co. Sdn. Bhd. for a price to be determined later.

Ho Hup has an issued and fully paid-up capital of four million shares of one dollar (37 U.S. cents) each and is involved in foundation and civil engineering and building construction.

UEM was a once financially troubled company which was revived after it was awarded the highway contract in 1988.

#90131d7180 05/11/1990 ~French/German News Agency
JOHANNESBURG (MAY 11) - Annual wage negotiations for 180,000 black mineworkers kicked off this week, with the National Union of Mineworkers (NUM) pushing for increases of between 16.2 and 68 percent, a union spokesman said here Friday.

The Chamber of Mines which represents the main mining houses, has refused to reveal its wage offer to the media but a NUM official told Agence France-Pesse that mineworkers were as "unhappy about the offer as we are about the wages."

Black miners are among the lowest paid workers in the country.

Annual negotiations started Thursday and will continue on Tuesday and Wednesday.

The miners are pushing for management to increase the monthly salary for underground miners from between 356 rands (138 dollars) and 455 rands (172 dollars) to 600 rands (238 dollars).

They are also demanding that surface workers be given a monthly salary of 543 rands (206 dollars). They are presently being paid between 324 rands (123 dollars) and 399 rands (158 dollars).

The critically low gold price of 370 dollars an ounce and rising production costs have taken their toll on South African mines. Industrialists told Agence France-Presse that the mines will all but crumble if miners expect "outrageous" wage increases and then go out on strike if they do not receive them.

Eight gold mines are not showing a profit, and two of them are in danger of closing down.

Some 22,000 white miners represented by eight trade unions announced an agreement Wednesday for a 13.5 percent annual pay hike after talks with the Chamber of Mines.

#90131d7200 05/11/1990 ~French/German News Agency
MUZAFFARABAD, PAKISTANI KASHMIR (MAY 11) - Indian troops, depopulating villages in Kashmir state, are plundering houses and abusing women as part of a "terror drive" against Moslem militants, refugees fleeing across the border from Indian-held Kashmir here said.

Mariam Bibi, a woman in her mid-20s who arrived here two weeks ago with her four children from Kantawali village in Kapwara district, said she was "gang raped for four days" by Indian soldiers.

"They pulled my hair and threatened to break my arms and legs," before taking her to their post, she said. They also threatened to hang her up by her breasts from a tree if she did not cooperate, she added.

Looking shocked, she said that while some Indian troops were dragging her away others pounced on her with sticks and rifle butts and pulled at her breasts.

They behaved "like starved animals", the pretty-looking woman, now living in a camp run by the Kashmir Liberation Cell (KLC) under the Pakistani-controlled Azad (free) Kashmir government, said as she wiped away tears and patted her children.

Explaining what she called the "agony of humiliation", she said "they held me for four days and raped me several times."

Asked why she became their target, she said "the invading soldiers attacked my house when my husband was away. All the time they were asking me 'hand over your weapons.' But I had none."

The soldiers and officers conducting house-to-house searches "plundered the houses and made many of us hostages when the search yielded no arms," she said.

"I was not allowed to sleep and my children were denied food," she added.

"On my repeated pleas they allowed me to fetch food from my house four days later. But that too, on the condition that my young nephew would stay behind as a hostage to ensure that I would come back."

#90131d7320 05/11/1990 ~French/German News Agency
MOSCOW (MAY 11) - Private motorists in Lithuania will be refused service at petrol pumps from Monday, the energy adviser to the Lithuanian government, Bronis Buinjavicius, told the German Press Agency dpa Friday.

With supplies of petrol dwindling because of Kremlin economic sanctions, Lithuania only has enough fuel for trucks, service vehicles, ambulances and farm tractors, he said. Until now, each private car owner was allocated a quota of 30 litres monthly.

Buinjavicius said Lithuania had tried to buy oil directly from producers in Perm and Tyumen, Russian cities that manage the Soviet oil trade. But no contracts were signed because of pressure from Moscow.

Deliveries of liquefied natural gas under existing contracts were running

slow because they were held up by the Soviet railways.

Radio Vilnius said Friday that old Lithuanian oilfields had been reactivated because of the shortage. One bore in the northwest was producing 15 tons of crude per day. Once all 26 existing bores were reopened, 460 tons of oil would be available daily.

The agriculture ministers of Lithuania, Estonia and Latvia have meanwhile signed a cooperation agreement. Buinjavicius said it was a first step toward creating a Baltic common market. The three republics' presidents are expected to meet on Saturday.

In another development, a Lithuanian man set fire to himself near a Hungarian border post with the Soviet Union Friday. The Hungarian news agency Mti said Rimantas Daugintis was taken to hospital with serious injuries. It was not known if he meant a political protest.

#90131d7380 05/11/1990 ~French/German News Agency

LONDON (MAY 11) - The United Arab Emirates will reduce oil output by at least 100,000 barrels a day in June, but are unlikely to cut production by the 200,000 bd promised at an OPEC meeting last week, the specialist publication Energy Compass said here.

Planned reductions of 50,000 bd for the onshore wells in Abu Dhabi and the same amount for two offshore wells could be higher if the national oil company Adnoc decided to reduce production from wells such as Upper Zakum, Energy Compass said in its latest issue.

But the reductions are likely to be below the 200,000 bd that the UAE pledged during an emergency Organisation of Petroleum Exporting Countries emergency meeting in Geneva last week.

OPEC had estimated the Emirates' production at two million bd in April, but Oil Minister Mana Saeed Otaiba said it was 2.1 million bd, which the Emirates would cut to 1.9 million bd.

Saudi Arabia, which pledged to reduce output by 430,000 bd, has reached agreement with clients of its oil company Aramco to reduce May offtake to take production down to its quota, 5.38 million bd, Energy Compass said.

Efforts by the Emirates and Saudi Arabia could push Kuwait to meet its pledges, Energy Compass said. Kuwait had said it would reduce production by 400,000 bd but its clients have not yet been informed of any moves.

The three producers are the main culprits in overproduction which pushed OPEC output to 24 million bd in March, sparking a steep fall in crude

prices in April.

OPEC agreed on May 3 to cut production by 1.445 million bd until July to bring output down to 22.05 million bd in a bid to restore price levels.

Crude prices have been moving up since Wednesday, with West Texas Intermediate breaching the 19 dollars a barrel level to close at 19.02 in New York on Thursday.

Prices have recovered 73 cents in two days, after falling immediately after the announcement of the OPEC agreement, amid market scepticism that members would adhere to it.

#90131d7510 05/11/1990 ~French/German News Agency

Brussels (MAY 11) - The European Community Commission said here Friday it had no objection to the Siemens company assuming a controlling interest in Nixdorf Computer.

''There is no reason to intervene under the rules of competition in the Community,'' the E.C. Commission said about the plans by the two West German companies.

It said that a review of the planned merger was made according to criteria of new fusion control regulations approved by the E.C. last December.

A siemens-Nixdorf company would greatly increase its share in the market, particularly in West Germany, but would acquire too dominant a position since there were still a sufficient number of competitors, the Commission said.

-30- 891

#90131d7540 05/11/1990 ~French/German News Agency

Bonn (MAY 11) - Vietnamese Foreign Minister Nguyen Co Thach said he had had ''very useful'' talks Friday with West German Foreign Minister Hans-Dietrich Genscher and the Bonn cabinet member responsible for development aid, Minister for Economic Cooperation Juergen Warnke.

Co Thach told reporters here that he assumed current projects between Hanoi and East Germany would continue despite the fall of the Communist regime in East Berlin and impending German unification.

Vietnam has some 40 contracts signed with East Germany on joint projects, many of which involve Vietnamese citizens working or studying in the formerlly fellow socialist country.

Co Thach said he had briefed Genscher on Vietnam's Soviet-style reform policy and on developments in war-plagued Cambodia, where he suggested that West Germany contribute to the international peace effort.

Bonn had promised development aid for training personnel in banking, financial administration and business and for improving the country's infrastructure, Co Thach said.

-30- 1234

#90131d7610 05/11/1990 ~French/German News Agency

ISLAMABAD (MAY 11) - Gulbuddin Hekmatyar, the Moslem fundamentalist leader of the Afghan guerrilla movement, has said an eventual U.S.-Soviet agreement on Afghanistan would have "no binding effect on the mujahedeen."

"The mujahedeen will not accept any alien or foreign imposed decision as it is for them alone to decide their own future as an independent nation," Mr. Hekmatyar told the Afghan News Agency (ANA), which issued the statement Friday.

The ANA is controlled by Mr. Hekmatyar's group, the Hezb-i-Islami (party of Islam), which is fighting the pro-Soviet regime in Kabul.

Mr. Hekmatyar was reacting to statements earlier this week by Benon Sevan,

special envoy for the U.N. secretary general in Afghanistan and Pakistan, who said Moscow and Washington were nearing a new agreement to disengage themselves from the Afghan conflict.

In addition, Mr. Hekmatyar expressed doubts about a plan of U.N. coordinator Prince Saddruddin Aga Khan, who predicted the beginning of a return of Afghan refugees to "safety zones" this summer.

"The refugees are not ready to return to any government-controlled area unless (Soviet-backed Afghan President) Najibullah steps down," he said.

"Regarding the repatriation of refugees to the liberated areas of Afghanistan, it could be possible only if all the mujahedeen parties arrive on a consensus of opinion in this regard," he said.

Three million refugees live in Pakistan, two million in Iran and two million more were displaced to the interior of Afghanistan following the Soviet invasion in December 1979.

The Soviets pulled out of the country in February 1989, but no political solution has been reached between the government it supports in Kabul and the guerrillas, who are supported by the United States, Pakistan and Saudi Arabia.

-30- 2015
#90131d7690 05/11/1990 ~French/German News Agency
LONDON (MAY 11) - Bank of Credit and Commerce International (BCCI), the bank currently pleading guilty to a U.S. charge of drug money laundering, is to relocate its headquarters in the Arab Emirate of Abu Dhabi, the bank said here Friday.

Abu Dhabi took 77 per cent control of the bank's Luxembourg-based parent BCCI Holdings 10 days ago.

No date has been set for the move, which was announced concurrently with a review of BCCI's profitability in the light of the recently announced loss of 498 million dollars for the bank in 1989, caused by a 600-million-pound provision for (mostly third world) bad debt.

The bank said its relocation will represent substantial savings in operating costs.

#90131d7860 05/11/1990 ~French/German News Agency
PARIS (MAY 11) - Vandals overturned tombstones and trampled flowers at a cemetery in the Paris suburb of Limetz-Villez, apparently overnight Wednesday, a council worker said Friday.

This new desecration was revealed just hours after parliament Friday briefly adjourned to manifest its outrage at the desecration of a Jewish cemetery at Carpentras in southern France, where one body was disinterred and impaled.

Some 40 graves were affected at Limetz-Villez.

Also Friday, police reported that a Jewish cemetery in the Alsatian town of Wissembourg had been desecrated between April 12 and May 4. Two other Jewish cemeteries in the eastern Alsace region were desecrated in 1988.

The shocking desecration of 34 graves at Carpentras, where vandals pulled out the body of an 81-year-old man who died last month and impaled it on a parasol, has been condemned across the political and church spectrum.

French Interior Minister Pierre Joxe on Friday criticized National Front leader Jean-Marie Le Pen, who said that the desecration could be a "provocation" aimed at the far right.

In a radio interview, Mr. Joxe called Mr. Le Pen a racist and said his own extreme nationalist ideas were a "provocation" that "could lead to

violence of dimensions" beyond the imagination.

The cemetery at Limetz-Villez is not specifically Jewish, unlike the one at Carpentras, which is the oldest Jewish burial ground in France.

"In all, 41 graves were sacked by these lunatics. It really is sacrilege. Even the children's corner hasn't been spared," said the guardian there, who looks after some 400 graves.

In Wissembourg, Jewish community leaders issued a statement expressing "deep indignation" at the profanation of some 20 tombs.

The incident reported Friday by police in Wissembourg follows the theft of 90 tombstones from the Jewish cemetery at Weiterswiller in April 1988 and the profaning of graves at Sarre-Union a month later.

#90131d8000 05/11/1990 ~French/German News Agency
BEIRUT (MAY 11) - The rival Shiite Moslem groups Amal and Hezbollah Friday agreed to a cease-fire in south Lebanon where their fighters have clashed for more than four months.

The truce was sponsored by a committee of Shiite leaders in the eastern Bekaa Valley and by Abdallah al-Amin, head of the Lebanese branch of Syria's ruling Baath Party.

The pro-Syrian Amal said it was "ready to respect the cease-fire" and welcome Mr. Amin's initiative, while the Iranian-backed Hezbollah said it was "committed to respecting the truce."

The agreement also calls for a meeting between the two groups, which have vied for supremacy over the Shiite community, the largest sect in Lebanon, for several years.

Shiite militiamen have clashed in the Iklim al-Touffah region near the southern port city of Sidon since December 23, killing more than 150 people.

Syria and Iran have sponsored several Shiite accords but without securing a political settlement between the secular Amal group and the Islamic fundamentalist Hezbollah, which have also clashed in mainly Moslem west Beirut.

#90131d8100 05/11/1990 ~French/German News Agency
SAN FRANCISCO, CALIFORNIA (MAY 11) - Asian economic powers are paring

back their trade surpluses, while the United States and other Pacific nations are picking up heavier trade deficits, according to a report by The Asia Foundation.

The Pacific Economic Outlook for 1990-91 report, released Thursday, said Pacific economies in 1990 would continue a self-imposed slowdown begun last year to combat inflation and growth threats.

But Pacific economies, led by Thailand, will still outpace all other regions, and begin to accelerate again in 1991, the report said.

The report predicted a 5.0 percent growth rate for 1990, down from 5.3 percent last year and 7.2 percent in 1988.

Japan, Taiwan and South Korea imposed tight monetary policies to rein in their economies, which were threatened in 1988 by inflation and a regional growth rate of more than seven percent.

Japan's trade surplus, 78.8 billion dollars in 1988, fell to 57.3 billion dollars last year. It is expected to drop to 42.7 billion dollars in 1990 and rebound to 45.5 billion in 1991.

Taiwan's surplus was 11.1 billion in 1989 and is forecast to fall to 10.4 billion this year and 9.2 billion in 1991.

South Korea's balance of payments surplus was 5.1 billion dollars in 1989 and is predicted to drop to 1 billion this year and to 300 million in 1991.

The United States, Canada and Australia are expected to fall further behind in their trade deficits, the report said.

The United States, after cutting its trade deficit to 118 billion in 1988 and to 96.6 billion in 1989, is forecast to see its shortfall increase to 105 billion this year and 116 billion in 1991.

The growth leader in the Pacific region is Thailand, with a rate of 11 percent last year, 9.1 percent this year and a predicted 8.4 percent in 1991.

Singapore and Malaysia are trailing slightly behind Thailand.

BONN (MAY 11) - King Fahd of Saudi Arabia may pay an official visit to West Germany before the end of the year, a foreign ministery spokesman said here Friday.

The spokesman was reacting to a report in a Cologne newspaper, the Koelner

Stadtanzeiger, which said King Fahd would come in late summer and be the first state guest at the West German government's newly-completed guest quarters, the Hotel Petersberg.

The spokesman said a visit was being planned but that no date had as yet been fixed.

PARIS (MAY 11) - French group Entreprise Miniere et Chimique (EMC), the world's fourth-biggest potash producer, is to buy a 51 percent stake in potash reserves in the Canadian province of Manitoba, it was announced here Friday.

EMC will buy the holding from Canadian group Canamax Resources Inc., and the two groups announced the deal jointly.

The rest of the Manitoba potash project is held by the province. The value of the deal was not revealed.

EMC said the purchase was part of its policy of "gradual renewal of resources". It is already a partner in operating a potash mine in New Brunswick, in partnership with Canada's Denison firm and Kali und Salz of West Germany.

MAPUTO (MAY 11) - Rebels of the Mozambique National Resistance (Renamo) have attacked an industrial school near the railway line linking the northern port of Nacala to landlocked Malawi, breaking a "unilateral ceasefire" in the area, Radio Mozambique reported Friday.

Raiders on Thursday destroyed equipment at the Carapira industrial school, and looted medicines from a nearby health centre, the radio said, but it did not report any casualties.

Carapira lies inside the "Nacala corridor", which Renamo declared late last year that it would no longer attack.

The official Mozambique News Agency, AIM, citing three attacks on the area this year, described Renamo ceasefires as "propaganda fictions".

The radio reported that on Monday Renamo killed eight people in an ambush near the town of Nacaroa, which, like Carapira, is also in Nampula province.

Further south, in Zambezia province, the radio reported that the Mozambican armed forces this month recaptured the small town of Umbuane, which had been in Renamo hands for over a year.

It said that 7,500 people in Umbuane were destitute and in need of food, clothing and medicines, and that unless aid were moved to Umbuane quickly, the town could face famine.

PORT MORESBY (MAY 11) - Production resumed Friday at Papua New Guinea's Ok Tedi copper mine, after a four-day strike by 1,000 workers seeking increased opportunities for local employees, company officials said.

Workers were back on the job for the first shift Friday after talks between Lawrence Titimur, secretary of the umbrella Papua New Guinea Trade Union Congress, and local union officials on Thursday, they said.

Production fell drastically during the strike, which began Monday, but exports of copper concentrate were not affected, an Ok Tedi spokesman said.

The workers were seeking faster promotion and increased opportunities for locals within Ok Tedi, which is owned by three foreign companies and the Papua New Guinea government.

The strikers, members of the Ok Tedi Awards Union, also wanted some senior ex patriate employees sacked and training for locals increased.

The status of their demands was not immediately clear.

BEIJING (MAY 11) - Yasser Arafat, Chairman of the Palestinian Liberation Organization (PLO), arrived Beijing from North Korea on Friday and was given a banquet in his honor by Chinese Prime Minister Li Peng.

Mr. Arafat, who was greeted at Beijing airport by China's deputy minister of foreign affairs, Yang Fuchang, discussed with Mr. Li the international situation, the Middle East, and the Palestinian question, the official New China News Agency reported.

During his two-day trip to North Korea, Mr. Arafat had two meetings with President Kim Il Sung, in a "sincere and friendly" atmosphere," the official Korean Central News Agency said.

Mr. Arafat visited China last in October for an official visit which was somewhat tarnished by a quarrel with NCNA. The PLO refuted remarks attributed to its leader congratulating the Chinese government for the crackdown on pro-democracy students in Tiananmen Square last spring.

#90131d8380 05/11/1990 ~French/German News Agency

SALZBURG, Austria (MAY 11) - Britain wants to see price stability and respect for market forces as the prime objectives of European monetary and economic union (EMU), Bank of England governor Robin Leigh-Pemberton said at an international conference here Friday.

He also outlined two other broad principles for European Monetary Union: accountability of monetary authorities to elected representatives, and "subsidiarity" - applying central control only to those functions which cannot be exercised locally.

"Respect for these principles seems to me much more important than the precise form of whatever arrangements evolve within the community," he said.

At the conference, organised by U.S. investment bank Salomon Brothers and called "Post-1992 and Perestroika", Mr. Leigh-Pemberton also argued against unilateral replacement of individual countries' market operations and central banks by a single European strategy and banking body.

He argued that even if all Community countries were to have similar interest rates in future, national authorities should be allowed to rely on the tools they know best for conduct of monetary policy, emphasizing that techniques such as using reserve ratios and repurchase operations were now used in different ways.

"Variations in short-term market operation techniques have grown up in response to specific market conditions ... There does not seem to me to be any reason to force the operating techniques of individual national central banks into a common mould," he said.

"The expertise, standing and traditions of the national central banks are an important resource. Any future arrangements must seek to harness these resources, and not seek to supplant them with a separate and independent construct."

Mr. Leigh-Pemberton sat on the Delors Committee, which set up a three-stage blueprint for European monetary union last year.

#90131d8390 05/11/1990 ~French/German News Agency

BEIRUT (MAY 11) - Lebanese Christian strongman Michel Aoun has closed off access by outside civilians to the areas of East Beirut he controls.

In an earlier development, the rival Shiite Moslem factions in Lebanon, Amal and Hezbollah, announced a ceasefire after four and a half months of fighting with one another at a cost of 150 dead.

Hundreds of people were turned away Friday when they tried to use three passageways linking the militia-held Ashrafiyeh neighbourhood and the northern districts of Kiserwan with the industrial area of Matin, which is controlled by General Aoun's army troops.

The blockade appeared meant to step up pressure on residents of the Christian areas controlled by the Lebanese Forces (Lf). Aoun has been fighting the Lf militia for supremacy since January 31.

Ambulances and civilians, among them political figures, were barred from commuting to work in Aoun's districts and told to go home by army soldiers on barricades at the crossing points.

The army, which Aoun runs, had no official explanation for the closure, but security sources in East Beirut said the general was trying to tighten the noose, making life in the areas held by his Christian enemies unbearable.

The sources termed the measure a ''two-edged sword'' for Aoun, since the general has no outlet to the sea. His only links to the outside world pass through militia areas or the Syrian-controlled districts to the west and south of the Christian enclave in Lebanon.

LONDON (MAY 11) - Natural rubber prices drifted lower over the past week on the London physical market on lack of interest following the May bank holiday week-end in the United Kingdom, traders said.

The price for Ribbed Smoked Sheet No 1 (RSS 1) for June delivery closed at

565 pounds per ton against 585 pounds the previous Friday.

The situation showed no change, traders said, with lower grades lacking interest but higher grades supported by supply shortages in the Far East following recent dry weather.

KATHMANDU (MAY 11) - King Birendra of Nepal appointed Friday a seven-member commission to draft a more democratic constitution. The interim coalition government accepted the body.

The commission, headed by supreme court judge Vishwanath Upadhyay, was charged by the king with formulating reforms to strengthen ''constitutional monarchy'' and a ''multi-party system''.

The panel is to present its document within 90 days.

Prime Minister Krishna Prasad Bhattarai said it was the first time the king had publicly talked about ''constitutional'' monarchy and a ''multi-party system'' as the basis for a constitution.

Bhattarai said the commission's draft will be submitted to the government which could make changes or reject it outright.

#90131d8790 05/11/1990 ~French/German News Agency

KINGSVILLE, TX (MAY 11) - President George Bush, declaring "it's time to open the final frontier," vowed Friday that an American would walk on Mars within 30 years, before July 20, 2019, the 50th anniversary of man's first step on the moon.

"Today, we're no longer just asking for the moon. We've been there. We're looking further, to carry the American adventure to wherever opportunity, curiosity and need will take us," Mr. Bush told graduating students at Texas Agricultural and Industrial University in Kingsville.

"And 30 years from now, I believe man will stand on another planet," said Mr. Bush, proclaiming "a new age of exploration" that echoed across 29 years a vision expounded by former president John F. Kennedy.

In a May 25, 1961, speech to Congress, Mr. Kennedy gave new impetus to the U.S. space program by solemnly declaring that in 10 years a man would walk on the moon. Barely more than eight years later, on July 20, 1969, Apollo 11 landed on the moon and Neil Armstrong took the historic step.

Mr. Bush was less ambitious in setting his timeframe. "I believe that before Apollo celebrates the 50th anniversary of its landing on the moon, the American flag should be planted on Mars," he said.

He encouraged the students of Texas A and I, a university located near the Mexican border with a predominantly Hispanic student population, to join in the "golden age of space" and to go "as far as your dreams can soar."

In July 1989, to mark the 20th anniversary of man's first step on the moon, Mr. Bush breathed new life into the National Space and Aeronautics Administration (NASA) program, still in shock after the Challenger disaster, by announcing three ambitious objectives: to put the space station Freedom in orbit before the century's end, to establish a permanent base on the moon, and to send a manned space mission to Mars. But he had not set a deadline on the Mars expedition.

Responding to criticism that his goals were not supported by funding allocations, Mr. Bush said that his budget proposal for fiscal year 1991 was positive proof of U.S. determination to have an active, enthusiastic and continued presence in space.

The president has asked Congress for 15.2 billion dollars for the space program, a hike of 24 per cent over this year's budget and a higher increase than any for any other budget item.

Because of the enormous financial burden entailed by a mission to Mars, the United States has also begun talks with the Soviet Union, Japan and Western European countries the possibility of a joint mission. The Soviets have expressed interest.

Mr. Bush emphasized that an ambitious space program would inspire technological developments, create jobs and improve mathematics and science studies.

"It's time to open the final frontier," he said. "Each time we go to the frontier and beyond, we bring back more than we hoped for. This time we have the chance to bring back more than we can possibly imagine."

LIMA (MAY 11) - Suspected leftist rebels torched six city buses in Lima and wounded one of the pasengers, while a bystander was injured in a bank bomb blast, police said Friday.

The president of the state-owned municipal bus company said the buses were set on fire Thursday after the driver and passengers were forced out at gunpoint. He estimated losses at dlrs 420,000.

One of the passengers was shot after he tried to resist, police said.

No group immediately claimed responsibility for the attack, which came a day after independent bus drivers who cover 90 per cent of Lima's urban routes held a 24-hour wildcat strike to demand a fare increase.

One state-owned bus was set on fire during the stoppage.

Meanwhile, another person was wounded when a bomb was hurled at a bank branch office in the Lima suburb of San Miguel, police said.

Two leftist rebel groups, the Maoist "Shining Path" and the Tupac Amaru Revolutionary Movement are active in Peru, where political violence has claimed some 20,000 lives over the past ten years.

NEW DELHI (MAY 11) XINHUA - TALKS FOR REPATRIATION OF THE BANGLADESH CHAKMA REFUGEES ENDED IN INDIA TODAY INCONCLUSIVELY.

THE CHAKMAS REFUGEES OBJECTED TO NEGOTIATE WITH A BANGLADESH DELEGATION BECCAUSE IT REFUSED TO ACCEPT THEIR MEMORANDUM.

THE 14-MEMBER BANGLADESH DELEGATION ARRIVED IN AGARTALA, CAPITAL OF INDIA'S NORTHEAST STATE OF TRIPURA, ON THURSDAY (MAY 10) TO CONVINCE THE CHAKMAS WHO HAVE BEEN STAYING THERE FOR THE PAST FOUR YEARS TO RETURN TO BANGLADESH.

ABOUT 60,000 CHAKMA REFUGEES HAVE BEEN SHELTERED AT SIX CAMPS AT SABROOM IN SOUTH TRIPURA SINCE MAY 1986. THE REFUGEES FLED ACROSS THE BORDER INTO INDIA DUE TO FREQUENT ATTACKS BY ARMED TRIBAL REBELS KNOWN AS "SHANTI BAHINI" (PEACE ARMY).

THE SHANTI BAHINIS, MOSTLY FROM THE CHAKMA TRIBE, HAVE BEEN FIGHTING A BUSH WAR SINCE 1973 FOR SELF-RULE IN THE CHITTAGONG HILL TRACTS COVERING AN AREA OF ABOUT 14,000 SQUARE KILOMETERS.

A SPOKESMAN OF THE REFUGEES WAS QUOTED BY THE PRESS TRUST OF INDIA TODAY AS SAYING THAT THEY WILL AGREE TO RETURN TO THE CHITTAGONG HILL TRACTS IF THE BANGLADESH GOVERNMENT CONCEDED TO THEIR 11-POINT CHARTER OF DEMANDS.

THE DEMANDS, AMONG OTHER THINGS, INCLUDE DISSOLUTION OF THE PRESENT

AUTONOMOUS DISTRICT COUNCIL, WITHDRAWAL OF THE ARMY FROM THE CHITTAGONG HILL TRACTS AND COMPENSATION FOR THEIR LOSS OF LAND AND OTHER PROPERTY.

LONDON (MAY 11) XINHUA - ARGENTINA'S FIRST AMBASSADOR TO BRITAIN SINCE THE 1982 MALVINAS (FALKLAND) ISLANDS WAR ARRIVED IN LONDON TODAY AND PLEDGED EFFORTS TOWARD BETTER RELATIONS BETWEEN THE TWO COUNTRIES.

THE POST WAS A "CLEAR INDICATION OF THE NEW RELATIONSHIP BETWEEN MY COUNTRY AND BRITAIN," MARIO CAMPORA, A 59-YEAR-OLD CAREER DIPLOMAT, SAID AS HE ARRIVED AT HEATHROW AIRPORT.

THE NEW AMBASSSADOR SAID: "WE HAVE TO RENEW SOME OF THE DEEP LINKS THAT EXISTED BETWEEN OUR TWO COUNTRIES FOR MORE THAN A CENTURY AND A HALF."

"THE MALVINAS ARE STILL THERE BUT WHAT IS IMPORTANT IS THAT THE TWO COUNTRIES HAVE ESTABLISHED DIPLOMATIC RELATIONS," SAID CAMPORA, WHO WAS NUMBER TWO IN THE ARGENTINE FOREIGN MINISTRY.

HE SAID PRESIDENT CARLOS MENEM HAD INSTRUCTED HIM TO IMPROVE RELATIONS IN EVERY POSSIBLE AREA.

BRITAIN HAS APPOINTED HUMPHREY MAUD, 56, TO BE AMBASSADOR TO BUENOS AIRES. MAUD, NOW HIGH COMMISSIONER IN NICOSIA, IS EXPECTED TO TAKE UP HIS POST IN JULY.

BRITAIN AND ARGENTINA RESTORED DIPLOMATIC TIES IN FEBRUARY, NEARLY EIGHT YEARS AFTER THE TWO COUNTRIES FOUGHT THE WAR FOR THE SOUTH ATLANTIC ISLANDS.

CARACAS (MAY 11) XINHUA - VENEZUELAN PRESIDENT CARLOS ANDRES PEREZ THURSDAY ASKED THE ORGANIZATION OF AMERICAN STATES (OAS) TO HELP EASE TENSIONS BETWEEN THE UNITED STATES AND CUBA TO ALLOW THE FULL INTEGRATION OF THE ISLAND NATION INTO THE LATIN AMERICAN COMMUNITY.

ACCORDING TO VENEZUELA'S OFFICIAL NEWS AGENCY VENPRES, ANDRES PEREZ MADE THE REQUEST AT A PRESS CONFERENCE IN TEGUCIGALPA, BEFORE ENDING HIS OFFICIAL TWO-DAY VISIT TO HONDURAS.

HE SAID IT WAS ESSENTIAL FOR BOTH WASHINGTON AND HAVANA TO AGREE TO

HOLDING TALKS BEFORE MOUNTING TENSIONS COULD BE DECREASED.

IN REGARD TO AGREEMENTS SIGNED BETWEEN VENEZUELA AND HONDURAS, ANDRES PEREZ SAID THE DOCUMENTS DEALT WITH SCIENTIFIC AND TECHNOLOGICAL COOPERATION IN THE FIELD OF PETROLEUM RESEARCH.

ACCORDING TO THE AGREEMENTS, VENEZUELA WILL AID HONDURAS BY SENDING SPECIALISTS IN THE FIELD OF ENERGY. IN ADDITION, BOTH COUNTRIES HAVE DECIDED TO EXPAND COOPERATION INTO THE REALM OF ENVIRONMENTAL PROTECTION.

VENEZUELA HAS ALSO AGREED TO PROPOSE TO THE MEXICAN GOVERNMENT THAT THEY EXPAND THE SAN JOSE ACCORD, UNDER WHICH PETROLEUM IS SUPPLIED TO CENTRAL AMERICAN COUNTRIES ON PREFERENTIAL TERMS, TO MEET THE GROWING NEEDS OF THE COMMUNITIES IN THIS REGION.

ANDRES PEREZ ALSO CONFIRMED THAT ON MAY 16 CARACAS WILL HOST PEACE TALKS BETWEEN THE SALVADORAN GOVERNMENT AND THE REBEL FARABUNDO MARTI NATIONAL LIBERATION FRONT (FMLN).

ANDRES PEREZ LEFT HONDURAS LATE THURSDAY TO RETURN TO VENEZUELA WHERE HE WILL MEET WITH BOLIVIAN PRESIDENT JAIME PAZ ZAMORA.

BUENOS AIRES (MAY 11) XINHUA - ARGENTINE PRESIDENT CARLOS MENEM MET THURSDAY WITH THE COMMANDER OF THE FRENCH GENDARMERIE'S MILITARY SCHOOL, GENERAL JEAN CLAUDE MARION, TO STUDY A COOPERATION ACCORD BETWEEN THE TWO NATIONS THAT INCLUDES, AMONG OTHER THINGS, THE FIGHT AGAINST DRUG TRAFFICKING.

THE MEETING TOOK PLACE AT THE GOVERNMENT HOUSE AND WAS ALSO ATTENDED BY ARGENTINA'S DEFENSE MINISTER, HUMBERTO ROMERO, THE FRENCH AMBASSADOR TO ARGENTINA, PIERRE DECAMPS, AND THE DEPUTY DIRECTOR GENERAL OF ARGENTINA'S GENDARMERIE, GENERAL JORGE SUERZ.

ROMERO TOLD REPORTERS THURSDAY THAT THE ACCORD WILL BE SIGNED WITHIN A MONTH. ROMERO ALSO CALLED THE DOCUMENT "SIGNIFICANT," SAYING "THE INTERACTION BETWEEN THE SECURITY FORCES OF BOTH COUNTRIES IS GOING TO PERMIT MORE EFFICIENT FIGHTING AGAINST DRUG TRAFFICKING AND OTHER TYPES OF DELINQUENCY."

ROMERO ALSO SAID, "THIS VISIT IS HIGHLY IMPORTANT" FOR ARGENTINA, AND ADDED THAT IT "HELPS IMPROVE AND BOLSTER THE NEW IMAGE OUR COUNTRY IS GIVING THE WORLD, AN IMAGE OF PEACEFUL COEXISTENCE, OF OPEN BORDERS AND GOOD RELATIONS BETWEEN NATIONS."

THE COOPERATION ACCORD BETWEEN ARGENTINA AND FRANCE INCLUDES THE EXCHANGE

OF INFORMATION, TECHNIQUES AND TECHNOLOGY USED IN IDENTIFICATION AND OTHER ELEMENTS OF THE SECURITY FIELD.

ADDIS ABABA (MAY 11) XINHUA - ETHIOPIAN BUSINESSMEN WILL PAY LESS TAXES ON THEIR PROFITS UNDER A SPECIAL DECREE ANNOUNCED HERE TODAY BY THE FINANCE MINISTRY TO AMEND THE PREVAILING INCOME TAX LAW.

UNDER THE NEW DECREE APPROVED BY THE STATE COUNCIL, THE MAXIMUM BUSINESS INCOME TAX RATE WILL BE 59 PERCENT INSTEAD OF THE CURRENT 89 PERCENT.

THE RATE OF INCOME TAX PAYABLE ON DIVIDENDS OF SHARE HOLDERS WILL BE DROPPED TO 10 PERCENT FROM THE PRESENT 25 PERCENT.

THE FINANCE MINISTRY SAID THAT ALTHOUGH THE MEASURES WILL BRING DOWN GOVERNMENT REVENUE FOR SOMETIME, IT IS NECESSARY TO GIVE AN INCENTIVE TO INVESTORS IN ORDER TO CREATE MORE JOBS AND ACTIVATE THE ECONOMY.

THE TAX RATE REDUCTION AIMS AT ENCOURAGING "PRIVATE CAPITALISTS" TO INVEST IN VARIOUS ECONOMIC SECTORS, PARTICULARLY IN THE HOTEL SERVICES AND SMALL-SCALE INDUSTRIES, SAID THE MINISTRY.

THE NEW MEASURE SHOWS CLEARLY THE GOVERNMENT'S INTENTION TO STRENGTHEN THE PRIVATE ECONOMY, IT ADDED.

ADDIS ABABA (MAY 11) XINHUA - A TOTAL OF 10,960 TONS OF RELIEF FOOD HAVE BEEN TRANSPORTED TO DROUGHT-STRICKEN AFEAS IN THE NORTHERN ETHIOPIAN REGIONS OF WOLLO AND TIGRAI SINCE ETHIOPIAN CHURCH ORGANIZATIONS LAUNCHED A RELIEF OPERATION ON MARCH 20.

IN AN INTERVIEW WITH THE ETHIOPIAN TELEVISION TODAY, CHAIRMAN OF THE EMERGENCY RELIEF PROGRAM DR. SOLOMON GIDADA SAID THAT THE PROGRAM HAS BEEN CARRIED OUT BY THE ETHIOPIAN ORTHODOX CHURCH, THE ETHIOPIAN EVANGELICAL CHURCH MAKANE YESUS AND THE ETHIOPIAN CATHOLIC CHURCH.

HE DISCLOSED THAT A PLAN HAS BEEN WORKED OUT TO FEED 800,000 FAMINE VICTIMS IN TIGRAI AND 211,000 OTHERS IN WOLLO EVERY MONTH.

HE HOWEVER SAID THAT THE OPERATION HAS BEEN HINDERED BY THE LACK OF TRANSPORT VEHICLES AND THE DELAY IN REPAIRING ROADS AND BRIDGES DAMAGED IN THE FIGHTING BETWEEN GOVERNMENT TROOPS AND REBEL FORCES.

BOTH THE GOVERNMENT AND THE REBELS IN TIGRAI HAVE AGREED TO ALLOW THE

CHURCHES TO SHIP RELIEF AID TO THE DROUGHT-STRICKEN AREAS THROUGH EMBATTLED AREAS. HOWEVER, ERITREA REMAINS INACCESSIBLE TO RELIEF AGENCIES BECAUSE OF THE ESCALATING WAR BETWEEN GOVERNMENT FORCES AND THE REBELS OF THE ERITREAN PEOPLE'S LIBERATION FRONT.

ABOUT FOUR MILLION ETHIOPIANS, MOST OF THEM IN WOLLO, TIGRAI AND ERITREA, NOW NEED RELIEF AID AS A RESULT OF LAST YEAR'S SEVERE DROUGHT.

#90131k0116 05/11/1990 ~Japanese News Agency

TOKYO (MAY 11) KYODO - WITH U.S. PRODUCER PRICES ON THE DECLINE, CHANCES ARE DIMINISHIN THAT U.S. MONETARY AUTHORITIES WILL TIGHTEN THEIR GRIP ON CREDIT IN THE NEAR FUTURE, BANK OF JAPAN (BOJ) SOURCES SAID FRIDAY.

THE REMARKS WERE IN REACTION TO A SEASONALLY ADJUSTED 0.3 PERCENT FALL IN U.S. PRODUCER PRICES OF FINISHED GOODS IN APRIL, ANNOUNCED BY THE U.S. GOVERNMENT EARLIER IN THE DAY.

''THE DATA UNDERSCORES THE FACT THAT THE ONGOING SLOWDOWN OF THE U.S. ECONOMY IS AFFECTING THE PRICE TREND THERE,'' THE SOURCES SAID.

BUT THEY SAID THE FEDERAL RESERVE BOARD, THE U.S. CENTRAL BANK, IS NOT LIKELY TO QUICKLY SHIFT TO AN EASIER CREDIT POLICY BECAUSE OF THE PRICE FIGURES ALONE.

ASKED ABOUT THE IMPACT OF THE DATA ON THE FOREIGN-EXCHANGE MARKET, THEY SAID RECEDING ANTICIPATION OF HIGHER U.S. INTEREST RATES WILL LEAD TO A FURTHER RALLY OF THE YEN. THE JAPANESE CURRENCY HAS BEEN PICKING UP GROUND IN RECENT SESSIONS AFTER MONTHS OF DOWNSLIDE IN ITS VALUE AGAINST THE U.S. DOLLAR.

THE SOURCES SAID THE FEDERAL RESERVE BANK OF NEW YORK MIGHT SUPPORT THE DOLLAR THROUGH DOLLAR-BUYING INTERVENTION IF IT BREAKS THROUGH THE 150 YEN LINE.

A SIMILAR OUTLOOK ON U.S. INTEREST RATES WAS EXPRESSED BY JAPANESE FINANCIAL MARKETS.

MARKET ANALYSTS SAID THAT WITH THE PRICE DOWNSWING POINTING TO U.S. ECONOMIC DECELERATION, EXPECTATIONS OF A U.S. CREDIT TIGHTENING, WHICH HAVE PROPPED UP THE DOLLAR SO FAR, WILL EVAPORATE.

THEY AGREED WITH THE BOJ SOURCES THAT THERE IS NO LIKELIHOOD OF AN IMMEDIATE CREDIT RELAXATION IN THE UNITED STATES, NOTING THAT PRICES OTHER THAN THOSE OF FOODS AND ENERGY ARE STILL INFLATED. THE U.S. GOVERNMENT ANNOUNCED A 0.2 PERCENT RISE IN PRODUCER PRICES EXCLUDING THE VOLATILE FACTORS OF FOODS AND ENERGY.

THOUGH THEY BELIEVE THE YEN'S COURSE HAS FINALLY BEEN REVERSED, THE ANALYSTS RULED OUT THE POSSIBILITY OF A FURTHER RAPID UPSURGE OF THE YEN

AFTER ITS RECENT DRAMATIC RECOVERY.

#90131p3262 05/11/1990 ~PR Newswire
SALT LAKE CITY (MAY 11) PR NEWSWIRE - American Stores Company (NYSE: ASC) announced today that it is considering the possible sale of Buttrey Food and Drug, a division of American's wholly owned subsididary American Food and Drug Inc. Buttrey is headquartered in Great Falls, Mo. and operates 44 supermarket and combination food and drug stores in the states of Montana, Idaho, Washington, Wyoming and North Dakota.

The company said it is considering marketing Buttrey due to number of factors. While Buttrey's sales and earnings have improved significantly, Buttrey is not year performing at the levels desired by the company. Furthermore, the company, said, the continuing litigation with the California Attorney General, which has prohibited American from merging Lucky and Alpha Beta, has forced the company to review all its marginal performing assets for possible sale.

The company stated that Shearson Lehman Hutton Inc., who is acting as the exclusive agent in soliciting bids for Buttrey, has indicated that there are a number of parties interested in the purchase, including an employee group led by current management.

American said that it will wait to review the bids for Buttrey before making a final decision to sell the chain. In the wake of the Supreme Court decision, which will cause American Stores Company to return to federal court for an antitrust trial, the company will continue to review for possible sale all of its marginal and underperforming assets.

BOCA RATON, FL (MAY 11) PR NEWSWIRE - Arvida Company, a national developer of premier resort, residential and business communities, has purchased Heathrow, an 1,800-acre master-planned community in Central Florida.

The acquisition of Heathrow represents the third in a series of major purchases by the 32-year-old Boca Raton, Fla.-based development firm. Arvida recently purchased SouthRidge Lakes, a 300-acre residential community in the Dallas-Forth Worth area; and Talega, a 2,300-acre, multi-use site in San Clemente, Calif.

"This acquisition is consistent with our plans to substantially expand the company," said Roger Hall, Arvida's chairman and chief executive officer.

This commitment to growth was established in 1987 when Arvida was purchased for $400 million by an affiliate of JMB Realty Corp. in Chicago. With the financial backing of JMB, which manages nearly $25 billion in real estate assets, Arvida has been expanding its community development activity nationally over the past three years.

WASHINGTON (MAY 11) PR NEWSWIRE - The U.S. Navy's award to Bay Tankers of a multi-year contract to operate eight Fast Sealift Ships shows how good labor-management relations can benefit union members, their employers and federal taxpayers, said President Raymond T. McKay of District 2 Marine Engineers Beneficial Association - Associated Maritime Officers, AFL-CIO (District 2 MEBA-AMO).

McKay was commenting on Thursday's award of a contract by the Navy's Military Sealift Command (MSC) to Bay Tankers after competitive bidding. The contract is for three years, with two possible one-year extensions. Bay Tankers previously had operated four of the ships under contract to the MSC.

"I am extremely gratified that the cooperative effort between our union and our employer was instrumental in winning this contract," McKay said. "It means stable jobs at decent wages and working conditions for our licensed officer members, good business for our employer and, for the MSC, millions of dollars in reduced operating costs.

"The contract award represents yet another example of the benefits of cooperative labor-management efforts in the maritime trades."

The specialized ships provide fast logistical support to military forces operating away from American shores.

District 2 MEBA-AMO represents licensed deck and engineer officers on ocean-going, Great Lakes and inland waterways vessels under the American flag.

CONTACT: Jerome E. Joseph, executive vice president, Marine Engineers Beneficial Association, 202-479-1166; or Alan Goodfader of Murphy and Demory, 202-785-3323, for the Marine Engineers Beneficial Association.

GREENWICH, CT (MAY 11) PR NEWSWIRE - Finevest Foods, Inc. (NYSE: FVF), today announced that it had signed a letter of intent for a private placement offering of $30,000,000 in aggregate principal amount of its convertible subordinated notes due 1998 (the "notes"). The notes are expected to be sold in July with $27,000,000 to be purchased by the Airlie Group, L.P., and the remaining $3,000,000 to be purchased by a company affiliated with William R. Berkley, the company's chairman of the board and its largest shareholder.

The notes will bear interest at an annual rate of 6 percent for the first 2-1/2 years, 6-1/2 percent for the following 2-1/2 years and 7 percent for the final three years of their term. The notes will be convertible into common stock of Finevest Foods at a rate of $7.75 per share, subject to adjustment, and will be subordinated to the company's senior debt. Terms of the transaction were agreed to in principle on Wednesday, May 9, and the closing price for the company's common stock on the New York Stock Exchange on that date was $7.125 per share.

Issuance of the notes is subject to execution of definitive agreements, shareholder approval, the consent of the company's lending banks and regulatory filings related to the transaction. On May 10, 1990, the closing price for Finevest Foods common stock on the New York Stock Exchange was $8.125 per share.

Finevest Foods, Inc., is a leading wholesale distributor of frozen foods and dairy products in the southeastern United States and is one of that region's largest processors of fluid milk, ice cream and other related dairy products.

CONTACT: Mel P. Melsheimer, chief financial officer of Finevest Foods, 203-629-8014; or Steve Barach of G.A. Kraut Company, 212-696-5600, for Finevest Foods.

ATLANTA (MAY 11) PR NEWSWIRE - For Priscilla Knight, owning her own home has always been a dream.

On Saturday, May 12, Priscilla's dream will come true, thanks to Southern Bell and Habitat for Humanity International.

Priscilla and her two sons will move into their new house at 910 Coleman St., on that day. They will be the first in Atlanta to benefit from Southern Bell's efforts as the first official corporate sponsor of Habitat

for Humanity.

Priscilla, who had lived in the same rented house all her life, was delighted to learn that Southern Bell and its employees would contribute half the cost of building her house. And a team of employees would even help her build it.

The project began when Southern Bell agreed to contribute 25 percent of the cost of each house as seed money with the understanding that employee teams raise an additional 25 percent. Habitat for Humanity provides the remaining 50 percent of the cost through donations from individuals, churches, businesses and foundations.

The company team, which organized themselves as PATH (Perimeter Acting Together for Habitat), set out to raise enough money to build one house. The team sponsored several fundraisers and raised enough to help build four houses!

Construction began on Priscilla's house on March 17. And each Saturday for the next six weeks, a team of 25 Southern Bell employees did everything from putting up the walls and roof, to the final touches of painting and planting trees. The team even installed a basketball post and net made from an old telephone pole.

Southern Bell is the first official corporate sponsor of Habitat for Humanity. Across Southern Bell's four-state region, which includes Georgia, Florida, North Carolina and South Carolina, employee teams, working with Habitat affiliates, raise money through local projects and volunteer their time and talents to help build the houses. Local Habitat for Humanity affiliates retain overall responsibility for the projects, including site selection and financial management.

Thanks to the enthusiasm and support from Southern Bell employees, the Communications Workers of America (CWA) and the Telephone Pioneers of America, PATH is now looking for at least two more Atlanta sites on which to build more houses for low-income families.

LAMBERTVILLE, NJ (MAY 11) PR NEWSWIRE - York Luggage announced today that Frank Alfieri and Jerome Lowengrub, senior financial and international executives, have become major investors in the corporation and part of the top management team. An affiliate of Manufacturers Hanover Trust Company also joined as a major investor.

The successful integration of York Luggage into York Partners L.P. became effective April 5 with Alfieri and Lowengrub serving as co- chairmen. Both executives join partners Marvin Schwartzstein, Jerome Popkin, Andrew Nitkin and Harvey Rimmerman, who will continue in their current top management positions with the company.

The new partnership creates growth opportunities in the U.S. market and Europe which calls for an expansion of capital and management resources, according to Alfieri. "The resources made available through this transaction position York as a major player in the luggage industry," Alfieri said. "York is now prepared to meet the worldwide business challenges in the 1990s and maximize the market potential of its luggage license agreements with companies such as Adolfo, Christian Dior, Diane Von Furstenberg, Jordache, Members Only, and Perry Ellis."

York manufactures luggage for the business and leisure traveler and currently ranks third in luggage sales nationwide. York Luggage was founded in 1935 and has manufactured and distributed luggage and luggage related products through national and regional chains, department stores, discount clubs and specialty stores, Its corporate headquarters are located at 312 Route 179, Lambertvile, NJ 08530.

BETHESDA, MD (MAY 11) PR NEWSWIRE - Federal Realty Investment Trust (NYSE: FRT) reported today that funds from operations for the three months ended March 31, 1990 increased $1 million to a record $6.2 million compared to $5.2 million in the first quarter of 1989.

This represents a 19 percent increase in funds from operations, but with the additional shares outstanding from the October 1989 stock offering, funds from operations on a per share basis remained at 37 cents per share. Revenues rose to $21.6 million in the first three months of 1990 compared

to $20.7 million in 1989, and net income increased 15 percent, rising to $1.6 million (10 cents per share) from $1.4 million (10 cents per share) in the first quarter of 1989.

In making the announcement, Steven J. Guttman, president and chief executive officer, stated, "These first quarter results are consistent with our expectations. Despite a softening retail market, our portfolio of prime properties continues to perform well, fueling the steady growth in our funds from operations."

Federal Realty is an equity real estate investment trust which concentrates on acquiring older shopping centers in prime locations. Trust properties are located in 10 states in the mid-Atlantic region between the New York metropolitan area and Richmond, Va

#90131p3320 05/11/1990 ~PR Newswire

KING OF PRUSSIA, PA (MAY 11) PR NEWSWIRE - The Nuclear Regulatory Commission staff has cited the New York Power Authority (NYPA) for alleged violations of NRC radiation protection requirements that led to the overexposure of an employee and contamination of several workers at NYPA's J. A. Fitzpatrick Nuclear Power Plant near Oswego, N.Y.

The staff proposes to fine the utility $75,000. The radioactive material involved in the incident was not a product of the nuclear plant's operation, but was an industrial isotope, sodium-24, that a contractor employee was using as a "tracer" to make water flow measurements in tests

of a piping system. The unplanned exposure occurred on March 8, 1990, to a technician monitoring the preparation of a solution to be used to inject the radioactive material into the plant system. After the original container was emptied, the technician handled the container cap with his gloved right hand, rather than with a pair of tongs or tweezers, and some of the Na-24 that had been on the cap got on his glove. Then, in removing his gloves, his left thumb came in contact with the contaminated glove. It is believed the worker received an exposure to the surface tissues of his left thumb of 48.8 rem. NRC regulations limit extremities' exposure to 18.75 rem per quarter year. Other workers became contaminated as they were helping to decontaminate the first worker. The NRC staff alleges that plant management had not adequately planned and then supervised the activities.

In a letter informing the company of these alleged violations of NRC requirements, Mr. Thomas T. Martin, Regional Administrator of NRC Region I, said, "These failures represent a breakdown in the management control of the radiation safety program at your facility and demonstrate the need for improved planning and control of radiation protection activities, and particularly for those activities involving non-routine, radiologically significant tasks."

Although the penalty for these violations is normally $50,000, the penalty was increased because of previous problems the licensee has had in the control and oversight of non-routine, radiologically significant tasks.

NYPA has been given 30 days to either pay the proposed fine or to request in writing that part or all of it be withdrawn, giving its reasons for any such request. The utility also has been given 30 days to admit or deny the alleged violations, to give its reasons for them if admitted, to describe the actions it has taken or plans to take to prevent their happening in the future, and to give the date by which it expects to be in full compliance with NRC requirements.

The State of New York has been informed of this proposed enforcement action.

CONTACT: Karl Abraham of the NRC, 215-337-5330.

NASHVILLE, TN (MAY 11) PR NEWSWIRE - Quorum Health Group, Inc. and Quorum Health Resources, Inc., were announced today as the new names for HMC Holdings Corporation, Inc., and HCA Management Company, Inc., respectively effective June 1, 1990. The announcement was made today by Jim Dalton, CEO of HMC Holdings Corp., and S. Douglas Smith, President of HCA Management Company and Vice-Chairman of HMC Holdings.

HMC Holdings Corp. was formed in June of 1989 by HCA Management Company together with financial partner Welsh, Carson, Anderson and Stowe, to facilitate the purchase of the management company from Hospital Corporation of Amercia. Use of the HCA Management Company name for one year was part of the purchase agreement.

"This is an exciting time for our company," said Smith. "It is a pleasure to announce the new names, and it is even more exciting to consider what our company now has to offer the healthcare market."

"We are organized and resourced to be a truly contemporary healthcare company," he said. "The timing is perfect. We have the operations, management and consulting expertise of Quorum Health Resources; and the financial strength of Quorum Health Group. Together we can effectively meet the market's needs."

Dalton indicated that Quorum Health Group will focus its efforts on equity opportunities, while Quorum Health Resources continues to focus on management and consulting situations.

"Our primary business is still management and consulting. However, the funds generated through these business lines, and the financial resources of Welsh, Carson, Anderson and Stowe, make it feasible for us to consider equity opportunities," said Dalton.

"The operational expertise, economies of scale, continuity of management and financial strength we offer is available to hospitals in a variety of

configurations," said Dalton. "We can now offer our expertise and resources through management by contract, consulting, joint venture, lease or ownership relationships."

HMC Holdings Corp. and HCA Management Company are headquartered in Nashville, Tennessee. HCA Management Company manages or has consulting relationships with more than 230 hospitals nationwide and in Canada.

SAN DIEGO (MAY 11) PR NEWSWIRE - Burnham Pacific Properties Inc. (NYSE: BPP), a San Diego-based equity real estate investment trust (REIT), today announced it will pay a second quarter dividend of 34 cents a share, payable June 29, 1990, to shareholders of record on June 22, 1990 -- the company's 97th consecutive quarterly payout.

Burnham Pacific also announced revenues for the first quarter ended March 31, 1990 rose to $5,814,000, from $4,949,000 a year earlier. The company reported net income of $670,000 for the quarter compared to $857,000 in the same period a year ago. Cash available for dividends increased to $1,965,000 in the quarter, compared to $1,897,000 last year.

The company also reported total assets rose to $185,434,000, from $144,668,000 in the comparable quarter a year ago.

Burnham Pacific owns and manages 19 commercial real estate properties in San Diego, Orange and Los Angeles Counties and is affiliated with John Burnham and Company, a 99-year-old San Diego-based real estate, insurance and mortgage banking firm.

#90131p3346 05/11/1990 ~PR Newswire

LAPLACE, LA (MAY 11) PR NEWSWIRE - Bayou Steel Corp. (AMEX: BYX) today reported lower earnings for its second fiscal quarter ending March 31.

Revenues for the 1990 second fiscal quarter were $50,176,000 as compared to $46,488,000 for the 1989 second fiscal quarter. Net income amounted to $191,000 or $0.01 per common share, compared with $3,417,000 or $.027 per common share, for the same periods.

Steel shape shipments decreased to 91,794 tons in the 1990 second fiscal quarter from 108,588 tons in the 1989 second fiscal quarter, while billet shipments increased to 90,109 tons from 29,089 tons in the same period last year.

For the six month period ended March 31, revenues were $95,303,000 compared with $91,512,000 for the 1989 period. Net income for the same period amounted to $997,000 or $0.08 per common share, compared with $5,110,000 or $0.40 per common share for the prior year.

Steel shape shipments decreased to 190,537 tons for the six months ended March 31 from 207,300 tons for the prior year period. Billet shipments doubled to 143,805 tons from 70,003 tons during the same period last year.

In the 1990 first quarter, the company received approximately $.9 million in net proceeds from a favorable settlement of a lawsuit. In the 1990 second quarter, the company received nearly $1.0 million from the power company as the result of a settlement of a lawsuit between the power company and its supplier.

Bayou Steel Corp. operates a steel minimill producing structural steel products. Located on the Mississippi River, the company operates four stocking locations along the inland waterway system. The common stock of Bayou Steel Corp. is traded on the American Stock Exchange under the symbol "BYX."

TULSA, OK (MAY 11) PR NEWSWIRE - Unit Corporation (NYSE: UNT) announced today that its proposed 1,000,000 share convertible exchangeable preferred stock offering has been withdrawn from the market.

Unit President John Nikkel stated that the offering was withdrawn because of the significant common stock price declines during the registration period. At current common stock prices, he said the offering terms are excessively dilutive to existing shareholders and not consistent with the company's objectives to manage long-term asset value.

Unit Corporation is a Tulsa-based, publicly held energy company engaged in oil and gas exploration, production, and contract drilling. Unit's common shares are listed on the New York Stock Exchange under the symbol UNT.

#90131p3357 05/11/1990 ~PR Newswire

MACON, GA (MAY 11) PR NEWSWIRE - Charter Medical Corporation today reported a net loss for the second quarter ended March 31, 1990, of $53.7 million compared to $1.5 million recorded in the same period a year ago.

Operating income (net revenue less operating expenses) in the second quarter of fiscal 1990 was $6.8 million compared to $78.4 million in the same period of the prior year. Net revenues in the second quarter of fiscal 1990 were $299.8 million compared to $298.7 million in the same period of the prior year.

During the quarter, the Company discovered and corrected inaccurate recording of previously reported contractual allowances, bad debts and expense accruals. As a result of such corrections and revised estimates of the net realizable value of accounts receivable, the Company reduced operating income by approximately $35 million. In addition, the Company abandoned certain development projects and lost a lawsuit resulting in an unusual charge to operating income of $11.2 million. Operating income for the quarter ended March 31, 1990, before the adjustment was $52.9 million. This is less than anticipated primarily because of reduced patient days in established hospitals (those operated by the Company for more than one year), increased contractual allowances and bad debts, and increased operating costs, including marketing expenses.

For the six months ended March 31, 1990, operating income was $67.0 million compared to $142.4 million in the same period of the prior year. Operating income for the six months ended March 31, 1990, before the adjustment was $113.2 million. Net revenue in the first half of fiscal 1990 was $606.4 million compared to $574.4 million in the same period of the prior year.

Charter Medical Corporation is an international healthcare provider of psychiatric, addictive disease and medical treatment services. The Company owns and operates 86 psychiatric and 13 general hospitals with 9,526 beds in the United States and Europe.

PHILADELPHIA (MAY 11) PR NEWSWIRE - Laventhol & Horwath (U.S.) issued this morning the following statement, clarifying a Dow Jones wire story (5-10-90, 5:17 EDT) titled "Price Waterhouse Canada Mulls Merger With Laventhol Partners":

Laventhol & Horwath (U.S.), the nation's seventh largest accounting and consulting firm, has confirmed that one of its Canadian affiliates -- in Toronto -- has announced its intention to merge with Price Waterhouse Canada.

Edward Suarez, a national partner with the U.S. firm, explained that Laventhol & Horwath/Toronto, is one of four affiliate firms in Canada of the Horwath International network.

"Although they have the same name as us, the Toronto office is a separate firm of Horwath International. We still have three other affiliates in Canada -- Vancouver, Winnipeg and Montreal," he said.

"The decision to go with Price Waterhouse is a Canadian issue, and one that does not affect the organization of the U.S. firm. We understand Toronto has been experiencing a serious 'brain drain' and that may have been one of the reasons for the merger talks," said Suarez.

Suarez said he believed Horwath International would be seeking another affiliate in Toronto.

Laventhol & Horwath (U.S.), headquartered in Philadelphia, has 51 U.S. offices and annual revenues of $345.2 million. It is represented in 64 countries through its affiliation with Horwath International, which has annual revenues of $685 million.

ROCKVILLE, MD (MAY 11) PR NEWSWIRE - GE Information Services (GEIS), a leading provider of global electronic messaging systems, has announced the availability of an optional Corporate Logo Feature for FAX (facsimile transmission) messages sent by its QUIK-COMM System, a global electronic messaging service.

GEIS' QUIK-COMM System to FAX capability, which was announced in February 1989, provides QUIK-COMM System users, including connected users of popular Local Area Network, micro-, mini- and mainframe-based Office Automation and Electronic Mail systems, with the capability to reach outside their own electronic mail community and communicate electronically by FAX with their clients.

The new Corporate Logo feature, which is believed to be unique in the electronic messaging industry, provides a company with a capability to have its own graphic logo printed on the first page of all QUIK-COMM System FAX messages sent to its clients' FAX phone numbers.

Cost in the United States to set up a Corporate Logo for the FAX capability of the QUIK-COMM System is $400, with a monthly fee per logo of $30. For further information on the Corporate Logo feature for the QUIK-COMM System to FAX capability, please call GE Information Services at 1-800-433-3683 or contact your local GEIS salN3/8office.

Under its BusinessConnect interface capability which allows users on various electronic messaging systems to exchange messages with users on other remote messaging systems, including the QUIK-COMM System, GEIS provides the following commercial offerings:

-- IBM PROFS Connector -- IBM DISOSS Connector
-- DEC Connector, supporting ALL-IN-1, VMS Mail and Message Router -- Wang OFFICE Connector
-- IBM AS/400 Office and System/3X Connector
-- 3Com 3+Mail LAN Mail System Connector
-- cc:Mail LAN Mail System Connector

GE Information Services, a division of General Electric Company, U.S.A. (NYSE: GE), is headquartered in Rockville, Md. GEIS is a leading provider of private electronic messaging, EDI (electronic data interchange), and business communications and processing systems via its worldwide teleprocessing network.

#90131p3383 05/11/1990 ~PR Newswire

PALM SPRINGS, CA (MAY 11) PR NEWSWIRE - Educators can now have the benefits of international communications and learning placed at their students' fingertips, thanks to an innovative service from AT&T.

The offering, called the AT&T Learning Network, combines classroom curriculum with one of the first applications of electronic mail messaging for the education market.

AT&T demonstrated its application of AT&T Mail at the Computer-Using Educators (CUE) Conference here. The Learning Network program matches geographically diverse classrooms by curriculum interest and grade level to form a Learning Circle, in which students share ideas and information via AT&T Mail.

The program is designed to stimulate a collaborative learning experience. "It's an effective way to integrate telecommunications and computer technology into the curriculum," said Valerie Sarris, project manager, AT&T Learning Network. "Teachers say the AT&T Learning Network motivates students and develops basic skills," Sarris said.

AT&T has conducted trials of the service with classes throughout the U.S. and abroad in the United Kingdom, Australia, Canada, France, West Germany and the Netherlands. Current enrollment has grown to approximately 8,000 students in 300 classrooms.

The AT&T Learning Network uses computers, software, modems and AT&T Mail's shared electronic mailbox to tie together six to nine classrooms into an interactive learning circle. The curriculum, designed for grades 3 through 12, includes creative writing, geography, science, social studies and global issues.

Schools purchase a complete educational package from AT&T, including curriculum, software, and network usage for about $350 per semester. The AT&T Learning Network enrollment for the 1990-91 school year is expected to reach more than 500 school districts, across the country and around the world.

#90131p3384 05/11/1990 ~PR Newswire

SPRINGFIELD, MA (MAY 11) PR NEWSWIRE - Monarch Capital Corp. (NYSE: MON) today reported income from continuing operations of $2.7 million or $.30 per share for the first quarter ended March 31, 1990, compared to $1.6 million or $.13 per share, for the same period in 1989.

Net income was $2.7 million, compared to $5.7 million in the first quarter of 1989. The 1989 results include $4.1 million of income from Monarch-Narragansett and the company's real estate operations, which are now presented as discontinued operations.

Gordon N. Oakes Jr., chairman and president, said, "Increased variable products sales and reduced expenses led the way for the increased income from continuing operations."

Variable products pre-tax earnings were $10.5 million, compared to $6.8 million for the same period a year ago. First quarter variable life gross sales of $25.2 million were up from $15.8 million in the 1989 first quarter. Variable annuity sales reached $19.1 million for the quarter, up from $7.6 million from the first quarter of 1989.

Disability insurance pre-tax earnings for the first quarter were $2.5 million compared to $3.1 million for the first quarter of 1989, principally as a result of lower sales.

Pre-tax earnings from other insurance operations, including Monarch's supplemental insurance business, were $1.5 million, up from $1.2 million for first quarter 1989.

Oakes also provided an update on Monarch's previously announced plans to

reinsure a portion of its disability income insurance business and to convert substantially all of its short-term bank debt to a longer term structure.

With respect to the conversion of its bank debt, Oakes reported that commitments have been received from syndicate banks in amounts which would convert substantially all of its short-term bank debt to a five- year term loan, and that the lead bank, Chase Manhattan Bank, N.A., and Monarch are negotiating the formal loan agreement.

Monarch Capital Corporation is a financial services company that designs disability income insurance and variable life insurance and annuity products. These products are distributed through a network of financial service firms in regional and national markets.

#90131p3417 05/11/1990 ~PR Newswire

COLUMBIA, SC (MAY 11) PR NEWSWIRE - BellSouth Mobility Inc. (BMI) and WLTX-TV have signed an agreement that allows BMI's customers in the metro Columbia area to join WLTX-TV's news reporting team.

BMI and WLTX-TV 19 have established a program where cellular (mobile) telephone users can phone in, free of charge, fast breaking news events to

WLTX-TV 19 Newsline, simply by dialing asterisk TV19 (asterisk 8819).

Robert N. Dunlap, BMI South Carolina region manager, said, "Mobile telephones are giving more and more people the ability to communicate immediately. BMI and WLTX-TV are utilizing this instant means of communications to provide a public service. Our companies' goals are to improve news reporting and promote good will for both organizations."

News stories don't always happen near a conventional telephone, but with the convenient mobile telephone and our agreement with WLTX-TV, callers can alert the television station as news happens," he said.

"BMI provides its customers with an abbreviated number for fast calling and does not charge the customer the customary usage fee," explained Dunlap.

WLTX-TV's Gene Upright said: "The station is happy to offer this news service with BMI. We hope we get calls and can develop good news stories from them."

Upright said during the first week of operation, WLTX obtained exclusive videotape from a asterisk TV19 BMI report. A tractor trailer rig hit another truck on a bridge near Camden. WLTX dispatched a news team to the accident when the BMI customer reported the accident, and the report appeared on the evening news that day.

Dunlap said BMI customers are often unknown "good samaritans" on streets and highways in the state. "They frequently report accidents or altercations. The report is made, help is dispatched and the mobile telephone user goes about his or her business."

BellSouth Mobility is the largest provider of cellular service in the Southeast. A subsidiary of the Bellsouth Corp., BellSouth Mobility currently operates cellular telephone systems in 26 major metropolitan areas in seven states, serving a population of more than 17 million.

CONTACT: Robert N. Dunlap of BellSouth Mobility, 803-750-2222 (office), or 803-331-0033 (mobile) or Joe Jones, 803-771-4271, for BellSouth Mobility.

NEW YORK (MAY 11) PR NEWSWIRE - Leucadia National Corporation (NYSE, PSE: LUK) today announced its unaudited operating results for the three-month period ended March 31, 1990. Income from continuing operations for the three-month period ended March 31, 1990, was $3,750,000, or 30 cents per common share, compared to $3,621,000 or 27 cents per common share for the

three-month period ended March 31, 1989.

Income from discontinued operations was $1,184,000 or 9 cents per common share (8 cents on a fully diluted basis) for the three-month period ended March 31, 1989. Discontinued operations reflect the company's railcar leasing and management operations and the electronic visual communications subsidiary, which were sold in 1989.

Net income was $3,750,000 or 30 cents per common share for the three-month period ended March 31, 1990, compared with $4,805,000 or 36 cents per common share (35 cents on a fully diluted basis) for the three-month period ended March 31, 1989.

Included in income from continuing operations for the three-month periods ended March 31, 1990, and 1989, were pre-tax net securities gains (losses) of ($19,000) and $2,161,000, respectively.

Leucadia National Corporation is a holding company for its consolidated subsidiaries engaged in life insurance (through Charter National Life Insurance Company of St. Louis and First Charter Life Insurance Company of New York); manufacturing (principally through its Leucadia, General Marble and Electri-cord divisions); banking (principally through American Investment Bank, N.A.); equipment leasing, and real estate development.

Through its approximately 66 percent interest in PHLCORP, Inc., the company is also engaged in trading stamps (through the Sperry and Hutchinson Company, Inc.); motivation services (through S&H Motivation, Inc.), and property and casualty insurance (through Empire Insurance Company and Allcity Insurance Company).

Leucadia also has equity interests of more than 5 percent in the following domestic publicly owned companies: Carmike Cinemas, Inc. (16 percent of Class A shares); Jones Plumbing Systems, Inc. (19 percent); Olympus Capital Corporation (24 percent), and Transportation Capital Corp. (13 percent).

HOUSTON (MAY 11) PR NEWSWIRE - Richard W. Krajicek, chairman of the board of Serv-Tech, Inc. (NASDAQ: STEC), announced, at the 1990 annual meeting of shareholders, that the company has entered into a letter of intent with Thyssen Handelsunion AG, part of the $20 billion German industrial concern. The agreement calls for the establishment of a jointly-owned European company to market Serv-Tech's industrial and environmental maintenance services to the hydrocarbon processing industry throughout

Europe. Krajicek stated that the cooperative effort with Thyssen will provide a substantial partner with excellent worldwide connections, enabling Serv-Tech to establish a strong European base prior to 1992. Initial operations are projected to begin in the third quarter of 1990. A definitive agreement is to be executed within the next 90 days.

Serv-Tech also announced that four new members were elected to its board of directors. Lon C. Cunningham, chairman of the board of the Wallace Companies; Hans E. Roeschel, president of Merex Texas Corporation; Louis A. Verbick, vice president-sales and operations; and Michael J. Krajicek, vice president-eastern region; were added to the board, increasing its size to eight members.

#90131p3433 05/11/1990 ~PR Newswire

NEWTON, MA (MAY 11) PR NEWSWIRE - Health and Rehabilitation Properties Trust (NYSE: HRP) today announced its results of operations for the three month period ended March 31, 1990.

Gross revenues for the March 31, 1990 quarter were $7,765,000. Net income and net income per share in this period were $3,475,000 and 22 cents per share, respectively. For the three month period ended March 31, 1989, gross revenues were $5,144,000 and net income was $1,964,000 or 20 cents per share.

David J. Hegarty, treasurer of HRP, pointed out that management bases its dividend calculation on cash available from operations, defined as net income plus depreciation and amortization of prepaid costs, rather than net income. In the quarter ended March 31, 1990, HRP's cash available from operations was $4,740,000 (30 cents per share). Cash available from operations for the quarter ended March 31, 1989 was $2,994,000 (30 cents per share).

HEALTH AND REHABILITATION PROPERTIES TRUST
FINANCIAL SUMMARY

	1990	1989
Gross revenues	$7,765,000	$5,144,000

PARIS, ONTARIO (MAY 11) PR NEWSWIRE - The financial results of Redlaw Industries Inc. (AMEX: RDL) of Paris, Ontario for the first six months of fiscal 1990 ended March 31, 1990 were today released by the company. All dollars quoted are Canadian.

Consolidated sales from continuing operations for the first six months were $36,052,000 compared to $38,372,000 for the same six months of the previous year.

Income from continuing operations and net for the first six months was $51,000 or 1 cent per share. This compares to last year's first six months income from continuing operations of $2,702,000 or 38 cents per share which was reduced by the loss from discontinued operations of $624,000 or 9 cents per share to bring the period's final results to net income of $2,078,000 or 29 cents per share.

Second quarter consolidated sales this year were $15,888,000 compared to last year's $19,630,000.

Second quarter results this year were a loss from continuing operations and a net loss of $652,000 or 8 cents per share compared to last year's income from continuing operations of $1,113,000 or 14 cents per share less $370,000 or 5 cents per share loss from discontinued operations for a net income of $743,000 or 9 cents per share.

#90131p3463 05/11/1990 ~PR Newswire

FREEPORT, NY (MAY 11) PR NEWSWIRE - LeaRonal, Inc. (NYSE: LRI) today reported its second best earnings year in the company's history. Net income for its fiscal year ended Feb. 28, 1990, was $10,174,000, or $1.15 per share, compared with net income of $11,229,000, or $1.23 per share, for the prior fiscal year. Total sales for fiscal 1990 were $140,555,000 compared with $156,977,000 for fiscal 1989.

Process sales, which are sales of proprietary specialty electronic and imaging chemicals and do not include the price of precious metals, increased 13 percent to a record $49,679,000 up from $43,898,000 for the prior fiscal year.

Ronald Ostrow, president and chief executive officer, indicated that the decrease in earnings resulted from reduced profitability of the company's precious metal operation, lower real margins on process sales and the negative effect of foreign currency exchange rates on reported results. The growth in process sales to record levels continues to be attributable to sales of newer technologies.

LeaRonal, Inc. also announced today that the board of directors has declared a quarterly dividend of 12 cents per share on the company's common stock to be paid on June 15, 1990, to shareholders of record on May 25.

LeaRonal, Inc. develops and markets a wide variety of specialty chemicals utilized in the electronics and metal finishing industries.

LEARONAL, INC.

Year ended Feb. 28:	1990	1989
Sales	$140,555,000	$156,977,000
Income before income taxes	14,686,000	16,177,000
Net income	10,174,000	11,229,000
Net income per share	$1.15	$1.23
Average number of shares of common stock outstanding	8,868,260	9,143,907

RED BANK, NJ (MAY 11) PR NEWSWIRE - North European Oil Royalty Trust (NYSE: NET) reported that royalty revenues for the second quarter of its fiscal year through April 30, 1990, were 18.4 percent higher than the amount received in the same period of the prior year.

The higher income was occasioned primarily by an increase in prices of 31 percent and an increase in the conversion rate for the Deutsche mark of approximately 10 percent. Offsetting these increases was a 6.6 percent decline in the average daily rate of volumes of gas sold. Shown below are quarterly and six months figures with the comparisons for the prior year:

NORTH EUROPEAN OIL ROYALTY TRUST

Periods Ended	Quarter	Six Months

April 30	1990	1989	1990	1989
Royalty income	$3,007,253	$2,539,216	$6,205,679	$4,810,087
Net income	2,835,887	2,446,386	5,938,965	4,560,945
Per unit	$.35	$.29	$.72	$.55

The trust declared a distribution to owners of 35 cents per unit for the second fiscal quarter, making the total distribution for the six months period 72 cents per unit compared with 54 cents per unit last year. The distribution will be paid on May 23, 1990, to holders of record May 11, 1990.

FORT WORTH, TX (MAY 11) PR NEWSWIRE - FFP Partners L.P. (AMEX: FFP), announced net income of $51,000, or 1 cent per Class A and Class B Unit, for its first fiscal quarter ended April 1, 1990. Revenues for the quarter were $53,935,000.

Comparative data for the first quarter 1990 and 1989 are presented below:

	1st Quarter 1990	1st Quarter 1989
Total revenues	$ 53,935,000	$ 46,122,000
Operating income	344,000	78,000
Income/(loss) -		
From continuing operations	(275,000)	(433,000)
From discontinued operations	326,000	32,000
Net income/(loss)	51,000	(401,000)
Income/(loss) per Class A and Class B Unit -		
From continuing operations	(0.08)	(0.12)
From discontinued operations	0.09	0.01
Net income/(loss)	0.01	(0.11)
Operating cash flow (net income plus depreciation and amortization)	$ 1,296,000	$ 798,000

FFP Partners is a publicly-traded limited partnership which owns and operates approximately 300 convenience stores, truck stops and self-service gasoline outlets in 12 central, southern and southwestern states. The company also engages in the sale of motor fuel on a wholesale basis to other motor fuel retailers and to commercial users of motor fuels. Its Class A Units are listed on the American Stock Exchange.

#90131p3473 05/11/1990 ~PR Newswire
BURLINGTON, NJ (MAY 11) PR NEWSWIRE - Monroe G. Milstein, chairman and president of Burlington Coat Factory Warehouse Corporation (NYSE: BCF), today reported results for the first nine months and third quarter of fiscal 1990, ended March 31, 1990. He noted that all per- share data have been adjusted to reflect the 3-for-2 stock split on March 9, 1990.

Revenues for the nine months ended March 31, 1990, reached $656,519,000, compared with $569,839,000 for the nine months ended April 1, 1989. Net income for the latest nine months was $28,910,000, or $1.63 per share, compared with $26,750,000, or $1.52 per share, for the comparable period last year.

For the three months ended March 31, 1990, revenues rose to $162,184,000 from $153,507,000 in the comparable period of last year. For this period, a net loss of $1,860,000, or 10 cents, per share was reported, compared with net income of $1,616,000, or 9 cents, in the comparable period of last year. Operating results of the third quarter were directly affected by the shift in the Easter selling season from March of a year ago to April of this year. This resulted in the shifting of approximately $12 million in net sales to the fourth quarter of the current fiscal year.

The comparative store sales during the month of April 1990 rose 32.5 percent over April of the previous year.

#90131p3477 05/11/1990 ~PR Newswire
ROSEMEAD, CA (MAY 11) PR NEWSWIRE - Southern California Edison wants to speak with customers who speak a variety of languages in Southern and Central California on a number of current topics such as how to save money on energy bills, how to prepare for an earthquake and how to use electricity safely.

To accomplish this, Edison has formed a multilingual speaker's bureau designed to bring Edison representatives who are fluent in English and one of five languages--Spanish, Chinese, Korean, Vietnamese and Cambodian--to local non-native English speaking groups. The speaker's bureau is available to local area community groups, neighborhood associations, schools, churches and civic groups free of charge.

Edison's multilingual speaker's bureau was formed in response to a growing

need to reach non-English speaking customers in the increasingly diverse ethnic communities within the utility's 50,000- square-mile service area.

Edison serves three million Hispanic customers, 26 percent of whom do not speak English, and 78 percent of whom speak their native language at home. Edison also serves 600,000 Asian customers, 16 percent of whom do not speak English, and 70 percent of whom speak their native language at home.

To better serve customers who speak a language other than English as their first language, Edison has developed special programs and presentations to be delivered in the five languages. The presentations can be individually tailored to a group's particular interest, such as energy conservation, electric rates or the many special services Edison offers its customers.

Most of the people Edison surveyed said they wanted more information about saving money on electric rates, how to use electricity safely and what to do during an electric outage or other emergency, such as an earthquake.

Edison has developed materials that are compatible with customer concerns and which are delivered in a format and design appropriate for each ethnic community.

The multilingual speaker's bureau consists of 11 Edison employees who are fluent both in English and another language.

SPRINGFIELD, MA (MAY 11) PR NEWSWIRE - As expected, Bank of New England-West, an affiliate of Bank of New England Corporation (NYSE: NEB), announced that it has signed a consent cease and desist order (consent order) with the Office of the Comptroller of the Currency (OCC). Bank of New England corporation, the holding company, announced in March that it had signed a similar consent order with the Federal Reserve. The corporation's other affiliate banks, Bank of New England, N.A., Connecticut Bank & Trust Company, N.A., Maine National Bank and Bank of New England-Old Colony, N.A. have previously signed similar consent orders with the OCC.

The consent order deals comprehensively with the development and implementation of plans, policies and procedures at the bank, and details improvements to be made in the operations of the bank. Bank of New England-West President C.D. Harrington said, "We are signing this order because we agree with the OCC that these policies and procedures are sound and progressive measures that any bank should follow. As we undertake this partnership with the OCC, I am pleased to report that many of the requirements and standards called for in the order are well under way or have already been completed."

#90131p3509 05/11/1990 ~PR Newswire

PANAMA CITY, FL (MAY 11) PR NEWSWIRE - Sunshine-Jr. Stores, Inc. (AMEX: SJS) a Florida-based convenience store and supermarket chain, today reported sales and earnings for the first quarter of 1990. Total revenue for the quarter ended March 29, 1990 was $46.7 million, an increase of 8.9 percent over first quarter revenue for last year which was $42.8 million. As was projected at the end of the fourth quarter of 1989, the company reported a net loss for the thirteen-week period of $383,693, or $.23 per share, vs. a net loss from operations of $490,384, or $.29 per share in the first quarter of last year.

While the number of gasoline gallons sold remained stable at 23.3 million gallons, gasoline sales accounted for 51.8 percent of total revenues and increased 15.4 percent for the quarter ended March 29, 1990 as compared to the same quarter last year.

Lana Jane Lewis-Brent, president and chief executive officer commented, "With five fewer stores in existence from last year, we are pleased to report that merchandise sales have improved during the quarter, reflecting an upward trend in average sales per store. In March, the company opened its first video/newsstand retail unit, a concept combining video rentals, an extensive magazine and newspaper selection as well as snack items, replacing an unprofitable existing store located in a shopping strip. In addition, during second quarter we will be opening our first auto/truck convenience center located at a major interstate exit, which will service both cars and large trucks."

Sunshine-Jr. opened two stores during the quarter and closed nine. At the close of the first quarter, the company was operating 300 convenience stores in Florida, Alabama, Georgia, Mississippi and Louisiana, in addition to four supermarkets in Panama City, Fla.

PORTAGE, WI (MAY 11) PR NEWSWIRE - Portage Industries Corporation (AMEX: PTG) today reported first-quarter revenues of $6,579,000, up $840,000, or 15 percent, over the same 1989 period. Earnings, for the quarter ended March 31, 1990, were $43,000, or $.02 per share, compared with a $134,000 loss, or $.06 per share, in 1989.

Commenting on the continued improvement in operating performance Bert Figi vice president-finance, indicated that the programs implemented last year to reduce costs and improve manufacturing efficiency have placed the company in a much more competitive position. Margins and backlog are 50 percent higher than a year ago with orders for the January-April 1990 period annualizing at over $30 million.

Figi also indicated that the company recently installed its first high-speed continuous forming line and will be announcing this expansion into preformed containers at the "Pack Alimentaire" packaging show in San Francisco next week. Figi commented that this value-added production capability will significantly enhance market penetration efforts for the company's barrier coextrusion product line.

Portage Industries manufactures and markets a broad range of extruded plastic material, which includes a variety of monolithic (single layer) sheet and rollstock, as well as coextruded and barrier coextruded (multi-layer) materials used primarily to form specialized packaging, automotive parts and industrial components. The company has an outstanding reputation for quality products and working with new resins. Its coextrusion operation can produce from the broadest array of resin combinations in the industry.

PITTSBURGH (MAY 11) PR NEWSWIRE - Chambers Development Co. Inc. (AMEX: CDV) today donated $10,000 to the Mel Blount Youth Home (MBYH) of Pennsylvania.

The MBYH was started to intervene early in a child's life and prevent kids ages 7-13, from returning to jail. This process occurs in a rural rather than an urban setting.

Boys referred by the juvenile system learn basic fundamental survival skills necessary to succeed in life. Each boy's stay lasts from three to 18 months, during which time he is required to learn and perform all

necessary farm chores, including growing one's own food.

"We believe that the Mel Blount Youth Home is an excellent way in helping our youth become productive citizens in their community. And we hope this donation helps Mel in reaching his goal," said John G. Rangos Sr., Chambers' president and CEO. "This is a wonderful program that Mel has started and we are very proud to be a part of it."

"This donation will go a long way toward helping our organization reach its building program goal of constructing three dormitories for the kids in Washington County," said Blount. "We are very appreciative to Chambers Development Co. for its donation."

Chambers Development Co., headquartered in Pittsburgh, is a leading environmental firm offering services in collection, hauling, disposal, recycling and landfill development. The company also provides security through its wholly-owned subsidiary, Security Bureau Inc., one of the 20 largest U.S. security firms.

DETROIT (MAY 11) PR NEWSWIRE - Commercial and residential electric sales for April set record highs for the month, but declining sales to the steel and automotive industry contributed to a 1.7-percent overall reduction in Detroit Edison sales compared with year-earlier figures.

A total of 3.1 billion kilowatthours (kWh) were sold in April. Record commercial sales of 669 milliion kWh were 1.7 percent higher than April 1989 and the ninth consecutive year-to-year increase for sales in this class. Since April 1989, more than 3,200 commercial customers have been added to Detroit Edison's southeastern Michigan service area.

Sales to residential customers were 870 million kWh or 0.9 percent above April 1989 sales.

Declining steel and automotive sales brought April industrial sales down to 1.5 billion kWh or 3.2 percent below April 1989.

ST. PAUL, MN (MAY 11) PR NEWSWIRE - The board of directors of Ecolab Inc.

(NYSE: ECL) declared a quarterly cash dividend of $0.165 per share, to be paid July 13, 1990, to shareholders of record at the close of business on June 19, 1990.

Ecolab has paid cash dividends for 53 consecutive years. Earlier today, at the annual meeting of shareholders, Ecolab Inc. shareholders re-elected Robert J. Haugh, Reuben F. Richards and Richard L. Schall as Class I directors for a term to end in 1993. The shareholders also ratified the appointment of Coopers & Lybrand as the company's independent certified public accountants for the current fiscal year ending Dec. 31, 1990.

Ecolab is a leading worldwide developer and marketer of premium cleaning, sanitizing and maintenance services for the hospitality, institutional and residential markets. For the year ended Dec. 31, 1989, Ecolab reported sales of $1.3 billion and earnings of $2.7 million, after preferred dividends, or $.10 per share, including a one-time charge of $31.5 million or $(1.15) per share. 1989 earnings would have been $34.2 million, or $1.25 per share, without the charge. Ecolab shares are traded on the New York Stock Exchange and the Pacific Stock Exchange under the symbol ECL.

#90131p3540 05/11/1990 ~PR Newswire

DURHAM, NC (MAY 11) PR NEWSWIRE - Kona Enterprises (OTC), a North Carolina based holding company, reported a dramatic improvement in the first quarter 1990 (ended March 31) performance of its wholly owned subsidiary Hanford's, Inc. versus the same period a year ago. Hanford's reported first quarter 1990 net sales of $2,126,827 versus $1,870,755 for the same period in 1989 which was a 13.7 percent improvement. Hanford's,

like the majority of most seasonal importers and distributors, generally reports losses in its first and second quarter operations and reports profits for the final two quarters. The Company's loss to retained earnings after dividends was $430,035 for the first quarter in 1990 versus $1,622,849 for the same period in 1989.

On a consolidated basis, Kona reported sales and revenues of $2,135,289 and a net loss of $392,093 or $(.013) per primary share of Kona Enterprises common stock (Note: earnings per share figures are calculated on the number of primary shares outstanding at December 31, 1989 and March 31, 1990 of 31,235,484 before the 30-1 reverse stock split).

W. Clay Hamner, Kona's President and Chief Executive Officer, attributed the improvement in Hanford's first quarter operating performance to increased sales volume in higher margined products as well as a reduction in selling, general and administrative expense. In October of 1989, Paul Norman, a former executive with Nationwide Industries, was named President of Hanford's replacing Edward M. Locke.

In other Company business, Hamner announced the appointment of a new Board of Directors at Kona's annual shareholders meeting held May 11, 1990 in Durham, North Carolina. Joining Mr. Hamner on the Board will be Thomas W. Keesee, Jr., former President and Chief Executive Officer of Bessemer Trust Company and Bessemer Securities in New York City; Frank H. Kenan, Chairman and Chief Executive Officer of Kenan Transport Company (OTC) in Chapel Hill, North Carolina; Wayne M. Rogers, Managing Director of WMR Development Company headquartered in Los Angeles, California; Matsuo Takabuki, Senior Trustee of Kamehameha Schools/ Bernice P. Bishop Estate in Honolulu, Hawaii, and R. David Thomas, Founder and Senior Chairman of the Board of Wendy's International, Inc.

Concurrent with the appointment of new Directors, Hamner also reported Kona Enterprises (currently a Nevada corporation) will reincorporate in the state of Delaware and effect a 30 for 1 reverse stock split.

SEATTLE (MAY 11) PR NEWSWIRE - The Airborne Optical Adjunct/Airborne Surveillance Testbed (AOA/AST) today made its first integrated check-out flight in Seattle.

The modified Boeing 767 houses the world's most sophisticated long-wave infrared (LWIR) sensor. The AOA/AST is a sensor project of the Strategic Defense Initiative. The AOA/AST is designed to determine if LWIR sensors

can provide early warning and tracking of enemy ballistic missile warheads. The sensor is housed in an 86-foot long cupola atop the plane, and is sensitive enough to pinpoint heat-emitting objects in space.

The objective of the AOA/AST's first flight was to check the vibration and acoustics environment of the system. AOA/AST now begins its continental United States flight program, designed to thoroughly test the aircraft's systems over the next three months. The onboard sensor system will be exercised by taking stellar measurements, tracking satellites and finally by performing a complete system check. This check will be a rehearsal for future tests of the sensors in conjunction with Air Force test targets at the U.S. Army Kwajalein Atoll in the Western Pacific Ocean.

The U.S. Army Strategic Defense Command manages the AST program for the Strategic Defense Initiative Organization. Boeing Aerospace & Electronics is the prime contractor for the project.

DALLAS (MAY 11) PR NEWSWIRE - Customers of Dallas-based Soft Warehouse Computer Superstores and other PC users across the nation can now get expert assistance in the set up and use of their systems just by picking up the phone.

The Soft Warehouse "Help Desk" hardware support hotline can be reached on the AT&T (NYSE: T) MultiQuest service by dialing 1-900-896-9393 Monday through Friday between the hours of 9 a.m. to 6 p.m. Central Time. The first minute of the call is free, with the remainder charged to the caller's telephone number at a rate of $2.00 per minute.

"While we have always provided full support for those who buy systems from Soft Warehouse, we have found a tremendous demand for additional support in our marketplace," said Nathan Morton, president and CEO of the company. "Now we have the ability to provide technical support for all PC users."

The Soft Warehouse hardware specialists assigned to the "Help Desk" bring extensive experience and training to their duties. And if unable to answer customers' particular questions, the technicians can refer the caller to the equipment or software manufacturer for additional support.

"The 'Help Desk' is a smart and innovative use of our MultiQuest service," said Peter Laws, AT&T account executive. "PC users get convenient, competent, economical help, and Soft Warehouse is able to expand its customer support program in a way that makes good business sense."

In addition to MultiQuest, the AT&T family of caller-paid telephone services includes MultiQuest Broadcaster, which allows customers to hear a live or recorded message, and MultiQuest Call Counter, a polling service that can register thousands of "voters" per minute from anywhere in the U.S., Canada and 80 other countries.

Soft Warehouse also offers customer support services such as FOCUS(sm) (Flexible On-Site Computer User Support), a unique on-site service program for the customer's entire computer system, regardless of the manufacturer.

"In computer retailing it's said that a store must choose to compete on either price or service, but we don't agree," said Morton. "Many Soft Warehouse customers have some knowledge of computers because they use them at work or, if they're young, have grown up with them. Good prices like

ours are important to them, and so is the technical support we can provide on the 'Help Desk.'"

#90131p3583 05/11/1990 ~PR Newswire

DALLAS (MAY 11) PR NEWSWIRE - Soft Warehouse, the largest operator of "one-stop" Computer Superstores, announced today expansion plans which include a retail store in Denver.

The newest Superstore is presently under construction and is scheduled to open in July of 1990. The location will be only one of several scheduled openings coast-to-coast in a national expansion plan that is scheduling one new location a month for the next 18 months. "Business has been very successful in our corporate sales office in Denver. Now we can better service our customers by providing a retail Superstore," stated Nathan Morton, president and CEO of the company.

Soft Warehouse offers a huge variety of microcomputers, computer peripherals, software, supplies, accessories, and furniture in over nine major U.S. markets. The stores make it possible for the first time for a corporation or an individual to purchase a complete selection of hardware and software products from a single source. Prices range from 30 to 80 percent below retail. In addition, direct-to-corporate telemarketing is conducted from each location throughout the country.

Soft Warehouse, whose annual sales currently exceed $300 million, has achieved remarkable growth since its inception five years ago. This extraordinary growth is due to the unique concept of stocking each store with over 5,000 computer related products, offering the most competitive pricing in the U.S., and providing a full-service technical department in each store complete with systems' configuration, repair, maintenance and support. Service at the customer's own premise is also available.

The Denver Superstore will provide employment for approximately 60 people in a working environment of 22,500 square feet, and will be located in the Centretech Plaza, Aurora, Colo. "At this time, there is no computer retailer in the state who can provide the individual or the corporate customer with the low prices, service and quality selection that a Soft Warehouse Superstore can provide," said Morton.

"Since we began running advertisements which announce our coming, we have received numerous phone calls from those who are eager to see the new store open," said Morton. "It's good to know that Denver businesses and residents are looking forward to our coming as much as we are looking forward to being a part of the Denver community."

VERO BEACH, FL (MAY 11) PR NEWSWIRE - Dixon Ticonderoga Company (AMEX: DXT) today reported a loss of $779,406, or 26 cents per share, for the second quarter ended March 31, compared with a net of $504,776, or 16 cents per share, for the second quarter of 1989. Revenues for the quarter were $23,400,069 compared with $21,329,322 last year.

For the first six months, Dixon Ticonderoga reported a loss of $1,146,418, or 38 cents per share, on revenues of $42,067,943 compared with a net of $745,485, or 24 cents per share, on revenues of $39,296,440 last year.

President Gino N. Pala attributed the loss to a number of non- recurring items and to a cutback in production to reduce last year's high inventory levels. Short term, he said, production levels and related expenses have been brought under control. Longer term, he explained, the company is completing the formulation of major financial and operating plans, which will be announced in the near future.

LOWELL, MA (MAY 11) PR NEWSWIRE - First Eastern Mortgage Corporation reduced the rate on its 30-year mortgage to 9.95 percent today, signifying the strengthening of the market.

First Eastern has seen an increase in applications for one to four family property financing which supports the belief that the real estate and

housing market is regaining its composure.

"In light of current property values and lower interest rates, first time homebuyers should have an excellent opportunity to locate and acquire their home during the later parter of this spring," according to Robb J. Osinski, vice president.

First Eastern Mortgage Corporation is a subsidiary of First Federal Savings Bank of Boston, on of the top eight one-to-four family residential lenders in the Commonwealth of Massachusetts.

NORTHVALE, NJ (MAY 11) PR NEWSWIRE - The MEM Company Inc. (AMEX: MEM) today reported net sales of $6,162,200 and a net loss of $1,439,900, or 55 cents per share, for the first quarter ended March 31, 1990, as compared to sales of $8,991,800 and a loss of $891,500, or 34 cents per share, for the initial quarter last year.

Gay A. Mayer, president of the company, commented that the general economic environment impacted the sales of the company and that the loss reflected expenditures involving the higher cost of goods as well as the expenses involving the repackaging of the products of the company. He also noted that sales from the holiday season had been below expectations. The company said it believes that despite the poor first quarter, the investment spending it has been making will result in positive sales and improved income as the year progresses.

The board of directors, at its May 4 meeting, voted the regular quarterly dividend of 5 cents per share payable Aug. 13 to shareholders of record June 29.

THE MEM COMPANY INC.

SCHAUMBURG, IL (MAY 11) PR NEWSWIRE - The United Airlines pilots Master

Executive Council (UAL-MEC) of the Air Line Pilots Association today ratified the tentative collective bargaining agreement defining the pilots' wages, working conditions and participation under an employee-owned United Airlines.

Ratification of the pilots' agreement completes organized labor's formal commitment toward creating the nation's largest all-employee owned company.

The 24-pilot executive council voted unanimously to ratify the agreement during a four-day regular quarterly meeting in Schaumburg, Ill.

As previously reported, the proposed five-year contract calls for wage reductions, benefit changes and work rule modifications to be used to finance the pilots' participation in the employee ownership initiative.

The Association of Flight Attendants and the International Association of Machinists have also ratified their tentative contracts, which also provide for substantial wage and contract changes in exchange for ownership of United Airlines.

Capt. Rick Dubinsky, chairman of the UAL-MEC, said: "The union-represented employees at United have now formally bonded as a collective force to work rapidly toward the completion of a transaction that will secure the future of all the employees, ensure the commitment for growth at United, and provide the finest air transportation product available for the traveling public. The prospect of allowing the employees to finally develop United Airlines to its full potential will surely result in a win-win situation for both our employees and our customers. The future and long-term security of every United employee has never looked more promising."

The three unions' collective bargaining agreements, which contain a five-year no strike commitment, will not be implemented until the transaction is completed.

WHITE PLAINS, NY (MAY 11) PR NEWSWIRE - Texaco Inc. (NYSE: TX) today announced that Ralph S. Cunningham will be named president of Texaco Chemical Company and a vice president of Texaco Inc. Cunningham succeeds Willis B. Reals, chairman of Texaco Chemical Company and a senior vice president of Texaco Inc., who is retiring after more than 40 years of service.

Cunningham, currently chairman and chief executive officer of St. Louis-based Clark Oil & Refining Corporation, will join Texaco Chemical Company in August.

In making today's announcements, James W. Kinnear, president and chief executive officer of Texaco Inc., said: "Throughout his years with Texaco, Bill Reals has made tremendous contributions both as an executive and as an engineer. We wish him the best as he leaves a company he has served for more than 40 years and a division that has seen tremendous growth and change as a result of his leadership."

Texaco Chemical Company, located in Houston, is responsible for the company's worldwide chemical activities, involving the manufacture of more than 500 industrial, chemical and consumer products as well as their marketing in more than 100 countries.

Cunningham spent 14 years with Exxon Company, USA, which he joined as a senior engineer at a major refinery, and held positions of increasing responsibility in the lube oil processing, technical, mechanical engineering, operating, supply and refining departments.

He joined Tenneco, Inc., in 1980 as executive vice president, and in 1982 he was appointed president and chief executive officer of Tenneco processing and marketing where he was responsible for refining and marketing, natural gas liquids extraction, and methanol production and marketing. In 1989, Cunningham joined Clark Oil & Refining Corporation as chairman and chief executive officer.

TULSA, OK (MAY 11) PR NEWSWIRE - Samson Energy Company Limited Partnership (AMEX: SAM) announced today its financial results for the quarter ended March 31, 1990.

Revenues for the three months ended March 31, 1990 were $4,348,000 an increase of 7 percent compared to $4,084,000 for the three months ended March 31, 1989. Cash flow from operating activities for the current quarter was $4,046,000 compared to $3,889,000 for the first quarter in 1989, an increase of 4 percent. Cash flow from operating activities in both quarters includes certain payments in excess of gas sales. Net income for the quarter increased by 33 percent to $363,000, compared to net income of $272,000 for the first quarter of 1989.

Weighted average units outstanding during the three months ended March 31, 1990 totaled 4,374,316, an increase of 27 percent over the 3,453,589 average units outstanding in the first quarter of 1989. The increase in units is the result of an units offering for cash in the first and second quarters of 1989 and units issued through the company's Cash Distribution Reinvestment Plan. Based on average units outstanding, cash flow from operating activities for the first quarter of 1990 was 91 cents per unit compared to $1.10 per unit for the first quarter in 1989. Net income was 8 cents per unit in both first quarters in 1990 and 1989.

"The company's management is pleased with financial results for the first quarter of 1990. This is particularly so considering the very mild winter which resulted in lower than expected prices for and deliveries of natural gas throughout the domestic natural gas industry. While first quarter 1990 natural gas volumes of 1.67 billion cubic feet were down by 6 percent compared to the first quarter of 1989, oil volumes increased by 36 percent to 57,000 barrels. Also oil prices were up by 22 percent and gas prices were up by 3 percent. The 91 cents per unit in cash flow for the quarter represents 2.28 to 1 coverage of the 40 cents per unit quarterly distribution. Cash flow in excess of that used for cash distributions will be invested in oil and gas reserve replacement and expansion," according to Dennis Neill, senior vice president and chief operating officer of Samson Properties Inc., general partner of Samson Energy.

Samson Energy Co. is a publicly traded master limited partnership whose

principal business activities include the development and operation of oil and gas properties and the acquisition of producing properties.

CONTACT: Dennis R. Neill of Samson Properties Inc., 918-583-1791.

#90131p3650 05/11/1990 ~PR Newswire

NEW YORK (MAY 11) PR NEWSWIRE - T&N plc and J.P. Industries, Inc. (NYSE: JPI) today announced that they have held discussions with the Federal Trade Commission regarding the scope and requirements of the previously announced FTC request for additional information pursuant to the Hart-Scott-Rodino Antitrust Improvements Act in connection with the ongoing $17.30 per share tender offer by T&N Automotive Components Inc. for all outstanding shares of common stock of J.P. Industries, and that they are continuing to prepare the information necessary for compliance with the FTC's request.

The tender offer is the first step in the companies' previously announced agreement to effect a merger of T&N Automotive Components, a wholly owned subsidiary of T&N plc, into J.P. Industries.

The FTC's request has extended the waiting period under the Hart-Scott-Rodino Act until ten days following "substantial compliance" with the request unless the waiting period is sooner terminated by the FTC.

In light of the companies' estimate of the time required to complete the preparation of the information necessary for compliance with the FTC's request and for the expiration of the Hart-Scott-Rodino waiting period, T&N Automotive Components has extended the expiration date for the tender offer until midnight, New York City time, on Thursday, June 28, 1990.

As a consequence of the extension of the expiration date, holders of J.P. Industries common stock are entitled to tender or withdraw their shares pursuant to the tender offer until midnight, New York City time, on Thursday, June 29, 1990, unless the expiration date is extended further by T&N Automotive Components. Prior to the extension announced today, the tender offer had been scheduled to expire on May 14, 1990.

Based on the latest count of tendered shares, including shares tendered pursuant to guarantees of delivery, 3,691,667 shares of J.P Industries common stock have been validly tendered and not withdrawn pursuant to the tender offer.

ATLANTA (MAY 11) PR NEWSWIRE - Delta Air Lines, (NYSE: DAL) which begins hourly service between Los Angeles and San Francisco on June 1, will commemorate the expanded service with a special one-way fare of $99 and double frequent flyer bonus miles June 1 through July 31, 1990.

For travel on Delta's new TransCon service between Los Angeles and New York/Newark, Delta is offering a special $199 one-way fare and double frequent flyer miles June 1 through July 31, 1990.

To take advantage of the special fares, passengers need only to purchase their ticket by May 31 for TransCon flights, or by June 15 for travel between Los Angeles and San Francisco. All travel under these special fares must be completed by June 30. Seats are limited and may not be available on all flights.

"These introductory fares, when combined with Delta's traditional emphasis on superior passenger service, are a great way for us to begin this major service expansion in two of the world's busiest travel markets," said Whit Hawkins, Delta's senior vice president - marketing.

Passengers traveling between Los Angeles and San Francisco will enjoy special pre-flight Delta Person-to-Person Service that includes the complimentary use of FAX machines, personal computer modem hook-ups, and worktables with telephones. In addition, in-flight service will include fresh-brewed gourmet coffee, snacks, and complimentary California wine on select flights.

Delta's TransCon service will feature spacious Boeing 767 service three times daily from Los Angeles to New York/Newark and offer passengers free complimentary champagne in all cabins. First in passenger satisfaction among major U. S. airlines, according to the U. S. Department of Transportation, Delta has received the fewest complaints of any major airline for the past 16 consecutive years.

CONTACT: Delta Air Lines public relations, (404) 765-2531.

DALLAS (MAY 11) PR NEWSWIRE - Ranch Development Co. has initiated plans to sell all property associated with Stonebridge Ranch, a 6,230-acre master-planned, fully-zoned community located in McKinney just north of Dallas. Ranch Development Company's sole shareholder is the FSLIC Resolution Fund which is managed by the FDIC. Sealed bids must be submitted by June 18, 1990.

Investor information packages are available from Ranch Development Company. Packages include extensive information on the physical assets and amenities associated with the property, according to David Leininger, CEO of ClubCorp Realty. ClubCorp was appointed interim manager of the property by Ranch Development when it was placed in Chapter 11 bankruptcy in March.

ClubCorp International, the largest private club operator in the world, owns and manages clubs and developments internationally. The firm currently manages another large development in Texas, Barton Creek, a 4,000-acre master-planned community in Austin, Texas.

Stonebridge Ranch is one of the largest mixed-use real estate properties in the country. All entitlements, master infrastructure and master amenities are in place. Existing zoning permits more than 27,500 housing units and 91 million square feet of retail, commercial, office, research and industrial space to be developed.

More than 8.4 miles of four-lane divided thoroughfares have been constructed throughout the property as well as 5.1 miles of continuous, paved hike and bike trails.

The property contains two operational championship country clubs. Stonebridge Country Club features as Pete Dye-designed golf course, an indoor-outdoor teaching facility, and a 35,000-square-foot clubhouse. The Ranch Country Club, a 25,000-square-foot facility, has a golf course designed by Arthur Hills. Both courses recently were ranked among the top 50 in the state of Texas.

Other amenities include a beach and racquet club with a swim area surrounded by a sandy beach, a small marina providing access to a lake, an equestrian facility and riding trails, outdoor basketball and tennis courts, and numerous lakes, ponds, parks and children's play areas.

The property has several hundred homes already completed and sold, and according to American/Metro Study, an independent research firm based in Dallas, builders at the community sold more homes than any other development in the Dallas/Fort Worth area in 1989.

#90131p3665 05/11/1990 ~PR Newswire

KENNEDY SPACE CENTER, FL (MAY 11) PR NEWSWIRE - The Coca-Cola Company (NYSE: KO) announced today it will make a $500,000 contribution to the U.S. Astronaut Hall of Fame to underwrite an exhibit honoring the lives of

the Mercury Seven, the first Americans in space.

The announcement was made during dedication ceremonies for the Hall of Fame facility and U.S. Space Camp, Florida. Present were Mercury Seven astronauts and Hall of Fame members Scott Carpenter, Gordon Cooper, John Glenn, Alan Shepard and Donald "Deke" Slayton. Mrs. Betty Grissom, wife of the late Virgil I. Grissom, was also present. Walter Schirra was unable to attend.

"We know the life stories of these men of valor will be of great interest to visitors to the Hall of Fame," said Walter Dunn, vice president, Prestige Accounts, Coca-Cola USA.

"It is our hope the deeds of the nation's first astronauts will continue to inspire our young people and future generations as they cross new frontiers of human endeavor," Mr. Dunn added.

The exhibit will feature a special section on each astronaut, including an interactive video presentation, and personal memorabilia such as Mr. Cooper's flight charts; tubes of Russian food sampled in space by Mr. Slayton; a space suit worn by Mr. Grissom; a camera used by Mr. Carpenter to photograph the earth; and the hand controller used by Mr. Shepard to guide his lunar module Antares to the moon's surface.

The contribution -- to be made on behalf of Coca-Cola USA and Coca-Cola Enterprises -- continues the tradition of support given to U.S. Space Camp programs by The Coca-Cola Company.

The Company was one of the first underwriters of the U.S. Space Camp program, which orginated in Huntsville, Alabama. Space Camp offers young people in grades four through seven the opportunity to participate in five day sessions of space orientation and astronaut training activities. Over the last decade, Coca-Cola USA has made on-going financial contributions to the Space Camp, and Coca-Cola Bottlers in Alabama have donated $100,000 for expansion programs.

In 1985, The Coca-Cola Company sent its revolutionary "Space Can" into space on board the shuttle Challenger. The can successfully allowed Coca-Cola to be the first soft drink consumed in space.

#90131p3670 05/11/1990 ~PR Newswire

FORT WORTH, TX (MAY 11) PR NEWSWIRE - Snyder Oil Corp. (NYSE: SNY) ("SOCO") today announced its results for the quarter ended March 31, 1990. As the consolidation with Snyder Oil Partners L.P. ("SOI") was effective

March 31, 1990, the results of its operations will not be reflected in SOCO's financial statements until the second quarter. Revenues for the quarter totalled $13.0 million and direct operating expenses rose to $9.5 million. The sharp increases were due primarily to acquisitions concluded in 1989. General and administrative expenses rose to $616,000 from $299,000 in the prior year as a result of the larger asset base, initiation of an exploration program and costs related to the consolidation with SOI. Interest expense declined due to lower debt levels. Net income for the quarter of $1.2 million (14 cents per share) declined from $1.4 million (17 cents per share) in 1989 due to deferred tax provisions. After-tax operating cash flow rose to $2.5 million, a level 19 percent higher than in 1989.

On a pro forma basis, reflecting the consolidation with SOI and 1989 acquisitions as if they had occurred Jan. 1, 1989, first quarter net income increased to $1.8 million, a 10 percent rise from the prior year. The improvement reflected higher energy prices, increased margins in gas processing and lower interest expense. These improvements were offset by higher income taxes and administrative expenses. After-tax operating cash flow for the quarter decreased slightly to $7.7 million due to higher income taxes. Increased revenues and operating expenses rose from the 1989 period primarily as a result of expanding gas marketing efforts. Interest expense decreased due to lower debt and interest rates.

SOCO is engaged in acquisitions and in the production, development and exploration of domestic oil and gas properties as well as the transportation, processing and marketing of natural gas. SOCO's common stock is traded on the New York Stock Exchange under the symbol "SNY."

#90131p3673 05/11/1990 ~PR Newswire

SPRINGFIELD, VA (MAY 11) PR NEWSWIRE - Versar (AMEX: VSR) today reported financial results for the third quarter and nine months ended March 31, 1990.

Revenue for the quarter was $15,509,000, an increase of 12 percent over revenue of $13,843,000 for the same period a year ago. The company reported a net loss for the third quarter of fiscal 1990 of $455,000 or 12 cents per share on 3,805,000 average shares outstanding, compared to a net loss of $538,000, or 15 cents per share on 3,692,000 average shares outstanding in the third quarter of fiscal 1989. Revenue for the first nine months of fiscal 1990 was $44,823,000, a 9 percent increase over revenue of $41,107,000 for the same period a year ago. The net loss for the first nine months of fiscal 1990 was $376,000 or 10 cents per share on 3,800,000 average shares outstanding, compared to a net loss of $536,000

or 15 cents per share on 3,661,000 average shares outstanding for the first nine months of 1989.

Most of the losses in the third quarter were associated with the final disposition of Versar Manufacturing and provisions for doubtful accounts receivable. The pre-tax loss for the quarter before these adjustments and the consideration of the minority interest in a subsidiary was $78,000 essentially breakeven.

Losses from the company's environmental segment in the third quarter were associated with a low sample flow in Versar's laboratory and excessive costs in its offices in the southern and western parts of the country.

Commenting on the third quarter results, Dr. Michael Markels, Jr., president and chairman of the board, said: "The entire environmental industry has experienced a nine-month period of low activity and long delays in procurement. This applies to both government and commercial contracts. Versar has not escaped this general trend. We are not happy with the third quarter and nine months' results, although they show improvement over the same period a year ago. We are actively pursuing a program of cost reduction and revenue enhancement."

Versar provides a wide range of scientific and technical services to solve environmental and health and safety problems caused by pollutants, hazardous materials, and toxic substances.

#90131p3675 05/11/1990 ~PR Newswire

WASHINGTON (MAY 11) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed First Federal Savings and Loan Association of Breaux Bridge, Breaux Bridge, La. in receivership and chartered a new federal mutual institution to take its place.

The new institution, First Federal Savings Association of Breaux Bridge, will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corporation.

The conservatorship did not result in any interruption of First Federal's day-to-day operations. The institution will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because First Federal was operating in an unsafe and unsound condition and has suffered losses that have depleted substantially all of its capital, with no prospect of replenishment without federal assistance.

First Federal does not meet its minimum core and tangible capital requirements. This condition results primarily from the recognition of deferred loan losses and a depressed local economy.

As of Feb. 28, 1990, First Federal reported assets of $20.7 million, liabilities of $21.3 million and tangible capital of negative $624,000, for a tangible capital-to-assets ratio of negative 2.97 percent.

#90131p3702 05/11/1990 ~PR Newswire

EDMONTON, ALBERTA (MAY 11) PR NEWSWIRE - Numac Oil & Gas Ltd. (Toronto: NMC) of Edmonton, Alberta reports consolidated financial results for the three months ended March 31, 1990 as follows:

NUMAC OIL & GAS LTD.
(Millions, except per share amounts)

	Three months ended March 31	
	1990	1989
Gross revenue	$12.4	$11.5
Cash flow	$7.9	$6.7
Per share	$0.31	$0.26
Net earnings	$1.6	$1.3
Per share	$0.06	$0.05

Numac recorded solid improvements in financial results for the first quarter ended March 31, 1990. As compared with the same period in 1989, gross revenue increased by 8 percent to $12.4 million, cash flow increased by 17 percent to $7.9 million and net earnings increased by 24 percent to $1.6 million.

Crude oil and natural gas liquids production averaged 4,764 barrels per day compared with 4,869 barrels per day. New production volumes brought on stream at Kitty and Otter during the first quarter more than offset normal reservoir declines with the result that crude oil and liquids production for the quarter just completed exceeded that for the fourth quarter of 1989 by 140 barrels per day. Crude oil selling prices averaged $23.79 in the first three months of 1990 compared with $19.38 in the year earlier period. Natural gas sales were 13.6 million cubic feet per day compared with 15.0 in the corresponding period of 1989 as a result of lower nominations due to warmer than normal weather. Natural gas selling prices improved to $1.67 per thousand cubic feet compared with $1.61 in the first quarter of 1989.

Numac participated in the drilling of 33 gross (13 net) wells during the first quarter of 1990 compared with 26 gross (13 net) wells during the first quarter of 1989. Of the wells drilled this year, seven were cased for crude oil production and 13 were cased for gas production. Capital expenditures of $8.0 million were unchanged from the year earlier period and were funded almost entirely by cash from operations.

#90131p3716 05/11/1990 ~PR Newswire

WASHINGTON (MAY 11) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed United Federal Savings Bank, Windom, Minn., in receivership and chartered a new federal mutual institution to take its place.

The new institution, United Savings Bank, F.S.B., will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corporation.

The conservatorship did not result in any interruption of United's day-to-day operations. The institution and its two branches will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect its fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because United Federal was operating in an unsafe and unsound condition and has suffered losses that have depleted all of its capital, with no prospect of replenishment without federal assistance.

United Federal's problems stem from a proliferation of commercial real estate loans without proper supervision by the thrift's directors and the virtual nonexistence of underwriting. These activities led to a substantial percentage of troubled assets. Because of its low levels of capital and earning assets and losses on loans and real estate owned, the institution reported operating losses for six of eight quarters ending Dec. 31, 1989.

As of March 31, 1990, United Federal reported assets of $161.4 million, liabilities of $173 million and tangible capital of negative $15.3 million for a tangible capital-to-assets ratio of negative 9.73 percent.

#90131p3723 05/11/1990 ~PR Newswire

MANDALUYONG, PHILIPPINES, (MAY 11) PR NEWSWIRE - Dennis R. Belmonte, acting president of Benguet Corporation, reported that on a consolidated basis, net operating earnings for the first quarter 1990 before income from other sources amounted to P37,500,000 (US$1,600,000), a decrease of

59 percent from the earnings of P92,000,000 (US$4,300,000) in the same quarter in 1989.

Total consolidated earnings this quarter, inclusive of other income of P85,700,000 (US$3,800,000) from the sale of investments in shares of stock and from real estate properties, was P123,200,000 (US$5,400,000), or P1.36 (US$0.06) per share, up by 34 percent from the earnings of P92,000,000 (US$4,300,000) or P1.07 (US$0.05) per share in 1989.

The Dizon mine contributed 72 percent to consolidated profits. Lower copper and silver production reduced the company's operating revenues for the first quarter of 1990 by 1 percent.

Earnings from the Dizon mine increased this quarter by 42 percent, or P88,500,000 (US$3,900,000) from the P62,400,000 earnings in the same period last year. Despite a month-long labor strike, mill throughput declined by only 14 percent due to the extraordinary efforts exerted by the mines' managers. Contributing to the improved earnings this quarter is the mine grade for gold which is higher compared to the same quarter last year.

Losses from mining operations at the Benguet gold operations this quarter increased to P20,500,000 (US$900,000) from P8,100,000 in the same quarter in 1989. Aside from the higher cost of production inputs and low productivity, losses were also compounded by production disruption at the Antamok open pit operation because of barricades set up by groups opposing the Grand Antamok project. The gold mine, however, made extraordinary income this quarter of P23,100,000 (US$1,000,000) when it acquired real estate property as settlement in a court suit.

The Masinloc chromite operation increased its earnings to P3,100,000 (US$140,000) in this quarter from P1,000,000 last year.

Losses in the Paracale gold operation increased by 28 percent to P14,600,000 (US$640,000) this quarter from losses of P11,400,000 in the same period in 1989. Monthly production this quarter averaged 1,832 ounces of gold from 14,881 tonnes of ore grading 4.28 Grams of gold per tonne, compared with 1,691 ounces of gold from 12,393 tonnes of ore grading 4.62 Grams of gold per tonne in 1989.

Earnings from metal (gold and copper) trading declined to P3,000,000 (US$130,000) this quarter from P32,000,000 in the same period last year. This quarter's earnings consisted only of gains from the exercise of gold buy-back options with the Central Bank, net of P1,000,000 losses from copper hedging contracts which were closed this quarter.

Other income this quarter included P43,000,000 (US$1,900,000) gains from the sale of 150,000,000 shares of the company's holdings in Dizon- Copper

Silver Mines, Inc. (DCSMI) stock at P0.32 per share. The acquisition cost of these DCSMI shares is P0.03 per share. There was also other income of P19,600,000 (US$860,000) this quarter from the sale of a real estate property which had no prior contribution to the company's operating income.

#90131p3729 05/11/1990 ~PR Newswire

WASHINGTON (MAY 11) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed The Savings Banc, A Savings and Loan Association, Arlington, Texas, in receivership and chartered a new federal mutual institution to take its place.

The new institution, The Federal Savings Banc, F.A., will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corp.

The takeover did not result in any interupption of the institution's day-to-day operations. The Federal Savings Banc and its four branches in Austin and Beaumont, Texas, will be open for business as usual. Holder of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because The Savings Banc was operating in an unsafe and unsound condition and has suffered losses that have depleted all of its capital, with no prospect of replenishment without federal assistance.

The Savings Banc's condition was due primarily to consistent monthly operating losses for more than two years. These losses were caused by a narrow net interest spread, high operating expenses, increases in specific loan loss reserves and a large volume of non- earning assets. Most of the asset quality problems resulted from poor loan underwriting practices.

The thrift also has a wholly owned subsidiary, Centerbanc, that has engaged in unsafe and unsound hedging activity, exacerbating the already high interest rate risk.

As of Feb. 28, 1990, The Savings Banc reported assets of $138.2 million, liabilities of $135.7 million, and negative tangible capital of $2.8 million, for a negative tangible capital-to-assets ratio of 2 percent.

CONTACT: Al Dermody, 214-541-8534, or Janis L. Smith, 202-906-6677, of the OTS

#90131p3733 05/11/1990 ~PR Newswire

CLEVELAND, (MAY 11) PR NEWSWIRE - Daniel J. Ramella, senior vice president-publishing, has been named president and chief operating officer of Penton Publishing, Cleveland-based publisher of business, professional and trade magazines.

The promotion was announced today by Sal F. Marino, president and chief executive officer, who will become chairman and CEO. The changes will be effective July 1, 1990.

The succession was precipitated by current chairman Thomas L. Dempsey's decision to retire from Penton to spend full time operating and managing Saddlebrook Golf & Tennis Resort in Wesley Chapel, Fla. Dempsey, who built and developed Saddlebrook, purchased it in November 1988 from Pittway Corporation, Panton's parent company.

"Saddlebrook is enjoying great success, but it requires my full time and attention," said Demsey. "It is with regret that I leave Penton, but it's time for a new management. Dan (Ramella) adds youth and vigor to the team. The company is in very good hands."

Marino added that "Dan (Ramella) has been on a fast track since joining Penton. At 37, he's already a proven publishing talent with the vision to lead Penton to greater heights in the '90s." Marino stressed that Ramella is a "customer-oriented" executive who learned the publishing business "in the trenches...he's a doer who leads by example."

Since joining Penton in 1977, Ramella has moved through the ranks from sales representative, to sales manager, to publisher, first of Production Engineering, and in 1985, Restaurant Hospitality.

His next move was to vice president of Penton's Foodservice Group, and then to senior vice president/publishing in 1989.

Before joining Penton, Ramella was employed by Authur Andersen. He is a graduate of Gilmour Academy, Gates Mills, Ohio and has a B.S. in Business Administration from Boston College, where he graduated Cum Laude in 1974.

When asked about his goals for Penton, Ramella replied, "I see Penton growing from a $200-million publishing company to a $300-million publishing company by 1995. We will grow internally and through acquisition. Our growth will result from an ongoing commitment to serve the needs of our readers and our advertisers. We will accomplish these objectives by continuing to select and nurture the best publishing personnel available, and giving them an environment in which they can function innovatively and effectively."

Dempsey, who was Penton's CEO during its period of greatest growth--from

1974 to 1988--when it exploded from approximately $15-million in revenues to almost $200-million--credits that remarkable success to a combination of internal growth coupled with an aggressive and successful acquisition policy.

Penton, today, is the result of mergers with Industrial Publishing Company and Reinhold Publishing Company, smaller acquisition and some start-ups. Dempsey anticipates that success can continue by fine-tuning past philosophies and packaging them for the '90s.

#90131p3740 05/11/1990 ~PR Newswire

SAN FRANCISCO, (MAY 11) PR NEWSWIRE - Chevron U.S.A. Inc. announced tonight that it is recalling aviation gasoline delivered from its Richmond Calif., refinery between April 25 and May 10 because of the possibility that some of the product may not meet all of Chevron's aviation gasoline product quality specifications.

While Chevron does not expect any problem from normal use, the complete integrity of any aviation product is of paramount importance, and that's why the product is being recalled, officials said. Chevron expects to complete the fuel recall and product replenishment by next week. The replacement of the aviation gasoline is being handled at Chevron's expense.

Aviation gasoline is used to fuel piston aircraft, which are primarily privately owned. Commercial aircraft use kerosene jet fuel, which is an unrelated product and is not involved in the recall.

As a precautionary measure, Chevron earlier today notified all recipients of the product in a delivery area between Medford, Ore., and Bakersfield, Calif., and east to Reno, Nev., to stop selling the product and wait for replacement supplies. Chevron also has asked airport dealers involved to notify all customers who bought aviation gasoline during this period to contact dealers for replacement.

"Chevron is the leading marketer of aviation products in the West," said Peter Kump, general manager, aviation division for CUSA Marketing. "We can't tolerate having product in the market that doesn't meet all of our specifications, and we intend to correct this situation promptly. Because this is aviation gasoline, we're taking this extra step to notify the public of our actions to recall and replenish affected supplies."

#90131u0174 05/11/1990 ~United Press International

(MAY 11) UPI - Guatemalan officials say a crowded passenger bus crashed in Antigua Thursday while en route to Guatemala City. At least 38 people were killed and 23 others injured. A fire spokesman says it appears the bus was trying to pass another vehicle when it overturned.

A pilgrimage to see Pope John Paul turned into tragedy in Mexico Thursday when a plane carrying people to hear the pontiff went down near an airport 400 miles southeast of Mexico City. At least 18 people died in the crash, including a Catholic bishop, and 17 others were injured.

The pope condemned abortion, birth control and sexual promiscuity Thursday as he celebrated mass before 750-thousand people in the northern Mexican city of Chihuahua. The pope dedicated the mass to the family and urged married couples NOT to shut out God by using birth control.

The Senate Judiciary Committee released a report Thursday indicating much more cocaine use by Americans than previously estimated. The report says almost two-point-two-Million Americans are hard-core cocaine addicts. Committee Chairman Jospeh Biden of Delaware called the report ''as alarming as it is tragic.''

Kurdish separatist guerrillas in Turkey have launched two different attacks during a 24-hour period. An Istanbul newspaper reports the rebels killed 10 people, including seven rural policemen. The guerrillas have vowed to stake their own territory, separate from Turkey, and have repeatedly clashed with government security forces.

San Diego Zoo officials are welcoming another California condor chick, the seventh hatched this year. The healthy chick emerged from its shell Thursday and now is the 39th surviving condor. A zoo spokesman say hopes are high that the giant vultures will be able to be returned to the wild as early as next year.

(MAY 11) UPI - The House passed a family and medical leave bill Thursday, despite threats of a veto from President Bush. Under the bill, businesses with more than 50 employees must offer up to 12 weeks of UNpaid leave for workers to care for newborns, newly adopted children, or a seriously ill child, parent or spouse. Supporters of the legislation call the bill pro-family, while opponents say it takes away an employer's rights to choose worker benefits.

A man convicted of poisoning a historic oak tree in Austin, Texas, has been sentenced to nine years in prison and fined one-thousand dollars. Paul Stedman Cullen of Stubenville, Ohio, was convicted Thursday of second-degree criminal mischief. The Treaty Oak was considered a spiritual tree by the Indians and is thought to be around 400 years old. The tree once was called the most perfect oak specimen in North America.

Environmentalists have filed a lawsuit against the Environmental Protection Agency charging new rules on toxic waste disposal do NOT encourage industry to minimize pollution. Environmentalists from three groups and a toxic waste industry association say the E-P-A did NOT follow a 1984 law directing the agency to set the toughest possible detoxification standards.

#90131u0283 05/11/1990 ~United Press International
(MAY 11) UPI - A freak winter-like storm hit Michigan's Upper Peninsula Thursday, covering some areas with as much as 12 inches of snow. At least one highway had to be closed and strong winds reduced visibility to less than one-quarter mile along Lake Superior in Marquette County. In southern Michigan, one youth is believed dead after being swept to off a pier by large waves in South Haven.

Canadian Forces officials say two Dutch fighter pilots were engaged in a ''NATO air defense exercise'' Thursday when their jets collided at 17-thousand feet. One pilot was injured and the other is missing. The accident occurred 48 miles northwest of the Canadian Forces Base in Goose Bay, Labrador, on Canada's Atlantic Coast. It was the second accident at the base in less than two weeks.

Exiled anti-Castro activists say they have organized a 100-vessel flotilla that will travel within 14 miles of the Cuban coast. The activists say the flotilla will leave Key West early May 20th to show solidarity with their countrymen and support for democracy. The flotilla will include members of most of Miami's Cuban exile groups. Quoting a spokesman- ''We are trying to bridge that wall of water in the same way the Berliners did with theirs.''

#90131u0285 05/11/1990 ~United Press International
(MAY 11) UPI - Cecil Fielder, who rarely got to show what he could do in Toronto, is giving the Blue Jays a belated performance that's drawing rave reviews.

Fielder collected three hits, including his major league-leading 13th home run, and drove in three runs Thursday night to lead the Detroit Tigers to a 10-5 victory over the Blue Jays.

Fielder, who homered to lead off the second inning and triggered the Tigers' six-run third with an RBI single, has nine hits in three games against his former Toronto teammates, including three doubles and four home runs. Nine of Fielder's league-leading 31 RBI have come against the Blue Jays.

''All he needed was the opportunity to play,'' said Blue Jays Manager Cito Gaston, who was Toronto's batting instructor when Fielder was with the club. ''He's a good kid. I always said he was capable of 25 to 30 homers a year, but the way he's going now, he could make that 40.''

The odd man out in a crowded first-base situation with Fred McGriff and Cecil Upshaw, Fielder left Toronto after the 1988 season and signed with Japan's Hanshin Tigers, where he hit 38 home runs last season. He joined

the Tigers as a free agent in January.

''The problem with platooning is you put more pressure on yourself because if you have a couple bad games you might be out of (the lineup) the next time it's your turn,'' Fielder said. ''Now I feel that I'll be in the lineup every day, so I just let things happen as they may and not worry about anything.''

Jeff Robinson, 2-3, scattered seven hits over 6 1-3 innings to earn up his first victory in six career decisions against Toronto.

''I've never been so cold in my life,'' Robinson said of the game that started in 40-degree weather with winds gusting to 38 mph. ''The only time I came close to getting loose was in the middle innings. But it kept getting colder and colder. When the umpire threw me a ball, it felt like it came out of the freezer.''

Paul Gibson relieved Robinson and pitched 1 2-3 innings, and Mike Henneman pitched a scoreless ninth.

Detroit chased Toronto starter Todd Stottlemyre, 4-3, with its six-run third inning. Lloyd Moseby led off with a single, took second on a wild pitch and scored on Fielder's single. David Wells relieved and didn't retire any of the five batters he faced.

Matt Nokes was safe on a fielder's choice when first baseman Fred McGriff's throw to second was late. Sheets popped a bunt over Wells' head to load the bases. Tracy Jones drilled Wells' next pitch up the middle for a two-run single and Heath followed with a single, scoring Sheets. Tony Phillips doubled to drive in Jones.

Willie Blair relieved Wells and struck out Trammell, but Lou Whitaker drove in the final run of the inning with a sacrifice fly.

''Those things are going to happen sometimes,'' Gaston said. ''I just hope they happen for us tomorrow.''

Elsewhere Thursday night in the American League, Minnesota edged Cleveland 3-2, Kansas City overtook Texas 6-2 and Seattle topped California 5-2.

In the National League, it was: Montreal 8, Los Angeles 2; San Diego 9, St. Louis 1; and Cincinnati 10, Pittsburgh 4.

-- AROUND THE AL --

Twins 3, Indians 2

At Minneapolis, Gary Gaetti capped a three-run sixth inning with a two-run

double to lift the Twins. Three Minnesota pitchers combined to hold the Indians to seven hits, with Roy Smith, 1-3, earning his first victory since last Aug. 23. Rick Aguilera went two innings for his seventh save. Greg Swindell, 2-3, took the loss despite pitching a complete game.

Royals 6, Rangers 2

At Arlington, Texas, Bo Jackson's three-run homer powered a six-run eighth inning for the Royals. Jackson broke a 2-2 tie when he hit the first pitch from Gary Mielke off the right-field foul pole for his second home run of the year. Jeff Montgomery, 3-1, got the win in relief of Tom Gordon. Texas starter Kevin Brown, 5-1, was the loser.

Mariners 5, Angels 2

At Seattle, Dave Valle's two-run single highlighted a four-run fourth inning as the Mariners handed California its seventh loss in eight games. Brian Holman, 5-2, allowed nine hits over eight innings for the win. Mike Schooler worked the ninth for his ninth save. Kirk McCaskill, 2-2, took the loss.

#90131u0330 05/11/1990 ~United Press International

(MAY 11) UPI - The New York Knicks figured James Edwards wouldn't hurt them from the inside, nor could Isiah Thomas do any outside damage.

Back to the drawing board.

Edwards scored a career playoff-high 32 points and Thomas tossed in five three-pointers - three in the final 6:13 - and the Pistons took a 2-0 lead over New York in their Eastern Division semifinal series with a 104-97 victory over the Knicks.

The best-of-seven series moves to New York for Games 3 and 4 on Saturday and Sunday afternoons.

Game 2 was a big improvement for the Knicks, who were demolished in Game 1 112-77. They played well Thursday night, but were unable to stop the Pistons down the stretch.

The Pistons have now won 12 straight postseason games and can tie the NBA record with a victory in Game 3. The Los Angeles Lakers set the record for consecutive playoff victories last year.

Edwards was a force in the first half, effectively posting up New York's Patrick Ewing to score 21 points, mostly on short turnaround jumpers. The Pistons planned to take the ball right at Ewing and succeeded in getting

him into early foul trouble.

''We wanted to put as much pressure on Patrick as we could,'' said Edwards a 13-year veteran, who made 13 of 19 field-goal attempts and all six of his free throws. ''We wanted to make him play defense so he couldn't rest. They count on him for a lot of minutes and offense.''

Maurice Cheeks didn't fair much better that his teammate, drawing the assignment of covering Thomas. Cheeks thought the Detroit guard would hurt the Knicks more by driving to the basket. So Cheeks decided to play a step back and force Thomas to make his outside shot.

Thomas made them.

''It's tough to play him,'' Cheeks said. ''He's extremely quick - and extremely quick making jumpers. You have to play the percentages, and this game they weren't in our favor. When he's making those type of shots, he's tough.''

Thomas hit the first of his big three-pointers with 6:13 to play to give Detroit a 95-90 lead. He made his second with 4:28 left, again taking advantage of being given the shot, to restore Detroit's lead to 99-94.

''Isiah is a game player, no question,'' Detroit Coach Chuck Daly said. ''We need that outside shot.''

Thomas said at that point, ''it was the only shot I had. You don't seem to understand, if those are the only shots they're going to give me, I have to take them.

''It was the result of necessity. I had exhausted every possibility to drive. And when it's going in, it doesn't feel like a three-point shot.''

The third came with 1:03 left and sewed up the game, moving the Pistons out to a 104-95 lead. Thomas had hit two free throws before nailing his fifth three-pointer of the game to make it 101-95.

''You have to give him those shots,'' New York's Gerald Wilkins said. ''With all due respect, he's not a great three-point shooter. He hasn't won any three-point shooting contests that I know of.

''I've seen him miss three straight threes. But when Isiah's on top of his game, he's vintage. And those were big baskets. When you hit threes instead of twos, that's nine points instead of six. Big difference.''

-- AROUND THE NBA --

Elsewhere in NBA playoff action Thursday night, San Antonio crushed

Portland 121-98 and the LA Lakers routed Phoenix 124-100.

Spurs 121, Trail Blazers 98

At San Antonio, David Robinson scored 28 points and blocked six shots and Rod Strickland added nine rebounds and a career-high 17 assists to help the Spurs win Game 3 of their Western Conference semifinal series. Terry Cummings added 19 points and nine rebounds and Willie Anderson and Sean Elliott had 17 each for the Spurs, who trail 2-1 in the series. Portland was led by Terry Porter and Buck Williams, each with 18 points. Game 4 is Saturday in San Antonio.

Lakers 124, Suns 100

At Inglewood, Calif., James Worthy scored 23 of his 27 points in the first half and the Los Angeles Lakers evened their Western Conference semifinal series at one game each. The Lakers quickly rebounded from its stunning loss in Game 1, sprinting to a 63-48 halftime lead. Magic Johnson contributed 21 points and 14 assists and Orlando Woolridge had 21 off the bench for the Lakers, who avoided losing the first two games of a playoff series at home for the first time since 1977. Jeff Hornacek led the Suns with 18 points. Game 3 of the series is Saturday in Phoenix.

KATMANDU, Nepal (MAY 11) UPI - Two Nepalese army helicopters retrieved three Japanese in Tibet Friday after they failed to make the first hot-air balloon flight over Mount Everest.

The balloon crashed Wednesday because of a lack of a strong wind needed to complete the flight over the 29,028-foot mountain, the world's highest peak.

Rescue teams had been placed at several points in Tibet to help the balloonists in case of emergency.

''While we were coming down to locate rescue teams, the balloon hit a rock and rolled down several times,'' said the craft's pilot, Michio Kanda, 41, shortly after landing at Katmandu airport. ''The balloon burnt after it hit the rock.''

The others on board were identified as Saburo Ichiyoshi, 44, and Atsushi Saito, 37.

''Ichiyoshi has a broken left leg maybe at two or three places,'' Kanda said. ''Only the hospital can determine.'' he said.

Kanda left the crash site and started walking toward the base of the operation at Nyalam. He was met about halfway by a doctor that belonged to the expedition team.

Ichiyoshi and Saito were retrieved at the crash site. All three were hospitalized in Katmandu.

ROCKY MOUNT, NC (MAY 11) UPI - The Carolinian, Amtrak's newest passenger train, is slated to make its inaugural 174-mile run Friday through the urbanized and traffic-logged heart of the Tar Heel State.

Eleven cities and approximately 3 million people will be served by the train, which will make daily runs between Rocky Mount and Charlotte.

Republican Gov. Jim Martin and Amtrak President Graham Claytor headed up the list of dignitaries on the first ''whistle stop'' trip, pausing for 15 or 20 minutes at each station for ceremonies.

The new train will travel an old path dating back to the golden age of rail travel - a route established in 1850 that gave birth to many of the cities the Carolinian will serve.

Martin hailed the new service as a boon to business travelers and predicted it could lead to revitalization of downtown areas. He was to reopen stations in Kannapolis and Durham along the way.

Other stops included Wilson, Selma, Raleigh, Burlington, Greensboro, High Point and Salisbury.

The 145-mile Raleigh-to-Charlotte leg of the trip, which officials predict will be the one most heavily ticketed, will take 3 hours and 59 minutes, or about an hour longer than it takes in a car. The same trip can be made by air in 45 minutes.

David King, director of the Public Transportation Division of the state Department of Transportation, said officials realize the relatively slow travel times are a problem and technicians already are at work to improve them.

''We think by October we will be able to knock 10, 12, or even 15 minutes off the running times,'' he said.

The Carolinian will also provide connecting service to Richmond, Washington, Philadelphia and New York. After leaving Rocky Mount, on the northern leg of its run from Charlotte, the train becomes part of Amtrak's ''Palmetto,'' the train linking Jacksonville, Fla., with New York City.

Regular fare for a Charlotte-to-Raleigh round trip will be $46. A Charlotte-to-New York round trip ticket will cost $156 during off-peak times, and $182 during holidays and other heavy-travel periods.

Today's run marked a rebirth for the Carolinian. An earlier Carolinian

covered much the same route during 1984 and 1985, but was canceled for lack of passengers.

King believes the new Carolinian stands a better chance of surviving because of growing traffic problems on the interstates and the stepped-up urbanization of the area in recent years.

''We've got 3 million people who are within 20 miles one way or the other of the service, and it is a growing area with growing mobility needs,'' he said.

He also pointed out the interstate highway system, particularly the segment between Greensboro and Durham is about to undergo some major repairs that will further snarl traffic in the already busy corridor.

The route the Carolinian follows is basically the same first staked out by the North Carolina Railroad, which was commissioned by the General Assembly in 1850. It ran from Morehead City to Raleigh, Greensboro, Durham Charlotte and points between.

''It (the old North Carolina Railroad) is the reason that some of those communities exist,'' King said. ''The railroad was there first and the cities and towns sprang up around it.

''So it (the route) is very well positioned. It is really the heart of our urbanized Piedmont,'' he said.

#90131u0408 05/11/1990 ~United Press International

AUSTIN, Texas (MAY 11) UPI - The sister of the man convicted of poisoning Austin's historic Treaty Oak begged the court's mercy before his sentencing, saying, ''I've never known him to harm a living thing except himself.''

The jury sentenced Paul Stedman Cullen to nine years in prison and fined him $1,000 Thursday for pouring the herbicide Velpar around the base of famous tree. He could be free within a year, said State District Judge Bob Perkins.

Cullen, 46, of Stubenville, Ohio, was found guilty Wednesday of second-degree criminal mischief. Prosecutors said he poisoned the tree as part of an occult ritual to impress a woman.

''I'm certain that everyone who was in this court the last two weeks still finds this crime unfathomable,'' Perkins said. ''In terms of rationale, nobody can figure it out. It makes it that much more of a crime.''

Cullen's sister, Elizabeth Love of Plano, Texas, urged the jury to be lenient, saying, ''I know how much pain and anguish he has gone through in the last 10 months. ''I've never known him to harm a living thing except himself.''

Cullen's father, retired Air Force Col. Paul Cullen of Lawton, Okla., also requested leniency, saying his son was not harmful to other people.

The Treaty Oak, one of the few survivors of a stand of trees called the Council Oaks, was considered a spiritual tree by the Indians, who gathered beneath its sprawling limbs 100 years ago. It has been an Austin landmark since the days of state founder Stephen F. Austin.

The tree, once called the most perfect live oak specimen in North America, is believed to be up to 400 years old.

The poisoning has left most of the tree dead, but part of the giant oak is still alive and experts hope it will survive.

''What he has done, he has robbed all of us and he has robbed future generations,'' Assistant Travis County District Attorney Kent Anschutz said after showing the jury pictures of the Treaty Oak a year ago and now.

A tape recording was played for jurors in which Cullen is heard discussing poisoning the tree. Traces of the potent Velpar were found in his pickup truck.

He called what Cullen did a ''senseless and selfish act,'' not against just any tree but by Cullen's own design a state symbol.

The tree-poisoning outraged many in Austin and across Texas. Cullen's lawyer said he took his client's case without charge because of a ''lynch-mob'' public mentality toward the accused.

''When I entered the case, it was because I wanted him to get a fair trial '' lawyer Terry Kirk said. ''I do not like lynch mobs. Thank God the jury in my home city verified that there was not going to be any lynch mob. I'd like to believe my argument that one should not give up on Paul anymore than we should give up on Treaty Oak.''

He had asked jurors not to sentence Cullen to more than 10 years. After the sentence was announced, Kirk said there would be an appeal, but that he would end his participation in the case. The court would appoint a lawyer for Cullen's appeal, Kirk said.

Prosecutors did not seek a specific sentence, but suggested that Cullen needed a ''long period of incarceration in a structured environment to reflect on his actions.''

Assistant District Attorney LaRu Woody reminded the jury of Cullen's past convictions, including a burglary conviction in 1964 in Virginia, a 1969 marijuana possession conviction in California, a 1983 DWI in Palo Pinto County and a 1983 burglary conviction in Austin.

Jurors deliberated about 3 1/2 hours Wednesday night and five hours Thursday. After the sentence was announced, Perkins applied Cullen's 10 months in jail toward the nine-year sentence.

Cullen was living in the back of a truck in nearby Elroy when he was arrested June 29, 1989. He has been in custody since that time on a $20,000 bond.

#90131u0417 05/11/1990 ~United Press International

PARIS (MAY 11) UPI - South African President Frederik de Klerk said his unprecedented meeting with President Francois Mitterrand signals international recognition of the racial reforms under way in his country.

De Klerk, beginning a nine-nation European tour in France that includes a stop Friday in Greece, was welcomed Thursday with all the pomp and ceremony afforded a head of state.

Republican guards wearing silver breastplates and plumed helmets lined the courtyard of the Elysee Palace as the Socialist Mitterrand came out on the steps to welcome the reforming South African politician.

''Just the fact that I met with them shows a recognition of the change under way in South Africa,'' de Klerk told a news conference after an hour of talks with Mitterrand at the Elysee Palace and a separate session with Prime Minister Michel Rocard.

''There is no turning back,'' de Klerk said after the meeting with Mitterrand. ''South Africa will get a constitution that is fair to all South Africans. It will not be racialist and it cannot be discriminatory in any way.''

De Klerk said he won no promises from Mitterrand on rolling back sanctions against Pretoria but that it would have been unrealistic to expect any unilateral moves in that direction.

''I did not come here with my hat in my hand,'' he said. ''It was my impression that there is a realization that the situation in South Africa has developed to such an extent that the question of sanctions should be dealt with but that this must be in the European context.''

France has made it clear it will only reduce sanctions in concert with all 12 European Community members.

Mitterrand for his part told de Klerk that France ''only asks to accompany the evolution (in South Africa) that it hopes will be as rapid as possible toward a situation of legal rights,'' said Elysee spokesman Hubert Vedrine.

After the discussions, Mitterrand strolled out with de Klerk in an unusual gesture of hospitality. The red carpet greeting underscored the importance of what is widely regarded in South Africa as the most important mission abroad by a South African leader in more than four decades of apartheid rule.

His Thursday meeting with Mitterrand was the highest-level talks between France and South Africa since the South African Republic was proclaimed in 1961.

African National Congress leader Nelson Mandela said in an interview with France's Europe 1 radio that he had no objection to the warm welcome France gave de Klerk and hinted he himself might run for the South African presidency one day.

Asked if the French attitude was incorrect, Mandela said, ''I do not think so. Our policy of isolation of South Africa is clear. But Mr. de Klerk has started dialogue with credible (ANC) leaders of the country.''

''I am convinced he is a man of integrity,'' Mandela said, playing down the prospect of his eventual candidacy for the presidency. ''That does not depend on me but on the ANC and the South African people. I will do what they ask me to do. I would accept any position that the people would confide in me.''

Vedrine said Mandela will meet with Mitterrand June 7.

The French president always has been a fierce opponent of the apartheid system of racial discrimination. He twice snubbed de Klerk's predecessor, Pieter W. Botha, when that South African leader visited France in 1984 and 1986.

De Klerk's European tour will seek to capitalize on the successful conclusion of a round of talks last week with the ANC and on positive international response to recent racial reforms.

The French Foreign Ministry issued a statement saluting de Klerk's ''courage'' in February after he announced the release from prison of Mandela.

But Mitterrand also has made it clear that he expects South Africa to press reforms aimed at dismantling apartheid.

France's only bilateral sanction against South Africa affects coal trade between the two countries. In the 1960s and 1970s, France was a leading exporter of arms - especially Mirage jet fighters - to South Africa. But Paris now adheres to the international arms embargo against Pretoria.

De Klerk will visit Britain May 19 for talks with Prime Minister Margaret Thatcher, the European leader thought to be most sympathetic to his position on lifting sanctions. He also will tour West Germany, Switzerland Greece, Portugal, Spain, and two other countries, believed to be Italy and Belgium.

#90131u0435 05/11/1990 ~United Press International

(MAY 11) UPI - Levees along the Red River in Texas and Arkansas were turning ''soft and mushy'' early Friday under the strain of surging floodwaters, while snow tapered off in Wisconsin and Michigan following a powerful spring blizzard.

Texas Gov. Bill Clements arranged Friday to inspect a levee along the Red River and fly over the flooding Trinity River, whose leading edge is said to be 6 to 10 miles wide as it pushes toward Lake Livingston in southeast Texas.

The number of Texas counties designated disaster areas jumped to 25 with the addition of nine counties Thursday by the Federal Emergency Management Agency.

Levees along the Red River were ''water saturated, soft and mushy,'' Scott Connor, a communications officer for Texarkana Emergency Operations, said early Friday.

Dave Hall, a coordinator for FEMA in Texarkana, said Thursday night that there had been a report of water spilling over a levee in Little River County, Ark., and repair crews had been dispatched to the scene.

Hall said some repair work was done Thursday afternoon on a levee near a bridge on U.S. 71, and as many as 20,000 head of cattle were reported stranded in Little River and Miller counties in Arkansas.

The National Weather Service said part of the Red River, which has a flood stage of about 25 feet, was expected to remain above 30 feet through Saturday. The previous record crest was about 29.2 feet in 1957.

Trinity River Authority officials expect a double crest at Lake Livingston

the first on May 17 and the second a few days later, said TRA spokesman Carol Weathers.

''We're experiencing a gradual increase and expect it to continue until the major flood waters hit sometime this weekend, probably Saturday or Sunday,'' Weathers said.

In Wisconsin and Michigan, snow began tapering off after early Friday after dumping up to a foot of snow across the region. The storm snapped power lines, causing power blackouts for thousands, felled tree limbs and closed some roads, schools and businesses.

The spring blizzard was unusual, even for the often-wintry Michigan Upper Peninsula.

''We've got a February-type blizzard going here right now,'' said Trooper Fran Weber of the Munising State Police post in the Upper Peninsula.

''This is unusual ... the intensity and length of the storm,'' he said. ''You get snow mixed with rain this time of year, but it usually doesn't build up.''

Snow had stopped in the western Upper Peninsula early Friday, but flurries continued in Sault Ste. Marie in the eastern peninsula, and Alpena had snowshowers in northern lower Michigan.

Trooper B. Gaustein of the state police post at Munising said Friday that State Highway 28, which had been closed for about a 40-mile stretch between Munising and Harvey, was opened about 11:45 p.m. Thursday.

''It's pretty unusual to get this much snow,'' he said Friday when asked of the 8 inches Munising region was socked with Thursday. ''It feels like January. Just a week or 10 days ago, it was in the 80s here.''

Roads throughout the region were slippery and covered with snow. Graustein said there were several traffic accidents with a ''couple of injuries, but nothing serious.''

''Marquette really got dumped (with snow),'' he said. The temperatures in the U.P. now are in the upper 20s to low 30s with wind-chill readings in the single-digit range.

In eastern Wisconsin's Waukesha County, which was hard hit with snow, officials said tens of thousands of trees were damaged and the county will apply for federal disaster relief to help pay for the clean-up. In Milwaukee, about 2,500 trees were reported damaged.

As many as 30,000 people were without power for at least a while Thursday

as the storm snapped power lines.

On the West Coast, strong winds raked drought-parched farmland in California's San Joaquin Valley for the second day Thursday, forcing the closure of a major highway that was nearly obliterated by dust and sand. There were numerous minor accidents.

Skies were mostly cloudy over Los Angeles, and winds gusted to 45 mph in the area's deserts, producing blowing dust and sand that prompted the weather service to issue a desert driving warning.

Clouds moved onto the Washington coast Thursday, keeping temperatures down to the upper 50s. Skies were mostly fair in eastern Washington.

Some rivers in southern New England swelled early Friday following heavy rainstorms that battered the region along with strong winds earlier in the night, the NWS reported.

A flood watch was in effect for much of southwest and central Connecticut, where up to 3 inches of rain fell in some areas, but state police reported no problems.

Rain gave way to cloudy skies and temperatures in the low 50s for most of New England.

The mid-Atlantic states took a turn for the colder and windier. Western Pennsylvania and the West Virginia panhandle had sleet and snow flurries. Eastern Pennsylvania, southern New Jersey, Delaware and Maryland experienced scattered showers. Temperatures ranged from the mid 30s to low 50s.

The South was chillier, too, registering only 48 degrees in Knoxville, Tenn., early Friday and 51 in Atlanta. Florida was warmer, with 75 degrees i Miami and 66 in Jacksonville.

#90131u0442 05/11/1990 ~United Press International

BANGKOK, Thailand (MAY 11) UPI - U.S. and Vietnamese experts completed a 20-day joint search for evidence of American servicemen missing in Vietnam official radio and a U.S. embassy spokesman said Friday.

''From April 20 to May 10, Vietnamese and U.S. specialists conducted the 10th joint search for information,'' the Vietnam News Agency said.

It said the search focused on 12 American airmen missing in action in central Vietnam.

The specialists excavated crash sites in the central provinces of Quang Binh and Quang Tri to search for the remains of the missing men, it said. The report, however, did not say whether any remains were found.

A U.S. embassy spokesman in Bangkok confirmed the search had been completed and the U.S. experts had returned to Bangkok. The spokesman said no further information was immediately available.

The Vietnamese agency said the U.S. experts ''appreciated the effective cooperation and assistance of the local authorities and people wherever they conducted the search.''

A total 1,678 Americans are still unaccounted for from the war, but officials have said that many of the missing were lost over water and their remains are never expected to be found.

#90131u0448 05/11/1990 ~United Press International

SAN FERNANDO, Philippines (MAY 11) UPI - The military announced Friday the arrest of a communist guerrilla commander who admitted he led the rebel team that ambushed and killed two American contract workers outside a U.S. communications station in September.

Alex Capitulo, 33, provincial commander of the communist-led New People's Army, was captured Wednesday as he emerged from a beer-drinking party at a restaurant in the nearby town of Guagua, the military said.

Capitulo was armed with a grenade, but did not resist, said Lt. Col. Efren Fernandez, Pampanga province constabulary commander.

Capitulo had been wanted in 16 murder and kidnapping cases, including the ambush slaying Sept. 26 of Americans William Thompson, 45, and Donald Buchner, 44, Fernandez said.

Thompson and Buchner, employees of Ford Aerospace under contract with the Defense Department, were killed in an ambush while driving home outside the U.S. Camp O'Donnell communications station in Tarlac province, 70 miles north of Manila.

Capitulo admitted he led the group of 30 rebels riding on two trucks that waylaid the two Americans, Fernandez said. The ambush coincided with the visit of Vice President Dan Quayle.

''Capitulo confessed he was the leader of the guerrillas,'' Fernandez said. He said Capitulo was confined at the regional police headquarters in San Fernando, 40 miles north of Manila, for tactical interrogation.

Fernandez said the arrest of Capitulo was not announced to allow agents to track down four other rebel commanders who were implicated in the slaying of the two Americans.

He said Capitulo also confessed he led the team that sprang loose last October two guerrillas on trial for the Oct. 28, 1987, slaying of three Americans in the nearby Angeles City, host to the U.S. Clark Air Base.

''People at Clark could rest easy once we pick up the others,'' Fernandez said. He said Capitulo and his men operated in the vicinity of Clark.

At least eight Americans have been killed since October 1987 in ambushes blamed on the NPA, the 19,000-strong armed wing of the outlawed Communist Party of the Philippines has been battling the Manila government for 21 years.

Philippine and U.S. authorities also are investigating the killing Friday night of Marine Gunnery Sgt. John Fredette, 34, of Buena Park, Calif., outside Subic Bay Naval Base.

-30- 2579

#90131u0451 05/11/1990 ~United Press International

WARSAW, Poland (MAY 11) UPI - Parliament dissolved the discredited communist militia and secret police, and Prime Minister Tadeusz Mazowiecki appointed two Solidarity officials to be in charge of state security.

Krzysztof Kozlowski, 58, who has been a deputy interior minister since March, Thursday was appointed head of the Office of State Protection, which replaces the secret police. Andrzej Milczanowski, 51, a Solidarity official and lawyer, was named deputy of the Office of State Protection.

The appointments by Mazowiecki indicate the last remnants of the communist power base - the Interior Ministry and the army - were losing power.

Kozlowski, former editor of the Catholic weekly Tygodnik Powszechny and a Solidarity activist, said the new office would not control ''everybody and everything'' as did the secret police, which was disbanded Thursday by Parliament.

Of the secret police's 24,000 agents, 9,000 have been fired and the rest will work in the Office of State Protection.

Under the Solidarity-communist government in 1989, the Interior Ministry remained in hands of communists, who further lost their base when the Communist Party was disbanded early this year.

Under communist rule, the secret police monitored all organizations in the

country, including the Roman Catholic Church. In 1984, secret police agents killed a pro-Solidarity priest, the Rev. Jerzy Popieluszko.

Kozlowski said he would allow former agents the opportunity to serve under the Solidarity government because of a concern over adequate manpower.

''I am not interested in the past, I am intrested in how these people will work,'' Kozlowski said.

The Parliament also dissolved the militia, the organization formed by the former communist government in 1944 to defend the communist system installed by Moscow. The 77,000-strong militia now becomes the national police.

Mazowiecki fired militia chief Gen. Zenon Trzcinski and was succeeded by Col. Leszek Lamparski.

Most militia members belonged to the Communist Party. As members of the newly formed police force, they will be forbidden from joining any political party.

Lamparski said the new police would attempt to build a better image and expressed his conviction that young Poles will not be ashamed to join the force.

#90131u0455 05/11/1990 ~United Press International

BEIJING (MAY 11) UPI - Security guards led away a man who assaulted a student at Beijing University Friday after a scuffle broke out over wall posters urging students to protest, witnesses said.

The incident occurred in a central area on campus where official notices are posted. At the height of last year's student-led democracy movement, the notice boards were plastered with illegal wall posters and declarations of protest.

Despite tough new rules banning wall posters on campus, three posters appeared Friday. One opposed Western economic sanctions, and another criticized students for being too passive, a witness said.

One of the posters called on Beijing University students to ''play an active role when the country is in difficulty.'' Undercover police ripped down the poster as a small crowd gathered to watch.

''Students should put into practice their love for the country. Stand up and be counted,'' one poster read.

A scuffle broke out shortly after the posters were torn down. One student was punched by an unidentified man who was taken away by security guards to a campus guard station, the witnesses said.

Students followed the man and stood outside the guard station demanding that he be brought out and identified, a witness said.

The posters appeared during a period of sensitive anniversaries leading up to June 4, the date the Chinese army opened fire on demonstrators in Beijing last year, ending six weeks of protests for greater freedom.

Chinese sources said authorities have issued repeated internal warnings to Beijing work units to avoid Tiananmen Square, the heart of last spring's protests, on June 4 and other significant dates.

Police deployment has been stepped up at night recently, with bands of police patrolling major roads by car and motorcycle. Witnesses have also reported seeing troops in fatigues patrolling the city.

Authorities are especially anxious over any inklings of rebellion at prestigious Beijing University, which served as one of the centers of the 1989 student-led protests.

Posters criticizing students for being ''too passive'' were also seen on campus last week, according to an academic source.

#90131u0470 05/11/1990 ~United Press International

MILL VALLEY, CA (MAY 11) UPI - Tamalpais High School will become the first in California to provide condoms for students without getting parents' permission.

Spurred by the death of a teacher from AIDS, students convinced parents and then school officials to provide free condoms through the school nurse along with a mandatory course on how to use them to prevent diseases.

Such visits to the nurse will be confidential, school officials said Thursday.

''We are by no means just handing out condoms,'' Principal Barbara Galyen said of the program scheduled to begin next week.

The effort was led by Student Body President Dave Harris, 17, a senior.

''We're no different from most other high schools,'' he said. ''I just think that students here are more vocal. Hopefully, other schools will follow suit.''

Harris said he was spurred by the recent AIDS-related death of Chuck Smith a history teacher who, the day before he died, told students of his illness and warned one class to use condoms if they were sexually active.

The effort was aided by sobering public health records showing that students of the school had a higher rate of sexually-transitted diseases, including the HIV virus that causes AIDS, compared to other high schools in Marin County.

Principal Galyen said it took some convincing to get the program started.

''We have the same concerns that parents are expressing,'' she said. ''When it was first brought up, most of us were against the idea.''

But a heavily-attended meeting of parents, teachers and students approved the plan and the school's Leadership Team, made up of faculty, parents and students, voted 14-1 in favor of it Wednesday.

Three high schools in Los Angeles provide condoms and contraceptive devices such as birth control pills in school health clinics but parental consent is necessary.

-30- 2066

#90131u0501 05/11/1990 ~United Press International

PARIS (MAY 11) UPI - Lawmakers briefly suspended a session Friday because of the ''monstrous'' desecration of a Jewish cemetery in southern France and officials blamed right-wing extremist Jean-Marie Le Pen for inciting vandals who smashed 34 tombstones and mutilated a corpse.

''Nothing can express with all the force that is needed our feelings of horror,'' Georges Hage, session president of the National Assembly, told fellow deputies of the lower house of Parliament.

Hage expressed outrage at ''the monstrous events'' at the southern village of Carpentras, where anti-Semitism was previously unknown before the discovery Thursday that vandals had unearthed coffins and impaled the recently buried body of an 80-year-old man with an umbrella.

''I invite each one to reflection and to demonstrate the deep reproval of the National Assembly,'' Hage said.''I suspend the sitting.''

The session was suspended 15 minutes.

A man ''with a strong Arab accent'' and claiming to represent a previously unknown group called Mohammed El Boukima telephoned the newspaper Vaucluse Matin to claim responsibility for the vandalism. Police said they were

investigating, but one agent said, ''Anybody could have made the call.''

Socialist Interior Minister Pierre Joxe accused the anti-immigration National Front leader Le Pen of whipping up a climate of hatred conducive to such racist acts.

''One knows very well that his ideas carry along the weak spirited, those who consider themselves strong, some groups, and can lead, like other anti-Semites in history, to crimes, to acts of violence of a proportion that exceeds the imagination.''

Joxe dismissed remarks by Le Pen describing the vandalism as a ''provocation'' by anti-racist militants. Le Pen is ''a provocateur himself'' and a racist, Joxe said.

''Like all racists and those who for dozens of years have expressed their anti-Semitism in an explicit fashion, he is one of those responsible, not just for the acts of Carpentras, but of all that has been inspired by racial hatred for years.''

At Carpentras, a town 20 miles northeast of the southern city of Avignon, families of the desecrated dead and local politicians gathered at the cemetery, one of the oldest Jewish graveyards in France, to survey the wreckage of the marble headstones.

''We need to educate, to teach,'' said Benassaya, whose brother Daniel is buried at the cemetery. ''The great religions must take each other by the hand to struggle against the violence,'' he said, clutching a bouquet of flowers.

Another mourner wearing a skullcap who identified himself only as David said his relative's tomb had not been touched.

''That is not the point,'' he said. ''I feel wounded. My honor hurt like the others. This is not the moment for politics. But the anti-Semitic climate run by certain people without doubt is not estranged from this odious act.''

Several anti-racist groups called demonstrations in the area and around the capital to protest.

Similar desecrations of Jewish cemeteries have taken place often in other European countries, notably West Germany.

But the incident shocked the French public and political opinion particularly because it recalled the mass deportations to concentration camps of hundreds of thousands of Jews by the collaborationist Vichy regime during World War II, political experts said.

Nobel Peace Prize winner Elie Wiesel left a dinner with Culture Minister Jack Lang at the opening of the Cannes Film Festival Thursday on hearing the news.

''I think there is an unhealthy climate in France, a racial climate, a racist climate,'' Wiesel said. ''It is not new but it is in the process of swelling, of heating up. It is becoming more and more dangerous. I think French society now should examine its conscience. It is urgent.''

The desecration came two days after anti-Semitic inscriptions and portraits of Hitler were found painted on store fronts in Avignon.

''It is not the body of a Jew that has been profaned but the image of mankind that has been stricken,'' Joseph Sitruk, the chief rabbi of France said in a statement. ''A civilization that does not respect the dead eventually destroys the living.''

President Francois Mitterrand visited the chief rabbi's home in Paris Thursday evening to express his sorrow and said the perpetrators should be punished.

Police said at least four people used crowbars and shovels to unearth caskets, lift or break heavy marble tombstones and pull the body of an 80-year-old man buried 15 days ago from his coffin before impaling it with the umbrella. The vandals also unsuccessfully tried to remove a woman's body from one coffin they unearthed.

''I hope this is the work of an unbalanced person, for Carpentras is a peaceful town that has never known such horrors,'' said Carpentras Mayor Jean-Claude Andrieu.

#90131u0503 05/11/1990 ~United Press International

MIAMI (MAY 11) UPI - Cuban leader Fidel Castro provided lawyers for Manuel Noriega with documents refuting charges that the former Panamanian dictator smuggled cocaine into the United States, it was reported Friday.

Miami attorney Frank Rubino told The Miami Herald he met with Cuban President Castro in March in Havana and was ''surprised'' when Castro disclosed that he had met earlier with other Noriega lawyers to give them information to help their case.

''Fidel Castro met with some of General Noriega's lawyers and discussed certain sensitive issues with us,'' Rubino confirmed Thursday. ''He further provided us with certain documentation. The nature of the documentation cannot be revealed because of the Classified Information

Procedures Act.''

The federal law prohibits the publication of documents classified by the U.S. government.

Rubino would not say which other members of the defense team went to Havana. Rubino, Steven Kollin, Jon May and New York attorney David Lewis are defending Noriega against charges he helped Colombian drug dealers smuggle cocaine into the United States.

Meanwhile, a hearing was scheduled for Friday afternoon before U.S. District Judge William Hoeveler to discuss the lawyers' request to withdraw from the case on grounds the government has frozen Noriega's assets, making it impossible for them to be paid.

Lewis, a specialist in classified documents law, said this week he has stopped working on the case until he gets paid.

''I told them to give me a call when they have a fistful,'' Lewis said.

Castro told a Brazilian television reporter March 26 that he met with Noriega's attorneys and denounced the government's case, the Herald reported.

''I have even talked with Noriega's lawyers,'' Castro said. ''If this is the evidence (prosecutors) have against him, then they have no evidence against him. And I have all the proof which proves the falsehoods of the accusations. I have given part to the lawyers, but I have kept another part.''

Castro did not say what evidence he gave to the lawyers. But he claimed ''to have all the cards in my hands to irrefutably prove the lies.

''Now the United States has brought a problem upon itself,'' he said. ''It has invaded (Panama). They have kidnapped Noriega and it turns out that they have no evidence to back the charges.''

The Noriega prosecution team had not reviewed Castro's remarks in Brazil, which were made while he was attending the inauguration of President Fernando Collor de Mello, said Diane Cossin, spokeswoman for the U.S. Attorney's Office in Miami.

Prosecutors claim Castro mediated a dispute between Noriega and Medellin cocaine cartel leaders about the destruction of a cocaine lab in Panama. The U.S. government has produced in court a color photograph of Noriega meeting with Castro, purportedly in Havana.

Noriega, who surrendered to invading American forces in Panama in January,

was indicted in Miami in February 1988 with 15 others on money laundering and cocaine smuggling charges. Two other defendants pleaded guilty and are awaiting sentencing, four are awaiting trial and the others remain fugitives.

If convicted, Noriega would face a maximum penalty of 145 years in prison and a $1.1 million fine.

(MAY 11) UPI - Around the world... around the clock... the latest news from U-P-I.

Pope John Paul plans to head to the scene of a plane crash today. The crash killed a bishop and 17 other people who were going to the Mexican city of Tuxtla Gutierrez to meet with the pontiff. The Aviacsa plane crashed in flames as it approached the airport yesterday. Despite the crash, the pope has NOT changed his schedule.

Officials in Colombia say three police officers have been shot to death in Medellin since a cocaine cartel began offering a bounty for each officer killed. Two officers were slain in separate shootings yesterday. A third was killed Wednesday. The cocaine cartel offered 42-hundred dollars for each officer killed.

The acting U-S attorney in Chicago, Ira Raphaelson, says he'll be the first federal prosecutor in the nation to ask for the death penalty in a drug case. Raphaelson says he'll ask for capital punishment for two alleged drug dealers who are accused of murdering a man scheduled to testify against them.

Two firefighters died responding to a false alarm in Waterbury, Connecticut, yesterday. Officials say the two were aboard a fire truck that hit several trees while racing to a reported fire. There was NO blaze. The ruins of the truck will be examined for possible brake failure or other malfunctions.

Police in New York City say seven Chinese peasants who were believed kidnapped after arriving in the United States just wanted to sight-see. A letter from three of the Chinese says they are afraid to come forward because they might be deported. The seven were supposed to study organic farming.

(MAY 11) UPI - The Senate has approved legislation authorizing federal

money for Amtrak for the next two years. The one-BILLION 396-Million-dollar measure was worked out by Senate-House negotiators and still must receive final approval from the House. President Bush did NOT include any money for Amtrak in the 1991 budget.

The Army and Boeing have unveiled a missile-tracking system built as part of the ''Star Wars'' defense program. The heart of the system is a sensing device mounted on top of a modified Boeing 767. The first test flight is scheduled this morning from Boeing Field in Seattle.

A Soviet spy film being aired tonight in the Soviet Union leaves two questions unanswered. In the film, Kim Philby's K-G-B handler says a fifth man was involved in the spy ring Philby ran in Britain- but does NOT name the man. The film also does NOT explain why the Soviets insisted on keeping Nazi Rudolf Hess in prison until he died two years ago.

Hawaii's Kilauea Volcano resumed its eruption yesterday after a three-day pause. But officials say the volcano has NOT immediately threatened more homes in the lava-devastated Kalapana area. 139 homes have been destroyed since the record-long eruption began in 1983.

Two Nepalese army helicopters rescued three Japanese balloonists in Tibet today. Their hot-air balloon crashed and burned Wednesday while attempting to fly over Mount Everest. Nepal had to get permission from China to undertake the rescue. The three balloonists were taken to a hospital in Katmandu.

MIAMI (MAY 11) UPI - Two Picasso paintings worth almost $600,000 have been stolen from the headquarters of a bank owned by an Ecuadorian famiily.

The 3-foot-by-2-foot artworks apparently were stolen from the Republican National Bank after their owner, Robert Isaias of Ecuador, left his office Wednesday afternoon to fly back to South America, police said. Isaisas' family owns controlling interest in the bank.

Bank employees noticed the paintings missing Thursday but other valuable art was left untouched in a private seventh-floor conference room at the bank's headquarters, police spokesman George Law said.

''Basically, that office is closed when he is not there,'' said Republic Bank President Oscar Bustillo Jr. ''One of his secretaries walked in to check and put mail on his desk and that's when she noticed.''

Police said there was no evidence of forced entry.

The paintings, titled ''Musical Instrument'' and ''Bull Skull on a Draped Table by a Window,'' together were worth $584,000, Officer James Copeland said.

Bustillo said the two paintings, were part of the Isaias family's collection, had been at the bank for about 10 years.

The theft occurred a day after police recovered contemporary paintings and sculptures from Ecuador that were stolen in November 1988. That art was valued at more than $200,000.

Police found the art in the attic of a home. Alberto Bello, 51, was charged with grand theft in connection with the theft. Police said he bought the art from the thiefs.

#90131u0566 05/11/1990 ~United Press International

TOKYO (MAY 11) UPI - Prime Minister Toshiki Kaifu told parliament Friday he will apologize to Asia for Japan's military expansion before and during World War II when he meets South Korean President Roh Tae Woo next week.

Roh is to make his first official visit to Japan May 24-26.

''I'm not going to apologize only to President Roh. I keenly feel responsible (for Japan's past conduct) and I will address myself to the Korean Peninsula, China and Asia as a whole,'' the prime minister said.

Roh will make his trip as Japanese debate how far Emperor Akihito should go in apologizing for Japan's 35-year colonial rule over the Korean Peninsula until the end of World War II in 1945.

Roh will have an audience with Akihito and Empress Michiko during his tour and address the plenary session of the lower house of parliament.

Government officials expressed hope Roh's visit will mark the beginning of a new era of friendship between Japan and South Korea.

Takeshi Noda, member of Kaifu's ruling Liberal Democratic Party, urged the government to avoid involving the imperial family in diplomatic problems in view of the postwar Constitution that reduced the emperor's status to a symbol of the state from living god.

Akihito's father, Emperor Hirohito, who died in January 1989, indirectly apologized for Japan's annexation of the Korean Peninsula in a 1984 meeting with South Korean President Chung Doo Hwan.

Akihito made a similar gesture to Chinese leaders during their visit to

Japan.

#90131u0633 05/11/1990 ~United Press International
WASHINGTON (MAY 11) UPI - The United States must chart a more specific path for the future of the space program before making major decisions about building new types of spacecraft, a report concluded Friday.

''A national dialogue is urgently needed to establish the future course of the publicly supported space program and to outline the preferred means of accomplishing the program goals,'' said the Office of Technology Assessment report, ''Access to Space: The Future of U.S. Space Transportation Systems.''

''The lack of a clear course for U.S. space activities makes the scale and character of future demand for space transportation highly uncertain,'' the 92-page report states. ''It is not sensible to choose among space transportation options without first selecting the specific goals to be served.''

Congress must choose among a variety of options in deciding which space programs to fund, including building new spacecraft or upgrading existing vehicles, the report said.

The options include:

-Building improved ''expendable launch vehicles or ELVs,'' which are rockets used only once.

-Limiting the number of space shuttle launches each year to only eight to 10, which is fewer than the number proposed by NASA.

-Building additional space shuttles.

-Improving the safety and reliability of the existing space shuttle fleet.

-Developing a crewless space shuttle to carry cargo into space, known as the ''shuttle-c.''

A variety of options are also under consideration to meet increased needs created by new initiatives, such as plans to build a space station, return to the moon and explore Mars, the report says.

Since development of such systems must begin about a decade before they are needed, advance planning is critical, the report said. Such planning cannot be done without clear future objectives, the report said.

#90131u0687 05/11/1990 ~United Press International
(MAY 11) UPI - News from NATO, Capitol Hill, the F-B-I and more coming up next from the 'round-the-clock wires of United Press International.

The heads of the countries in NATO may agree in July to reduce short-range nuclear weapons in Europe.

The changes in Eastern Europe caused North Atlantic defense ministers to decide yesterday to endorse a reduction in the short-range nuclear weapons in Europe.

The defense ministers directed NATO's High Level Group to study the Atlantic alliance's future nuclear needs and to determine the numbers and types of weapons needed.

The NATO decision was announced yesterday at the end of a two-day meeting of NATO's Nuclear Planning Group of defense ministers in Alberta, Canada.

A NATO summit is set for July 5th and 6th in London. NATO Secretary-General Manfred Woerner announced the dates at the conclusion of the Canadian ministers' meeting.

The group's final communique welcomed President Bush's decision to cancel new ground-based nuclear weapons for Europe and to review thoroughly NATO's political and military strategy in light of the lessened Soviet threat.

Defense Secretary Cheney says the review undoubtedly will lead to reductions in nuclear weapons in Europe. Cheney also said a pull-out of all of NATO's nuclear artillery from Europe is ''entirely possible.''

#90131u0688 05/11/1990 ~United Press International
WASHINGTON (MAY 11) UPI - Lower prices for volatile energy and food products, especially vegetables, helped wholesale prices for finished goods drop 0.3 percent in April after falling 0.2 percent in March, the government reported Friday.

The fall in seasonally adjusted wholesale prices over the last two months, after no change in February, stood in contrast to a 1.8 percent surge in January, largely due to a cold snap, the Labor Department's Bureau of Labor Statistics noted.

The April Producer Price Index drop was better than what markets had expected, and will be reflected later in the Consumer Price Index,

bringing relief both to consumers as well as financial markets worried about inflation eroding investment yields.

Economists had anticipated no change in wholesale prices for the month.

For the last 12 months, the advance in wholesale finished goods prices was 3.5 percent. In 1989, the bureau's Producer Price Index had risen 4.9 percent.

Among finished goods, wholesale prices fell 0.6 percent in April after losing another 0.6 percent in March. Energy prices dipped 1.7 percent in April after falling 2.4 percent in March.

Excluding the more volatile prices for food and energy, wholesale prices for finished goods increased by 0.2 percent in April after advancing 0.3 percent in March, 0.4 percent in February, and 0.1 percent in January, the bureau said.

Wholesale prices for intermediate goods, semiprocessed goods that will undergo further processing, rose 0.1 percent in April after being stable in March and falling 0.7 percent in February. In January, intermediate goods prices increased 1.2 percent.

Wholesale prices for crude goods - mostly raw materials - fell 3.1 percent in April, signaling lower demand. Crude goods prices dropped 1.4 percent in March after rising 0.4 percent in February and 2.3 percent in January.

In food, April prices for tomatoes plummeted 73.3 percent, for corn 49.2 percent, for cabbage 36.4 percent, for green beans 24.1 percent, and for onions 15.3 percent.

Decreases were also registered in April for processed chickens, bakery products, shortening and cooking oils, and fresh fruits. In contrast, prices rose for pork, eggs, beef and veal, fish, roasted coffee, pasta, and milled rice.

Among finished energy goods, gasoline prices turned up 2.2 percent in April after falling for two months, but home heating prices turned down 1.9 percent after advancing 10.6 percent in March. The index for natural gas declined even more in April - 5.5 percent - than in March, when it dropped 2.5 percent.

April prices rose for pharmaceutical products, tobacco, soaps and detergents, toilet paper, floor coverings and toys. But wholesale prices fell for alcoholic beverages, gold jewelry, periodicals and household flatware.

Passenger cars prices fell 0.3 percent in April after decreasing 0.8

percent in March, the Bureau of Labor Statistics said.

The bureau's Producer Price Index for capital equipment increased 0.2 percent in April, following a 0.4 percent hike in March.

WASHINGTON (MAY 11) UPI - Wholesale prices for finished goods dropped 0.3 percent in April, after falling 0.2 percent in March, primarily because of lower prices for volatile energy and food products, especially vegetables, the government reported Friday.

The fall in seasonally adjusted wholesale prices over the last two months, after no change in February, stands in contrast to a 1.8 percent surge in January, largely due to the cold snap during the first month of the year, the Labor Department's Bureau of Labor Statistics noted.

The April Producer Price Index drop is better than what markets had expected, and will be reflected later in the Consumer Price Index, bringing relief both to consumers as well as to financial markets worried about inflation eroding their investment's yields.

Economists had anticipated no change in wholesale prices for the month.

For the last 12 months, the advance in wholesale finished goods prices was 3.5 percent. In 1989, the bureau's Producer Price Index had risen 4.9 percent.

Among finished goods, wholesale prices fell 0.6 percent in April after losing another 0.6 percent in March. Energy prices dipped 1.7 percent in April after falling 2.4 percent in March.

Excluding the more volatile prices for food and energy, wholesale prices for finished goods increased by 0.2 percent in April after advancing 0.3 percent in March, 0.4 percent in February, and 0.1 percent in January, the bureau said.

Wholesale prices for intermediate goods, semi-processed goods that will undergo further processing, rose 0.1 percent in April after being stable in March and falling 0.7 percent in February. In January, intermediate good prices increased 1.2 percent.

Wholesale prices for ''crude goods'' - mostly raw materials - fell 3.1 percent in April, signaling a lower demand. Crude goods prices dropped 1.4 percent in March after rising 0.4 percent in February and 2.3 percent in January.

Among finished consumer goods, April prices plummeted 73.3 percent for tomatoes, 49.2 percent for corn, 36.4 percent for cabbage, 24.1 percent for green beans, and 15.3 percent for onions.

Decreases were also registered in April for processed chickens, bakery products, shortening and cooking oils, and fresh fruits. In contrast, prices rose for pork, eggs, beef and veal, fish, roasted coffee, pasta, and milled rice.

(MAY 11) UPI - A family and medical leave bill cleared the House yesterday and has gone to the Senate.

Representative Nita Lowey, a New York Democrat, says it is the most pro-family legislation in this Congress. She says workers should NOT be forced to choose between a job and caring for a family member.

The House passed the bill on a 237-187 vote. Foes of the measure say it takes away the right of businesses to choose worker benefits. President Bush has threatened to veto it.

The bill is a compromise. Under its terms, businesses with more than 50 employees must offer up to 12 weeks in one year of unpaid leave for workers to care for newborns, newly adopted children or a seriously ill child, parent or spouse. During the leave, employees would have job protection and receive health benefits.

The General Accounting Office estimates the bill would affect five percent of all employers and about 44 percent of all workers.

The 2nd U-S Circuit Court of Appeals ruled in New York City yesterday that panhandling on the subway is NOT a constitutionally protected form of free speech. The decision upholds a Metropolitan Transportation Authority's ban on panhandling.

The ruling said- quote- ''Begging in the subway often amounts to nothing less than assault, creating in the passengers the apprehension of imminent danger.''

M-T-A Chairman Robert Kiley called the ruling a victory for subway riders.

Douglas Lasdon is the executive director of the Legal Action Center for the Homeless, which was one of the parties that brought the suit against the M-T-A ban. He says he's disappointed with the ruling. In his words... ''Silencing poor people will NOT solve the hunger or homeless problem.''

In January, U-S District Judge Leonard Sand affirmed the First Amendment right to beg, which fueled a heated debate on panhandling. The appeals court overturned Sand's ruling.

#90131u0736 05/11/1990 ~United Press International

(MAY 11) UPI - The crimebuster television program ''America's Most Wanted'' struck again yesterday with the separate arrests of two suspected felons in Florida and Indiana.

In Eastpoint, Florida, authorities recovered a five-year-old Massachusetts girl who had been kidnapped April 3rd from her Milford home. They also arrested 24-year-old Kenneth Cole, an ex-babysitter who they said was obsessed with the child.

F-B-I spokesman Paul Cavanagh in Boston says the Justice Department credits the location of both child and suspect to public response to ''America's Most Wanted'' and similar news media coverage in the Florida panhandle.

In Monticello, Indiana, police arrested a 29-year-old man wanted in a contract killing in Georgia who fled his home because he learned he would be featured on ''America's Most Wanted.''

The F-B-I says Scott Haneline was arrested at Monticello Hospital after he accidentally shot himself in the hand. At the hospital Haneline called his wife in Illinois, and she convinced him to call the F/B-I in Chicago.

The director of a charity says the incidence of AIDS in Romania is near epidemic proportions.

The president of France's Medine du Monde, Jacques Lebas, says the number of AIDS virus infections among adult Romanians totals about 130-thousand cases. He says nearly all of the victims are heterosexual. He says AIDS has spread in Romania largely because of prostitution.

The revelation comes just three months after the discovery that hundreds of Romanian children were accidentally infected with the AIDS virus from contaminated blood transfusions. Lebas was instrumental in bringing to light the 800 cases of AIDS in Romanian children.

Romania's official AIDS Commission has confirmed only 50 adult AIDS cases in the country.

Health officials have laid much of the blame for the spread of the disease on executed dictator Nicolae Ceausescu, who suppressed information about AIDS and allowed outmoded medical practices.

FRANKLIN, N.H. (MAY 11) UPI - A flintlock musket and three gold coins were recovered from a river nearly three years after they were stolen from Daniel Webster's birthplace.

The musket, which was owned by the 19th-century statesman's father, was found last week by a diver from the state Fish and Game Department in a 15-foot-deep section of the Smith River in Bristol.

Four men have been arrested in connection with a September 1987 burglary of the Webster birthplace in Franklin and a fifth person is being sought.

Police declined to say where or when the coins were found.

Police Detective Sgt. Steven Laro said authorities received information on the location of the artifacts during the course of an unrelated investigation.

The Webster birthplace museum and several adjacent buildings were broken into and ransacked during the 1987 burglary. The musket, gold coins and a silver commemorative coin were the only items taken.

Parks Director Wilbur LaPage called the artifacts priceless. He said there is no way to put a value on such historically significant articles.

The coins were issued in 1932 to commemorate the 150th anniversary of Webster's birth. They are solid gold and weigh about 1 ounce. One side shows a a likeness on Webster, while the other depicts a view of Webster's

birthplace.

LaPage said the musket was damaged by its exposure to water. It is being kept in water to prevent further deterioration until it can be professionally restored.

On Monday, three Franklin men were arrested and charged with three counts each of burglary. Arrested were: Raymond A. Brorby, 25, Harold K. Collins, 25,and Gary A. Fredette, 31. All were released on $15,000 bond.

Also arrested was Robert N. Warren, 24, of Northfield, who was charged with one count of receiving stolen property. He was released on $1,000 bond.

#90131u0739 05/11/1990 ~United Press International

(MAY 11) UPI - The Soviet Union continued it's game of cat-and-mouse with the West yesterday over the identity of the so-called ''fifth man'' in the biggest East-West spy scandal of the century.

The film, ''Cambridge Graduate,'' airing today in the Soviet Union... shows the K-G-B contact for British-born master Soviet spy Kim Philby confirming for the first time that a ''fifth man'' was involved in the celebrated espionage ring.

However, the film tantalizes in that it does NOT reveal the identity of the fifth K-G-B mole in the British secret service. Said 67-year-old K-G-B agent Yuri Modin... ''They have wasted 30 years looking for him. Let them go on trying.''

The four known members of the spy ring are dead- Guy Burgess... Donald Maclean... Philby... and Queen Elizabeth's former art adviser, Anthony Blunt.

All spied for Russia in the 1930's right through World War Two and during the Cold War years. Burgess, Maclean and Philby fled to the Soviet Union when they were on the verge of being detected. Burgess and Maclean fled to Moscow in 1951 and Philby in 1963. The fifth man never has been revealed.

The new joint Soviet-British film was made with K-G-B material and shown to journalists yesterday. It was NOT immediately known if the movie would air outside the Soviet Union.

#90131u0754 05/11/1990 ~United Press International

HOT SPRINGS, Va. (MAY 11) UPI - A report presented Friday to a meeting of

America's corporate leaders said the chances of a recession in 1990 and 1991 are slim and predicted that the economy will grow slowly.

The high-powered members of the Business Council, which include the likes of General Motors chairman Roger Smith and General Electric chief Jack Welch, expressed guarded optimism at the forecast - and agreed the economy is fragile.

''I'm certainly not as sanguine as the economists,'' said Lewis Preston, chairman of banking giant J.P. Morgan and Co. ''When I get 19 economists agreeing there's going to be 2 percent growth, there's one thing I can guarantee: There won't be 2 percent growth.''

The panel of corporate analysts that compiled the report also called for a 2.6 percent growth rate in 1991 and believe the probability of a recession by the end of the year has declined to 22 percent from 32 percent, and to 36 percent from 40 percent at the end of 1991.

''Things are pretty good,'' Welch said.

Added Smith: ''The automobile business has continued to surprise people.''

But trouble is brewing in the banking industry.

''The banking business in the U.S. is going to be difficult, tough,'' said John Reed, chairman of Citicorp. ''Real estate is obviously weak. I don't think they have found a bottom yet.''

But, on the other side of the coin, Reed said overseas banking is ''quite strong.''

The Business Council, founded in 1933, is a private organization that brings together corporate chieftains several times a year to discuss the economy and other issues of the day.

The economic report to the group - generally in line with government estimates - was upbeat about inflation, which soared to 8.5 percent in January, February and March on rocketing fuel and food prices in the wake of December's brutal cold.

''The disappointingly high inflation readings in the first quarter are generally viewed as an aberration,'' the report said. ''Inflation expectations have not been raised.''

The economists raised their estimates of the 1990 inflation rate to 4.8 percent from 4.2 percent, and predicted that inflation would ease to 4.4 percent during 1991.

They said heavy industry shows signs of improvement, but that ''rapid improvements'' in the nation's trade deficit are ending and that the nation should end the year with a $102 billion shortfall.

The analysts also predicted that the weakened Japanese yen will regain its lost strength.

''The economists were unanimous in forecasting a stronger yen, with individual projections of yen appreciation by year-end 1991 ranging from 7.5 percent to 25 percent,'' the report said.

-30- 2910

#90131u0820 05/11/1990 ~United Press International

(MAY 11) UPI - Prices closed sharply higher on the Tokyo Stock Exchange Friday on late buying spurred by the strength of the bond market and the Japanese yen.

The stock market surged as the U.S. dollar tumbled 2.60 yen to close at 154.15 yen on the Tokyo foreign currency exchange. The key Nikkei Stock Average of 225 selected issues, which gained 34.65 points Thursday, surged 531.88 points to close at 31,512.14.

The Tokyo Stock Prices Index of all major listed stocks, which gained a modest 4.06 points Thursday, rose 36.12 points to 2,348.97.

An estimated 600 million shares changed hands, compared with 731 million shares Thursday. Gainers outnumbered losers 749 to 226, with 152 issues unchanged.

Brokers said buying spread across the board as investors hunted for lagging and incentive-backed issues.

Friday's rally was attributed to a "very cyclical rotation" of money by investors, said Hidetada Yoshida, general manager of equity trading at Kidder Peabody International.

Investors first pushed up large-capital shares, next domestic demand-backed shares, then oil and mining shares, and finally high-priced issues, he said.

Yoshida said many investors who had been waiting on the sidelines to buy on dips came into the market in the afternoon as the market appeared to be on an upswing.

Constructions were selected for buying. Foods were generally higher. Other gainers included steels, high-tech issues, department stores and individual incentive-backed issues such as Sony and JAL. Drugs weakened.

So did some chemicals and fishery issues.

Elsewhere in Asia, prices plunged on the Hong Kong Stock Exchange on rumors of the death of Chinese leader Deng Xiaoping. Chinese officials in Beijing quickly denied the report but the Hong Kong market failed to recover by the closing bell.

The Hang Seng Index ended trading at 2,960.46, down 24.96 points from Thursday, when stocks rose more than 43 points on overseas buying.

Utilities fell 31.24, financials dropped 8.46 and industrials were off 25.93. Properties were off 45.38. Turnover totaled 1.33 billion shares, compared with 1.46 billion shares Thursday.

Analyst Howard Gorges of South China Securities said the rumor of Deng's death killed the rally begun Thursday and the market was unable to come back.

"Yesterday's rally looked like it would go on this morning. Then the rumors and that was it," Gorges said. "When the rumor was denied in China, the market stayed unsettled." "With the weekend coming up, people decided not to stick their necks out."

Prices inched up on the Singapore Stock Exchange with investors encouraged by the higher closings in Tokyo and on Wall Street.

The Straits Times Industrial Index, which gained 6.84 points Thursday, rose 9.00 to 1532.27, fighting back some profit taking. The All Singapore Index, which gained 2.55 Thursday, rose 2.74 to 423.64. Turnover was 82.77 million shares, compared with 57 million shares Thursday.

Analysts said investors were slowly regaining interest in the market, after a long slide reflecting sluggish overseas buying. The return of major foreign investors, although on a limited scope, helped boost the market, analysts said.

Among the gainers were Singapore Press (foreign), Singapore Airlines, Cycle and Carr, Hotel Props, UIC, Golden Plus, Shangri-la, United Overseas Bank Foreign, and Fraser and Neave Ordinary.

Losers included Overseas Chinese Banking Corp. (foreign), ASEAN Fund, Thai PF (US), Sime Darby, Ana Hotel, Singapore Land, and Development Bank of Singapore Land.

In Australia, prices rose on the Sydney Sharemarket, despite continued depressed news from the corporate front.

The key All Ordinaries Index rose 10.1 points to close at 1484.6, after

losing 3.3 points Thursday.

Reflecting uncertainty among investors, the All Industrials Index slipped 4.5 points to 2283.7, while the All Resources Index gained 2.6 points to 855.5. Turnover was 105.8 million shares, up from 84 million shares Thursday.

John Elliot, who heads the troubled Elders IXL group, said the general weakening of the sharemarket had forced the company to review its plans to list its agrobusiness division as a new company.

Elliot's statement followed an Elders' marathon board meeting Thursday in Melbourne and negotiations with banks for more loans to refinance the company's debt. Elders shares sank three cents to $1.85.

WASHINGTON (MAY 11) UPI - Dragged down by lower automobile sales, total U.S. retail sales fell 0.6 percent in April after dropping 0.2 percent in March, signaling an economic slowdown, the Commerce Department reported Friday.

Retail sales fell to $148.6 billion in April from $149.5 billion in March, the department's Census Bureau said. The numbers were adjusted for seasonal factors but not for price changes.

Excluding automobiles, U.S. retail sales were unchanged in April after falling 0.2 percent in March and increasing 1.6 percent in February and 1.1 percent in January.

The numbers were worse than markets had anticipated, indicating that consumers were skittish about spending their money. Most private economists had predicted flat retail sales in April, with the more optimistic expecting a 0.5 percent advance for the month. The numbers, however, have proved to be both volatile and somewhat unreliable, since the Census Bureau has frequently revised them afterwards.

The economists saw a silver lining in that an economic slowdown could take some pressure off the inflation front. In a separate report, the Labor Department said that wholesale prices fell 0.3 percent in April after dropping 0.2 percent in March.

According to the Census Bureau, automobile sales fell 2.7 percent in April to $30.5 billion, after decreasing 0.2 percent in March and falling 1.7 percent in February.

Census said that April total retail sales were 3.4 percent above April

1989, which would make them lower after adjusting for inflation. Sales in the February through April period were 5.2 percent above the same period a year ago, virtually flat after adjusting for inflation. Total U.S. retail sales were unchanged in February and increased 2.8 percent in January.

In April, retail sales of durable goods - big ticket items designed to last three years or more - fell 1.6 percent from March after dipping 0.7 percent in March. Nondurable goods sales were unchanged for the second consecutive month.

Among durable goods, building materials sales fell 2.6 percent in April, reflecting lower construction activity. Yet, furniture stores sales advanced 0.4 percent.

Among nondurable goods, general merchandise stores rung up 0.7 percent less in April than in March, with department stores losing 0.3 percent in sales during the month. Apparel and accessory stores sales fell 1.9 percent. In contrast, food stores increased their April sales 1.1 percent.

The Census Bureau said that gasoline service stations saw their sales drop one percent in April. Restaurants and bars, a good barometer of consumer feeling, registered a 0.2 percent loss in sales during April, while drugstores increased sales 1.2 percent.

#90131u0844 05/11/1990 ~United Press International

LONDON (MAY 11) UPI - Prices on the London International stock exchange were higher at midday Friday as investors expressed relief at better-than-expected April retail figures in Britain.

The blue-chip Financial Times 100-stock index, which eased 1.2 points at midday Thursday, rose 11.6 points to 2,168.6 points, boosted by a three percent increase of the Retail Price Index. The narrower top 30 industrial average, which was up 0.6 points Thursday, was up 10.1 points to 1,700.9.

Volume was 296.3 million shares, up from 225.9 million traded in the same period Thursday.

The market's enthusiasm was somewhat dampened by the release of a

government report showing Britain's annual inflation rate at 9.4 percent. But the figure, although the the highest in eight years, still brought some relief to investors, some of whom had feared a rate above ten percent.

A dealer said the high inflation rate was unlikely to encourage investors, but another said the market could continue to move upwards if the FT-100 managed to break through the psychologically-important 2,200 level.

On the corporate front, ECC Group's announcement its earnings had dropped 23 percent, drove its shares down 16 cents to $5.58. GKN, the automotive part manufaturer, continued to slide and was down ten cents to $5.76.

Among the blue-chip gainers were Imperial Chemical Industries, up 18 cents to $17.80, Ultramar, up 11 cents to $5.44, and Thorn Emi, up 11 cents to $10.78.

#90131u0904 05/11/1990 ~United Press International
(MAY 11) UPI - President Bush has another round of graduations coming up. He plans to talk about technology, changes in Europe and volunteerism today and tomorrow during three commencement addresses. Bush is to leave Washington this morning for Texas A-and-I University in Kingsville. Bush will attend an evening fund-raiser in Columbia, South Carolina, for Republican Governor Carroll Campbell. Tomorrow, he'll address the University of South Carolina and Liberty University in Virginia.

Bush is leaving Washington with hopes that budget negotiations with Congress are back on a trouble-free track. But he's leaving behind questions about his willingness to consider all options... including tax increases... to trim the deficit.

Two Solidarity officials will be in charge of security in Poland. Parliament yesterday dissolved the discredited communist militia and secret police. And Prime Minister Mazowiecki appointed two Solidarity officials to run the new Office of State Protection. One of the new security chiefs says the office will NOT control ''everybody and everything.''

A family and medical leave bill passed the House by an overwhelming vote of 237-187 and now goes to the Senate. It would make businesses with more than 50 employees offer up to 12 weeks of unpaid leave in one year for workers to care for new children or seriously ill family members. The Chamber of Commerce is among the legislation's critics. President Bush threatens to veto the measure.

The head of a coalition of federal employees and postal workers says the Senate has taken a giant step toward restoring to those employees the right to participate in the political process. The Senate voted to allow more partisan political activity by federal employees and postal workers. A Senate-House committee will try to settle differences between the two chambers' versions.

#90131u0920 05/11/1990 ~United Press International

(MAY 11) UPI - NASA engineers are beaming up a corrected computer program to the Hubble Space Telescope. The computer program will point the telescope in the right direction for taking its first picture of the universe. Scientists hope the picture can be taken next week. It depends on focusing the Hubble telescope's wide-field camera.

Environmentalists say the Environmental Protection Agency's new rules on toxic waste disposal are too lax. As a result, three enviromental groups sued the E-P-A yesterday in Washington. The lawsuit says the E-P-A's new rules do NOT obey a 1984 law mandating the toughest possible detoxification standards for wastes in landfills.

Two toxic waste haulers have been indicted in Los Angeles. They are accused of smuggling hazardous material across the border and dumping it in Mexico. U-S Attorney Robert Brosio says the practice of across-the-border dumping appears to be rampant. It's the first such case to be prosecuted under federal laws.

The House version of the clean air bill may contain a provision the Senate rejected. Congressman Robert Wise, a West Virginia Democrat, says he'll try to include in the House version 250-Million dollars in unemployment aid for workers who lose jobs because of pollution controls. Wise says he has 45 co-sponsors. A more expensive jobless aid plan was defeated in the Senate.

Federal appeals court Judge Alex Kozinski brightened up an anti-trust ruling with 204 movie titles. The judge, a conservative appointed by President Reagan, serves on the bench in San Francisco. The movies are named in a ruling concerning a movie theater owner accused of trying to monopolize the first-run movie market in Las Vegas. The ruling is in favor of the theater owner.

#90131u0923 05/11/1990 ~United Press International

KINGSVILLE, TX (MAY 11) UPI - President Bush, trying to get budget talks with Congress back on a trouble-free track, reiterated his call for negotiations ''with no conditions,'' but refused Friday to reveal his stand on higher taxes.

''You can come at me all day long. It would not be dealing in good faith if I started going into these details. I'm not going to do it,'' Bush said in reply to questions about whether he would consider raising taxes.

''But I'll be there with no preconditions. ... Tomorrow there will be another tidal wave, so keep your snorkel above the water level,'' Bush said.

''I'm not going to show you my hand and I haven't seen a lot of hands being laid down up on the Hill,'' Bush said. ''But that's the way it ought to be, if we are going to get anywhere. There are some tough decisions out there and we've got to do something.''

En route to a commencement address at Texas A&I University, Bush stated support for his chief of staff and told reporters that the deficit-cutting talks beginning Tuesday will be open and have no conditions set beforehand.

''Why don't you just listen to what I say and see what we do?'' Bush said in his first public comments on the issue since last week. ''There's no conditions and that's the way it is. That's the way it's going to be, and that's the way it must be. ... I'll simply repeat that I made this proposal that we meet with no conditions and that's exactly the way it's going to be.''

Bush would not characterize the deficit as a crisis: ''No ... we're not dealing in a crisis mentality, but we've got a major deficit problem. ... We need cooperation because it isn't going to be easy. It's going to be very difficult.''

Bush also dismissed suggestions that White House chief of staff John Sununu is in trouble for indicating the president is unyielding on his 1988 ''no new taxes'' campaign pledge.

''That's silly, so stupid,'' Bush said. ''None of these congressmen are in trouble either.''

Bush referred to Democrats and Republicans in Congress who have joined in the fray.

Reacting to criticism of delaying comment on the budget talks, Bush said, ''We're hearing comments from the political left, middle, center, right. And my position is: I made this offer to sit down in good faith and talk with no conditions. ... I spelled it out just as well as I possibly can.''

Bush acknowledged concern from House Speaker Thomas Foley, D-Wash: ''Yes, he did express concern ... but I think he sees the need to go forward on the basis I have called for and I respect him for that.''

Rep. Robert Torricelli, D-N.J. had cited a ''general concern about the question of good faith,'' adding Thursday, ''At some point the president is going to have to speak for himself.''

Senate Democratic leader George Mitchell of Maine lambasted Sununu, a member of the administration's negotiating team, and warned that any similar incidents could jeopardize the talks.

''Governor Sununu's remarks directly contradict the president's assurances to us,'' Mitchell said.

Scrambling to knock down Democratic suspicions that Bush may simply be laying an election-year trap, White House press secretary Marlin Fitzwater also took issue with Sununu, pledging again that everything would be on the negotiating table.

''I speak for the president,'' Fitzwater said, ''and I assure you that he wants everyone to know that his position is that there are no preconditions.''

''We will consider every option that comes to the table,'' he added.

Bush left such reassurance to his spokesman, Sununu and Vice President Dan Quayle. The president maintained a public silence on the talks - despite calls for clarification. He spoke by telephone with Foley to smooth matters.

#90131u0937 05/11/1990 ~United Press International

ELSINORE, DENMARK (MAY 11) UPI - Anti-racism protesters hurling firecrackers and stones clashed with riot police Friday outside a hotel where right-wing members of the European Parliament had been meeting earlier in the day.

Police sealed off the Marienlyst Hotel in Elsinore, 18 miles north of Copenhagen, to prevent demonstrators from approaching the area where French National Front Party leader Jean-Marie Le Pen and West German Republican Party leader Frantz Schonhuber were meeting along with 15 other lawmakers.

More than 600 banner-waving demonstrators protested outside the hotel, held at bay by riot police and police dogs. But when Le Pen departed through a hotel back entrance, a small group of the protesters wearing masks and helmets began throwing firecrackers and stones at police.

Despite appeals by the leaders of the protest, the group of protesters belonging to the BZ anarchist Danish youth organization continued to

attack police, prompting the authorities to counterattack. Police said two protesters were detained and two police officers were slightly injured in the clash.

Demonstrations continued Friday afternoon in Elsinore and riot police were to continue patrolling the town until evening.

In a press briefing at the conclusion of the meeting by right-wing lawmakers, Le Pen told reporters he firmly condemned the desecration Wednesday of 34 graves at a Jewish cemetery in the French town of Carpentras.

A man ''with a strong Arab accent'' telephoned the newspaper Vaucluse Matin to claim responsibility for the vandalism on behalf of the previously unknown Mohammed El Boukima organization. Thirty-four tombstones were damaged and a corpse was mutilated in the incident.

''This macabre event was carried out by professional provocateurs,'' Le Pen said. ''No one wants the perpatrators of this infamy and their accomplices - however highly placed they are - to be punished with all the force of law more than I do.''

He said the desecration seemed aimed at compromising his National Front Party, which he firmly denied had anything to do with the incident.

Le Pen and Schonhuber went on to say new immigration rules should be imposed in Europe to prevent an influx of non-Europeans.

''What is going to happen when the countries of North Africa fall prey to fundamentalists. We risk a wave of immigrants rolling over Europe,'' Le Pen said. He added such an influx would cause racism to flourish.

''We must stop it before it begins,'' he added.

Schonhuber told reporters his party did not accept the idea that a unified Germany should accept the current border with Poland. A part of Germany known as Silesia was ceded to Poland at the end of World War II.

''We have three main demands,'' Schonhuber said.

''We want a double language status for Silesia (Poland), a customs union between Silesia and Germany and self-determination of the population of Silesia,'' Schonhuber said, repeating his party's earlier demands.

Asked whether he would like to be the Fuhrer (leader) of a united Germany, Schonhuber quipped: ''I would like to be the Fuhrer of the world. I hope you understand irony.''

He added his party had already begun organizing itself in East Germany, where the Republican Party is illegal, saying he envisaged major support in the country, ''in particular among the young people who are very anti-communist.''

Le Pen and Schonhuber were to leave Denmark Friday after being shunned by Denmark's political and governmental establishment, none of whom were willing to meet any of the 17-member group of right-wing lawmakers.

Denmark's right-wing Progress Party declined an invitation to hold talks with the rightist European Parliament group.

#90131u0952 05/11/1990 ~United Press International

TULSA, OK (MAY 11) UPI - Hospital officials say they plan to remove the life support system Monday from a woman considered legally dead for two weeks despite her family's pleas to give God a chance to heal her.

St. John Hospital spokesman Steven Reynolds said Bill McFall, husband of Isabelle Vesta McFall, was notified of the decision Thursday in a hand-delivered letter.

''As we have repeatedly discussed with you,'' the letter stated, ''your wife ... is no longer alive. Physicians have determined, based on acceptable medical standards, that she has had no brain activity for over two weeks.

''Consequently,'' the letter continued, ''We have no alternative but to discontinue the use of the ventilator that is now artifically maintaining her respiratory functions. We will so do on Monday, May 14, 1990, at 9 a.m. unless you have made alternative arrangements prior to that time.''

The woman's family, members of a Pentecostal church, have asked the hospital to maintain her present state to allow God an opportunity to heal her.

''All I'm asking,'' her husband said, ''is that they leave her as she is. Step aside and let God work his perfect will.''

Reynolds said Mrs. McFall, a former nursing employee at the hospital, underwent emergency surgery April 16 after a blood vessel burst in her head. He said tests a week later indicated no electrical activity or blood circulation in her brain and she was declared legally dead.

''We recognize everyone's right to their religious beliefs,'' Reynolds said. ''We certainly don't contest the existence of a higher power that doesn't need medicine. We don't see why a religion would require a

respirator to realize whatever miracle his higher power could deliver.''

(MAY 11) UPI - C O R R E C T I O N

In last item, please read 1st sentence xxx Soviet Union continued its game of cat-and-mouse, etc.

The Soviet Union continues its game of cat-and-mouse over the identity of the so-called ''fifth man'' in the biggest East-West spy scandal of the century.

The film, ''Cambridge Graduate,'' airing today in the Soviet Union... shows the K-G-B contact for British-born master Soviet spy Kim Philby confirming for the first time that a ''fifth man'' was involved in the celebrated espionage ring.

However, the film tantalizes in that it does NOT reveal the identity of the fifth K-G-B mole in the British secret service. Said 67-year-old K-G-B agent Yuri Modin... ''They have wasted 30 years looking for him. Let them go on trying.''

The four known members of the spy ring are dead- Guy Burgess... Donald Maclean... Philby... and Queen Elizabeth's former art adviser, Anthony Blunt.

All spied for Russia in the 1930's right through World War Two and during the Cold War years. Burgess, Maclean and Philby fled to the Soviet Union when they were on the verge of being detected. Burgess and Maclean fled to Moscow in 1951 and Philby in 1963. The fifth man never has been revealed.

The new joint Soviet-British film was made with K-G-B material and shown to journalists yesterday. It was NOT immediately known if the movie would air outside the Soviet Union.

#90131u1044 05/11/1990 ~United Press International

WASHINGTON (MAY 11) UPI - The United States must chart a clearer path for the future of the space program so planners can make the best decisions about upgrading existing spacecraft and building new ones, a report concluded Friday.

''A national dialogue is urgently needed to establish the future course of the publicly supported space program and to outline the preferred means of accomplishing the program goals,'' said the Office of Technology Assessment report, ''Access to Space: The Future of U.S. Space Transportation Systems.''

''The lack of a clear course for U.S. space activities makes the scale and character of future demand for space transportation highly uncertain,'' the 92-page report states. ''It is not sensible to choose among space transportation options without first selecting the specific goals to be served.''

The space program has made major strides toward recovering from the Challenger explosion but is at a critical point for planning for the future, said OTA project director Ray Williamson at a news conference.

''We still have a long way to go in order to have reliable, operable and resilient launch systems,'' said Williamson.

Congress must choose among a variety of options in deciding which space programs to fund, depending on which objectives the nation decides to pursue.

Proposals to build the space station Freedom, for example, will probably require more space shuttles, a crew rescue vehicle and perhaps a crewless space shuttle for cargo known as ''Shuttle C,'' said Williamson.

The current space shuttle fleet is only 97 percent to 99 percent reliable, meaning there is a 50-50 chance another shuttle will be destroyed in the next three to four years, he said.

A variety of options are also under consideration to meet increased needs created by new initiatives, such as proposals to establish a base on the moon and explore Mars, the report said.

Such initiatives could require developing an ''aerospace plane'' and other new systems, including those that are more reliable and less expensive, Williamson said.

Greater international cooperation with the Europeans, Japanese and Soviets could aid such development and supplement the U.S. space fleet, the report said.

Since development of such systems must begin about a decade before they are needed, advance planning is critical, the report said.

''The lack of clear goals for U.S. space activities has made it next to impossible to choose among space transportation options,'' said Williamson.

The OTA report was prepared at the request of the Senate Committee on Commerce, Science, and Transportation and the House Committee on Science, Space and Technology.

''This nation stands at a crossroads in its civil space program,'' said Rep. Robert Roe, D-N.J., chairman of the House Science, Space and Technology Committee.

''I believe that we should take the high road - complete the space station Freedom on schedule and then begin to reach out beyond our planet to explore the moon and Mars, and eventually begin to use these new frontiers for both scientific and economic gain,'' he said.

#90131u1050 05/11/1990 ~United Press International

LONDON (MAY 11) UPI - The European, a weekly billed as "Europe's first national newspaper," went on the newsstands in Britain and on the continent Friday, aiming to capture readers as the political climate shifts in Europe.

"The European will support all those who are in favor of European unity and oppose all these who are against," said a factsheet issued by the London-based newspaper. "The European will be independent and free of party politics." Robert Maxwell, 66, is the editor in chief and publisher of The European.

The debut edition was 64 pages in three sections, two sections in broadsheet covering European news, politics, business and sports. The third section is a tabloid featuring European culture and lifestyle.

The layout is cleanly attractive and colorful, with a promise that half the newspaper will be printed in full color. It goes on sale Friday mornings and costs 50 pence (80 U.S. cents). A circulation of 225,000 copies was

expected.

It aims to fill a market created by "the imminent European integration, the total failure of communism and by the crumbling frontiers, massive cross-frontier business integration, resulting in movement of jobs, people capital and know-how," the factsheet said.

The readership will be "Europe's opinion formers and decision makers and all those who need to know of their actions and thoughts. No national or international newspaper currently satisfies this need," it said. The staff of 100 journalists is overseen by Editor Ian Watson.

Maxwell, a former Labor Party member of Parliament, also owns The Daily Mirror, Sunday Mirror, and People newspapers of London, and the Glasgow Daily Record and Sunday Mail, and the weekly magazine Sporting Life. He also is involved in cable television. The Czechoslovak-born media magnate has extensive interests in textbook publishing in Central and Eastern Europe and the Third World.

NEW DELHI, INDIA (MAY 11) UPI - The Dalai Lama, the temporal and spiritual head of the world's 6 million Tibetans, Friday accepted the resignation of the self-styled Tibetan government-in-exile in a move aimed at introducing greater democracy in the refugee community.

The 1989 Nobel Peace Prize laureate also announced the dissolution of the Assembly of Tibetan People's Deputies, the Parliament-in-exile, a statement issued by his New Delhi office said.

The statement said the Dalai Lama announced the actions in his exile home in the Himalayan foothills town of Dharmsala during a special convention of representatives of the 100,000-strong community of refugees from the ''Roof of the World'' who have settled in India.

The statement said the Tibetan leader announced he was accepting the resignation submitted May 9 of the seven-member Kashyag, the name of the self-styled Tibetan government-in-exile.

No country in the world recognizes the Kashyag, which oversees the administration of Tibetan refugee communities across India.

The Dalai Lama said the new Cabinet would be chosen by the special convention, but that in the future, the body would elected by the Assembly of Tibetan People's Deputies.

The dissolution of the assembly will be implemented after the selection,

the statement said.

The government-in-exile had previously been chosen by the Dalai Lama.

''He indicated that he wanted to make it (the system) more democratic. At present, the Kashyag is elected by him. He felt is wasn't as democratic as it could be,'' said a spokesman for the Dalai Lama's New Delhi office.

The statement said the Dalai Lama also called on the convention to consider ways of introducing a more democratic system through which the Parliament-in-exile is chosen.

At present, the assembly consist of two representatives elected by each of the three regions in India into which the Tibetan refugee community is divided. There are also five representatives from each of the five sects of Tibetan Buddhism.

The statement said a new system for selecting the assembly should be decided upon before May 10, 1991.

The Dalai Lama has lived in India since 1959, when he fled his homeland with tens of thousands of followers after a failed uprising against Chinese rule.

Many more Tibetans have followed over the intervening years and their communities are scattered across India.

(MAY 11) UPI - Philippine officials say at least seven people were killed in an explosion and fire on an airliner. The blast occurred aboard the Philippines Airlines Boeing 737 as it was being towed to a runway for take-off at the Manila airport. The fire followed. The airport manager says seven charred bodies were retrieved from the wreckage. Hospital sources said at least 87 people were injured.

The blast sheared the roof off the plane and left three gaping holes in the fuselage. The cause of the explosion has NOT been determined. An airport officer says there were NO reports of bomb threats.

President Bush is resuming his rite of spring... speaking at three more university graduations today and tomorrow. First on the presidential agenda is a speech at Texas A-and-I University in Kingsville. During his addresses, Bush plans to talk about volunteerism, technology and changes in Europe.

A team of Soviet officials assigned to plan for the May 30th to June 3rd summit conference has finished its work in Washington. The 16-member Soviet team headed back to Moscow yesterday. Most of the summit will be at

the White House... although President Bush is inviting President Gorbachev to Camp David for a weekend.

The Congressional Budget Office says more reliance on reserve forces can enable a cut of 463-thousand active-duty troops in five years. The office says annual budget for the armed services will fall to about 227-BILLION dollars- down 43-BILLION- if greater use is made of the reserves.

Former President Ford says his family will stop eating tuna. Ford says a decision by three major American tuna canneries to buy only tuna caught in nets that don't endanger dolphins could wipe out the U-S tuna fishing industry. Environmentalists say Ford is wrong. They're ending a tuna boycott.

#90131u1138 05/11/1990 ~United Press International

WASHINGTON (MAY 11) UPI - Evan Kemp, the new chairman of the Equal Employment Opportunity Commission, said Friday he wants his agency to begin looking harder at sex and race discrimination in the upper reaches of management.

Kemp, in his first session with reporters since being confirmed as chairman of the commission, which enforces anti-employment bias laws, also said he wants to speed the investigation and settlement of job discrimination cases handled by the agency.

''I think the EEOC has done an extraordinary job in getting people (fair treatment) at the entry level position,'' Kemp said.

But he said women and minorities still face major obstacles ''getting through the bamboo or glass ceiling,'' a reference to top management levels.

''I think we should look very closely at upper mobility cases,'' Kemp said. ''They're hard to win but I think we should work to win a few.''

He said there is need for better statistics on the number of women and minorities in the upper levels of management and on boards of directors.

Kemp also said he was worried that parts of proposed civil rights legislation would promote ''group solutions'' to discrimination problems rather than solutions based on the American tradition of individualism.

''As a society we're focusing on group answers to things and I don't think those are the best solutions,'' he said. ''We just have too many groups to come up with group solutions.''

Historically, he said, the United States has avoided importing ''group hatreds from Europe'' but he said there is a mood in the nation now in which ''groups are pitted against groups. ... And I find that very depressing.''

He pointed particularly to campus life, noting that there has been a number of bias-related incidents.

''When those people graduate, they're going to be going back to their communities and bringing those attitudes with them,'' he said, suggesting that could create some ''explosive situations.''

''We are a melting pot and we shouldn't forget that,'' he added.

Kemp also said he would press for full funding of the agency's $295.9 million budget, particularly for reinstituting a training program for the agency's investigators.

He acknowledged that EEOC's enforcement efforts have been hurt by the decision to suspend training in 1987 as a result of Reagan-era budget cutbacks.

But he also said the agency is continuing to make progress in reducing the number of backlog cases - currently about 40,000 - and he hopes to have it reduced to 35,000 by the end of the year.

#90131u1170 05/11/1990 ~United Press International

SEATTLE (MAY 11) UPI - The U.S. government criticized former Northwest regional Environmental Protection Agency chief Robie Russell for allegedly having lax enforcement and poor judgment, particularly in approving a plan for dumping mine waste into a prime salmon fishery.

The 72-page EPA report released this week found that Russell exercised questionable judgment in 10 of 11 controversial matters examined by EPA investigators. Several of the incidents involve charges of inappropriate influence by business and political figures.

In response to the report, EPA officials announced they would reverse Russell's decision to allow the United States Borax and Chemical Corp. to dump 80,000 tons of waste a year from its Quartz Hill mine into a salmon-rich southeast Alaska inlet.

Thomas Dunne, Russell's interim replacement, said Thursday he has already moved to stop the dumping, and expressing concern about the report's ''serious criticism,'' vowed to fix the problems it highlighted.

In February, a similar report from the inspector general, EPA's internal watchdog, faulted Russell for stalling enforcement against the owners of Idaho's Bunker Hill Mine complex, a Superfund hazardous waste cleanup site.

Dunne said he is seeking advice on whether he can or should reverse Rusell's decisions on at least five other matters involving protection of waterways and wetlands. He also announced plans to tighten allegedly lax policies on record keeping and the levying of fines and penalties.

Russell has denied doing anything illegal and said all his decisions were within the discretion allowed an EPA regional administrator. He also claimed his record of enforcement of EPA regulations in the Northwest was one of the best in the nation.

But EPA investigators found that:

-Russell's approval of the Quartz Hill Mine plan for disposal of mine waste was ''not supportable based on available economic or scientific data '' was contrary to staff recommendations and a threat to a valuable salmon resource.

-Russell's efforts to limit penalties for improper asbestos removal violated EPA policy.

-His failure to make Idaho list all its environmentally impaired waters delayed action to protect certain rivers from mine or pulp mill pollution.

#90131u1204 05/11/1990 ~United Press International

WASHINGTON (MAY 11) UPI - The Soviet Union, acting one day after the Agriculture Department predicted a huge U.S. wheat crop, bought 250,000 metric tons of soft red winter wheat Friday at subsidized prices.

The wheat was worth about $34.8 million, based on Chicago prices.

There are 36.7 bushels of wheat in a metric ton of 2,204.6 pounds, so the deal called for delivery of 9.17 million bushels of wheat during June.

The wheat was sold through the Export Enhancement Program, the major U.S. export subsidy program. Under it, exporters receive bonus amounts of surplus commodities if they lower their prices to make a sale to a targeted country. Two exporters received subsidies worth $18.18 a ton, or 49.5 cents a bushel, for the deal.

It was the first major wheat sale to the Kremlin in nearly three weeks, although the Soviet Union purchased 2.35 million tons of U.S. corn at full price in recent days.

Since last Oct. 1, the Soviet Union has purchased 19.16 million tons of U.S. corn and wheat, including 15.63 million tons of corn and 3.53 million tons of wheat. During fiscal 1989, the Kremlin bought a record 21.7 million tons of U.S. corn and wheat.

The Foreign Agricultural Service reported Thursday the Soviet Union was likely to harvest its largest grain crop in 12 years but still would import large amounts of foreign grain. Wheat prices were forecast to become more attractive, resulting in more wheat imports and modest reductions in feed grain purchases.

#90131u1205 05/11/1990 ~United Press International
WASHINGTON (MAY 11) UPI - Agriculture Secretary Clayton Yeutter will travel to France and Switzerland next week for meetings on trade reform with European and world trade officials, it was announced Friday.

The sessions will include meetings with members of the European Parliament and officials at the General Agreement on Tariffs and Trade, the forum for ongoing negotiations for trade reform. Negotiators have a December deadline for reaching an agreement.

Yeutter's office said the secretary's first appearance would be a speech Monday before the International Office of Epizootics in Paris. Also on Monday, Yeutter was scheduled with meet with Jean Claude Paye, the head of the Organization for Economic Cooperation and Development.

A high-level OECD meeting is slated for later this month.

On Tuesday, Yeutter was slated to meet in Strasbourg, France, with members of several committees of the European Parliament. Topics would include agricultural, environmental and economic issues, the Agriculture Department said.

Yeutter was due to meet with GATT officials on Wednesday to discuss the current round of trade reform talks. Agriculture has become one of the thorniest issues, partly due to a sharp difference of opinion between the European Community and the United States over the shape of farm policy reform and its scope.

WASHINGTON (MAY 11) UPI - The Soviet Union, acting one day after the Agriculture Department predicted a huge U.S. wheat crop, bought 250,000 metric tons of soft red winter wheat at subsidized prices Friday.

The wheat was worth about $34.8 million, based on Chicago prices.

There are 36.7 bushels of wheat in a metric ton of 2,204.6 pounds, so the deal called for delivery of 9.17 million bushels of wheat during June.

The wheat was sold through the Export Enhancement Program, the major U.S. export subsidy program. Under it, exporters receive bonus amounts of surplus commodities if they lower their prices to make a sale to a targeted country. Two exporters received subsidies worth $18.18 a ton, or 49.5 cents a bushel, for the deal.

It was the first major wheat sale to the Kremlin in nearly three weeks, although the Soviet Union purchased 2.35 million tons of U.S. corn at full

price in recent days.

Since last Oct. 1, the Soviet Union has purchased 19.16 million tons of U.S. corn and wheat, including 15.63 million tons of corn and 3.53 million tons of wheat. During fiscal 1989, the Kremlin bought a record 21.7 million tons of U.S. corn and wheat.

The Foreign Agricultural Service reported Thursday the Soviet Union was likely to harvest its largest grain crop in 12 years but still would import large amounts of foreign grain. Wheat prices were forecast to become more attractive, resulting in more wheat imports and modest reductions in feed grain purchases.

#90131u1220 05/11/1990 ~United Press International

LONDON (MAY 11) UPI - Queen Elizabeth II should become Empress Elizabeth of Europe to ensure the unity of Europe, a royalist said Friday.

''Monarchies are becoming more popular, there are kings and queens in Sweden, Spain, Norway, Holland, a grand duke in Luxembourg, and, if the public had its way, there would be further restorations,'' said Harold Brooks-Baker, publishing director of Burke's Peerage, bible of the aristocracy.

'''Everybody loves a lord,' goes the phrase and it is even truer that everyone loves a king even more.''

Prime Minister Margaret Thatcher expressed concern last month that a united Europe could jeopardize Queen Elizabeth's sovereignty.

''Mrs. Thatcher's efforts to preserve the position of the queen as constitutional monarch here are admirable, but not admirable enough,'' Brooks-Baker said.

He urged Thatcher to take her case further, ''impressing on the rest of Europe the inestimable advantages of joining us in the best of all forms of government.''

Brooks-Baker also suggested a European House of Kings, modeled on the British House of Lords, which would act as a ''moderating influence on over-ambitious politicians and a curb on the bureauratic powers of Brussels.''

He said he expected objections to his proposal. ''You have a lot of socialists on the continent,'' foremost among them European Commission President Jacques Delors.

Also, there would be a battle among loyal subjects to decide which royal family, if any, would take the leading official role in Europe, Brooks-Baker said. Six of the 12 European Community countries have constitutional monarchies.

But among royal families, the U.S.-born royalist said, ''Our queen is recognized by them as the senior, from the senior royal family.''

The rank of empress is not new for British rulers. Prime Minister Benjamin Diraeli secured the title of empress of India for Queen Victoria.

A Buckingham Palace spokesman said, ''There would have to be a new constitution from a United States of Europe for the queen to be installed as empress of Europe.''

The remark should not, however, be interpreted as an endorsement of the idea, another spokesman said.

PITTSBURGH (MAY 11) UPI - Iron bars do not always a prison make.

Inmates at the State Correctional Institution have ordered video cassette recorders, television sets and other items and charged them to unknowing credit-card holders on the outside, police said.

The scam started by one inmate was uncovered in November but it spread throughout the prison, police said.

At least $100,000 worth of merchandise has been charged from inside the prison this year through the unauthorized use of credit cards, police said.

''It probably spread by word of mouth,'' said Police Sgt. Mark Ninehouser, who is in charge of the city's burglary section. 'Now it's become a big problem.''

Inmates use the credit card numbers of customers who charged at hotels, restaurants and other businesses, police said. They get the numbers by posing as bank executives.

The inmates place their orders by using outside accomplices to keep the calls from being traced to the prison, police said. The accomplices are allowed to order merchandise for themselves for their help, police said.

''One we know of got a washer and dryer out of it,'' said Ninehouser.

Police said they have made 30 arrests in four months and more arrests,

including a number of inmates, are forthcoming.

''Slowly but surely we're zeroing in on this thing,'' said assistant Chief Mayer DeRoy. ''It represents a good bit of credit card fraud we have here.''

Most of the items ordered by the inmates have been sent to the homes of the accomplices, but some VCRs, compact disc players, baseball gloves and an order for 20 pairs of athletic shoes were sent to the prison, police said.

LINCOLN, NE (MAY 11) UPI - A store manager and a would-be thief were caught in a tug-of-war at a busy intersection over a tray of diamonds.

A 28-year-old man walked into Powell's Jewelers Thursday night and asked to see a tray of diamond earrings, police Lt. Allen Soukup said. After looking at the diamonds for a couple minutes, the man picked up the tray and walked out the door.

Store manager Jim Powell ran after the man and grabbed the tray and the two fought for the diamonds. Powell's brother-in-law, Brad Ross, ran out of the store and tackled the would-be thief and held him until police arrived about one minute later.

The diamonds were valued at $1,000-$10,000, Soukup said. The suspect was identified as William S. Morgan II.

#90131u1235 05/11/1990 ~United Press International

CHICAGO (MAY 11) UPI - The son of Tony ''Big Tuna'' Accardo, the reputed head of the Chicago mob, and a partner have claimed half the $5.9 million Lotto prize from April 7, an investigator of the Chicago Crime Commission confirmed Friday.

Anthony Ross Accardo, 54, and Joseph P. Cohen, 44, claimed their $2,981,591 prize Thursday.

''It just shows that anyone can win the Lottery, I guess,'' Director Sharon Sharp said. ''They won it fair and square.''

Crime Commission investigator Jerry Gladden described the senior Accardo, 84, as ''the head or semi-retired head of organized crime in Chicago.'' Anthony Ross Accardo, however, has no criminal record.

Sharp described the two winners as ''very nice gentlemen.''

The winners will receive a check for $150,591 and subsequent annual checks of $149,000 for the next 19 years.

The younger Accardo and Cohen told Lottery officials they are in the Motion Picture Projectionists Union and run the theaters in the Stratford Square Shopping Center in Bloomington, Lottery officials said.

The two said they buy $10 worth of Lotto tickets a week and have been since 1981 and let the Lottery computer pick their numbers.

FRESNO, Calif. (MAY 11) UPI - Fruehauf Trailer Operation, deep in debt ever since fighting off a hostile 1986 takeover attempt by corporate raider Asher Edelman, said Friday it will close its Fresno plant on July 7.

The shutdown will leave about 150 employees, who rejected another wage cut out of work.

Fruehauf, which makes truck trailers, has also slated plants in Harrisburg Pa., and Fort Worth, Texas, for closure before the end of 1990.

The company has been laying off employees the past several years in an attempt to pay off substantial debt incurred in fighting off Edelman's takeover bid.

Company officials had warned employees last August that closure was possible. ''It's not a big surprise,'' said Ian MacDowall, the plant manager.

Negotiations broke down between management and representatives of Local 311 of the Allied Industrial Workers Union two days ago over a pay cut proposal to save the plant. The company had asked the union to accept a $2.50 per hour wage cut for plant workers, but the request was rejected.

Al Blandin, a union representative, said the workers felt they could not accept the wage cut because they had twice before agreed to cuts in an attempt to help the company.

''It was a difficult decision for the membership because they knew there was a possibility that the plant would close, but it had to stop somewhere '' Blandin said.

To stop Edelman, Fruehauf management put together a leveraged buyout. But it left the company badly in debt.

In 1987 and 1988, Fruehauf sold more than $600 million worth of subsidiary operations, trailers and real estate. It also eliminated a workers' pension plan.

EAST LAKE, FL (MAY 11) UPI - The competition for valedictorian at East Lake High School was tough - three seniors all had a 4.2857142 grade-point average.

The three students all have maintained straight-As, are active in extracurricular activities and are deadlocked to the seventh decimal point said Patricia Browne, registrar for the school in north Pinellas County.

''I checked it and I checked it again,'' Browne said. ''We had no choice but to name them all valedictorian.''

The only possible solution is to name three valedictorians and hear two valedictory speeches - one by Janet Raymond, 17, and another by Csilla Csori, 18. The third valedictorian, Elias ''Robert'' Samaan, 17, decided two speeches was enough.

''There will already be enough people talking on graduation day,'' Samaan said.

Although no such statistics are tracked, Pinellas County officials said Thursday they can remember no such dilemma ever before.

''The fact that they have the same average to the seventh decimal point ... that's unheard of,'' said Hugh Kriever, an area superintendent for the Pinellas school system.

Five students tied for valedictorian at Wilson High School in Washington, D.C., in 1984, and in Holdrege, Neb., seven students tied for top honors in 1981.

''We are just glowing with pride,'' said East Lake school principal Bruce Baptist.

Raymond said she plans to be a journalist, Csori wants to study physics and Samaan is seeking a career as a corporate lawyer.

#90131u1255 05/11/1990 ~United Press International

WILKES-BARRE, Pa. (MAY 11) UPI - Pennsylvania Enterprises Inc. said

Friday first-quarter earnings were $4.23 million, or $1.56 a share, down 9 percent from $4.63 million, or $1.71 a share, in the first quarter of 1989.

Revenues for the period slipped to $62.6 million from $68 million a year ago.

PEI, parent company of Pennsylvania Gas & Water Co. of Wilkes-Barre, attributed the results primarily to reduced earnings from its water utility operations due to higher costs and insufficient rate relief.

PEI last month signed a definitive agreement to merge with NUI Corp. of Bedminster, N.J., which in turn will sell PG&W's water operations to United Water Resources of Harrington Park, N.J.

#90131u1256 05/11/1990 ~United Press International

NEW YORK (MAY 11) UPI - The jury for the accused ringleader in the Bensonhurst racial murder trial Friday asked the judge to explain ''depraved indifference to human life,'' sparking speculation a second-degree murder verdict may be close in the death of a black youth by a white mob.

Stephen Murphy, attorney for Keith Mondello, 19, charged with whipping up a white mob into an attack last Aug. 23 in which 16-year-old Yusuf Hawkins was shot dead, said the request ''does not bode well'' for his client.

''I was hoping that they would pass that charge by,'' he said.

As Mondello's jury, in its fourth day of deliberations, listened to state Supreme Court Justice Thaddeus Owen's explanation, the jury for accused triggerman Joseph Fama, 19, waited its turn in the courtroom for repeats of testimony.

Both Fama and Mondello are charged with second-degree murder. There are two juries because Mondello made statements to police fingering Fama as the killer.

Wednesday, Mondello's jury asked for explanations of four verdicts they could consider - second degree ''with intent'' and second degree ''depraved indifference,'' as well as first and second-degree manslaughter - and for a separate definition of ''intent.''

In a second-degree murder verdict involving ''depraved indifference to human life,'' intention to kill does not has to be proved. The charge carries a sentence of 25 years to life.

Fama's jury, in its third day, appeared to be struggling with the

testimony of witnesses incriminating Fama as the gunman.

They asked for readbacks of testimony of Irene DeSerio, who said she saw Fama at the head of the mob before the attack, holding something to his side.

The prosecution's star witness, Frank Tighe, a neighborhood buddy of Fama's with a history of mental problems and hallucinations, testified he saw Fama point the gun at Hawkins and fire four times.

The incident began when Hawkins and three black friends caught the subway from Queens to Brooklyn to look at a used car and were mistaken for a rumored group of blacks and Hispanics supposedly headed for the Bensonhurst neighborhood.

Hawkin's slaying exposed deep racial divisions in New York City and triggered months of demonstrations and protests.

Mondello and Fama and the first of eight young men to be tried for the slaying.

#90131u1268 05/11/1990 ~United Press International

WINDSOR, Ontario (MAY 11) UPI - Ford Motor Co. said Friday it will build a $50 million plant in Windsor, Ont., to produce cast aluminum parts for its new generation of engines.

Plans call for construction of the 96,000 square foot plant to begin immediately on a 24-acre site in the Ojibway Industrial Park, Ford said.

Production at the plant, to employ 138 people, is set to begin in mid-1993.

The plant will use a high technology casting process developed by Cosworth Engineering of England that currently is used in the building of its high performance engines.

George Booth, general manager of Ford's casting division, said the carmaker developed techniques to adapt Cosworth's precision sand process for high-volume production.

''The sophisticated valvetrains on our new engines demand light-weight, cast aluminum parts of exceptionally high quality,'' Booth said. ''Using this process we will produce parts that will be high quality, dimensionally more accurate and of lower weight.''

Ford has been operating a pilot casting facility in Windsor since early 1989 which Booth said ''met all our quality, cost and technical

objectives.''

#90131u1292 05/11/1990 ~United Press International
WASHINGTON (MAY 11) UPI - A deeply divided Senate opened Friday what is certain to be a long and difficult debate over how to change the way campaigns are financed and erase the ''image of corruption'' and special interest influence threatening Congress.

However, even as Democrats and Republicans both stressed the current system needs to be revamped, they also revealed the serious differences standing in the way of a comprehensive plan.

No votes were taken Friday and it was expected that while senators would continue the debate intermittently for the next few weeks, the real action is to take place away from the Senate floor, where a small group of negotiators will try for a compromise.

Although the issue is complex, the real differences between the two parties are on a few basic points - campaign spending limits, public financing and so-called soft money, which involves certain spending and contributions that are not reported.

Opening debate on the bill, the Democrats' expert on the issue, Sen. David Boren, D-Okla., argued that the problem of having to raise large amounts of campaign cash has become so acute for senators that it threatens their integrity.

And Sen. Robert Byrd, D-W.Va., said senators were so busy ''begging for money ... on our hands and knees'' that their votes were being unfairly influenced by wealthy political action committees that donate to their campaigns and push special interests.

''Everyone knows members don't always vote their minds and consciences,'' Byrd said. ''We're presenting the views of those who contribute to us, in many instances.

''PAC contributions influence members. All of us know that they do,'' Byrd said. ''They cause us to be beholden to the special interests. They affect the way we vote. Many a vote has been cast in this chamber that was, at least in some measure, based on the need to please some political action committee - not cast because of the member's constituent interest, not cast because of the national interest.''

The current ''money chase,'' added Boren, created ''an open invitation to an image of corruption in the system.''

Democrats, who generally do not have as much access as Republicans to wealthy individual contributors, are insistent that any reform bill include limits to curtail the skyrocketing costs of campaigns. But Republicans are equally adamant in opposing the limits, arguing that such a move would only help perpetuate the Democrat majority in Congress.

Likewise, Democrats want to have most of the costs of campaigns paid by the public through a voluntary tax checkoff system, but Republicans feel equally strong against even limited public financing.

Both sides, however, have said they want to severely limit the influence of the political action committees and Republicans indicated that might be one of the areas where negotiators could begin to work on a compromise.

Sen. Mitch McConnell, R-Ky., the GOP expert on the issue, argued Friday against the Democratic approach. However, he suggested that negotiators begin their efforts by concentrating on areas of agreement, such as limits on PACs.

Nonetheless, McConnell was insistent that spending limits not be a part of a bill. ''The issue is not how much you spend, it is who does it come from '' he said.

Boren said he was certain he had a majority of support for the Democrats' bill, but it was clear he does not yet have the 60 votes needed to cut off debate on the plan.

Two years ago Democrats pushed another bill that included spending limits, but Republicans successfully killed it with a filibuster.

There has been speculation this year that growing public concern over congressional ethics would force lawmakers to act on campaign financing. But some senators have privately hinted that both parties appear to be mostly concerned not with reaching a compromise, but with taking positions that can be defended in their election campaigns this fall.

#90131u1302 05/11/1990 ~United Press International

MEXICO CITY, MX (MAY 11) UPI - A commercial airliner that crashed in southeastern Mexico and killed at least 18 people was carrying three crew members and 38 pilgrims to see Pope John Paul II, an airline spokeswoman said Friday.

''We cannot give more details. Our list of victims is not yet complete,'' Aviacsa airline spokeswoamn Patricia Chavez said in a telephone interview from Tuxtla Gutierrez.

''There were 41 people aboard, including three crew members,'' she said.

Aviacsa Flight 100, an F-27 made by Fairchild in the United States under license from the Dutch company Fokker, was on a 125-mile trip from Tapachula to Tuxtla Gutierrez, 400 miles southeast of Mexico City in the state of Chiapas, when it crashed about 9 a.m. Thursday.

The cause of the crash was not known.

Heladio Castro, a spokesman for the Chiapas state government, told United Press International by telephone that army and Red Cross rescue workers recovered 18 bodies from the wreckage.

A spokesman for the regional attorney general's office confirmed 17 people were injured and that the number of deaths could rise because some of the injured were in critical condition.

Castro said Bishop Luis Miguel Canton Marin of Tapachula was among the dead. The bishop had been scheduled to participate in ceremonies during the pope's visit to Tuxtla Gutierrez on Friday.

Among those injured were Ecology and Urban Development Ministry delegate Manuel Mauricio Leguizamo and Beatriz Yanez de Sau, the wife of the Chiapas deputy minister of government.

Ivan Ruiz Esparsa, a spokesman for Mexico City Airport and Auxiliary Services, said the plane lost contact with the control tower at Tuxtla Gutierrez airport minutes before it crashed in flames less than a mile from the runway.

#90131u1326 05/11/1990 ~United Press International

MARIETTA, GA (MAY 11) UPI - The Great Circus Bim Bom, out of money and far from home in the Soviet Union, was stranded in an Atlanta suburb Friday, looking for the cash to finish what was to be a two-year goodwill tour of the United States.

''I've been all over the world and this is the first time this has ever happened,'' said Viktor Lomakin, who has a chimpanzee act in the stranded circus. ''We have a great show. Not being able to perform is like taking a piece of gold and throwing it out.''

The troupe, composed of all-star performers from 60 Soviet circuses, arrived in America March 31 and trained in Wheeling, W.Va., before opening performances April 25 in Hershey, Pa., then going to Knoxville, Tenn.

Poor promotional efforts and two investors who bowed out of their

agreement after the first performances forced the 125-member circus out of business, circus officials said.

The group, including 11 children and about 40 married couples, fled to Atlanta, where shows were planned for June or July, and where some of the group's main contractors are located, said tour director Nikolaj Vissokovsky.

Vissokovsky, president of International Showbusiness Inc., a Florida-based firm, said the company lost its backers, two Kuwaiti investors, shortly after arriving in Tennessee.

''We've been left high and dry,'' Vissokovsky said. ''We don't know what we are going to do.''

He said he has been talking to two other investors who may be interested in taking over the circus for the rest of the tour.

Yuri Turkin, the circus director, said the performers have stayed in good spirits, but are eager to resume the tour.

Scheduled performances in Johnson City, Tenn., were canceled after the circus lost its backing.

The group Wednesday was evicted from a Motel 6 in Marietta, about 20 miles north of Atlanta, after managers at the discount lodgings learned of the group's shaky finances.

Motel manager Edward Jones confirmed the group paid for one night's stay by credit card. When asked why the performers were evicted, he said, ''Research the history of the group.''

Circus managers are accused of writing a bad check for $923 at a Johnson City store for 20 pounds of bananas, two 50-pound boxes of cabbages, six cases of dog food, 20 pounds of cucumbers, 137 loaves of day-old bread and other items, said Randy Hendrix, son of the store manager.

''They said they needed bear and lion food but then they got yogurt and cottage cheese and I thought what it really was was food for the Russians, Hendrix said.

A Knoxville Civic Auditorium employee said the group left that town owing hundreds of dollars in arena fees.

The group has been taken in by a Scottish Inn in Marietta, where managers have adopted a more sympathetic stance.

Thomas Smith, food and beverage manager at the motel, said the business is

helping coordinate a donation drive to feed and lodge the performers, who could be seen sprawled on the grassy areas of the motel sunning on Friday.

Smith said churches and individuals who have learned of the group's plight have responded to the call for help with contributions of food and money.

''I don't think that people from another country should come to this country and be treated like they were at Motel 6,'' Smith said.

The plight of the Great Bim Bom Circus is reminiscent of the tribulations of the ship Fazisi, the first privately financed Soviet vessel ever to enter the 32,932-mile Whitebread Round the World Race during perestroika.

Financial problems threatened to force the Fazisi from the race when it arrived in Fort Lauderdale, Fla., in 13th place April 11. The ship, apparently having solved its financial problems, set sail with the rest of the field May 5.

#90131u1328 05/11/1990 ~United Press International

TORONTO (MAY 11) UPI - Varity Corp. reportedly plans to move its headquarters to Buffalo, N.Y. despite committments the company made in 1986 to remain in Canada as part of a restructuring of its pedecessor, Massey-Ferguson Ltd.

Varity requested and received preliminary approval for tax incentives to buy and renovate the historic Butler mansion in Buffalo, the Financial Post reported.

Varity told the Erie County Industrial Development Agency it would pay $11.5 million for the property, with $2.35 million slated for renovation work, according to Dean Sallak, treasurer of the agency.

Public assistance could exempt Varity from $700,000 in real estate taxes over a 10-year period and allow the company to avoid up to $60,000 in sales tax on the renovations, the Post reported.

Varity's chairman Victor Rice told shareholders at last year's annual meeting in Toronto that moving the company's headquarters was being considered as one of several ways to increase shareholder value.

But shifting its head office from Ontario would violate commitments the company made to the Canadian and Ontario governments as part of the controversial Massey-Ferguson restructuring. The governments spent $200 million in the early 1980s to bail out the ailing farm equipment manufacturer.

The Buffalo mansion is currently owned by Solar Sportsystems Inc., a subsidiary of Delaware North Companies Inc.

Varity manufactures engines, farm machinery equipment and automotive components at Massey-Ferguson Industries Ltd., Perkins Engines Ltd., Dayton Walther Corp. and Kelsey-Hayes Co.

LIMA, PERU (MAY 11) UPI - A bus plunged 600 feet down an Andean cliffFriday, killing 48 of the 51 persons aboard, the Peruvian air force reported.

Forty-three of the victims died at the site of the crash, 500 miles

southeast of Lima, and five others died at Goyoneche Regional Hospital of Arequipa, Peru's second city, an air force spokesmen said.

Three survivors, ferried from the crash site to Arequipa by helicopter from the La Joya air base, were in critical condition, the spokesman said.

Police reported the bus of the Ormeno Interprovincial Transportation line ran off a curve on the Pan American Highway at 4:05 a.m. on the route from Lima to Arequipa after it passed through the Vitor tunnel at a locality known as Tambillo.

Early police reports said investigators suspect the bus was forced to swerve off the road when it was about to collide with a cargo truck that was approaching from the opposite direction but apparently in the same lane.

The accident is one of the worst highway tragedies in Peru in recent years.

#90131u1342 05/11/1990 ~United Press International

MINNEAPOLIS (UPI)- Honeywell Friday said it plans to divest its Denver-based Test Instruments Division.

Honeywell said its most likely option would be to include the division in the company's plans to spin off its Defense and Marine Systems business into an independent company.

Honeywell's board of directors is expected to review a spinoff plan for approval in the third quarter of 1990.

Pursuit of the spinoff option does not preclude the possibility of divesting any of the businesses in another manner, such as a sale, company officials said.

Test Instruments Division is part of Honeywell's Industrial business. The division is a leading supplier of information storage products, including magnetic tape recorders and systems, graphic recorders, and instrumentation, calibration and testing services. Key customers worldwide include major governments, defense contractors, major industrial and medical original-equipment manufacturers, engineering laboratories and end-users.

''The intended divestiture of Test Instruments Division reflects our continuing efforts to focus on our primary business - controls,'' said Jerome Meyer, president of Honeywell's Industrial business.

The division employs approximately 1,000 people, 700 of whom are at its

manufacturing facility in Denver. The remaining employees are in test facilities in California and Arizona, and in service centers and sales offices worldwide.

#90131u1349 05/11/1990 ~United Press International

(MAY 11) UPI - A report from the Office of Technology Assessment says the United States needs more focus for its space exploration program before making major decisions about building the next generation of spacecraft. The report says that since development of such systems must begin about a decade before they are needed... advance planning is critical.

A report says Cuban leader Fidel Castro gave documents to lawyers for Manuel Noriega that refute charges that the ex-Panamanian dictator smuggled cocaine into the United States. Miami attorney Frank Rubino says he met Castro in March. Rubino says the nature of the documentation cannot be revealed because of the Classified Information Procedures Act.'' The law prohibits publication of documents classified by the U-S government.

Trumpeter Dizzy Gillespie treated a Moscow audience last night to nearly three hours of the finest American jazz in his first Soviet appearance. Muscovites packed the 25-hundred-seat hall... spilled into the aisles and along the walls... and crowded in front of the stage to hear Gillespie play. Fans roared their appreciation after solos... and brought flowers onto the stage after nearly every number. Next stop for Gillespie is Prague.

Congratulations go to aspiring writer Linda Vernon, who captured first place in the Ninth Annual Bulwer-Lytton Fiction Contest for bad writing. The 38-year-old housewife and mother of Newark, California, says she had NO problems whipping out the turgid 80-word sentence that beat 10-thousand entries worldwide. The man who gives his name to the contest... Edward Bulwer-Lytton... is best known for penning the sentence that begins, ''It was a dark and stormy night.''

Her winning entry, word for word:

''Dolores breezed along the surface of her life like a flat stone forever skipping along smooth water, rippling reality sporadically but oblivious to it consistently, until she finally lost momentum, sank and, due to an overdose of fluoride as a child which caused her to suffer from chronic apathy, doomed herself to lie forever on the floor of her life as useless as an appendix and as lonely as a five-hundred-pound barbell in a steroid-free fitness center.''

#90131u1370 05/11/1990 ~United Press International

LIMA, PERU (MAY 11) UPI - Peruvian novelist Mario Vargas Llosa and agronomist Alberto Fujimori were the winners in April's first round of presidential elections, the National Election Board announced Friday.

The two top vote getters in a field of nine candidates will face each other in a runoff election June 10.

The first vote was Apr. 8 but official results were delayed over a month.

With all of 52,157 election districts accounted for, the election board said Vargas Llosa, leader of a conservative coalition, got 27.6 percent while Fujimori, an independent backed by some leftist factions, got 24.6 percent of the vote.

The candidate of the governing Aprista Party, Luis Alva Castro, was third with 19.1 percent, while Henry Pease, the United Left candidate, was fourth with 6.9 percent.

Left-wing socialist Alfonso Barrantes was fifth with 4 percent, the election board said.

The figures showed the other four candidates got a total of 2.2 percent of the votes, while blank and null votes accounted for 15.3 percent in the election in which 7,866,858 Peruvians voted.

Peruvian election law stipulates that if none of the candidates gets more than 50 percent of the vote in the first round of a presidential election, the two top vote getters will face each other in a runoff.

MILWAUKEE (MAY 11) UPI - A mother and her boyfriend were arrested on charges of neglect Friday after a smoky house fire that killed five of the woman's children and critically injured another, authorities said.

An investigator said the fire may have been caused by children playing with matches.

The fire broke out before 10 p.m. Thursday, trapping six of seven siblings left alone in their two-story downtown home, police Lt. Roosevelt Harrell said.

An 11-year-old girl, Cynthia Sharp, the eldest of the youngsters in the home, was helped to safety from a second-story window by a neighbor, Lawrence Wimberly, 35, Harrell said.

Wimberly said the girl jumped into his arms and he then tried to put up a ladder to rescue the other children.

''The smoke was so intense I couldn't get in,'' he said.

Four girls - Lashandra Moore, 5, Alexis Moses, 6, Jocelyn Moses, 8 and Daphne Moses, 9 - died. A brother, Antonio Dion Moore, 3, died Friday at Children's Hospital and another brother, Justine Moses, 2, was in critical condition.

The 26-year-old mother of the victims, whose name was not released, was arrested on suspicion of neglect of children leading to death, Harrell said. The woman's 43-year-old boyfriend also was arrested on suspicion of child neglect. The cases were being reviewed by the Milwaukee County district attorney's office pending the filing of formal charges.

Fire Chief August Erdmann said the fire broke out on the first floor of the two-story home.

''We can't tell exactly but it appears the children were in the upstairs part of the house,'' he said.

Police fire investigator Mike Durfee said it appeared the blaze was accidental and ''is consistent with children playing with matches.''

The blaze was reported at 9:46 p.m. and Erdmann said all the children were taken out of the home within four minutes of the time firefighters arrived on the scene.

First Battalion Chief John Hufnagel said the home was destroyed. He said ''there was a large amount of fire'' but smoke was also a dangerous factor for the children.

HYDERABAD, INDIA (MAY 11) UPI - Rescue workers Friday fanned out across Andhra Pradesh, the coastal state devastated by a typhoon that left at least 169 people dead, an unknown number marooned by floods and some 5 million without power.

The storm, meanwhile, lost its destructive power overnight as it moved further inland, officials said.

Relief Commissioner C. Arjun Rao told United Press International that 500 relief teams moved into areas battered by the typhoon, distributing food to stranded villagers, providing medical attention and assessing the damage.

He said at least 169 people died due to weather-related incidents and the toll would probably go up once relief workers can inspect coastal areas.

About 200 workers set about clearing four main roads leading to isolated coastal areas where telecommunication links were not functioning, Rao said. He said the roads, choked by fallen trees and debris, were expected to be cleared by Saturday morning.

''Right now the greatest challenge is opening up those inaccessible areas and supplying food, mainly in the Krishna district,'' Rao said. ''In the meantime, we will conduct aerial surveys and also be dropping food from helicopters into areas where it is required.''

The exact number of people marooned was not known.

He said the hurricane badly damaged two power stations in Vijayawada, cutting electrical power to about 5 million people residing in districts around the city, 150 miles southeast of Hyderabad.

#90131u1377 05/11/1990 ~United Press International

HOT SPRINGS, VA (MAY 11) UPI - John Reed, chairman of Citicorp, the nation's largest bank, said Friday there are signs of a credit crunch because many institutions are less willing to loan money, especially for real estate.

"There is no question there is a heightened level of concern," said Reed, attending a meeting of the Business Council, an organization of America's corporate chieftains. "We are certainly maintaining our commitment to the real estate industry," he said, but added, "Other institutions are pulling back."

The nation's top banking regulators - Federal Reserve Board Chairman Alan Greenspan, Federal Deposit Insurance Corp. Chairman William Seidman and Comptroller of the Currency Robert Clarke - held an unprecedented meeting Thursday in Washington with officials of the American Banking Association about credit concerns.

The regulators, who requested the private meeting, urged the bankers against overreacting to strict new standards on real estate lending and other loans in the wake of the collapse of the savings and loan industry.

"We're not telling the bankers not to make loans, we're telling them to be careful and to work with the borrowers," Clarke said. Although Reed did not attend the meeting in the nation's capital, he said, "The industry is clearly going through an important slowdown."

"My suspicion is that what the regulators are trying to do is tell (the banks) we want you to drive at 55 mph, but we don't want you to cause a traffic jam," Reed said. "The comptroller of the currency has been warning the industry to be prudent," he said.

During the Business Council meeting, a group of 19 corporate economists released a survey that predicted the economy will continue to grow, although slowly, in 1990 and 1991 and avoid a recession. "The great strength of the American economy is its diversity," Reed said. "The overall economy is quite robust."

The Citicorp chairman also said that despite the problems for banks in the United States, business abroad will be "strong" in 1990 and 1991 - especially in Japan and other parts of the Pacific.

#90131u1394 05/11/1990 ~United Press International

WARSAW, POLAND (MAY 11) UPI - The Polish government scolded Solidarity leader Lech Walesa Friday for his criticism of Prime Minister Tadeusz Mazowiecki's reform program, saying "exposure of political differences does not serve the interests of the country."

The remarks by government spokeswoman Malgorzata Niezabitowska came a day after Walesa attacked the government for failing to address the concerns of workers in the Gdansk shipyard, where the Solidarity union was born in 1980.

The exchange was part of a growing tiff between Mazowiecki, the head of the Solidarity-led government, and Walesa, the trade union chief, over how the country should be governed.

In the southwestern industrial center of Katowice, meanwhile, 50 right-wing activists took over the headquarters of regional Polish television and radio, which is controlled by the Solidarity government.

The protesters, members of the nationalistic Confederation for an Independent Poland (KPN), walked peacefully into the radio-TV headquarters and occupied the building to press their demands for greater access by other opposition groups to the mass media.

KPN leader Adam Slomka was meeting with regional governor Tadeusz Wnuk on the matter, a KPN spokesman said in Katowice. "We want to protest the monopoly of the Solidarity communistic government on the media," the spokesman said, referring to last year's roundtable arrangement allowing the communists to retain some posts in the Solidarity-led government.

The latest tiff between Walesa and the government erupted Thursday when the union leader supported a brief strike at the Gdansk shipyard by workers concerned about low wages. Walesa lashed out at the government for choosing "the wrong version" of democracy, which he said is not allowing individuals their full liberties within the law.

The Solidarity chief also has criticized the government for allowing former communist officials to take over various businesses and "rob" Poland. He demanded that communists be ousted from positions that permit them to control various sectors of economy and implied they may slow down the reforms.

In response Friday, government spokeswoman Niezabitowska tried to play down any differences between Mazowiecki and Walesa and said the relations between the two were good, even if the union leader had declared war on the government.

"War will not be declared against Walesa," she said, because "it seems to us that exposure of political differences does not serve the interests of the country."

"The position of the government is strong," she said. "We are not facing dismissal or collapse."

On Thursday, the government introduced sweeping changes in Polish security. The Parliament dissolved the discredited communist militia and secret police, and Mazowiecki appointed two Solidarity officials to be in charge of state security.

Krzysztof Kozlowski, 58, who has been a deputy interior minister since March, Thursday was appointed head of the Office of State Protection, which replaces the secret police. Andrzej Milczanowski, 51, a Solidarity official and lawyer, was named deputy of the Office of State Protection. The appointments by Mazowiecki indicate the last remnants of the communist power base - the Interior Ministry and the army - were losing power.

Kozlowski, former editor of the Catholic weekly Tygodnik Powszechny and a Solidarity activist, said the new office would not control "everybody and everything" as did the secret police, which was disbanded Thursday by Parliament.

Of the secret police's 24,000 agents, 9,000 have been fired and the rest will work in the Office of State Protection. Under the Solidarity-communist government in 1989, the Interior Ministry remained in hands of communists, who further lost their base when the Communist Party was disbanded early this year.

Under communist rule, the secret police monitored all organizations in the

country, including the Roman Catholic Church. In 1984, secret police agents killed a pro-Solidarity priest, the Rev. Jerzy Popieluszko.

Kozlowski said he would allow former agents the opportunity to serve under the Solidarity government because of a concern over adequate manpower. "I am not interested in the past, I am intrested in how these people will work," Kozlowski said.

The Parliament also dissolved the militia, the organization formed by the former communist government in 1944 to defend the communist system installed by Moscow. The 77,000-strong militia now becomes the national police.

NEW YORK (MAY 11) UPI - A young man arrested in North Carolina for the fatal shooting of a rap music producer was headed Friday to New York to face murder charges, authorities said.

Derrick Blair, 20, of Brooklyn, was nabbed Feb. 13 in Fayetteville, N.C., after a tip by someone who saw a chronicle of the slaying of Paul McKasty on television and alerted authorities to Blair's whereabouts, said Steve Jones, the victim's brother-in-law.

Blair, who had fought extradition, is to be arraigned Monday on murder charges for the July 17 killing of McKasty, who produced music for rap bands including Eric B. and Rakim and Biz Markie, authorities said.

McKasty was shot three times in the head and neck and was found the next day in his home in Rosedale, said Richard Piperno, a spokesman for the Queens District Attorney.

A witness who saw two men leave McKasty's home identified Blair as one of the suspects in a lineup four months ago, Piperno said.

Blair, who was also wanted on a Texas warrant for narcotics charges, was arrested after a re-enactment of the McKasty killing on WNYW-TV's ''New York's Most Wanted'' and on a ''Crime Stoppers'' television show in Fayetteville, Jones said.

The second suspect remains at large, Piperno said.

Authorities have been unable to determine a motive in the killing of the 24-year-old producer said by his friends to be a rising star.

Patricia McKasty, the victim's sister, said she and the rest of her family were pleased to hear of Blair's arrest.

''It makes a big difference,'' she said. ''It's been horrible, more horrible than I ever imagined. Paul was a very loving person and extremely talented. It's very hard to feel like there's any joy left in the world.''

Blair could face a maximum prison sentence of 25 years to life.

#90131u1422 05/11/1990 ~United Press International

BONN (MAY 11) UPI - Both East and West German leaders accused the Communist Party Friday of preying on the fears of East Germans who have been demonstrating against the planned German economic union.

East German Social Democratic leader Richard Schroeder, in an interview with the West German Bild newspaper, called the Communist Party a ''Trojan horse'' for the new East German democracy.

He said the communists played on the fears of the people, and that the appearance of party leader Gregor Gysi at every demonstration only fueled the common belief the planned economic union would cause massive unemployment.

''The Party of Democratic Socialism is just like the old Communist Party '' Schroeder said, refering to the new name taken by the communists after last fall's ouster of the hardline communist government.

West German government spokesman Hans Klein agreed in a statement Friday at a news conference.

The Christian Democratic minister said: ''Some of the people who are, in part, behind the strikes, are the same people who got East Germany into the mess it's in in the first place''

The thousands of East Germans who participated in the warning strikes and demonstrations Thursday, were protesting the terms of the East-West German economic treaty scheduled to go into effect July 1.

East German farmers blocked border crossings, halting West German delivery of agriculture products, which even before the economic union caused a drop in sales in the East.

Nearly 2,000 teachers demonstrated in front of the East German Parliament, demanding higher wages and joining factory workers in a one-hour work stoppage.

In another interview with the mass-circulation Bild newspaper, West German Labor Minister Norbert Blum attempted to allay East German fears.

''No one in East Germany needs to worry, that in losing his job he will fall into social deprivation,'' Blum said. ''We are helping build a modern labor system in East Germany, which is socially secure and will fight umemployment through education.''

#90131u1443 05/11/1990 ~United Press International

CHICAGO (MAY 11) UPI - A 12-year-old girl snatched from a hospital - possibly by her homeless, fundamentalist Christian mother - may die unless she has open heart surgery within a week, officials warned Friday.

The youngster, identified as Kimberly Winfield, suffers from a serious heart ailment brought on by rheumatic fever, said Gordon Johnson, director of the Department of Children and Family Services.

''The probability is if not found in a few days - the doctors tell us she will not live,'' Johnson said. ''We hope and pray she is returned.''

DCFS spokesman David Schneidman said officials suspect the child was taken by her mother, identified as Caroline Winfield, 35, because she is a Jehovah's Witness and ''her religious beliefs prohibit any exchange of blood - therefore any surgery on Kimberly.''

''We suspect her because she had voiced concern to her relatives that she intended to withdraw the child from the hospital,'' Schneidman said. He said the child's grandmother ''became very concerned over the way the woman was acting and called police.''

The disappearance was discovered by officials at Children's Memorial Hospital at 12:30 a.m. Thursday. The state was notified almost immediately Schneidman said.

Hospital officials also overheard conversations involving the mother but ''thought nothing of it'' because the mother made no formal protests about the surgery, Johnson said.

Schneidman said officials waited until Friday to ask for the public's help to avoid alerting the mother and to check with relatives.

He said the DCFS took custody of the girl from the mother ''on the street'' about two months ago, following complaints the mother was seen pushing a shopping cart containing Kimberly and their belongings and appeared unable to care for the child.

''The mother and child were homeless. They were street people. The mother was pushing the little girl in a shopping cart. She lived in parks and

shopping malls,'' said Schneidman.

The heart condition was discovered through testing and the girl had been hospitalized about two weeks.

The child's natural father, identified as Larry Winfield, was ''very upset'' about Kimberly's disappearance and said ''he had no qualms'' about the surgery, Schneidman said.

#90131u1445 05/11/1990 ~United Press International

WASHINGTON (MAY 11) UPI - FBI Director William Sessions, whose agency has come under fire from a number of minority employees, said Friday he does not want the public to see the FBI as ''a racist or discriminatory organization.''

Several black and Hispanic FBI employees have made accusations of discrimination against the agency, which is charged with enforcing the nation's civil rights laws.

Sessions told reporters he has made many changes at the FBI and is investigating the reported harassment of agents and other workers.

To recruit minority employees, the FBI must ''be perceived as a good place to work,'' Sessions said.

''The American people can't perceive us as a racist or discriminatory organization,'' he said.

''No, I'm not profoundly embarrassed by the allegations,'' Sessions said. ''We've made tremendous numbers of changes.''

He said the agency has diligently reviewed language programs and all facets of recruitment and training at the FBI.

Sessions said he dispatched his top equal employment opportunity aide to San Juan, Puerto Rico, on Friday as part of an effort to give ''direct and immediate'' attention to FBI offices with a large number of Hispanic agents.

A federal judge in El Paso, Texas, ruled in 1988 that the FBI was guilty of systemic discrimination against Hispanic agents and must promote them. Since then, a number of agents who participated in the suit said they have been punished in retaliation.

Several former and current FBI employees recently told a House Judiciary subcommittee that institutional discrimination by the FBI has gotten worse

since the class-action lawsuit in Texas. A number of black agents have filed lawsuits against the agency.

#90131u1463 05/11/1990 ~United Press International
RICHMOND, VA (UPI) - A North Carolina law exempting purchases of Bibles from state sales tax is discriminatory and violates the constitutional prohibition against state-established religion, a federal appeals court ruled Friday.

A three-judge panel of the 4th U.S. Circuit Court of Appeals, in reversing a lower court, said the sales tax exemption not only violated the constitutional clause that prohibits state-sanctioned religion, it also violates the First Amendment, which guarantees freedom of the press, by discriminating against other religious books.

The court made its decision in light of a 1989 U.S. Supreme Court decision that ruled unconstitutional a Texas sales and use tax exempting all religious literature from taxation.

''This case presents a more untenable violation of the establishment clause because the exemption specifically applies to 'Holy Bibles,' a religious text sacred only to members of Christian faiths,'' the panel said.

A rabbi, a member of the Hindu faith and a member of the Hare Krishna faith challenged the constitutionality of the exemption, saying purchases of their sacred texts were not exempt under the act.

John Friedman, a rabbi, had purchased a copy of Tanach, the Holy Scriptures of Judaism, and was charged the 5 percent sales tax. Vasudha Gupta, a member of the Hindu faith, had purchased a copy of Bhagavad Gita, a sacred Hindu text, and Bruce Jacobs, a member of the Hare Krishna faith, bought a copy of The Upanishads and were required to also pay the tax.

The panel turned aside arguments that the state's secretary of revenue

attempted to interpret the statute liberally to apply to all sacred scriptures, and that the North Carolina Department of Justice had agreed the men would be entitled to refunds.

''It is precisely this type of 'official scrutiny of the content of publication as the basis for imposing a tax' that is so repugnant to the free press clause of the Constitution,'' the panel said.

A lawyers for the plaintiffs called the decision ''exciting'' and suggested it would have implications for about a dozen other states with such exemptions still on the books.

''It vindicates a position which we have had for over three years,'' said Washington attorney Brian Rubin. ''We had contacted various officials in the North Carolina government in 1987 questioning the constitutionality of the exemption. They failed to respond adequately and that is why we filed this suit.''

John Simmons, a spokesman for the North Carolina attorney general, said the decision did not come as a surprise.

CAIRO, EGYPT (MAY 11) UPI - At least 200 East German security and intelligence advisers left South Yemen after the Arab world's only Marxist state refused to help pay their salaries, Arab diplomatic sources said Friday.

''Two hundred East German experts from the former East German intelligence apparatus Stasi and their families have now left Aden,'' the Cairo-based diplomatic sources said.

The sources said Berlin stopped paying the salaries of the advisers after the abolition of the East German Stasi security apparatus, and Aden was unwilling to pick up the bill.

The East Germans have been training South Yemeni security personnel for 20 years. The last of about 100 Cuban experts left Aden several months ago, after South Yemen began questioning Havana's communist policies and began talks for union with North Yemen.

It was still unclear if some 2,000 Soviet military and technical advisers had also left Aden, where Soviet warships have docked since a Marxist government took power shortly after independence from Britain in 1967.

The diplomats said South Yemen wanted to maintain ''good ties with Moscow, but also wanted to break with the past relationship.''

Plans to merge North and South Yemen would create the most populous nation on the Arab peninsula after three centuries of division. Parliaments in both states have said they will discuss a draft resolution for a merger later this month, and the resolution would later be put to a referendum.

Saudi Arabia, which in the past backed both North and South Yemen with economic aid, has privately expressed concern over the idea of a large secular state with free political parties operating on its border.

North Yemeni diplomats said they would oppose an Islamic state on Saudi lines in a new Yemen, even though Saudi Arabia - an absolute monarchy which has banned political parties and imposes strict Sharia or Islamic law - has encouraged Yemeni religious leaders to try and influence events in their country.

North Yemen is grouped with other secular states such as Iraq, Egypt and Jordan in the Arab Cooperation Council. The North Yemeni diplomats said they expected a new Yemen to remain within the ACC.

#90131u1504 05/11/1990 ~United Press International

WASHINGTON (MAY 11) UPI - Mayor Marion Barry's lawyer said Friday the ''eleventh hour'' addition of six new drug counts against the embattled mayor interferes with his right to a speedy trial, but he did not say if he would ask for a delay in the scheduled June 4 trial.

Barry, indicted on eight drug and perjury charges Feb. 15, was indicted Thursday on six new misdemeanor counts of cocaine possession and conspiracy.

''We of the defense have already experienced a serious problem of time constraints in preparing to meet the eight complex charges in the first indictment,'' Barry's attorney, R. Kenneth Mundy, said in a statement.

''Now the government comes on the very eve of trial at the eleventh hour with a new indictment and six new charges which span a six year period all the way back to 1984. Certainly, we think this tactic is unduly burdensome and unfair to the defense,'' he said.

Thursday's indictment also ''violates our understanding'' with prosecutors that there would be no last minute charges, Mundy said.

The 14 charges in the superseding indictment include 10 misdemeanor counts of cocaine possession, three felony perjury counts and one misdemeanor count of conspiracy to possess and use cocaine and crack.

Barry is scheduled to be arraigned on the new charges Tuesday before U.S. District Judge Thomas Penfield Jackson, who will hear the case. He pleaded innocent to the initial eight counts after his Feb. 15 indictment.

The latest charges allege Barry bought and used cocaine and crack with more than 10 unnamed co-conspirators dating back to 1984 - half of his time in office - and possessed illegal drugs on many occasions from November 1987 to January 1990.

The earlier charges had alleged drug activity only in December 1988 and on Jan. 18 of this year, the night Barry was arrested in an FBI sting operation.

Mundy called the new charges ''unduly burdensome and unfair to the defense.''

''It is unfair too, because it interferes with Mr. Barry's right to a speedy trial on the earlier indictment and seems designed to untrack this case from an early deliverance by jury,'' he said.

U.S. Attorney Jay Stephens had no immediate comment on Mundy's charges.

But both Mundy and prosecutors said Thursday they did not want a delay in the June 4 trial date. But preparing for the new counts could force a delay, a decision that could be made by Jackson at the Tuesday arraignment.

Barry has said he would withhold any announcement on whether he will seek a fourth term until after the trial.

But Barry must file with the District of Colombia Board of Elections and Ethics by July 5 if he plans to run in the September Democratic primary for mayor.

Under city law, the three-term mayor would be precluded from holding office only if jailed after a felony conviction. Only the three perjury charges are felonies.

Since Barry's return to the city from seven weeks of in-patient substance abuse treatment following his Jan. 18 arrest, he has kept up a busy schedule of public appearances and visits to area housing projects.

#90131u1513 05/11/1990 ~United Press International

CHICAGO (MAY 11) UPI - Prices in the soybean complex tumbled to nearly limit-down levels at midday on the Chicago Board of Trade, pressured by aggressive selling.

The market recovered some of the losses, but soybeans and soybean meal remained sharply lower at the final bell. Oil futures also were lower, but losses were limited by the sale of a substantial quantity of soyoil to Pakistan.

The supply and demand report which came out Thursday afternoon was considered bearish for soybeans. A prominent professional firm dominated the selling in the soybean pit.

The same firm was a major buyer of new-crop corn which ended the day with moderate gains. Nearby May and July corn were lower, pressured by liquidation and spillover weakness from soybeans.

Wheat traded lower most of the day. The selling was based on the Agriculture Department's production estimate which was higher than expected. The sale of 250,000 tons of export bonus wheat to the Soviet Union provided underlying support.

Positioning ahead of the weekend kept the entire floor on the defensive.

Country movement was light.

At the close, corn was off 1 3/4 to up 3 1/2, soybeans down 14 1/2 to 17 1/2, wheat off 1/2 to 5 1/2 and oats down 5 1/2 to 6 1/4.

#90131u1517 05/11/1990 ~United Press International

WASHINGTON (MAY 11) UPI - The Senate paid tribute Friday to the late Sen. Spark Matsunaga, D-Hawaii, by naming the center table in the senators' dining room in his honor.

A resolution designating the table the ''Spark M. Matsunaga Table'' was passed by voice vote.

Matsunaga, who died last month, was famous for giving personal escorted tours of the Capitol to visitors from Hawaii and then bringing them into the dining room for lunch - sometimes ushering in more than one group in a day.

Senate Republican leader Robert Dole said, ''We used to kid him because he was there almost on a daily basis with friends from Hawaii.''

#90131u1520 05/11/1990 ~United Press International

WASHINGTON (MAY 11) UPI - Foreign interests own 12.9 million acres, or slightly less than 1 percent, of U.S. agricultural land and nearly half of it is forest land, the Agriculture Department said Friday.

The acreage total was up 263,273 acres from last year's report but the department's Economic Research Service said the foreign ownership total has been relatively stable at 1 percent for the past decade.

Maine had the largest total for foreign-owned acreage, 2.07 million acres, most of it in the hands of four timber companies. Otherwise, foreign holdings were concentrated in the South and West, each having 35 percent of the total.

Canadians had the largest amount of the U.S. land, 1.67 million acres, followed by West Germany with 739,657 acres, Netherlands Antilles with 385,229 acres, Great Britain with 294,700 acres and Switzerland with 215,529 acres.

ERS adminstrator John Lee said 60 percent of the land listed as foreign holdings actually was owned by U.S. firms. Federal law requires firms to register land holdings as foreign owned if foreign investors own 10 percent or more of the firm.

Corporations own 81 percent of the foreign-held acreage.

Foreign investors own 11 percent of the privately owned agricultural land in Maine and their 2.07 million acres amount to 16 percent of all the foreign-owned land nationwide. The owners indicated 93 percent of their land would remain in agricultural use.

#90131u1526 05/11/1990 ~United Press International

TALLINN, ESTONIA, USSR (MAY 11) UPI - The presidents of Estonia, Latvia, and Lithuania will meet Saturday in a historic Baltic summit to join forces in their fight to break away from the Soviet Union.

"Just the fact that the presidents are meeting all together for the first time is historic," said Estonian government spokesman Valle Selbman. "The republics are not standing alone."

A draft of a proposed agreement on economic and political cooperation also said the three Baltic republics will demand their "rightful seats" in the United Nations as independent nations.

The draft accord, shown to United Press International, would reinstate a 1934 treaty that established close political and economic ties between independent Estonia, Latvia, and Lithuania.

The agreement to be signed Saturday and the 1934 treaty pledge joint efforts on trade and periodic high-level conferences, with the exchanges to be coordinated by the Baltic Council, an umbrella group set up last year.

The treaty signed by Latvia, Estonia, and Lithuania in Geneva on Sept. 12, 1934, also provides for the exchange of diplomats. But the single-page draft accord provides few specifics of how the republics could help one another in the face of Soviet economic sanctions.

Presidents Vytautas Landsbergis of Lithuania, Anatolijs Gorbunovs of Latvia, and Arnold Ruutel of Estonia will meet Saturday in an ancient castle on a hill overlooking the Estonian capital of Tallinn's Old Town. Each of the three Baltic republics has declared independence from the Soviet Union in the past two months.

Soviet President Mikhail Gorbachev cut off Lithuania's crude oil and other supplies last month to pressure it into rescinding its March 11 declaration. Gorbachev has threatened similar sanctions against Estonia and Latvia, which passed more moderate decrees seeking negotiated breaks from Moscow.

The three republics, annexed by the Soviet Union in 1940, have each asked for talks on secession but have shown no signs of giving in to Gorbachev's demand to back down from their independence proclamations.

The three republics have some economic ties, but the links are controlled by Moscow and all transactions must go through central ministries in the Soviet capital.

#90131u1528 05/11/1990 ~United Press International

IRVINE, Calif. (MAY 11) UPI - American Savings Bank completed the liquidation of its $400 million junk-bond portfolio last month, a spokeswoman for the privately held thrift disclosed Friday.

Spokeswoman Dianne S. Nelson said the thrift has not determined the cost of the liquidation, but said a reported estimate of a loss of $125 million was probably ''too high.''

American, a 177-branch thrift which was acquired in late 1988 by Texas financier Robert Bass, bought the portfolio last spring and summer before Congress banned thrift ownership of junk bonds as part of the savings and loan bailout legislation. The portfolio had a peak value of $493 million, Nelson said, making American one of the largest holders of junk bonds among thrifts.

However, the junk-bond market began plunging in value late last year, prompting American to disclose in February that it had set aside $65 million in reserves for junk-bond losses in the fourth quarter. It also said at that point that the value of its portfolio had been cut to $400 million.

Nelson said most of the liquidation of the portfolio took place during the first quarter, with less than $100 million remaining in it by the end of March. The entire portfolio had been sold by the end of April, she said.

The loss from the liquidation should not cripple American, one of the nation's healthiest thrifts. It earned $214.2 million last year and met all the capital requirements for savings and loans.

American is headquarted in Stockton, Calif. and has administrative headquarters in Irvine, Calif. Its assets currently total about $16 billion.

#90131u1546 05/11/1990 ~United Press International

LOS ANGELES (MAY 11) UPI - Sammy Davis Jr. lay near death from the ravages of throat cancer in his Hollywood Hills home Friday, according to close personal friends.

''We're going to lose him,'' said entertainer Jerry Lewis, who visited the 64-year-old Davis three weeks ago and has been in daily contact with Davis's family.

''It's a matter of days or perhaps hours,'' Lewis said in an interview.

Since his release from Cedars-Sinai Medical Center in Los Angeles six weeks ago, Davis's condition has worsened steadily, confining him to his bed, said another friend who asked not to be identified.

The pencil-thin song-and-dance man, whose career spanned vaudeville, Broadway, movies and TV, has wasted away to 60 or 70 pounds and sleeps most of the time. His wife, Altovise, remains close to his bedside.

''It's very, very sad,'' said Susan Reynolds, the entertainer's publicist. ''Sammy is a terribly sick man. We don't know what more can be done.''

Earlier this week Davis's daughter, Tracy, brought her 3-week-old daughter to see her terminally ill grandfather, which brought a smile to his face, friends of the entertainer reported.

Such other friends as Frank Sinatra and actor Roger Moore also have visited their stricken friend.

Actress Shirley MacLaine, a longtime friend and the only female member of the early 1960s clan that included Davis, Frank Sinatra, Dean Martin, Peter Lawford and Joey Bishop, visited Davis Tuesday.

The visit by Jerry Lewis came three weeks ago after he completed a concert tour.

''For the last seven months I've telephoned and talked to all the people around Sammy, getting reports,'' Lewis said, ''but he delayed my visit. He didn't want me to see him in this condition.''

''Altovise said Sammy told her: 'When I think I'm going, I'll call Jerry and Frank and tell them to come.' So when I got the call from Altovise three weeks ago I felt as if the roof had fallen in.''

Lewis said he wept after seeing Davis, who worked on the comedian's national multiple sclerosis telethon last year.

''You see, Sammy did the telethon last September knowing what his prognosis was. He knew he had cancer but he was on the air for 24 hours with the New York section of the show. But he didn't tell me about his condition. He didn't want to upset me.

''I am afraid we are about to lose a wonderful man and a great

entertainer. Sammy is a treasure,'' Lewis said.

Another entertainment source said Davis was being fed intravenously and has been able to recognize visitors.

He recently received a white robe by California designer Bill Whitten with the embroidered signatures of more than 100 entertainers, and the gift brought a smile, the source said.

Davis - an actor, singer, dancer, musician, mimic, comedian, and star of Broadway, Hollywood and Las Vegas - was diagnosed as having throat cancer in the fall of 1989.

He began treatments at a Los Angeles hospital but kept up hope that he could continue with his career.

''I've undergone treatments and my doctor says it'll be a couple of months recovery and then I'll be back out there screaming and yelling,'' Davis said during a backstage interview just before a dazzling array of Hollywood stars on Nov. 14, 1989, celebrated his 60th anniversary in show business.

''I've had the pleasure of working with real giants in this industry,'' Davis said. ''It's amazing to know that you're a part of the mutual admiration society that includes talents like Michael Jackson, Frank Sinatra and Dean Martin.''

Jackson, Sinatra and Martin were among dozens of stars who turned out for the gala tribute held at the Shrine Auditorium to benefit the United Negro College Fund, a charity of which Davis is the all-time largest single contributor.

A versatile performer who described himself as ''a one-eyed Jewish Negro '' Davis literally was born into show business. The son of vaudeville dancers Elvina and Sammy Davis, he toddled onto a stage in Columbus, Ohio, when he was 18 months old.

His surprise walk-on fouled up his parents' dance number, but brought down the house.

On Nov. 11, 1954, Davis was seriously injured in a near-fatal traffic accident near San Bernardino, Calif., while en route from a club date in Las Vegas to Los Angeles, where he was to record the title song for the movie, ''Six Bridges to Cross.''

The accident cost Davis his left eye, but his courage brought sympathetic response from his fans and friends in the entertainment world, who turned out to cheer his comeback at Ciro's in Hollywood.

He was the first black performer to star in his own hourlong variety program, ''The Sammy Davis Jr. Show,'' which ran for 13 weeks on NBC-TV.

His highly publicized marriage to Swedish actress Mai Britt was one of Hollywood's first interracial marriages. It ended in divorce after eight years in 1968.

His first marriage, to singer Loray White, ended in divorce after nine months in 1958. He married Altovise Gore, lead dancer in his nightclub act on May 11, 1970.

#90131u1548 05/11/1990 ~United Press International

MANILA, PHILIPPINES (MAY 11) UPI - An explosion, possibly caused by a bomb timed to go off in flight, ripped through a Philippine Airlines jetliner Friday as it prepared for takeoff, igniting a fire and killing seven of the 120 people aboard, authorities said.

Hospital sources said at least 87 people were injured, including two in serious condition. One of the injured was Aurelio Periquet, president of the Philippine Chamber of Commerce and Industry.

Transport officials, investigating the possibility the blast was caused by a bomb, said the airliner had been delayed in taking off and more people could have been killed if the plane had been airborne when it exploded.

Aviation sources said if the blast was caused by a bomb, it apparently was timed to explode in flight.

Airport Manager Edgardo Carrascoso said the charred remains of a man, five women and a girl about 4 years old were retrieved from the burned-out wreckage of the Boeing 737, which the PAL acquired only eight months ago. All the fatalities were Filipinos.

PAL spokesman Enrique Santos said the aircraft, carrying 114 passengers and six crew, was being towed to the runway to prepare to take off at 3:25 p.m. for the central city of Iloilo when there was an explosion in the midsection of the passenger cabin.

Transport Secretary Oscar Orbos, sent by President Corazon Aquino to look into the incident, said investigators were probing the possibility that the explosion was caused by a bomb timed to go off in flight.

''That's one of the issues being addressed,'' Orbos said.

He said the Boeing 737 was delayed when the airport control tower allowed

a PAL Airbus 300 to leave ahead. ''More people could have died,'' Orbos said, if the explosion had occurred while the plane was aloft.

Air transport chief Oscar Alejandro said the aircraft would be taken to a hangar for the investigation.

Edita Abadilla, airport terminal monitoring officer, said there were no reports of bomb threats before the incident.

The blast sheared off the roof of the plane and left three gaping holes in the fuselage.

''The aircraft had just been pushed away from the terminal. It was getting ready to leave for Iloilo when there was an explosion from the plane,'' Santos said.

''The plane was engulfed by fire and thick smoke,'' the airline spokesman said. He said the crew immediately opened emergency exits and evacuated the passengers.

Sony Villareal, 30, a theater ticket clerk, said she was in seat No. 8 when she heard a ''very loud explosion'' behind her just after the stewardess had demonstrated the use of a life vest.

''I was jolted. I felt deaf. Then I saw thick smoke and flames. Bags fell from the overhead racks. Pandemonium broke out and there was a stampede for the exits,'' said Villareal. ''Some were screaming 'Lord, Lord.' Others were praying.''

Villareal suffered bruises when she leaped from the plane.

Baltazar Tancio, a Filipino worker in Saudi Arabia who had returned home for a wedding in Iloilo, suffered a broken leg. He said he was in seat No. 14 and thought the blast took place near seat No. 11 or 12.

''The explosion was so powerful it threw away the man in front of me at seat No. 13,'' Tancio said. ''He was probably severely injured.''

Most of the injured suffered burns, fractures and bruises.

On April 26, a private DC-3 cargo plane burst into flames and crashed at the suburban Fort Bonifacio army camp, killing six of the 22 people aboard.

In July 1989, a PAL plane on a domestic flight overshot the Manila airport runway, killing eight people on the ground and injuring 91 others.

BEVERLY HILLS, CA (MAY 11) UPI - Hilton Hotels Corp., recently rumored as a prospective buyer for Trump Castle Hotel & Casino in Atlantic City, may try to open a casino in New Jersey, an executive of the hotel-casino chain said Friday.

But the company is not currently in negotiations to enter the Atlantic City gaming market, said William C. Lebo Jr., Hilton's general counsel.

Barron Hilton, chairman and president, said in interviews after the company's annual meeting Thursday that it would ''consider'' buying an Atlantic City property, including the Trump Castle. ''We consider everything,'' Hilton said.

The company built the property in 1984, but state gaming officials officials rejected its application the following year because of concern about some business ties, including its relationship with reputed mob attorney Sidney Korshak.

Hilton, which had severed its ties with Korshak prior to the hearings, sold the property to New York developer Donald Trump in 1985.

If Hilton tries again to get into Atlantic City, New Jersey regulators may be more inclined to grant the company's application since several of the city's dozen casino hotels are in financial trouble.

Trump, who also owns the Trump Plaza Hotel & Casino and the $1 billion Taj Majal Hotel and Casino in Atlantic City, said recently he wants to raise cash by selling assets and refinancing properties but has indicated he is not planning to sell or refinance the casinos.

Hilton said Thursday it had recorded the highest April and four-month earnings in company history. Earnings for April were $15.5 million, or 32 cents a share, up from $14.6 million, or 30 cents a share, with the 1990 results including the traditionally slow Easter period.

For the four months ended April 30, Hilton earned $40.5 million, or 84 cents a share, up from $27.7 million, or 57 cents a share, in the 1989 period.

Two months ago, Hilton's board took the company off the sales block after bidders failed to meet the company's reported asking price of about $80 a share, or $4 billion.

The board voted a 20 percent increase in the company's quarterly dividend to 30 cents a share Thursday.

Hilton stock was up 12.5 cents at $48.25 a share in early afternoon trading Friday on the New York Stock Exchange.

#90131u1589 05/11/1990 ~United Press International

WASHINGTON (MAY 11) UPI - Officials from both large and small cities said Friday that problems continue to plague the 1990 decennial census and the count could miss 15 percent to 20 percent of the nation's population.

The officials from the U.S. Conference of Mayors' task force on the census met for a third time with key Census Bureau officials and, while welcoming the bureau's responsiveness, warned they may file a second suit challenging the final head count.

"We think this is a major political crisis," said Hulbert James, representing New York Mayor David Dinkins. "It is possible that only 80 percent of the country will be counted."

Other officials, however, said they believe the count will miss around 15 percent, significantly higher than the two percent the bureau believes were missed in 1980.

Peter Bounpane, assistant director of the Census Bureau, dismissed the concerns and said that "everything is going as anticipated." "Numbers like that are uncalled for at this time," he said.

The census is currently in the second phase of its once-a-decade, constitutionally required count of the nation's population in which census takers are sent door to door.

The census is required for congressional redistricting and for directing the flow of billions of dollars of federal money to states and local jurisdictions.

In the first phase, people were mailed census questionnaires and asked to mail them back. But the mail-back rate - about 63 percent - was significantly below the 70 percent the bureau's planned for and there were widespread reports of massive foul-ups with entire zip codes, housing developments and apartment buildings receiving no forms.

Asked about the door-to-door counting, Bounpane said, "As far as we can tell, that is going well." But James said the city officials "think there is going to be a very difficult time in doing the door-to-door census." "Its going to be very difficult to make up for the shortfall" in mailed back forms, James said.

The city officials were unmollified by Bounpane's optimism and said they were considering filing a second suit against the government challenging the 1990 census. Earlier this year, the mayors' conference and several cities reopened a suit seeking to require the government to make an adjustment for the expected undercount.

James also said the city officials will consider promoting legislation to

address questions "of what did and did not happen" in the 1990 census and how to deal with a major undercount. "The 1990-1992 redistricting (of the House) cannot take place without a full count," James said.

James said the task force also wants a meeting with Secretary of Commerce Robert Mosbacher, whose department oversees the census bureau, to raise its concerns with him. In the past, Commerce has opposed making any adjustment in census figures to account for a suspected undercount.

#90131u1590 05/11/1990 ~United Press International

NAIROBI, KENYA (MAY 11) UPI - Southern Sudanese rebels said Friday they had cut government access to the White Nile at a point 370 miles south of Khartoum.

A clandestine broadcast by the Sudanese People's Liberation Army, monitored in Nairobi, said its forces seized the important garrison town of Melout and its outskirts on Thursday and were now in firm control.

The town's seizure would mean government forces had no river access to their key military center at Malakal, 420 miles south of the capital. There was no government confirmation.

The assault on Melout began Wednesday, the radio said.

''The garrison has been wiped out and the remnants are being mopped up. The lucky remnants fled towards Kaka,'' about 12 miles north of Melout on the opposite, west bank of the Nile, the radio said.

''The fall of Melout is important to us because we now control river transport, having cut off Malakal. All army steamboats moving on the Nile must obtain SPLA clearance,'' it added.

The SPLA, a predominantly black African, Christian, southern rebel group has claimed seizure of over 20 garrisons and outposts since January this year. It has fought for control of southern Sudan against the Islamic north since 1983.

The radio gave no details of casualties in the fight for Melout, but said its forces were now advancing round a loop in the Nile towards Kaka.

MANILA, PHILIPPINES (MAY 11) UPI - Police swinging truncheons beat up students attempting to hold a rally at the U.S. Embassy Friday to demand the dismantling of U.S. military bases in the Philippines.

Exploratory talks on the bases issue begin next week.

Police said about 70 students screaming ''oust U.S. bases'' clashed with several dozen riot police guarding the embassy gate, forcing the lawmen to disperse the youths.

Two student leaders were arrested.

As night fell, the students roamed a downtown Espana street near Corazon Aquino's presidential palace, burning several used tires and causing a massive traffic jam at the evening rush hour.

The Philippines and the United States will open exploratory talks on Monday on the future of six American facilities in the Philippines, including the huge Clark Air Base and Subic Bay Naval Base.

The lease on the facilities is due to expire in September 1991.

''The talks are just a sham,'' said student leader Nelson Padilla. ''We will do everything to disrupt it.''

Police have been placed on alert for the talks, to be held at the Central Bank building on Manila Bay.

U.S. special negotiator Richard Armitage, a former assistant secretary of defense, is due to arrive during the weekend. The talks should last about a week, a Philippine spokesman said.

#90131u1605 05/11/1990 ~United Press International

WASHINGTON (MAY 11) UPI - FBI Director William Sessions, whose agency has come under fire from a number of minority employees, said Friday he does not want the public to see the FBI as ''a racist or discriminatory organization.''

Several black and Hispanic FBI employees have made accusations of discrimination against the agency, which is charged with enforcing the nation's civil rights laws.

Sessions told reporters he has made many changes at the FBI and is investigating the reported harassment of agents and other workers.

To recruit minority employees, the FBI must ''be perceived as a good place to work,'' Sessions said.

''The American people can't perceive us as a racist or discriminatory

organization,'' he said.

''No, I'm not profoundly embarrassed (by the allegations),'' Sessions said. ''We've made tremendous numbers of changes.''

He said the agency has diligently reviewed language programs and all facets of recruitment and training at the FBI.

Sessions said he dispatched his top equal employment opportunity aide to San Juan, Puerto Rico, on Friday as part of an effort to give ''direct and immediate'' attention to FBI offices with a large number of Hispanic agents.

A federal judge in El Paso, Texas, ruled in 1988 that the FBI was guilty of systemic discrimination against Hispanic agents and must promote them. Since then, a number of agents who participated in the suit said they have been punished in retaliation.

Several former and current FBI employees recently told a House Judiciary subcommittee that institutional discrimination by the FBI has gotten worse since the class-action lawsuit in Texas. A number of black agents have filed lawsuits against the agency.

On other subjects, Sessions said:

-The FBI is making ''significant progress steadily'' in its investigation of package bombings in the South. The case involves four mail bombings. One killed a federal judge, another a civil rights worker.

-That despite changes in Eastern Europe, the FBI must remain vigilent to counter scientific and technical spying by foreign agents. Soviet and Eastern bloc agents continue to try to recruit Americans for spying, he said. He gave no examples.

-That he reviewed a videotape of an FBI ''sting'' operation that led to cocaine charges against Washingotn Mayor Marion Barry. He refused to provide any details of the tape and would not discuss the investigation.

-The FBI is investigating 40 percent of the drug trafficking organizations it has identified but does not have the resources to investigate the other 60 percent.

-''We will successfully complete our investigation'' of the December 1988 bombing of Pan American World Airways Flight 103 over Lockerbie, Scotland.

#90131u1614 05/11/1990 ~United Press International

DALLAS (MAY 11) UPI - The nation's first extensive AIDS-virus field study indicates the deadly virus may be far less common than previously estimated in some communities, federal health officials reported Friday.

''We have a much clearer picture of AIDS,'' said Dr. Jacob Gayle, special assistant to the HIV survey programs with the Centers for Disease Control. ''We certainly recognize the weaknesses of extrapolating national figures on a specific locale. Dallas confirms our lower back-estimates of HIV incidence.''

Based on trends in reported AIDS cases, Dallas County was projected to have between 5,600 and 16,000 adults infected with human immunodeficiency virus, or HIV, the virus which causes AIDS. The field survey instead projected between 4,000 and 7,500 cases.

''We're happy for the lower figures,'' said Dr. Charles Haley, county epidemiologist. ''But we stress that these numbers represent real people. While 4,000 is less than 16,000, it still is a lot of people and still overwhelms our health service system.''

The Dallas survey, which builds on a smaller pilot program in suburban Pittsburgh, was designed to test the reliability of a planned nationwide canvass - a three-year, $5 million campaign - to check for the actual incidence of the AIDS virus.

The planned campaign has been criticized by gay rights activists, who say the money would be better spent providing services to existing AIDS patients.

''We were surprised and disappointed,'' said Warren Buckingham, executive director of the Dallas AIDS Arms network. ''We're worried this kind of government study will cause people to forget about the problem.''

William Waybourn, president of the Dallas Gay Alliance, called the survey - which required anonymous blood samples and asked a series of highly personal lifestyle questions - ''an affront to human dignity, a joke and a waste of money.''

But Dr. Peter Hurley, CDC project officer, said the study was essential in fine-tuning methods of confidentiality.

''We learned it is possible to create a cooperative environment in which to conduct such a survey,'' he said. ''We also developed perhaps the most rigorous protocol imaginable to insure confidentiality.''

The field study examined 1,446 respondents screened from a total of 2,132 households, Hurley said.

Individual addresses were separated from blood samples and never entered into a computer database, he said. All hard-copy documents with personal information were destroyed after data tabulation, he said.

''We were after the numbers, not the people,'' he said.

He noted the survey did not include the homeless or those in institutions. He said more than 300 people refused to participate, but that adjustments were made to compensate for potential distortions or biases. Each participant was paid $50.

The most frequently reported risk factors for HIV infection were male-to-male sex, 8 percent; male receptive anal intercourse, 4 percent; shared needles, 2 percent; sexual contact with high-risk persons, 16 percent. But the majority of respondents did not indicate any risk factors on the questionnaire.

Seven percent of the males and 2 percent of the females reported five or more sexual partners in the past 12 months.

''Having a good field test is a necessary first step in determining the feasibility of a national survey,'' said Hurley. ''It's essential we have some hard and accurate numbers. We must know the extent of the epidemic in order to fight it.''

#90131u1629 05/11/1990 ~United Press International

KANSAS CITY, MO (MAY 11) UPI - An auction company Friday offered a preview of property to be sold next week by bankrupt Braniff Inc. in the first of three auctions.

Representatives of major airlines and courier services inspected more than 500 pieces of mobile ground equipment parked on a lot at Kansas City International Airport, from which Braniff operated hub air service before filing for protection from creditors last September.

The ground equipment and Braniff's 29,000-square-foot reservations center at the airport will be sold at auction Tuesday in Kansas City as part of a U.S.Bankruptcy Court-ordered liquidation of the airline's assets.

Office equipment, furniture, computers and a Boeing 737-200 jet will be sold May 17 in Orlando, Fla., site of Braniff's other hub and company headquarters, and May 22 in Dallas. Previews also were held Friday in those cities.

Appraisers said the property would be worth about $10 million if purchased new, a factor expected to attract major airlines to the series of auctions.

Another draw for airlines is the fact they could take possession of the equipment immediately, said Brian Hayes, auction coordinator for Rabin Brothers Auctioneers & Appraisers, of San Francisco.

''Take that push tractor there,'' he said, pointing to a machine used to move aircraft away from jetways, ''and you'd wait a year for it if you ordered it. You could buy it here on Tuesday and pick it up Wednesday and go to work.''

Much of the equipment offered by Braniff was purchased in the late 1980s as part of a major upgrade at the airline. Among other items, some push tractors, tuggers and de-icers were purchased last year, said auction coordinator Charles Becker.

Larry McNurlin, manager of maintenance equipment for Minneapolis-based Northwest Airlines, said that most of the equipment was in ''very good'' condition but that a few pieces were old. McNurlin said he was interested in push tractors and de-icing equipment.

Longtime Braniff employee Jay Barnhart, formerly manager of ramp services for the airline in Kansas City, helped Rabin Brothers prepare for the operation.

Barnhart, who joined the original Braniff in 1951 and remained with the airline through two bankruptcies, was philosophical as the auction approached.

''I guess it's reality,'' he said. ''It has to happen.''

Braniff, which ceased operations last November, is operating with a skeleton staff under Chapter 11 of the federal bankruptcy code.

The airline's trademark, flight certificates and other items were sold last month for $313,000 to BN Air Inc., a New York company controlled by former Braniff vice president Jeffrey Chodorow. BN has said it hopes to operate a new Braniff by late summer.

#90131u1638 05/11/1990 ~United Press International

WASHINGTON (MAY 11) UPI - Faced with a significant chance of another space shuttle disaster within the next few years, a government report Friday urgently recommended that steps be taken to help upgrade the nation's spacecraft fleet.

"A national dialogue is urgently needed to establish the future course of the publicly supported space program and to outline the preferred means of

accomplishing the program goals," said the Office of Technology Assessment report, "Access to Space: The Future of U.S. Space Transportation Systems."

"The lack of a clear course for U.S. space activities makes the scale and character of future demand for space transportation highly uncertain," the 92-page report states. "It is not sensible to choose among space transportation options without first selecting the specific goals to be served."

The space program has made major strides toward recovering from the Challenger explosion but is at a critical point for planning for the future, said OTA project director Ray Williamson at a news conference. "We still have a long way to go in order to have reliable, operable and resilient launch systems," said Williamson.

Congress must choose among a variety of options in deciding which space programs to fund, depending on which objectives the nation decides to pursue. Proposals to build the space station Freedom, for example, will probably require more space shuttles, a crew rescue vehicle and perhaps a crewless space shuttle for cargo known as "Shuttle C," said Williamson.

The current space shuttle fleet is only 97 percent to 99 percent reliable, meaning there is a 50-50 chance one of the nation's three existing space shuttles will be destroyed in the next three to four years, he said.

Because of the risk, Congress may consider buying "one or more" new shuttles - at about $2 billion apiece - and limiting the number of shuttle missions to eight to ten each year - instead of NASA's goal of 14, the report states.

A variety of options are also under consideration to meet increased needs created by new initiatives, such as proposals to establish a base on the moon and explore Mars, the report said.

Such initiatives could require developing an "aerospace plane" and other new systems, including those that are more reliable and less expensive, Williamson said.

Greater international cooperation with the Europeans, Japanese, and Soviets could aid such development and supplement the U.S. space fleet, the report said.

Since development of such systems must begin about a decade before they are needed, advance planning is critical, the report said. "The lack of clear goals for U.S. space activities has made it next to impossible to choose among space transportation options," said Williamson.

President Bush, who already has proposed to have a space station

operational by the end of the century, a permanent lunar base and a manned expedition to Mars, Friday predicted an American flag would be planted on Mars within 30 years.

"Today, we're no longer just asking for the moon. We've been there. We're looking futher, to carry the American adventure to wherever opportunity, curiosity, and need will take us," Bush said in a commencement address at Texas A&I University in Kingsville, Texas,

In a speech reminiscent of John Kennedy's promise in a May 25, 1961, address to land people on the moon, Bush declared, "We stand at a halfway point in our exploration of the immediate solar system. ... Thirty years ago, NASA was founded and the space race began. And 30 years from now I believe Man will stand on another planet.

"And so I am pleased to return to Texas today to announce a new Age of Exploration, with not only a goal but also a timetable: I believe that before Apollo celebrates the 50th anniversary of its landing on the moon - the American flag should be planted on Mars."

The OTA report was prepared at the request of the Senate Committee on Commerce, Science, and Transportation and the House Committee on Science, Space, and Technology.

"This nation stands at a crossroads in its civil space program," said Rep. Robert Roe, D-N.J., chairman of the House Science, Space and Technology Committee.

"I believe that we should take the high road - complete the space station Freedom on schedule and then begin to reach out beyond our planet to explore the moon and Mars, and eventually begin to use these new frontiers for both scientific and economic gain," he said.

#90131u1664 05/11/1990 ~United Press International

ALBANY, NY (MAY 11) UPI - Gov. Mario Cuomo Friday offered a first glimpse into his proposals to establish a Mohawk peace-keeping force on the strife-torn St. Regis Indian Reservation, where two Mohawks died in gun battles 10 days ago.

Providing scanty details, Cuomo told a news conference his proposals cover training, financing, qualifications and the possible establishment of a Mohawk system of justice.

The governor also tried to quell fears that violence would again erupt as soon as State Police pulled out from the reservation, which lies on both sides of the U.S.-Canadian border near Massena.

''I will have them there as long as it is necessary,'' he said. ''All of us agree the State Police ought not to be there forever.''

Cuomo did not indicate whether he would remove State Police before the Indians can establish their own police force.

The Mohawks already have a tiny 14-man police force on the Canadian side of the reservation that had been overwhelmed in manpower and firepower by the Warrior Society, a group that has consistently sided with casino owners in the civil war over gambling.

Two Indians were killed on the Canadian side of the reservation May 1 in an overnight gunbattle related to that long-simmering controversy.

Cuomo said it would be up for discussion whether a reservation force would be exclusively comprised of Indians and whether such a force would be phased in to gradually take over the duties of the State Police, Cuomo said.

He also said it remains to be hashed out how much an indigenous police force would be paid.

Cuomo said he would leave it to the Mohawks to decide whether their force would be governed by an entirely separate Indian code or by state law, but added ''there will be no police force unless the Indian community wants it and support it.''

The governor also said he has agreed to meet with various Indian chiefs other than the three who administer the New York Tribal Council.

Gambling opponents on the reservation had long complained that Cuomo had turned a deaf ear to the hereditary chiefs who exert a lot of influence on the reservation.

Declining to name specific chiefs, Cuomo would only say ''they said they wanted to meet me, and I said okay.''

#90131u1682 05/11/1990 ~United Press International

LOS ANGELES (MAY 11) UPI - Paroled ''Onion Field'' cop killer Jimmy Lee Smith has been sentenced to six months in County Jail after pleading no contest to a misdemeanor drug charge, court officials said Friday.

Smith, 59, of Van Nuys, was sentenced Thursday after entering his plea to a charge of being under the influence of heroin.

Parole officials said the no-contest plea will likely result in Smith being found in violation of parole and being sent back to state prison for up to one year. A parole violation hearing is pending.

Smith was charged with the misdemeanor drug count following his arrest May 1 for allegedly trying to stab a Van Nuys man, Dana Ruvolo, 37, a friend of Smith's ex-girlfriend, Marcia Peltier, 49.

The District Attorney's Office, however, declined to file felony assault charge against Smith because of insufficient evidence. The City Attorney's Office went ahead and charged Smith with the drug count.

Smith has been arrested several times, mostly for drug-related offenses, since he was initially paroled in February 1982 after serving 19 years in state prison for the March 1963 slaying of Los Angeles police officer Ian Campbell in an onion field south of Bakersfield.

Smith and Gregory Powell, the actual triggerman, were convicted of abducting Campbell and his partner, Karl Hettinger, and driving them to the onion field where Campbell was slain. Hettinger escaped. Powell, who has never been paroled, remains in prison.

The case was detailed in the book ''The Onion Field,'' by author Joseph Wambaugh, a former Los Angeles police officer.

#90131u1707 05/11/1990 ~United Press International

DETROIT (MAY 11) UPI - The growing importance of used cars as a means of bolstering new car dealers' profits has prompted a California automotive marketing firm to initiate its first customer satisfaction ratings on previously owned cars.

J.D. Power & Associates, in its May report issued Friday, said the initial findings, based on a survey of 5,000 owners of 1988-model cars, closely resembled those for the firm's 1989 new car owner satisfaction studies in the top spots.

While there was virtually no difference between overall initial quality and reliability ratings in the two studies, used car buyers seemed to be far less satisfied with their dealership service and customer handling, the Agoura Hills, Calif., researchers noted.

However, while used car buyers' shopping and financing habits are similar, Power's studies also showed they perceived they may have saved as much as $3,700 over the cost of a new car.

Honda's Acura division took first place in Power's 1990 Pre-Owned Customer Satisfaction Index (CSI) ranking, just like in the new car study. Acura was followed by the Honda brand itself, which ranked third in Power's new car study for 1989.

The Toyota, Cadillac and Nissan nameplates - which ranked fourth, fifth and sixth, respectively, in the new car study - tied for third place in the latest report.

But there were some twists further down the list. Mercedes-Benz, which placed second in Power's ranking of new cars last year, came in seventh in the used car study, losing points in repair and reliability measures as well as in customer handling.

Three domestic namplates - Oldsmobile, Dodge and Chrysler - increased their scores in the used car study when compared with the new car study, in which all three ranked below average.

Oldsmobile tied with Nissan for sixth place in the used car study, on thestrengths of vehicle repair and reliability, Power noted. Dodge tied for seventh with Mercedes and Buick on merits in customer handling, while Chrysler managed an 11th place finish in the study because of strong scores in vehicle repair and reliability.

Power said used cars should be viewed as being in competition with new cars because nearly 60 percent of late-model used car shoppers look at new vehicles as well.

Used cars are also seen as a major source of additional profits for car dealers, especially in light of very thin sales margins on new models, the marketers said. They are also often available at lower costs through auctionsand are accounting for a larger percent of overall dealer sales.

Industry sales analysts noted the Power study concentrates more on satisfaction with the dealer and service than on merits of the product itself.

#90131u1715 05/11/1990 ~United Press International
ATHENS, GREECE (MAY 11) UPI - Police scuffled with left-wing demonstrators Friday protesting a visit to Greece by South African President Federick de Klerk.

The South African chief, who arrived early Friday, talked with President Constantine Karamanlis and conservative Prime Minister Constantine Mitsotakis before the violence broke out in central Athens.

Left-wing groups who assembled at the Athens University to protest de Klerk's visit, marched to the Parliament building in the center of the capital, where police scuffled with them. There were no reports of injuries.

The protesters, made up mainly of the youth branches of the Greek Communist Party and the Pan-Hellenic Socialist Movement, said de Klerk should not have been invited to Greece while South Africa still followed a policy of apartheid.

The South African president said his government had launched an irreversible process to abolish racial separation.

''An irreversible process has begun in South Africa,'' he told journalists. ''A new reality affecting our country and the region has come into being,'' he said.

Mitsotakis told reporters he welcomed what he described as positive steps taken in South Africa recently to eradicate apartheid.

De Klerk was the first head of state to visit Athens since the conservative New Democracy party came to power after winning the general elections last month, and the leftists said his arrival may indicate the direction in which Greek foreign policy was heading.

De Klerk flew to Athens from France in a continuation of his nine-nation European tour. In Paris, he was welcomed Thursday with all the pomp and ceremony afforded a head of state.

Republican guards wearing silver breastplates and plumed helmets lined the

courtyard of the Elysee Palace as the Socialist President Francois Mitterrand came out on the steps to welcome the reforming South African politician.

''Just the fact that I met with them shows a recognition of the change under way in South Africa,'' de Klerk told a news conference after an hour of talks with Mitterrand at the Elysee Palace and a separate session with Prime Minister Michel Rocard.

''There is no turning back,'' de Klerk said after the meeting with Mitterrand. ''South Africa will get a constitution that is fair to all South Africans. It will not be racialist and it cannot be discriminatory in any way.''

De Klerk said he won no promises from Mitterrand on rolling back sanctions against Pretoria but that it would have been unrealistic to expect any unilateral moves in that direction.

''I did not come here with my hat in my hand,'' he said. ''It was my impression that there is a realization that the situation in South Africa has developed to such an extent that the question of sanctions should be dealt with but that this must be in the European context.''

France has made it clear it will only reduce sanctions in concert with all 12 European Community members.

ONTARIO, Calif. (MAY 11) UPI - Negotiators for Lockheed Corp. and 935 striking workers at three Southern California aircraft service plants have reached a tentative agreement on a new contract, spokesmen for both sides said Friday.

The three-year wage and benefit offer will be submitted to members of the Local Lodge 821 of the International Association of Machinists for a ratification vote Saturday, Lockheed spokesman Al Dubiel said.

Machinists at the Lockheed Aircraft Service Corp. plants in Chino, Ontario and Upland went on strike on March 12 after rejecting a contract offer that they regarded as inferior to a three-year pact that had been accepted by 18,000 machinists at Lockheed plants in Southern California and Georgia.

The two sides went back to the bargaining table two weeks ago at the urging of federal mediator Phyllis Cayse. Lockheed officials had said that it could not afford to match the offer to the other machinists because the Aircraft Service plants are not production facilities.

Union spokesman Tom Hurd said the two side have agreed to a $2,000 signing bonus and a 5 percent bonus during the fist year. Some workers will receive a 3 percent wage increase during the second and third years, while others will receive bonuses amounting to 5 percent of their salaries during that period, Hurd said.

(MAY 11) UPI - One passenger says pandemonium broke out after an explosion that sparked a fire and tore off the roof of a Philippine Airlines jetliner today in Manila. Seven people were killed and at least 87 others were injured in the blast, which came as the plane was preparing for takeoff from Manila.

President Bush acted like a good poker player today when questioned about next week's budget talks and his stand on higher taxes. Bush told reporters- as he put it- ''I'm NOT going to show you my hand.'' But the president did say- quoting again- ''we've got to do something'' to reduce the nation's deficit.

Authorities say the strain of surging floodwaters are causing levees along the Red River in Texas and Arkansas to turn ''soft and mushy.'' Texas Governor Bill Clements is to inspect a levee along the Red River this afternoon and fly over the flooding Trinity River. The river's leading edge is said to be six to 10 miles wide as it pushes toward Lake Livingston in southeast Texas.

America's corporate leaders were told today that the chances of a recession in 1990 and 1991 are slim and that the economy will grow slowly. The high-powered members of the Business Council agreed that the economy is fragile, but they expressed guarded optimism at the forecast presented today by corporate analysts in Hot Springs, Virginia.

The leader of a French anti-immigration party says his National Front had

nothing to do with the desecration of a Jewish cemetery in southern France. Right-wing extremist Jean-Marie Le Pen blames what he termed ''professional provocateurs'' for smashing 34 tombstones and mutilating a corpse.
